The Investors' Review.

To our Readers.

SOME few words seem in place as to the aims embodied in this new weekly financial paper. For a long time back the Editor's friends have told him that there was room for such a paper, and he now puts their opinions to the test of experience. All along the publication of a magazine only once a month has been hampering and unsatisfactory. No possible effort could prevent some portion of the criticisms thus tardily produced from being behind the times. Many things had to be allowed to pass unnoticed, and readers appeared, in consequence, so distant at times to the writers that the effect was similar to speaking in an empty chamber. In the weekly INVESTORS' REVIEW writers and readers will at least be nearer to each other, and blows aimed at living impostures will fall less frequently on carcases already dead.

THE chief purpose of the REVIEW is not warfare with any class or political creed, but to be a storehouse of facts; facts about trade, about industry, about man's conquests over Nature; facts first and everywhere—inferences from facts afterwards. To the test of reality we shall always desire to bring the opinions expressed. Nothing shall be wilfully misrepresented in these columns, nothing set down from sinister motive; and if we err, as must now and then happen with the best intentions, the error shall always be frankly acknowledged.

ONE thing we beg readers not to do—they should not judge by the first number, nor look in it for all the things we hope in time to accomplish. A first number is always the hardest of all to put before the world. Everything is new; the machinery, as it were, has no

yet been worked smooth at the joints. Some things bulk too largely, others are treated with insufficient breadth; there will be omissions and perhaps redundencies, but with time defects will be overcome if diligence and the desire to work always towards perfection count for anything in this world.

One object has always been before us, and that is, to supply people who do not live in London with information which should be useful to them in dealing with their money. The Review has never been produced merely for the benefit of the crowd in Throgmorton-street, and to a considerable extent experience has justified the efforts made to give it a wider scope. There is no part of the civilised world into which the monthly Investors' Review did not go. To tell the truth about financial operations and schemes is often neither pleasant nor profitable, but we determined, when we began, to do this as far as in us lay, and readers may depend upon it that we shall not slacken in the endeavour now. Criticism is not always pleasant, and frequently those it is meant to benefit are the first to resent it. Holders of shares bought at fictitious prices do not relish being told that their possessions are not worth the money given for them. Sometimes the criticisms may come too late to save the public from serious loss, and that we cannot help, for if a security is bad to begin with no amount of analysis or denunciation can set it right. A good deal, however, of the criticism hitherto given in this Review—in fact, we may say the bulk of it—has been directed to make things better, not to destroy. Few securities are so good as to have no point at which they can be improved; even Consols, perfect as they are, the most substantial security in the world, may be bought too dear. And if we see a Government pursuing a policy, through its Sinking Fund and Savings Bank investments, which tends to force the price up artificially, surely it is in the interests of the investing public to attack that policy, especially if it not only involves loss to individual investors, but likewise large ultimate deficits in the public accounts, which the nation will have to make good.

Looked at in this humbler, matter-of-fact aspect the attitude of this Review is that of the doubtist who stands in the market. No bent is more constant on the Stock Exchange than the tendency to send prices up and up always, to unattainable heights. The man in the market is nearly always over-sanguine. When he sees a stock rising in price, his imagination catches fire and discovers heights to be reached which no ordinary mortal can behold. We stand against this tendency—between the man who means to buy and the market which wants to sell. To call us mere pessimists for taking up this attitude is not to exhibit gratitude, but that cannot be helped in these days. We know very well from a long experience that people who may at first denounce will, by-and-bye, be ready to commend. When this Review was originally started and began to prick the bubbles of finance brought into being before the crisis of November, 1890, many correspondents, in writing to express their gratitude for the light it then began to throw into the dark places of company-mongering, declared that if they had only been privileged to read our exposures before the crisis broke out they would have been saved from serious losses. Our attitude is precisely the same now as it was six years ago, but the gratitude has not of late been so abundantly expressed. People have forgotten the severe lessons of the Baring crisis and its sequels. Many glamours of finance have again come over them and fired their imaginations with hopes of easy gain. But it will not be for long. The elements which go to produce a crisis have been accumulating fast during the last two or three years, and it would not surprise us if before the century closes the country should stand face to face with a far more destructive credit storm than that which was so threatening seven years back. Onlookers, it should not be forgotten, see most of every game, and the Investors' Review is merely an onlooker. Its conductors join not in the play.

It will be obvious that the Review differs very considerably in its new shape from the monthly one, and that it is now largely occupied with tables of figures and price lists of securities. In this, however, it in some measure but reverts to its original form as a quarterly to which was appended the entire stock exchange list, and the intention has always been to make this publication a medium of information about prices. The list which had to be dropped in the Review was resuscitated in the quarterly index, which is still good. In laying down the lines of the weekly paper the choice lay between again making the attempt to present its subscribers with a complete weekly list of Stock Exchange prices and the easier, much more profitable, and far less troublesome business of filling so many pages a week with reports of company meetings. We had little hesitation in choosing.

Reports of meetings have mostly ceased to be independent so far as the weekly Press is concerned, and have sunk to the position of advertisements paid for on a more or less high scale. Editors of financial papers who admit such reports, placing them amongst the editorial matter without the slightest indication that they are mere advertisements, appear to us to surrender their independence in more ways than one. To begin with, the board of the most trumpery company in existence which chooses to spend the money of its shareholders in paying five, ten, or twenty guineas to each one of so many papers in order to have an official report of a shareholders' meeting published as editorial matter can dictate what shall be inserted, thus depriving an editor of the power to say what and what shall not be laid before his readers. Then undoubtedly such official reports act as a gag upon criticism, and payment for their publication as editorial matter is often a mere bribe. They also frequently prevent any ventilation of shareholders' grievances by omitting everything unpleasant to directors.

No reports of this description will ever be published in the Investors' Review. If a board of directors deems it expedient to advertise in its columns an official version of a shareholders' meeting such version must appear in its proper place, among our advertisements. But although shut to official matter of this kind, published as though under our responsibility, the editorial columns will always be open to the ventilation of genuine grievances, impartially, and without any attempt to favour one side more than another.

It will be obvious that the attempt to conduct a weekly paper on these lines is a somewhat arduous one

and perfection in the arrangements of details, or in the order and mass of information presented, is not to be attained in one month or in six. We may lay down the lines upon which it is the intention to work, but the design has to be filled slowly in bit by bit. Perfection can only be attained, if it is ever attained, after long and patient labour. But readers may be assured that there will be no slackening in the effort to attain something approaching perfection, and if they will not only bear with shortcomings only too visible at the outset, but at the same time help us with suggestions, criticisms, new information, hints of any practical kind, they will earn our gratitude.

Economic and Financial Notes and Correspondence.

HOME AFFAIRS.

The Revenue for the last quarter of the year was good, and Sir Michael Hicks-Beach will again have a surplus to deal with. It may be one million and might be two. Looking at the Imperial portion of the Revenue alone, it might seem that the nation had tired a little of drinking, for the Customs dropped a little compared with the previous year, but that may be tea or coffee. There is no need to fear the future in this respect while the Excise returns continue to flourish, and they have flourished amazingly in the past year. On the gross Revenue, which includes the doles given to local spending bodies, the increase was £630,000. Taking the gross income from all sources the entire gain for the nine months has been £2,378,000, of which about one million goes to swell the local authorities' portion and £1,400,000 is retained by the Treasury. What will the Government do with the probable surplus? Remit taxation? We may be sure it will not do that. All the money will be spent and much more, and in all probability the next great change in the burden of the taxes will be another penny added to the income tax.

Or shall we have a brand new Customs tariff on the "reciprocity" or *Zollverein* system, so beautifully exemplified by Canada, which, out of her love of the "flag" and of us, generously permits British goods to bear import duties on an average 4 per cent. higher than those of the United States—40 per cent. against 36? Some day we might rise to the height of such generosity.

The *Star*, which has distinguished itself by exposing the evil deeds of the American monopolists who have acquired the control of the petroleum oil trade, announced a week ago that the Rothschilds had entered into competition with the Rockefellers with Russian oil whose flash point is 103 deg. This is good news, which should be made a note of and acted upon by every householder. It has been a scandal that the law of the land has allowed people, especially the poor, to be murdered throughout the country, or maimed and disfigured for life, every day in the week by explosions of the "low flash" oil supplied by the American monopolist. This new Russian oil which Messrs. Rothschild and their partners are introducing in England is to be known as the "Anchor" Oil, and will be sold at the same price as the abominable trash foisted upon us from the United States. In all probability the Americans will not allow this new oil to get upon the market without a more or less prolonged fight, which will involve very heavy losses to their competitors. It would be a great shame if the British public sat passive in this contest. They ought to help those who are seeking to supply them with an article as safe as water, so far as any risk of explosion is concerned. And the way to help is to imitate the tactics of the American town of Columbus, Miss. Its people boycotted the Rockefeller gang. We should refuse, absolutely, to take anything from the oilman except this "Anchor" oil. If the British consumer does this, there will be an end of the pernicious monopoly which is responsible for such a multitude of deaths here every year.

On Monday last the re-organisation plan of the Trustees, Executors, &c., Corporation, Limited, was duly carried. It excited much discontent among shareholders, and is strikingly unjust, but as a matter of course it was carried. Opposition by shareholders never seems able to organise itself. Many a time have we tried to work up something like unity and strength among the discontented, but never remember a case in which we really succeeded. On the face of it this scheme is bad, were it for no other reason than that it perpetuates the founders' share abomination, giving to five new founders' shares of £10 each one-eighth of the net profits after 10 per cent. has been paid on the ordinary shares, from which £4. 10s. has been written off as completely lost. Half the reserve formed under sub-section "A" of clause 7 of the memorandum of association also goes to these five founders' shares. In the matter of dividends, we do not suppose the founders' shares will ever be worth anything, but in the event of winding-up, which is as likely as not to be the ultimate fate of this wretched concern, their holders might come in for a substantial amount. However it is no use bewailing; the thing is done, and the fruits of it will remain with those who did it.

It was stated the other day by some semi-official authority or other that the despatch of British troops to "stiffen" the Egyptian force in the Soudan "meant nothing." It was surely not complimentary to Sir H. Kitchener to assert that he had asked for the help of three or four British battalions when he "meant nothing." Of course he had a meaning, and the events of the week have shown that it is probably a much more important meaning than was, at first suspected. The first explanation was that the Sirdar anticipated a Dervish attack on his position at Berber. The Dervishes have not yet made a movement towards it; but, of course, they may do so at any moment; and if they do go, and are defeated, as they must be, then for some reason, not explained, we may "make a rush" for Khartoum. Perhaps, however, the latter place is the real aim of the "stiffened" expedition. Letters from members of the French Marchand expedition have this week been published, much to the chagrin of the *Temps*, who thinks the publication only serviceable to the enemies of France, and go to show that the primary object of that mysterious expedition was to checkmate England on the Nile. It may even have had instructions to go on to Khartoum; but, whether so instructed or not, it is not impossible that Sir H. Kitchener wishes to get there as soon as possible to wait and to watch for that mysterious French expedi-

tion, which is now believed to be nearing the sources of the Nile. What France desires by going there, and whether England is anxious to forestall her aims, are matters on which we must wait for further enlightenment. These are times of secrecy and mystery.

Our Consul-General in Norway, in his report on the trade of 1896 in that small but steadily progressive community, preaches another little sermon on the stiff-necked character of the British merchant in his dealings with his foreign customers. He likes their custom, but does nothing to attract it, and a good deal to repel it. The consequence is that even Norwegians, who in general rather prefer Englishmen, are being driven to deal with Germans, Frenchmen, Belgians, and Dutchmen. In grain, for example, groceries, textiles, hair, skins, manufactured wooden goods, various vegetable products, paper, and manufactured mineral goods, England is already behind Germany to the extent of about a million and a half sterling. France, Belgium, and Holland are also ahead of us in many things. It is the old and now too familiar story. Our foreign rivals study the wants of their customers; we do not. They have their commercial travellers scouring the country for orders. English merchants seem content with inundating the British Consulate with catalogues and price lists, and probably are surprised that Norwegian dealers never see them. Why should they go to the British Consulate for English catalogues or price lists, when they find foreign commercial travellers bringing their catalogues and price lists to the Norwegian traders' doors—all made up, too, in decimal and metric figures, while John Bull scorns to diverge from his pound sterling and his pound avoirdupois?

Indications are daily accumulating of the evil influence the engineering dispute is having upon trade. A twelvemonth ago shipbuilders rejoiced in the fact that they had sufficient orders booked to keep them going for a year. Orders are still numerous, but they cannot be executed. Vessels which should have been delivered months ago are still unfinished, and will remain so until the wilful engineers return to work. The copper statistics for December indicate dulness, while there would assuredly have been considerable briskness but for the incubus of the lock-out. Worse than all, perhaps, is the report that a Glasgow iron-foundry, which employs about 2,500 hands in the making of locomotive and other engines, is about to transfer its works to Belgium. There can be little doubt that other firms will follow this example if this deplorable dispute is prolonged much further. If they would take the agitators with them we should be glad.

The following letter on the subject deserves to be carefully read:—

Sir,—Can you find space for a few lines in your Review on the engineering dispute, from one who has carefully read and materially profited by every number of the Investors' Review which has been issued since it started as a quarterly, and who now hails it as a weekly, and wishes it a prosperous career? During the past six months I have had many conversations with members of the Masters' Federation, and of the Amalgamated Society of Engineers, and I am astonished that, with the reciprocal feelings of goodwill expressed by each towards the other, this war has continued so long. Some of the men in London who are now working eight hours have told me that they would rather work the nine hours and not rouse up their homes so early in the morning to make a breakfast, which has to last them until dinner-time, six hours later, when they feel faint and worn out. If this sentiment is general, why has it not made itself felt at the recent ballot of the men? Simply because a large proportion of the men are confused as to what they are fighting for, and many others have not the courage to vote against the policy of their union, which forms the staple conversation in train, tram, public-house, and club-room, led by their younger and more militant members. A quiet chat at home by their own firesides proves that they do not believe that the masters wish to "smash" their union, and as for the eight hours, as one man expressed it, "he was a poor specimen who could not work nine." As we all know, a week consists of seven days of twenty-four hours each. Surely no man in average health could be injured by working fifty-six hours out of 168, leaving a balance of 112 for rest and recreation, one hour's work for two hours' rest. When Mr. Barnes speaks of fifty-six hours a week being too long, owing to the "intensity of the work," he may not be aware that not half of the members of his society, taking all the year round, work more than forty-eight hours a week. How few men in an engineering establishment make a full week's wages, and how many are marked in the wages-book as bad time-keepers? A London employer, who, much against his will, had to concede the eight hours, informed me a few days ago that for the first fortnight after the change his workmen almost to a man were in their places when the engine started in the morning; now they had reverted back to the old state of affairs, and instead of making forty-eight hours, they were making forty-four and forty-six hours a week. The masters cannot allow sentiment to guide them in a matter which is purely one of pounds, shillings, and pence, and have frankly told the men's leaders that fifty-six hours' pay cannot, owing to foreign competition, be given for forty-eight hours' work. If the men are really in earnest they will vote for forty-eight hours, with forty-eight hours' pay, a test of sincerity which their leaders have never had the courage to apply. Mr. Barnes and Mr. Sellicks now find themselves in a very illogical and embarrassing position. At the recent conference the amended terms of management were accepted by them, provided the masters conceded fifty-one hours. They cannot, therefore, now maintain that the employers are attempting to destroy "trades unionism generally," or if they do, why did they barter away their birthright for so miserable a mess of pottage as a paltry concession of three hours a week? The barometer points to prolonged resistance, but what will be the certain upshot? Many masters will never again open their shops to union men, as they are now full up with non-unionists, and the handy lads and men now being daily taken on, are gaining skill every hour the trained men are idly walking the streets, losing their deftness.—Yours, &c.,

One who has been both a Man and Master.

January 6, 1898.

COLONIAL NOTES.

According to the Government accounts just received, the total revenue of the Cape of Good Hope for 1896 was £7,241,311. The estimated revenue for 1897-98 is £6,715,000, while the estimated expenditure for the same period is £6,741,151, showing a deficit of £26,151. The Jubilee celebrations cost the Colonial Government £26,000—£1,000 for the representation of the Colony in London during the celebrations here, and £25,000 in contributions in aid of hospitals and kindred institutions to be erected in commemoration of her Majesty's record reign. The decreases in expenditure are not very formidable, as a rule, but there is a diminution in the estimated expenditure on posts and telegraphs amounting to £37,455. Towards the revenue it is calculated that the railways will contribute £3,360,000, the Customs £1,900,000, the Post Office £308,000, and the telegraphs £130,000. Stamped licences may yield £135,000, blank stamps £175,000, and the bank notes duty £7,000. The land revenue is estimated at £148,000, while £75,000 is set down for the sale of Government property. The existing debt of the Colony amounts to £27,388,405. But where does our "ironclad" come in?

The prevailing tone of the official report on the Colony of British Honduras for 1896 is cheerful. The increased export duty of 50 cents a ton on logwood fell 3,230 dols. short of paying off the charges on this special tax; but it was promptly resolved to issue an Ordinance re-imposing a duty of 1 dol. a barrel on beef and pork, which, it was expected, would add approximately 14,000 dols. a year to the ordinary revenue of the colony. The total general revenue for 1896 was 302,686 dols., while the expenditure was 269,877 dols.; so that the outgoings were well within the incomings. The revenue for 1896 was more by 48,074 dols. than that of 1895, while the expenditure for the same year was 15,084 dols. less than that of 1895. If the saving is modest, it is at least satisfactory. On the whole, the colony gives a good account of itself, but there seems plenty of room for agriculturists; for, of its estimated acreage of 4,839,408, only 52,600 acres are returned as being under cultivation. The post-office is a costly institution. Its total revenue for 1896 was 6,492 dols., and the expenditure 17,117 dols. But postal business is steadily increasing.

Appended to this note is a letter from Renmark South Australia, which ought to have the attention of our Colonial Office. It is shameful to see the Government of that Colony coolly ignoring its moral responsibilities in the way this letter sets forth. All that appears to be wanted is £15,000 to put the irrigation works, on which the existence of Renmark depends, into efficient working order. We need not give over again the miserable story of Chaffey Bros., and their Irrigation Colonies. It was told on several occasions at great length in the monthly issue of this Review, which was threatened with a libel action for daring to speak the truth. Chaffey Bros. have gone, but during their existence they flooded this country with circulars so enticingly worded that numbers of people were induced to invest their money in the fruit-growing ventures, and many to emigrate to Mildura and Renmark. Unquestionably, the Governments both of Victoria and South Australia made themselves responsible for the promises of those American gentlemen Victoria has recognised its responsibility by coming to the help of the Mildura settlers. South Australia refuses. This ought to be energetically protested against in the interests of public morals, as well as in those of the unfortunate people now struggling despairingly to avert absolute ruin on the lands of Renmark. Without the pumped-up water of the Murray River the place is a desert.

Renmark, South Australia, November 8, 1897.

Sir,—I have been desired by my committee to address you on the subject of the present position of the Chaffey Irrigation Settlement of Renmark.

From the nature of your previous references to Messrs. Chaffey's enterprises, you will probably be aware that the liquidation of these contractors discovered the irrigation system to be in a very incomplete and inefficient state. The papers I have the honour to enclose will generally show you the causes of this condition of affairs, as well as the grounds upon which appeals have been made to the South Australian Parliament for redress.

At the sister settlement of Mildura, an accommodation of similar disputes has been arranged. The influence of a large mortgagee interest upon the Victorian Government was successfully exerted, and although the compromise involves the Mildura settlers in a liability for repayment of a loan of over £40,000, and the land owners have pledged themselves to buy over again the irrigation system included in their purchase-moneys, they are freed at once from heavily-increased water rates, and will avoid the discredit which an agitation involves. Unhappily for this settlement, this influence in sufficient volume is not at command; and in its absence the South Australian Government has specifically refused to do anything. Parliament, we are assured on high authority, will follow suit. Under these circumstances the settlers, an overwhelming proportion of whom were drawn from England, look for the influence and assistance of the Home Press, in the hope that an ultimate appeal to the Imperial Parliament may be avoided.

It has been suggested by my committee that a demand for redress of Renmark grievances in your Review would procure that attention which has been denied to reasonable and respectful representations on the spot. It is submitted that the repudiation of any and all liability to our settlers, in respect of the non-fulfilment of conditions accepted from Government agents, contains the essence of that wider repudiation to which a State turns only in the last resort And that the credit of South Australia is as much involved in the present issue as in the flotation of any of the South Australian public loans on the London market. The Chaffey enterprise was an appeal to English capital, organised between the Government of this province and its agents. The conditions of that appeal have never been satisfied, and are now repudiated by the principals. I, therefore, respectfully suggest that the case is one for your attention as a recognised guardian of English investors.

Hoping for your invaluable aid, I have the honour to be, Sir, your obedient servant, Chas. Morant, Lieut.-Col.,
Chairman of the Renmark Defence Committee.

The revenue of New South Wales only fell off about £190,000 in the second half of 1897, and still amounted to £4,423,200, which is a mighty sum for the Colony to raise in a drought-afflicted year. It is that, even admitting that the gross receipts of the railways, which are national property, account for, say, a million and a half of it. How long this scale of income can be kept up by a population of less than a million and a half is always the serious question. But New South Wales has her liberal trade policy in her favour, and the more thoroughly she carries this out the better is her chance. The worst blow to her would come from India were that misruled dependency to fall into financial difficulties. And she is going to refresh herself with a million and a half from our pockets. So everything is all right.

We cannot say that the annual report of the New Zealand Government Insurance Commissioner for the year 1896, published six months ago, and which we have just come across, pleases us much. For one thing, ratio of expenses to premium income is still very high, nearly 20½ per cent. taken on the assumption that all the premiums are for the whole life. It would really be considerably higher if the cost of the endowment business was calculated on the basis of the duration of the premiums it brings in. Again, it does not seem to us that the valuation by which a gross surplus of assets over liabilities amounting to £225,000 is brought out is a good one. A 4 per cent. Hm. "nominal basis" is employed, but a special reserve is said to be created, which brings the net valuation virtually down to 3⅝ per cent. This is clumsy at best, and even the lower rate is much too high for prudence in these days. Least of all do we admire the way the funds are invested. These funds aggregate £2,646,158 and of this amount £465,999 is lent out on the Government Office's own policies. Another £872,000 is in Government securities, and not less than £812,565 is in "mortgages on property." Perhaps the first two items ought to pass without criticism, although we do not envy policyholders the quality of the security

offered by New Zealand Government stock. But what of these mortgages? We in this country know by the most painful experience the quality New Zealand real estate possesses of shrinking in value until it becomes an unknown quantity. Where are these mortgages located, and on what sort of property? We notice that the department has been obliged to foreclose on £30,000 worth of property thus mortgaged; and besides the huge aggregate under this head, it seems to own "landed and house property" to the value of more than £116,000. Explanations are wanted here, but we fear they are not likely to be forthcoming from the present Government of the Colony.

We shall be as pleased as Punch if the anticipations in the following letter come true :—

Dimbula Valley (Ceylon) Tea Company, Limited.
16, Philpot-lane, London, E.C.,
December 1, 1897.

Sir,—My attention has been drawn to your article in the Investors' Review for October headed "A Weak Tea Company." With reference to the writer's comments on the Dimbula Valley (Ceylon) Tea Company, Limited, I can only say they are unfair in the comparison drawn between this company and the other two named.

In the first place, the writer of the article adds to the company's capital £6,250, the amount of the mortgages which were taken over when the estates were purchased. These mortgages could only be paid off at certain dates, but the company hold the amount ready to pay them at due date.

In estimating whether our capital is high or low the amount of mortgages should, therefore, not have been added. Then our profit of £14,595. 1s. 8d. was practically derived from 1,440 acres of bearing tea, or at the rate of £10 per acre net profit, whilst I assert without any fear of contradiction that the average profit for the whole of Ceylon is not over £5 per acre.

This shows that the dictum is all wrong of the writer of the article, to the effect that "any tea company's capital which stands over £50 an acre is over capitalised," because it is manifest that a company's gardens which turn out a net profit of over £10 an acre must be worth more than those giving only half that, or even less. The only estate belonging to the company absolutely in full bearing last year gave over £16 per acre profit, and I am aware that it has done something like this for several years. Therefore, no rule such as the writer lays down is applicable to Ceylon, or any other gardens.

I would, in conclusion, point out that in judging the stability or otherwise of a tea company as a safe dividend-paying concern, the net profit per pound of tea realised is the most important guide. A company whose net profit per pound is but a penny, is surely in a very different position from one whose profit is 4d., as was, and, I hope, always will be, the position of this company.

Should tea drop 1d. a pound, a capital of £50 would be a bit high, would it not?—Yours faithfully,

James Sinclair.

FOREIGN NOTES.

The papers have lately been giving us scraps of news about a new "wheat corner" which has been engineered in Chicago by a man named Joseph Leiter. We did not care much about it, knowing that such things will be done now and then in spite of the warnings from the past. The American mind cannot be happy until it enjoys a monopoly of something, and brave gamblers have again and again attempted to establish a temporary one in wheat. But wheat is not like oil wells, nor even as bounty nourished beet sugar, and Mr. McKinley has not yet fenced round its production in the States with a prohibition tariff on imported grain.

So Mr. Joseph Leiter appears to have failed, like all who have gone before him, if we may believe a highly-coloured account of the "deal" supplied by Messrs. Armour & Co., the corned beef people, and printed in Wednesday's *Financial Times*. Mr. P. D. Armour, it seems, entered the lists against the champion of the "bulls," and sold him all the wheat he could take. Six million bushels Mr. Leiter bought, all to be delivered by the end of December, and Mr. Armour has delivered it. In the battle of the giants the unrivalled organisation of his house of business, and such ingenuity and resource as was implied in keeping the ice in Duluth harbour and in the "Soo" Canal free by tugs until the wheat boats got out and through, carried the day, and the question now is, what will Mr. Joseph Leiter do with his six million bushels? Go bankrupt over them, perhaps, and help us to cheaper bread. Nobody will pity him should the worst befall, and yet he must be a man of pluck.

Mr. Dingley is exceedingly happy with the condition of the United States Revenue. He thinks his tariff is all right and sure to make surpluses blossom as a rose might on the roof of the Capitol. And if not he still has the remedy of more taxes to fall back upon, happy man that he is. Facts, however, hardly appear to bear him out. Take the New England Cotton Industry as an example. In the Fall River Mills wages were reduced 10 per cent. on Monday last, and the sad confession has to be made that home consumption is not able to take the product of American Cotton mills running full time. Their owners must either get foreign markets for their goods or shut down. How they are to get foreign markets under the Dingley tariff is a problem we are much interested in watching them try to solve. What makes the position all the funnier is that mills in the Southern States are successfully competing with those in New England. So that we shall soon have the cut-throat method of business in this industry just as fully developed as among railroads through raw territories. But plants in hot-houses do have a tendency to crowd each other to death.

President Miller, of the Milwaukee Railway, says that the Western Railroads are not making much profit in spite of their larger business because of the prevalence of rate cutting. It is very candid and honest of him to tell us this. If he would go a step further and let us know who profits by the cutting we should be deeply grateful. The singular fact which we begin to note on this side is, that railroad managers never by any chance become poorer by the policy which ruins their shareholders and nominal masters. On the contrary, from a stockholder's point of view, the worse the profit to him the more rapid is usually the progress of managers towards the blessed state of the millionaire. At present, unless for objects of private profit, there seems no reason why the Grainger roads of the North-West should engage in apparently tearing business out of each others grasp. To undertake to carry goods for unprofitable freights is perhaps excusable when the amount of business doing is not enough to go round, but when the lines are all well laden with traffic eagerly pressed forward, we cannot see why the carriers should be so anxious to conduct business at a loss. Probably there are rings of traders receiving favoured treatment and sharing with the conductors of the roads the gains thus dishonestly obtained. We wait for more light, sceptical on many points.

If it be the case that Marshal Blanco, the new Governor-General of Cuba, has made a demand on the

Spanish Government for sixty million pesetas a month, two-thirds of which are for the expenses of the war, not only are the troubles of that unhappy land not yet at an end, but the difficulties of the Spanish Treasury must surely soon reach a climax. Sixty millions of pesetas amount to about two millions sterling in the present depreciated state of Spanish currency—say £25,000,000 a year, and Spain lumbers along with heavy deficits irrespective of this. Under ordinary circumstances she could no more find this money out of normal resources than her neighbour, Portugal, could. So the Marshal's demand immediately implies a fresh loan on the security of the Customs, amounting to two hundred million pesetas, part of which is to be used to enable the Bank of Spain to still further swell out its excessive note circulation. That is what we infer from the statement that forty million pesetas of the loan will be retained by the Bank of Spain as a guarantee for the money it is to advance to the Government to meet Marshal Blanco's requirements; and another hundred million besides on Cuban bonds now pledged to the Bank of Spain, is, if possible, to be sold to the public. Spain is not really a poor country in some senses—it is only poverty-stricken. The people also are indifferent taxpayers, so that although the foreign trade is increasing, both import and export, the Customs revenue is declining. What the end will be it seems hardly necessary to say. The wonder to us is that Spain has kept up an appearance of solvency for so long under the strain. Blessed, for its present Government, are the financiers of Paris.

In his report to the Foreign Office—a veritable trade romance in its way—on the enormous development of the trade and commerce of Japan—a veritable romance in its way—Mr. Brenan certainly speaks very plainly as to the want of commercial morality among the Japanese. They are declared to be worse than the Chinese in this respect. You may accept Chinese goods "on the faith of a Chinaman's honesty," but it is not so with Japanese goods. These have all to be very carefully inspected before delivery is accepted. According to Mr. Brenan, gradual deterioration seems the inevitable fate of all articles of Japanese manufacture. Their match trade, which was rapidly driving all competitors out of Eastern markets, is said to be greatly depressed, if not on the road to ruin, because of fraudulent practices. The Japanese merchant has no credit; it is scarcely possible to keep the ordinary Japanese to the terms of a contract. This is very sad, no doubt; but is it not possible that the traders of Japan may yet learn by experience the value of commercial honesty? Even in England that was a knowledge of slow growth. It is not so very long since there were grievous complaints of the comparative absence of commercial morality among English traders and manufacturers.

But, in spite of these drawbacks, Japanese trade progresses at a most extraordinary pace. In twenty-six years the value of the foreign trade of Japan has grown from 48,000,000 dols. to 288,000,000 dols. In the course of the last seven years, the imports into Japan have increased by 90,000,000 yen, and the exports by 74,500,000 yen. In this, Great Britain and the British possessions have participated to the extent of 50,500,000 yen while all other countries put together improved their position to the extent of only 29,000,000 yen. That is all very satisfactory in itself, and there should be no difficulty in the British merchant and manufacturer keeping the lead if they will only submit to push and to display a little more "sweet reasonableness" and patience in dealing with the natives. But the complaint comes from Japan as from so many other quarters, that the British dealer is not so careful in cultivating customers as are the dealers of other countries—more especially America and Germany. Of course, these are at present far behind us in the race, and, to make any headway at all, they must exert their utmost energies in increasing their business. But, as Mr. Brenan wisely says, "if other nations push, and we remain inactive, we shall drop behind."

Russia has now got a good, honest, thumping national debt of 6,101,339,902 roubles, say 600 millions sterling, and a bit. Its total rose in 1897 by about 116 million roubles gross, owing to the issue of 490 rentes, &c., to buy the Vistula, the Moscow-Brest, and the Moscow-Smolensk Railways, and its net increase was about 51 million roubles after allowing for amortisation, &c. This noble debt is represented to some extent by revenue-yielding iron roads; but it took 296 millions odd roubles for its service last year, and will require 272 millions this, or over 20 per cent. of the whole revenue of the State.

The situation in the Far East has cleared up a very little. It is officially announced that Germany has "leased" Kiao-Chau from China. However bad things may look for her, Germany can now at least say, with documentary proof to back her, that she has not "annexed" that famous bay. The "mailed fist" may have been put forth, but by the moderation of China it was not necessary to use it. Things have, therefore, been made comfortable for the Kaiser. The lease runs for fifty years; will it be necessary to have a formal renewal of it? We doubt it; but much may happen between now and then. But how much is Germany to pay for her lease in rent or tribute? The official record saith not; and the probabilities are that the "rent," if anything is to be paid, will be a peppercorn one. Now will come the question as to whether Kiao-Chau is to be regarded as a free port. Will the other Powers demand the free use of it under the "most favoured nation clause?"

We shall know that by and by. Meantime, it is said that this "most favoured nation clause" briefly embodies the policy followed by England in China. She demands—as yet—no new port for herself, but tells China that whatever ports she gives to other powers must be as free to all as are the Treaty ports. American journalists applaud this statement of policy; and undoubtedly it is the right course to pursue. England's greatest interest in China is freedom of trade, and this would be in grave danger if there were to be any exclusive dealing in Chinese ports. It would be idle to attempt overtaking all the rumours of the week concerning China. Those of the one day were generally contradicted by others of the next, and most of them are forgotten.

Belgian industry must have been in a specially vigorous condition during 1896, for we find from our Vice-Consul's report on the coal industry of the province of Liège for 1896 that the output was 5,241,220 tons, or

192,936 tons greater than in 1895, and 184,789 tons more than in 1890, a year of extraordinary prosperity. This increase in the output of coal was almost entirely due to the greater demand for the coals used for industrial purposes. The profit made by thirty mines at work in 1895 was 2,513,600 frs.; of thirty-three mines in 1896, 3,607,850 frs., or an increase of 1,094,250 frs. About thirty years ago, the quantity of coal produced in the province of Liège was 2,564,550 tons, or less than half of the present day. The owners seem to be totally unaffected by the sinister prophecies of the failure of the supply. That is for the far future.

There is much that is interesting in the British Consular report on the trade and commerce of Hungary for 1896-7. Ever since the close of its memorable struggle with Austria, Hungary has devoted itself with no little energy and perseverance to the development of trade and manufactures. But in this respect it is still, to use a familiar colloquialism, "On the make." It is in the transition stage between agriculture and commerce; and the former is still, by a long way, the leading industry, three-fourths of the population depending upon it for their subsistence. Of its agriculture, however, the British Consul-General can only say that "it is far from being in a hopeless condition." High-farming is practised, and the importation and manufacture of the best agricultural machinery are very large. Indeed, several English manufacturers of modern agricultural machines have found it to their advantage to establish branches in Hungary.

Hungary's principal exports are corn, flour, cattle, and wines. From Great Britain she imports chiefly cotton and woollen goods, raw iron, steel, machinery, platinum articles, and steamships. Seven-tenths of the exports to England consist of meal, the remainder being made up of raw sugar, oak-gall extract, barley, mineral waters, and sawing materials. Recently British manufacturers and merchants have shown increasing interest in Hungarian industries. They have inundated the British Consulate, not with comparatively useless catalogues and price lists, but with applications for information as to the best way of initiating or of developing various branches ofcommerce and industry. Our Consul has supplied these with the best information available, and in time we may see English capital going more freely to the help of Hungarian trade.

Although the Russian bureaucrats, with their stupid system of secrecy in all things, refuse to allow the agricultural statistics gathered yearly a wider circulation than that of their own inner circle, the British Consul at Batoum has contrived in various ways to collect a considerable amount of useful information, which is fairly accurate so far as it goes. It is not a very cheerful picture that he draws. The cereal crops have been a complete failure in the Trans-Caucasian province, so much so that the peasants must be dependent on Government, or other outside sources, for the seeds for next year's crops. They are an ignorant, superstitious, and prejudiced people, these peasants; but farmers of some substance and intelligence do rise up among them; and these, we are told, are showing an inclination to use modern agricultural implements in place of the primitive "scratchers of the ground" to which the common peasantry cling. As a consequence, there is a movement, so far favoured by the Government, for the reduction of the Customs duties on foreign-made agricultural implements, and, if this is successful, the Consul thinks there would be a good opening for English enterprise in this line.

It is difficult to say what success has attended the experiments in tea-growing, begun some years ago on the Russian Imperial domains near Batoum. The yield from the trees planted has been too insignificant to be remunerative, but the domain officials do not seem to have lost hope, as they are trying to induce the neighbouring peasants to plant tea shrubs by the offer of seed for nothing. A still more remarkable fact, however, is the decision of a Moscow firm greatly to extend the area they at present have under tea cultivation. They seem to have found their previous experiments sufficiently successful at least to promise profit in the future. The cultivation of the American cotton plant would appear to have been a decided success. The red rust, a disease which has not yet attacked the local cotton plant, has to some extent damaged the yield for the present year in the Trans-Caucasus; but the crop will still be abundant, and in the Trans-Caspian territory they have 100,000 acres under American cotton—a fact, perhaps, worth noting in Manchester.

We have received the following in reply to an article in the November number of the monthly issue of the Investors' Review:—

The Imperial Continental Waterworks, Limited,
35, New Broad-street,
London, December 30, 1897.

Sir,—Under the heading of "The Proposed New Waterworks for Genoa" there appeared in your issue of last month, a letter, dated 16th October, 1897, which you stated was written by Mr. Frederick A. Y. Brown, of Granet, Brown & Co., English Bankers, Genoa. That letter endeavours to criticise the Debenture Issue of this company made on 9th October last, and seeks to impugn the statements in this company's prospectus of that issue. No one should be denied the right of *fair* criticism, but the intention of Mr. Brown's letter is self-evident, and my directors can only conclude that his fears concerning the ultimate consequences to the company of which he is a director, when the works of this company (excavations and preliminary works for which are now being proceeded with, and steel mains being shipped) are completed, have so far misled him as to cause him to make statements which are proved to be incorrect, even by the engineer-in-chief of his own company in his report printed in 1893, as also by the Royal Decree of November 17, 1887, but these are too lengthy to quote in this letter; the originals, however, and notarial translations thereof can be seen at any time. My directors can only assume that Mr. Brown when writing his letter of October 16 last, forgot the existence of these and other important documents. Mr. Brown's misleading statements are of a very serious and important nature, and while apologising to you for the great, but necessary, length of this reply, embodying as it must do, Mr. Deacon's refutal of Mr. Brown's statements from the engineering point, and a letter addressed to this company from fifty-two leading citizens of Genoa, including members of the Legislature, the Municipal Council of Genoa, and other Municipal Councils, and of land owners, merchants, manufacturers, and professional men, which my directors hope amply refutes Mr. Brown's statement that the residents in the Bisagno Valley are "well supplied with water." I am instructed to request that you will, in fairness to this company, give the same publicity to this communication and annexed letters as you gave to Mr. Brown's letter. I am also instructed to say that this company has no need, nor does it intend, to compete at first with existing supplies. The population without any adequate public supply and to whose houses my company at first proposes to lay on its water, will yield a revenue quite equal to that named in the prospectus of this company, without, my directors think, encroaching on the parts now supplied by Mr. Brown's Company, but when this company increases its service beyond that sphere into the parts of Genoa at present very meagrely supplied by pipes with impure water, my directors think it may be safely left with the inhabitants of Genoa to say whether they prefer paying for a constant and unrestricted supply, under high pressure, of pure water such as this company will supply, or for the meagre supply of impure water which they are now receiving.—I am, sir, your obedient servant, Ernest J. R. Dodd, *Secretary*.

To the Directors of the Imperial Continental Waterworks, Limited.

Victoria Mansions, 32, Victoria-street,
Westminster, S.W.
December 28, 1897.

Gentlemen,—In compliance with a request contained in the secretary's letter of the 10th inst., drawing my attention to a communication from Mr. Frederick A. Y. Brown, of Genoa, which appeared in the Investor's Review for November, I have the honour to report as follows:—In that communication Mr. Brown impugns certain statements made in your prospectus, and others made in my report dated July 20, 1897. It is due to you that I should reply to Mr. Brown's statements, so far as they concern the information I have afforded you.

1. Mr. Brown's letter contains ten paragraphs. The first two do not touch my statements, and the third introduces my name incorrectly in connection with a statement in the prospectus issued by the company, but not contained in my report. Apart from this, I am of opinion concerning that statement that no adequate public supply has been afforded to the "population lying next to the company's proposed reservoir."

2. In the fourth paragraph Mr. Brown says that he is in a position to contradict flatly my statement that the company of which he is a director "has somewhat more than reached the limits of its resources in respect of water-supply." I believe my statement to be accurate even under the restricted mode of distribution adopted, and it would still be true in the driest seasons even if Mr. Brown's company were empowered to take water from the Gorzente without limit. Their concession, however, only permits the withdrawal of 250 litres per second, a quantity many times more than the flow of the stream in dry weather, and which Signor Niccolo Bruno, the engineer-in-chief of the company, says at page 30 of his Report of 1893, had been shown in 1885 to be insufficient to cope with the demand. ("La convenienza di aumentare la potenzialità della derivazione, essendosi dimostrata impari alle richieste quella dei 250 litri d'acqua al l'domandati dagli Ing Grillo e fratelli Bruno.") How much more insufficient must it now be having regard to the great increase of the population of Genoa since that date, and to the fact that the company's statutory powers of withdrawal have not in the interval been increased.

3. But it must be borne in mind that quite apart from insufficiency at the sources, the present Genoa supplies are restricted to a very serious extent by the mode in which they are distributed to the tenement. It is an undoubted fact that the people of Genoa have no experience of that constant and unrestricted supply of water under high pressure, paid for (so far as domestic consumption is concerned) without reference to the quality used, which in this country is regarded as a sanitary necessity.

4. Towards the end of the fourth paragraph Mr. Brown quotes, incorrectly, the statement following, which is contained in my report:—"I have been informed that even after the repair of the lower reservoir the authorities have not permitted it to be filled," and states that he is able to contradict it flatly. By the word "filled" I mean "filled." I do not mean, and no one would suppose I meant, that I had been informed that the reservoir in question had not been used at all. The reservoir is used, but owing to the defective construction of its retaining dam, a Commission was in 1885-6 appointed by the Government upon the report of which Commission an injunction was issued in 1886 by the Ministry of Public Works limiting the height to which water might be stored in the reservoir. Further, that Commission made certain recommendations for the strengthening of the dam, which I understand from the report of the engineer-in-chief of its owners have not been carried out. It is reasonable, therefore, to suppose that the injunction is still in force, and I am informed that it has not been withdrawn. I do not, of course, doubt Mr. Brown's statement that the reservoir was filled on an occasion in October, 1892, but if the upper part of it is used, and the injunction has not been withdrawn, it is improperly used, and having personally examined the dam in 1892 I can imagine nothing but dire need of additional water which would justify so dangerous an expedient as the filling of the upper part of this reservoir, even if there were no human dwellings in the valleys between it and the sea.

5. The fifth and sixth paragraphs of Mr. Brown's letter contain further statements about the Gorzente works, and do not relate to your company's proposed works.

6. In the seventh paragraph Mr. Brown incorrectly quotes the purport of my report, and, having done so, proceeds to draw inferences from the incorrect quotation. The paragraph in question deals with my assertion as to the sufficiency of the gathering ground included in your company's concession. I have thoroughly satisfied myself by prolonged gauging and investigation that every word of my report upon this subject is justified. In the same paragraph, when comparing the resources of your company with those of the Gorzente Company, of which he is a director, Mr. Brown has entirely omitted to mention the Bisagno area, which, in addition to the adjacent Concasca area, is covered by your Concession. The two areas together contain 9,750 acres, and will supply enormously more water than I have yet spoken of.

7. The eighth paragraph of Mr. Brown's letter contains further remarks concerning his company. As an engineer, I am enabled to state that the inference which would be drawn from his conclusion as to the additional supply to be obtained from an additional reservoir on the Gorzente would be incorrect, even if the company had power to abstract more water.

8. The ninth and last paragraphs are expressions of opinion to which it is not necessary that I should reply.

9. From a physical point of view there cannot be any doubt that the sources included in the Bisagno and Concasca areas present immense advantages over those utilised by the Gorzente Company which are drawn from less than half the area, and are situated at a distance from Genoa more than three times as great. I regard it as a misfortune to the city of Genoa that waters of such remarkable purity, and at so short a distance, have not yet been properly utilised.—I am, gentlemen, your obedient servant,

(Signed) George F. Deacon.

The following letter has been addressed to the company by fifty two residents in Genoa, whose signatures are attached:—"We are extremely pleased to learn from the communication made to us that your company have decided to carry out shortly the conveyance (or derivation) of the water from the torrents of Concasca and Bisagno, for the purpose of supplying with the purest water the valley of Bisagno, Genoa and neighbouring towns. A want is by this means satisfied and a long-felt need will be supplied, and thus benefiting not only the city and townships where the water is delivered, but also the company undertaking the works. And while we thank you for the information afforded us and applaud the initiative taken by your company, we earnestly hope and wish that the aqueduct so sorely needed may as soon as possible become an accomplished fact." (Here follow the signatures.)

The Queensland National Bank.

Defrauded Australian Bank depositors and students interested in the moral development of our Australasian settlements will find much to interest them in the report of the Committee appointed to investigate the affairs of this Bank, the text of which has now reached this country. Some may remember that the London Board of the Bank was so tremendously sensitive, so conscious of surpassing virtue, that it resented the slightest whisper about the solvency of the institution in the crisis of 1893, and even went so far as to commence an action against the *Standard*, claiming £100,000 damages because that newspaper had published a slender fragment of the truth. Of this Board we shall have more to say presently. In the meantime, let us look at what the Committee has disclosed. First, it tells us that the total losses of the Bank from its formation down to June 30, 1896, have amounted to £3,497,803. This is a fairly tidy sum, but the details cause surprise that it was not larger, and we are not at all sure that it is not considerably larger. But as it stands, it is a proof of marvellous, if peculiar, enterprise; for how was this money lost? According to the report before us, barely 7 per cent. of it disappeared in agricultural advances, and less than 14 per cent. in pastoral; but fully 35½ per cent. vanished in what is euphemistically described as commercial undertakings, 22 per cent. in mining adventures, and 21 per cent. in what might be called miscellaneous leaks. The details entered into are of the most romantic description, and, as usual, the directors knew nothing. They trusted to the manager, the manager acted by blind routine, the auditors did what the manager told them, and they were all a happy family until the crash came. Even after the crash, the directors went on comfortably as before. They constructed illusory balance-sheets and paid dividends, which were not earned, on the share capital of the re-constructed bank to the tune of £40,300. In fact, the bank made no profits after its re-construction any more than before, but continued its unbroken record of losses; and we do not believe it is making any profit now; in fact, like Mr. *Punch's* costermonger, in regard to this affair "We don't think much of nuffin'."

But let us get to the heart of the story. Who were the most valiant appropriators of the bank's money? Quite a crowd of small money-sucking accounts are mentioned by the Committee, some of them so graphically that we may quote the text just to lighten the narrative, and to illustrate how banking business can be

done in an enterprising and progressive settlement run on bushranger or ticket-of-leave principles. Just read this :—

For each advance with which we dealt we asked by whom it was sanctioned, and in the great majority of cases the answer was "no record." We asked what limit was fixed for each account, and to this query, with very few exceptions, we obtained the same reply. As an extreme instance, we cite a laconic report in the case of an account on which we estimated a deficiency of £7,500, and off which various sums, amounting in all to £14,800, had been previously written :—

"By whom sanctioned ?—No record.

"Authorised limit ?—No record.

"Value of securities at the time ?—No record.

"Commenced with a charge for a cheque-book, and steadily ran up until the bank took over the property."

And this :—

The half-yearly reports on advances of some of the branch managers were absurdly optimistic and misleading.

Here is a case in point in connection with an account on which the bank has lost £30,500. In June, 1889, the manager reported as follows :—"Of the highest character and standing. This is our largest and most profitable account. Their business is extensive both in town and country, and for the most part very sound." In the following half-year the same manager's report resolved itself into the brief obituary notice—"Estate assigned ; see security number so-and-so."

In the majority of cases, however, we are happy to say that we believe the branch managers to-day to be competent, careful men.

We can do things pretty freely in the old country and must not hold our heads too high, but this rather beats our "form." It is nothing though to what that renowned statesman and pioneer of all sorts of things, Sir Thomas M'Ilwraith, ex-Prime Minister of Queensland, ex-Finance Minister, and so forth, and so forth, K.C.M.G. in addition, and now of obscure address, was able to accomplish with the assistance of his friend and partner, Mr. E. R. Drury, C.M.G., the remarkable man who condescended to act as general manager of the bank. What Sir Thomas precisely owes the creditors of the old bank we are not sure that the Committee makes quite clear to us, but then, as its members say, "it was most unfortunate" that they should have been without the benefit of Sir Thomas's "oral testimony." He produced his evidence through an attorney who was evidently ignorant of many things, although we do not in the least doubt "a thoroughly intelligent witness." Putting one thing and another together the Committee has come to the conclusion that on June 30, 1896, Sir Thomas M'Ilwraith's indebtedness to the bank at head office, and in respect of accounts in his own name was £251,461. Against this security amounting to £60,700 was held, leaving the deficiency of £190,761, but this is only the beginning of the tale. Sir Thomas is also held responsible by the Committee to the defunct original Queensland National Bank for £39,674, representing advances to the Mount Perry Copper Company, and the whole of this has been written off as irrecoverable, for £16,608 advanced to the Palmer River Gold Mining Company, also all written off, and for £15,928 the amount lost on what is described as the Ida Accounts.*

* The following reveals a little of the darkness surrounding this account :—Thomas M'Ilwraith "Ida Account."—On the 9th February, 1882, Sir Thomas M'Ilwraith wrote to the late Mr. Drury as follows :—"I enclose cheques (2) for £3,600 each, signed T. M'I., Ida Account. Will you kindly open the account in that form?" This account was closed at the head office on 30th December, 1884, by a transfer of the balance—then Dr. £10,369 18s. 8d. —to the account of the Palmer River Gold Mining Company at Maytown branch, from which £10,000 was written off as irrecoverable in December, 1885.

These items added together come to £247,043, quite a respectable total, but scarcely large enough, we imagine, to indicate the true greatness of Sir Thomas's mind. Its towering grandeur may be dimly perceived from the story of the Ravenswood account, described thus in the report :—

The "Ravenswood" account is referred to as follows by Mr. Stuart : —"Date opened—March, 1887 ; by whom sanctioned—no record ; authorised limit—no record ; security taken—nil. The account commences with a cheque for £3,631 drawn to No. 1, and with accumulated interest represents the debt as written off in December.

A mere bagatelle this, but luminous of its sort. Less light yielding, but suggestive also, are the dealings with the ex-Prime Minister of the Colony, and the ex-General Manager, Mr. Drury. It is popularly supposed, by the way, that Mr. Drury suddenly died a natural death at a convenient moment, but private gossip at once ascribed his death as being due to his own hand ; and it is now alleged that he is no more dead than Sir Thomas, but only "beavering" till the storm blows by. What he and Sir Thomas did together had best be given in the words of the report. They do not require to be moralised over to any great extent :—

Exclusive of the "Ravenswood Account," Sir Thomas had, on June 30, 1896, at the head office, eight separate overdrawn accounts, totalling, as we have said, a quarter of a million sterling, but he asserts that in six out of the eight accounts (amounting in the aggregate to £160,000 in round figures) the late Mr. E. R. Drury was his full partner. The following are the accounts for which it is alleged that the late Mr. Drury is jointly liable :—No. 2 account, representing Mount Morgan shares ; No. 4 account, representing the purchase of shares in the Hydraulic Company, and in the Colonial Land Company; "Dotswood Account" ; "Newcastle Brewery Account" ; "Adelaide-street Land Account" ; "Land Account." There is nothing on record in the books of the bank which would serve to establish the alleged partnership. But there is a letter from Sir Thomas to the late Mr. Drury, dated at Westminster Palace Hotel, London, January 29, 1896, and in this letter Sir Thomas specifically reminds the late Mr. Drury of his liability in connection with the several accounts already mentioned. That letter, of course, arrived here after Mr. Drury's death. In a subsequent letter, addressed to the present general manager, Sir Thomas refers to the various transactions as follows :—"No. 2 account. This was an account opened by Mr. Drury for him and myself, founded on the purchase by him of various Mount Morgan shares from time to time. . . . . No. 4 account was opened by Mr. Drury for the purchase between us of certain shares in the United Colonial Land Company and the Sydney Hydraulic Company. Newcastle Brewery Account the late Mr. Drury and I were responsible for. The Adelaide-street Land Account (Dr. £38,493) was for land purchased by Mr. Drury and —— and myself. ——'s portion was divided from ours, and the balance remaining is the foundation of the account." We think it right to say here that the Bank has no security whatever for the last-mentioned advance. "Land Account I am unable to explain, but take it to be for two pieces of land," &c. And he concludes as follows :—"At all events, in the whole account, Mr. E. R. Drury was an equal sharer with myself. This advance, also is entirely unsecured.

Sir Thomas McIlwraith and his friend Mr. Drury, thus by Sir Thomas's own admissions, did what they liked with the money furnished by British depositors and others, and, at the time of the closing of the Bank the pair had open no less than eight separate overdrawn accounts at the head office of the Bank, exclusive of the Ravenswood account, and the two men obviously played with the funds as pickpockets of a gambling disposition might play at Monte Carlo. Securities, where there are any, held by the Bank against advances to Sir Thomas, have depreciated enormously, and it is all very sad of course ; and the late Mr. Drury "stood

indebted," £67,744 to the Bank at the time of his decease, £30,242 of it being written off as lost, with another £16,480 to follow. But Mr. Drury is dead—or held to be—and his defalcations are useful mainly as affording directors a chance of excusing themselves. This is how one of them does that. Bold as a warrior in triple brass was this Mr. Webster until the truth begun to be dug out :—

In the early days of the Bank, the directors sanctioned an advance to the deceased gentleman of £600, and subsequently this was extended to £2,000. So far as the minutes go, no application for further advances came before the board, and we were assured by two directors— Messrs. Hart and Morehead — that they were ignorant of the existence of this large advance until after the late Mr. Drury's death. Mr. A. B. Webster, on being questioned on this subject, replied as follows :—"When I was auditor I knew Mr. Drury had an overdraft at the Bank, which I thought was irregular. I was told that this was a land speculation in South Brisbane bridge lands, and that it was amply secured. Mr. Pritchard informed me of this. When I became a director a certain time elapsed between the date of my resignation as auditor and election (Mr. Webster signed the balance-sheet June 30, 1889, as auditor, and took his seat on the board on May 7, 1890), and the account was never brought before the board. I also thought that the account was authorised. I made no enquiry when I went on the board, as I was under the impression that the advance was in order, and that it was not increasing." It would thus appear that the late Mr. Drury, as general manager of the Bank, made large advances to himself, without the sanction of the board, on security that might or might not have been considered full cover at the time. There can be no doubt that there has been a large shrinkage in the value of that security, and that the consequent loss is considerable. We refer to this matter with the utmost reluctance, and we wish to remind you that had the deceased gentleman been able to speak for himself he might have put a different complexion upon a transaction which, we are bound to admit, bears an ugly aspect in its present form. We are much indebted to Mr. Victor Drury, attorney for Mrs. Drury, who courteously gave us the fullest information as to the great decline in the values of properties purchased by his late uncle and held as security by the Bank. We are of opinion that the late Mr. Drury was wrong in incurring large monetary obligations to the Bank—of which he was general manager—without the formal sanction of his board. We desire to record our appreciation of the action of the widow of the deceased in voluntarily surrendering certain securities to the Bank which have since realised over £4,000.

This is sweetly consoling, to be sure ; and Mr. Drury was a most honourable man ; we are all honourable men. Yea, even Sir Thomas M'Ilwraith, of whose adventures and financial gambols at the Bank's charges the Committee speaks with becoming sorrow. He owes this and that ; but what would you, flayed depositor ? Was he not a mighty power in the land ? Nevertheless, the accumulated interest due on his private account alone amounts to £27,000, and it is not yet paid it up, although, of course, he will pay when "luck" improves with him and times mend. He seems to have been a man of great gullibility in regard to mines, and to have been always dabbling in something, caring not a straw so long as the Bank was loser, and not he. But, through his attorney, he declares that a large part of the debt is due as much to Mr. Drury as himself, Mr. Drury being his "full partner." So let us vow vengeance on Drury, and salute Sir Thomas as a great "Imperial" patriot badly guided.

One point has been hotly debated in the Colony ; it has only an academic interest here. The Committee reports that the Bank was in such a precarious position at the end of 1892 as to render it necessary for the Government of the Colony to come to its relief by borrowing £600,000 from the Bank of England to enable it to pay the dividends on the Colony's debt. This transaction was faintly known in London at the time, and must have been perfectly known to the London Board. As soon as possible in 1893 a public loan was issued for Queensland by the Bank of England, so that the said Bank might get its money back again from the pockets of the British investors, and thus escape what would otherwise have been an absolute dead loss to-day. Of course, statements of this kind cast the gravest reflection, not only upon the Government of Queensland, but upon the London Board of its Bank, and Sir Samuel Griffiths, another ex-Premier, who carried out the transaction on behalf of the Colony, wrote to the Brisbane papers to deny that this money had been borrowed for any such purpose. The Queensland Premier also made a statement by way of an explanation, which explained nothing. The money was lent to the Government, they say, not to the Bank ; but it really does not matter a straw what the ostensible reason for the borrowing was—the actual fact being that this £600,000 providentially prevented both the Colony and the Bank from stopping payment.

The committee gently informs us that the loss caused to the Bank by the "boom" in Mount Morgan Mine shares "may be moderately computed at £350,000." Did not some of the servants of the Bank emerge more than millionaires from this boom ? Are not some of them now swaggering around in London Society, rubbing shoulders with Princes, and intriguing for "titles" ? "It is fortunate for the Bank," adds the Committee, "that one of the largest shareholders in the mine headed the financial revel, and took upon his own shoulders liabilities of great magnitude." Perhaps ; but the £350,000 "moderately" vanished.

In conclusion, may we be allowed to ask a question about the position of the London Directors in regard to this miserable story of criminal finance. Are they perfectly innocent of any knowledge of what was going on in the Colony ? They were supposed to be all men of business, and some of them were reputed to be men of sense also. As directors, they held a position of great responsibility towards the thousands of British depositors who lent money to the Bank on the faith of their names. In their own interest, we imagine, they ought now to demand an investigation into the affairs of the Bank on this side, and if they are innocent of all knowledge of Sir Thomas M'Ilwraith and Mr. Drury's "enterprise," of the thievish proceedings in Brisbane, they would rejoice were investigation made even in a Criminal Court. Whether these gentlemen take steps to have themselves cleared or not, they must expect to be judged by their conduct in relation to this unclean business. The mealy-mouthed language of the Brisbane Committee sometimes excites amazement as one reads it, sometimes contemptuous disgust. They slur over vile betrayals of trust, shameless robberies, the most basely-concocted frauds, as if they were mere errors of judgment, the trivial peccadilloes of men too eager to get on and become rich to pause and give a thought about the morality of their proceedings. But such language is not likely to be employed in this country. Both the Queensland Government and the National Bank appear to us to have been in the hands of a set of unscrupulous knaves, and the London board of the Bank, unconsciously no doubt, but still in actual fact, was the associate of this set of thieves, through whose opera-

tions the British public has lost incalculable sums of money. Will those four men try to do anything now to rehabilitate their character, to dissociate themselves fully and convincingly from all participation in the deeds of those Colonial rogues? They may be quite sure that if they adopt the policy of remaining silent under it all, a brand will be put upon their names which will blacken them for ever in the memory of their fellow countrymen.

Our Position in China.

It is well that we should keep calm about the movements of Germany and Russia in China, although commercially we have a greater stake there than all the rest of the world put together. And should it be the case that Sir Robert Hart is to be succeeded in the control of the Imperial Customs by a German or a Russian, we may certainly look for it that our commerce will be seriously interfered with. So far as England herself is concerned, there might be compensations, but the matter is much more serious when we take India into account. The revenue of our Indian dependency from opium, sold principally to China, has been falling off somewhat rapidly of late years, but it still amounts to nearly sixty million rupees a year and were the decay of this source of income to be hastened by influences hostile to the finances of India, so gravely compromised by domestic mismanagement, the consequences might be serious indeed. From this point of view Russia may be able to deal a far more deadly blow at our Indian Empire than by anything she has done in Central Asia. While we have been wasting the bravest of our troops in the foolish endeavour to subdue mountain tribes, always an untameable species of human being; while we have been making roads to facilitate the entrance of an enemy into the plains of India, Russia has reached forth her hand in the far east and grasped the control of Northern China. Both Russia and Germany bear us no good will commercially, and will be at one in all probability in injuring our commerce. All this is true, and still there is nothing much to be afraid of if we do not make the mistake of folding our hands and waiting on events. There has been far too much of the "let slide" in our foreign policy since the present Government came into power. Bold words have been spoken, but the deeds have been futile. When the news first became public that Russia had agreed to guarantee a loan for China in exchange for certain concessions, including the right to carry her Trans-Siberian Railway across Manchuria, we urged in the monthly issue of this Review for July, 1895, that our true policy, as a counter-move, was to ally ourselves with Japan. The wisdom of this course must be still more apparent to-day, and if we neglect to make friends of the Japanese, to work with them, and to back them up in the conflict which is impending between them and the Powers that stepped in and robbed them of the fruits of their victory, the day may not be distant when we shall find ourselves driven out of the commerce of China altogether. Enterprising and clever as the Japanese are, the trade they could give us is not sufficient to compensate us for the much larger business which we do now with the immense population of the Chinese Empire. It is quite conceivable, moreover, that if we neglect Japan she too might be overwhelmed by the combined attack of Russia and Germany, and herself become a dependency of one or other of these powers. This is a contingency too dreadful to be contemplated with equanimity; and, if there be anything in our boast that we are the friends of the free, we certainly ought to make haste to let the Japanese know whether we mean to help them in every just quarrel. Not only so, but, in proof of our capacity to do this, we ought to establish at one or more points of the Chinese coast. A naval post, for our fleet is absolutely necessary there—one at least, but there will be no harm in our having more—one, and that the most important in the South, and another a point of observation somewhere in the neighbourhood of the Gulf of Pi-chi-li. It would hardly be possible to illustrate more strikingly the sham nature of the Imperialist boasting now in fashion, than to contrast our apathy in this matter of the further Eas and our immense interest there, with the zeal and impetuosity with which we rush into costly wars in regions of the earth where there is no trade for us to do, except it may be the insignificant trade surrounding gold digging, and where we cannot settle any of our surplus population. It may be said we cannot settle any of it in China, a country already teeming with people, and that is so; but there is almost unlimited scope for the extension of profitable channels of employment in the civilising and guiding of this great mass of people, and of trade. And the question we have to settle with ourselves is, Shall this be done with our help, or without it? Are we to lead the way, as hitherto, or fall back into the third or fourth place?

When we speak of establishing posts on the Chinese coast, it is by no means our purpose to advocate any imitation of the piratical example set by Germany and Russia. Whatever ports we may require as a refuge for our fleet in the Chinese seas, or as fortified posts of observation, ought to be acquired by purchase, either as freehold outright or on a long lease. There can be no doubt at all that Pekin would be only too pleased at the present time to listen to any offer of money, and it, therefore, is a splendid moment for striking a bargain. We might obtain a harbour or arsenal in the Canton River, a position near the mouth of the Yang-Tsze-Kiang, that great river of Central China, the commerce of which we are bound by the instinct of self-preservation to keep under our own control; and if it were necessary and not too alarming, we might even possess ourselves of the port of Wei-Hai-Wei, failing that, some place on the Gulf of Pi-chi-li, near the mouth of the Hoang-Ho, might be available. In short, our naval commanders out in that region should be instructed to promptly examine the most likely points on the coast of the Chinese Empire for the establishment of naval arsenals and depots, and negotiations ought to be at once entered into with the Tsung-Li-Yamen for the acquisition of the points selected, with a suitable amount of land in their neighbourhood. If it cost us two or three millions to acquire the necessary territory and harbours, the money might easily be raised on a short annuity, and would be money well spent. It would also give most seasonable help to the Chinese Government, which is in a more impecunious condition than it was even at the close of the Tai-ping Rebellion. And better this, surely, than another loan "guaranteed" by Russia, under conditions sure to hasten the collapse of the Tartar Empire in her favour.

As we write the rumour circulates that the British Government is about to stand sponsor with the London Market for a loan to China. The *Times* of Wednesday, quoting the *Cologne Gazette*, put the amount at £16,000,000, and made some very sensible remarks about the supposed policy of England in the matter. On principle, the guarantee of the credit of one State by another cannot well be defended; but expediency sometimes overrides principle in this world, and the habit is spreading which substitutes the *main mort* for the "mailed fist" as leading agent in the subjugation of the weak by the strong. A mortgage on China might not be a bad investment for us; and, provided our Government takes care to obtain substantial concessions from that of Pekin, we might do worse than help the Chinese out of their great impecuniosity. The *rendezvous* port, or ports, for our fleet might be bought or leased as the Germans have leased Kiao Chau, and, in addition, ten or more millions might be raised on England's acceptances, so that, say, provided that all Chinese ports, not only on the sea but on the great water-ways, were thrown open to trade, that the Customs service was put definitely under British control, and that order is introduced into the provincial dues—squeezes, *Likin*, or whatever they may be in matters of finance—now too arbitrarily levied by the semi-independent governors. It would be hopeless, we imagine, to attempt to assume the direct management of any portion of the internal revenue, but British Consular Agents ought to be distributed over the whole Empire, and ample guarantees taken for their safety. Under some such conditions a loan might be endorsed by us and China delivered from her present embarrassments without offence to the Japanese, whose trade would benefit by the reforms as well as ours. With the Japanese for our allies and the Chinese under permanent and enforcible obligation to us we need not care much whether Russia and Germany are offended or not. Nor need we interfere with Russian designs on Northern China.

Critical Index to New Investments.

As far as possible the contents of this Review will deal week by week with the affairs of the week. In a first number, however, some slight latitude may be admitted. We do not propose to go back for a month and to examine the prospectuses issued during the month which has elapsed since our final monthly issue appeared in the usual way readers have been accustomed to under this heading, but a little general discourse upon the more prominent features of recent company promotion may not be out of place.

Towards the end of the year the pace at which companies were manufactured for public consumption became fast and furious, and the quality of the wares offered did not improve with the quantity. On the contrary, the faster the pace grew, the wilder became the projects in which imaginative promoters sought to interest the public. What could be more fantastic, for example, than Youde's Bill-Posting, Limited, a new venture whose flaring advertisements dazzled the eye of the newspaper reader for a week or more before Christmas. That a thing of this kind, organised by a man of no strong position in the world of finance or business, possessing no monopoly in the bill-posting trade, or anything else, should have the effrontery to ask for two and a quarter millions of money is something to marvel at. Happily this thing failed, and the subscriptions were returned. The Trinidad Lake Asphalte Company, with its modest £900,000 in shares and debentures, appears to be another example of cupidity gone mad. We believe this pitch lake, for it is more pitch than asphalte, was originally worked by a company with a few thousand pounds capital, and now it comes forward with the demand for this enormous sum at the instance of a vendor from America. If the Clerk of the Fulham Vestry is to be credited, the substance in which this company proposes to deal is not suitable for paving streets; but that does not matter if only shares are subscribed.

We might go on instancing company after company, brought out with the most extravagant pretensions, and making the most unheard-of demands on the purse of the public, and on its credulity. It is hardly worth while, and yet there is one company about which we should like to say a word, because of the man nominally at the head of it. Considerable surprise was expressed in the City when the Marquis of Dufferin and Ava, who has been Governor-General both of Canada and of India, and who but recently retired from the post of British Ambassador to France, allowed himself to be nominated chairman of the London and Globe Finance Corporation, Limited, a concern on all fours with the lamented and badly reduced Trustees, Executors, and Securities Insurance Corporation, Limited, founded by Mr. Leopold Salomons. That is to say, this London and Globe Corporation is a company-promoting agency whose principal purpose is to make as much money as possible out of the things it creates or buys cheap to sell dear. This may be all very well for the ordinary financist, whose only object in life is to get speedily rich, but it is not a business in which a nobleman and gentleman can take part without injury to his position and discredit to his order.

The worst of it is, that having once entered into partnership with financial gentlemen in operations of this sort a man has to go on obeying their orders, and, accordingly, we find the Marquis of Dufferin and Ava going before the public as chairman of an affair called the British America Corporation, Limited, with a nominal share capital of a million and a half in £1 shares. Alongside the Marquis we also find Lord Loch, a brother director of his on the London and Globe concern, and also an ex-member of the ornamental and diplomatic governing class of this country. In order, perhaps, to mitigate the feeling of soreness created in the market by the peculiar manner in which the shares of an Australian mine lately bought up and re-sold at an enormous profit (if re-sold) by this London and Globe concern were allotted, the shares in this new British America affair were offered first to the London and Globe shareholders alone. Whether they took them or not we cannot say, but there is not much inducement to the public to take them. The whole thing appears to us to be flimsy in the highest degree—a mere attempt to utilise for an ignoble gain the sudden craze which has arisen about the gold deposits on the Yukon River in the far North-West. For certain properties and rights, for sundry mines "believed to be of great value and among the best in British Columbia," for the assets and goodwill of the Alaska Commercial Company, by no means a

stupendous affair we should think, for sundry stores, for town site property in Dawson City, for "claims," which may be located by an exploring party sent out to explore the Sweetlaritska River and so on—a bundle of possibilities merely—this new concern is to give half a million of its shares, leaving one million to be subscribed in cash, the money to be paid up promptly in full on allotment. It is lamentable to find men in the position of the Marquis of Dufferin and Lord Loch acting as figure-heads and decoys for what is little better than a "wild-cat" venture like this. Experience never appears to teach such people.

Whether they are so completely ignorant of the ways of financiers as to always be an easy prey, or whether they are afflicted with poverty, and anxious to make money as gourds grow, is hardly worth while discussing. That they do lend themselves to this kind of finance is a lamentable fact. Just as surely as the earth fulfils its orbit round the sun will the day of reckoning arrive for companies of this kind; in the future it is bound to be precisely as it has been in the past. There never is any real variation in the history of bubble-company making. Fashions in it pass over us in waves and cycles, beginning modestly with small companies and comparatively moderate profits, then growing and growing until they ultimately expand into monstrous proportions. When the height of folly has been reached comes collapse.

We do not think that collapse is very far off now for some of our latest freaks in this line, for the public has not been subscribing of late to the great bulk of the monster creations of the financial imagination. We can tell that they have not, to some extent, by the lavish profusion with which prospectuses have been advertised. The inference is also tested by the attitude of the Stock Exchange, which finds that it cannot deal freely in the shares of the majority of these companies. There is "no market" for them, as the phrase runs, the said shares being held in large masses by that class of people described as underwriters, a class of which, unless we are much mistaken, Lord Dufferin has made himself a member, through underwriting 50,000 shares in this British America Corporation. Now, "underwriting" is a very nice business if you can be sure of selling the shares you have provisionally undertaken to purchase, either directly they have been allotted to you or before allotment. Commissions of 10, 15, 20, sometimes even 50 per cent. are earned by the mere signing of one's name, nothing more, unless it be the chance of an extra haul through sales to the gudgeon public at a premium now and then, but this operates best under the "call of shares" system.

Should the public take the shares, the underwriter just bags his commission, and does not have to risk a penny; but if the public fails to take the shares things are rather different. Then, instead of receiving money, the underwriting fraternity have to find it. And during the last two years, speaking moderately, a large proportion of underwritten issues of capital has never been sold to the public. "Who has got the shares?" may be asked in the market. "Oh, the underwriters," is the answer. Strive as they may, these enterprising fellows cannot escape from their liability. They have made themselves responsible for so many shares, and must take them up and find the money for them whether they like it or not, the general public, whose money they hoped to finger, having failed to do so. A question, therefore, now arises, "Where does all the money come from which enables the great body of underwriters of new companies in and around the Stock Exchange to keep an unbroken front to the market in spite of their numerous and continually increasing commitments?" We should not like to answer off-hand, but significant indications are not wanting that some of the more imprudent among the banks have committed themselves to this form of business enterprise too deeply for their profit, although we trust not too deeply as yet to imperil their solvency. It is impossible to particularise, but if the intelligent reader will note down for himself the names of those banks which appear most frequently upon prospectuses, not merely as occupying the humble position of custodian of the cash, but as issuer of the capital submitted for subscription, a very shrewd idea may soon be arrived at as to the banks which are most likely to have to write off more or less stupendous losses when reckoning day comes. A 6 per cent. bank rate for three months is all that is required to disclose the ravages of the promoter and underwriter manœuvres, and we are working towards that.

New South Wales Government Three per Cent. Inscribed Stock.—Second issue of £1,500,000, offered at a minimum price of 99 per cent. The loan is repayable at par, October 1, 1935, and the proceeds are wanted for railway and other permanent public works. Interest due April and October, and tenders will be received at the Bank of England on Tuesday next. The issue will rank *pari passu* with the stock already in the market, which is quoted at about 103. Recent issues have been as under:—

Date.	Amount offered.	Minimum price per cent.	Average price obtained per cent.	Interest per cent.
	£		£. s. d.	
April, 1888	3,500,000	102	103 12 2	3½
July, 1889	3,500,000	102	102 8 0	3½
September, 1891	4,500,000	95	95 0 5½	3½
September, 1894	832,000	100	101 14 8	3½
October, 1895	4,000,000	94	96 18 3	3

The public debt of the Colony is about sixty-two millions and the debt per head of population rather over £48. New South Wales, however, has recently made more progress than the other Australian Colonies, and the outlook is not unpromising. The minimum of the new issue is placed rather low-looking, but underwriters like to see a good premium quoted before allotment.

City of Toronto Corporation Loan.—Issue of £213,000 sterling Three-and-a-Half per Cent. General Consolidated Loan Debentures redeemable July 1, 1929. Tenders will be received at the City Treasurer's Office, City Hall, Toronto, up to January 25; purchase money payable 5 per cent. on allotment, balance on delivery; interest due January and July. Net debenture debt of city, including present renewal issue, £3,463,700; value of assessable property, £26,711,409; estimated value of property owned by city, £2,670,000. Estimated revenue for last year is £590,000, of which three-fourths comes from taxation. The population of the city is 200,000, so that the debenture debt comes to quite £17 per head. The city has several higher interest bearing issues falling due within the next few years, and at 106½, which is about the price the bonds may be expected to go at, they should be a passable investment.

The Barcelona Tramways Company, Limited, offers at par an issue of £100,000 Four-and-a-Half per Cent. Redeemable Debenture Stock, being one half a total creation of £200,000, the whole of which will be a first charge, subject to an outstanding balance of 5 per cent. debentures, now amounting to £53,800. Interest is due February and August, and the stock can be redeemed at six months' notice at 105 not earlier than August 1, 1903, and not later than February 1, 1931, by a cumulative sinking fund of 2 per cent. by purchase or drawings. The money is wanted to convert the present system into an electric tramway, which work is now in progress, and is expected to be completed in time for the summer service this year. Remaining half of this stock is reserved for the redemption of the existing 5 per cent. debentures, and for further expenditure. Company was formed in 1872; has a share capital of £300,000, of which £70,000 is unissued, and operates 17½ miles of line, which will be shortly increased to 19 under various concessions, the earliest of which expires in 1931, and the rest in the following years up to 1937. Average

net earnings for three years, 1894-6, were £12,840, or nearly double the amount which will be required for debenture interest, and the substitution of electric for animal traction should lead to additional profits. Although Spain is far from an ideal country in which to trust one's money, the debentures should provide a good enough investment.

CITY OF SANTOS IMPROVEMENTS COMPANY, LIMITED.—This company, which has an issued share capital of £135,000 in £10 shares, of which 10,000 are Seven per Cent. Non-Cumulative Preferred shares and 3,500 Deferred, is now offering for subscription an issue of 10,000 Six per Cent. Cumulative Preference shares of £10 each at par. Company was incorporated in 1880 to acquire a concession for fifty years from 1870 to supply the city of Santos with gas and water, and to establish and work tramways. The tramways were sold in 1890 for £80,000, and the money used chiefly in redeeming £75,000 debentures issued in 1890. Of the gas and water it has a monopoly, and it is claimed that Santos is now the principal shipping port in the world for the export of coffee. Population of the city has grown since 1880 from 12,000 to 36,000 persons, and as the present water supply cannot provide for more than 4,000 persons, a fresh contract has been made with the city, which has granted the company a new concession, expiring in 1930. Under this, the company undertakes to carry out works necessary to supply 70,000 persons; the supply to all dwellings is made compulsory, and the water rates charged are fixed on a gold basis by means of a sliding scale, according to the rate of exchange; and the Government further undertakes to pay the company annually £3,000 for public services. But the Government reserves the right to expropriate the company after eighteen years if it be for the public good, in which case the works, plant, &c., are to be taken over at a valuation in gold based on the actual expenditure incurred by the company on the same. The money now to be raised is for the construction of new works, which will require about £150,000, the balance to be raised by debentures. The company has not done over well in the past. For the fine year ended 1891 the deferred shares got 7 per cent., but for 1892 the preferred received 6 per cent., and for 1893 and 1894 only 3 per cent., for 1895 6 per cent., and for 1896 5 per cent. For a Brazilian security, the shares seem no great catch, and the existing preferred £10 shares, which are non-cumulative, can be bought for 8½.

Messrs. J. S. Morgan and Co. have, in conjunction with Messrs. J. P. Morgan and Co., of New York, taken a first step in the conversion of the maturing and high interest bearing bonds of the New York Central Railway into the new Three and a Half per Cent. Consolidated bonds. They offer to receive an amount not exceeding 20,000,000 dols. in First Mortgage Seven per Cent., First Mortgage Six per Cent. Extended, Four per Cent. Certificates, and Five and Four per Cent. Debentures for exchange on a fixed scale determined by the present value of the maturing bonds calculated on a 3½ per cent. basis, the New Three and a Half per Cent. to be accepted in payment at 103 per cent.

Company Reports and Balance-Sheets.

THAT renowned mining engineer Mr. Bainbridge stated lately when giving evidence in the case of Holland *v.* Hess, that "dividends are a very severe test of a mine." These words strike us as full of the deepest wisdom, and their truth is beautifully illustrated in the balance-sheet of the Eagle Hawk Consolidated Gold Mining Company, Limited, which reached our hands the other day. This company has a paid-up capital of £117,000 only, and it received not less than £19. 4s. 8d. last year for its gold. To attain this wonderful result the mere expenditure on wages, salaries, and directors' fees in Australia and London came to the good round sum of £5,634. At what rate of progression must this company move in order to reach the dividend-paying state? Its directors alone require £500 a year to solace them for their labours, and all the shareholders as yet get for their money is the "encouraging views" of Sir John McIntyre. Still gold at £19 per pennyworth seems dear.

E. W. TARRY & CO., LIMITED, is a company which supplies machinery and other mechanical requisites for mining companies in South Africa, and it appears to own a large and progressive business. The accounts made up for the year ended August 31 show that the gross profit came to £88,144, against £84,351, but expenses were higher in proportion, so that the net profit is only £38,302, compared with £42,619. In spite of this, shareholders get a dividend of 15 per cent., together with a bonus of 5 per cent., which absorbs £25,000, compared with £18,750 distributed a year ago. Another £10,000 is added to reserve and £1,000 to reserve against bad debts, but the balance remaining is only £14,596 against £19,794. In some respects the balance-sheet shows improvement. Sundry creditors have been reduced from £22,604 to £6,647, and the £10,000 temporary loan against security has disappeared, but £1,090 is written off bad debts reserve, though it does not naturally follow that the two items are connected. Amongst the assets, goods have increased £19,000; freehold properties, £21,000; and machinery, plant, and tools, £3,900; while book debts and bills receivable are down £8,700 at £42,229. A branch has been opened at Bulawayo. Good profits appear to be made, but the business must be to a certain extent speculative.

THE COLONIAL BANK.—The business of this old institution—the charter dates from 1836—continues to decline, and the total of the balance-sheet is now not much above four millions, being a reduction of a million in four years. For the first half of last year the bank made a net profit of only £18,511, or little more than 3 per cent. on the paid-up capital of £600,000. This compares with a profit in the previous year of £31,804, so the dividend has to be reduced from 5 to 3 per cent. The note circulation is £24,000 less at £409,000, while deposits are down £85,000 at £1,757,000, and bills payable and other liabilities £558,000 less at £1,233,000. On the other side, cash and investments are down distinctly, and there is a drop of just upon £200,000 in bills discounted and advances. We could hardly have expected a more favourable showing considering the depression in business in the West Indies, which has been naturally increased by the gloomy report of the Royal Commission appointed to enquire into the industrial condition of the Colony. The outlook for the self-helpless sugar planters, and therefore for the bank, is not at all promising. In the circumstances the directors are wisely seeking powers to do business elsewhere than in Jamaica and the other West Indian islands, and they are also endeavouring to get power to reduce the nominal value of the shares, which means a reduction in the uncalled liability, now amounting to £70 a share, in addition to shareholders being liable for the note circulation. This will be a great relief to those holding shares in the bank, and will help to moderate their anxiety regarding the future, but should not its accounts be overhauled first?

JOHN CROSSLEY & SONS, LIMITED, have had a comparatively bad year, and the dividend is put even lower than we ventured to suggest a year ago. Profits and dividends for the last four years will be gathered from the subjoined figures:—

	Year's Profits.	Transfer from Reserve No. 2.	Dividend per cent.	Balance Forward.
	£	£		£
1894	74,074	15,000	10	585
1895	84,225	5,000	10	713
1896	83,309	6,000	10	924
1897	66,897	4,000	7	544

In each of the four years the amount distributed in dividends has been in excess of the actual profits earned; and while it is true that Reserve Fund No. 2 was formed to equalise dividends, we are of opinion that it has been drawn upon too heavily. When a trading company makes a profit of £74,074, as Crossley's did in 1894, £89,000 is too much to distribute by way of dividend. This policy, however, is now at an end, for Reserve No. 2 has been used up, and this year's dividend will have to come entirely out of profits. No trading account is published, and the only items of interest given in the balance-sheet are, on the one side, liabilities, book debts, &c., which have declined from £226,000 to £191,000; and on the other, freeholds, plant, stock, book debts, minerals, &c., amounting to £1,700,000. This item would be better for some sub-division, but we are glad to see that these assets appear to have been written down by £57,000. The company has no doubt suffered from diminished trade in Yorkshire, which does not seem likely to improve at present, and the unfavourable character of the report has knocked the shares down about £2. At their present prices the preference shares yield nearly 3¾ per cent. and the ordinary 4⅜ per cent., which is not a brilliant return considering the prospects of the company, for if there had been no reserve to fall back upon the dividend on the ordinary shares for last year could not have exceed 6¼ per cent.

ORIENT STEAM NAVIGATION COMPANY.—As a reward for their brilliant services a faithful body of shareholders have decided that they could not do better than re-elect the former managers, Anderson, Anderson, & Co. and F. Green & Co., for a further term of ten years. One plucky shareholder mildly ventured to move that a committee be appointed to take over and investigate matters and report to the shareholders, and he had the boldness to assert that the board had never yet presented the accounts in accordance with the articles of association. Without a fellow-shareholder to support him, the poor man was promptly ruled out of order, and told by a well-known Q.C. that his remarks were a gross insult, and that the affairs of the company had been managed with "marked ability." Well, they may have been; but there is no getting away from the fact that its affairs have been in low water for a long time, and the dividend record since 1887 is not a picture to have hung up in board room. In that year there was no dividend; then 5 per cent. was distributed for 1888 and 1889, and 3 per cent. for 1890. In the next four years there was no dividend, but for 1895 and 1896 it was possible to squeeze out 2½ per cent. Thus for ten years the average dividend is less than 2 per cent., but an admiring body of shareholders are content to let the two managers go on taking 4 per cent. of the gross earnings for another ten years, thankful to receive any small return that may be left for them.

SIR HECTOR M. HAY, Bart., who has been associated with Messrs. Mocatta and Goldsmid for the last fifty-two years, has retired from the firm. It has taken into partnership Mr. John R. Villiers, who has for some time past signed per procuration.

THE announcement comes from Perth, Western Australia, that the Government intend contracting a loan of £1,000,000 in March next.

French Finance and Trade.

(From our Correspondent.)

Activity in the Bourse—The Russian Conversion—French Railways.

Paris, January 5.

The Liquidation of the "Valeurs" and of the "Fonds d'Etat" has been completed, with very few exceptions, quite to the advantage of the buyers. Every "Bourse-day" since the new year has been more and more animated. Some people were afraid at the opening to-day, that the "reports" (contangoes) might be raised, but these apprehensions did not prove to be well founded. The rate was between 3½ and 4½, according to the quality of the shares and of the "reported" people. These rates being really moderate, the liquidation is now well forward, and in a few days the payment of the "coupons" will set free a considerable amount of money ready for re-investment.

The general tone of the market is good, and the Bourse to-day has been very busy indeed. Our Rentes are firm; the Three per Cent. Perpetual was at 103·40 at the opening, and 103·35 a little later, closing at the same figure; cash price, 103·10. The Three and a Half, which had reached 10 yesterday, stand to-night at 10·20. The premiums (discounts) are still offered on a large scale, so that the d/25 finds buyers at 15 centimes difference from the "ferme." As we are at the 5th of the month, one may suppose that such sales are not judicious. These very vendors being mostly buyers of "ferme," incited by the last months' receipts, might be suddenly turned out by "run-about" vendors. I believe that such a position may be worked against them one of these days.

Our Banks are affected differently. The Banque de France stands at 3,550 cash, and 3,535 for account, showing falls of 25 and 30 francs in the last séance. There is no good reason for believing that the new arrangements introduced in the privilege charter will be profitable to the shareholders, and certainly the prices would have fallen lower had not the new governor been a much more able man than M. Georges Pallain. The Credit Lyonnais is the most active of the Credit Societies, ranging between 803 and 813 francs. Speculators expect some profit from the Vienna Municipal Loan, about which our great financial house is in negotiation, since the Deutsche Bank has not been conciliated. The Banque de Paris et de Pays Bas stands firmly at 892, and the Banque Internationale advances to 618. Société Générale is, at 532, quiet; so is the Comptoir d'Escompte at 586. The Comptoir announces that it redeems or converts the 5 per cent. debentures of the Transcaucasian Railway. The "conversion" is completed in 4 per cent. shares free from every Russian duty or tax.

The French railways are very firm:—Nord, 2,060; Lyon, 1,830; Midi, 1,450; Orléans, 1,840; Est, 1,090; Ouest, 1,210. The rise of our great companies has been a very remarkable one during 1897. The principal gains have been made by the Lyon, with a 180-francs advance on the quotations of December 31, 1896; and the Nord, which has gained 200 francs from one year to the other. These results accrue from the far better receipts of the companies. Though these have no immediate effect on the dividends (the Nord excepted, which is not under the régime of the "guaranteed interest"), they are generally considered as indicating an improved future. The P.L.M. Company has signed a new convention with the State, approved of last week by the Chamber of Deputies, by which the "compensation" of the two debts—that of the company and that of the State—against each other is allowed, so that the P.L.M. Company, which has not asked for guarantee for two years, will be able to realise all the receipts. You know that the sums given to the company by the Treasury for the completion of insufficient receipts are only "reimbursable advances," producing simple interest at 4 per cent., and constituting a "conditional" debt, exigible so far only as the further net results allow of it, after the yearly payment of the guaranteed revenue to the shareholders. The companies, on their side, are creditors of the State for the advance in money and work, made by them for the construction of the secondary lines since 1883, reimbursable by annual instalments.

For instance, the Lyon Company need never have put aside anything from its earnings beyond the forty-four million francs which are necessary to pay the yearly 55 francs dividend to the shareholders. To allow "compensation" to be made between the two debts, the company has given up the benefit derived from the "conditionality" of its debt; it agrees to the repayments to be made actually, and appropriated *partly* to the definitive reimbursement of its excess receipts to the State. The State has the advantage of certain payment. The full payment has been fixed at 150,897,478 francs.

Our industrial shares Bourse is very active. The General Traction Company, recently formed and introduced on the market, is being pushed on towards 125 francs; a good many electrical concessions have been granted to that syndicate. The General Omnibus Company's receipts for 1897 amount to 45,684,370 francs, an increase of 1,396,609 francs on the preceding year. The company are shortly to adopt mechanical traction for their 'buses. A good many new lines will be opened in 1898.

I give you the total amount of the credit operations during 1897—"Issues" or "introductions":—

	Francs.
Emprunt de l'Etat de Minas-Geraes 5 per cent.	50,700,000
25,000 obligations Compagnie Fives-Lille 4 per cent. ...	12,500,000
5,555 obligations Grand Hôtel 4 per cent.	2,777,500

12,000 obligations Appontements de Pauillac	6,000,000
32,400 actions Oural-Volga à 595	19,278,000
150,000 actions Compagnie Générale de Traction ...	15,000,000
25,000 obligations Compagnie Générale de Traction ...	12,500,000
20,000 act. nouv. Thomson-Houston, émises à 750 ...	15,000,000
10,000 actions nouvelles Briansk émises à 1,000 ...	10,000,000
30,000 act. nouv. Banque Internationale émises à 580...	17,400,000
5,000 act. priv. Omnium Russe	3,150,000
30,000 obl. Omnium Russe	15,000,000
8,000 act. Forces Motrices du Rhône	4,000,000
16,000 oblig. 5 per cent. Forces Motrices du Rhône ...	8,000,000
11,500 oblig. Trignac...	5,750,000
2,000 actions Penarroya à 1,500	3,000,000
6,000 act. Toulouse à Boulogne-sur-Gesse	3,000,000
5,000 obligations Sels Gemmes	2,500,000
20,000 actions Mines d'Héraclée à 600 francs.	12,000,000
Fr.	250,555,500

I must add the participations of French capital in oreign loans, such as the Five per Cent. Hongrois Ponts de Fer, the Three and a Half per Cent. Autrichien (116,840,000 couronnes), the lettres de gage of the Banque Foncière (Russ.) del Noblesse, &c. I believe the total of investments amount to about 450 or 500 millions. These figures are interesting to compare with the annual hoarding which amounts in France to about a milliard francs at least. Does all the rest go to the *bas de laine?*

Louis de Tourville.

The Produce Markets.

GRAIN.

The markets opened dull yesterday week, sellers showing more disposition to deal, but buyers were cautious and waiting for "developments." They preserved this attitude during the week, and on Wednesday the market was inactive, with sellers and buyers alike indifferent. Though business was carried on slowly, prices were generally maintained. At Mark-lane, English wheat was in short supply, but buyers held off, reds offering up to 38s., and whites 39s. to 39s. 6d. Foreign was in slow request, and to induce business less money must have been taken. Flour was unaltered in value, but the trade was nominal. Maize was irregular in price and limited in demand. mixed American, 16s. 3d., ex ship; old mixed, 12s. 3d., ex quay; and Galatz-Bessarabian at 18s. ex quay. Barley was very quiet at 15s. 6d. ex ship, Odessa-Nikolaieff. Oats moved very slowly; common Petersburg, 16s. 3d., ex quay; Canadian white, 16s., ex ship; Canadian mixed, 15s. 9d.; and mixed American, 15s. 6d. to 15s. 9d. There was no improvement in the cargo market, and no cargo sales were reported. Californian, prompt, were obtainable at 37s. 3d., and Walla Walla, January, at 36s. Oregon, September, may be had at 39s., while for a handy cargo Manitoba, January shipment, 38s. 4½d. is bid; No. 2 Chicago, January 14-February offered at 36s. 6d.; Entre Rios, steamer, January 15-February, to be had at 35s. 6d.; for Santa Fé a bid of 34s. 6d. is solicited, and for a March-April steamer 34s. is wanted. In wheat futures at Liverpool the market was quiet at ⅛d. to ¼d. decline.

OFFICIAL CLOSING VALUES (100 lb. deliveries—January 6).

	Jan.	March.	May.	July.	Sept.
Red American Wheat	—	7'3⅜	7'2⅛	6'11⅝	6'6½

In New York on Wednesday wheat opened easy, with ½ c. decline, under increased crop estimates, then revived on some covering, but again declined on a disappointing export demand, and closed weak, ⅞c. lower, spot weak; spring 101⅝c.

COTTON.

The Liverpool market was closed for several days this week for holidays. The spot market has been fairly active throughout. In American, good business has been done at rather easier rates. Brazilian and Surats remain dull without change. Egyptian in active demand at steady prices. Futures dull, and closed ½ point below Tuesday's prices. Wednesday's tenders at the Clearing House were 400 bales American and 250 bales Egyptian on new dockets.

NEW YORK CLOSING VALUES.

	Spot.	Jan.	Feb.	Mar.	April.	May.	June.	July.	Aug.	Sept.	Oct.
Wednesday ..	5⅝	5'74	5'76	5'79	5'84	5'88	5'93	5'97	6'01	6'01	6'02

WOOL.

The total decrease in the importation of Colonial wool into Great Britain during 1897, as compared with 1896, is stated in Messrs. Brown and Eagle's circular to have amounted to 24,006 bales. The shipments direct from the Australian Colonies and Cape of Good Hope were 428,500 bales against 518,500 bales in 1896. The total arrivals of Colonial wool for the London sales in 1897 were 1,627,747 bales. There were sold here 1,323,130 bales. Messrs. Jacomb, Son, & Co., in their annual circular, state that "the general course of trade during the first half of 1897 bears striking contrast to that of the last six months, for whereas during the former period great excitement was experienced in the feverish heat of express deliveries to the United States in avoidance of an obstructive customs tariff there, the latter has been marked by the deadly dulness of one of the too often recurring disputes between employers and employed, leading to a general paralysis of many of the home industries. The hopes that were generally felt at the termination of 1896 that better prices for wool would be forthcoming in the year just passed have been disappointed, for at no time during the last twelve months has there been the much-needed spurt, either at home or on the Continent. The exception to this, however, is in the case of the U.S.A., as, anticipatory of higher protective duties, buyers from there, in the early months of the year, secured suitable wools with unprecedented eagerness, and, before the tariff arrangements had been settled, swept the board of all the best deep grown merino wools, and subsequently turned them over to great advantage; thus somewhat checkmating the expectations of our home manufacturing districts. Throughout the week the market has been rather cheerful, with a firmer tone. Further arrivals of River Plate sheepskins to the extent of 569 bales, chiefly Buenos Ayres produce under mark N in diamond, were offered by auction at Liverpool on Wednesday, and attracted a good attendance of buyers. Competition was active, and the whole of the offering was sold without change from the prices ruling on December 17. Matadero first—138¼ lb. making 4⅝d.; 144½ lb., 4¼d.; 160 lb., 3⅝d.; second—134 lb., 4⅝d.; 149⅜ lb., 4¼d.; 159⅞ lb., 3⅜d.; third—135¾ lb., 5d.; 130½ lb., 4⅜d.; fourth—141¼ lb., 4⅛d.; fifth—143 lb., 5d., all under mark N in diamond; and three-quarter woolled merino mark F.G.T.—106 lb., 4½d. to 4⅝d.; cross-bred half-woolled mark E F over U—77 lb., 4½d. per lb. The next Plate wool sale will be held on January 14.

METALS AND COAL.

There has been an active business in copper during the week, and on Wednesday trade was done in cash at £48. 8s. 9d., or 1s. 3d. above the quotation of the previous day. Subsequent transactions were, however, put through at £48. 7s. 6d. In the afternoon, however, cash rallied again to £48. 8s. 9d., and nearer the close advanced to £48. 10s., three months also hardening to £48. 17s. 6d. The close was firm at rates, making a rise of 2s. 6d. for cash, and 1s. 2d. for forward delivery.

SETTLEMENT PRICES.

	Jan. 5.	Dec. 29.	Dec. 22.	Dec. 15.	Dec. 8.	Dec. 1.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
Copper ..	48 10 0	48 5 0	48 2 6	48 7 6	48 10 0	

The iron market has been inactive, and little business has been done during the week.

SETTLEMENT PRICES.

	Jan. 5.	Dec. 29.	Dec. 22.	Dec. 15.	Dec. 8.	Dec. 1.
	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.
Scotch ..	45 6	45 4½	45 [illegible]	45 0	45 0	
Cleveland ..	40 4½	40 3	40 [illegible]	40 1½	40 3	
Hematite ..	48 4½	48 4½	48 4½	47 10½	47 10½	

In the coal market there has been little doing, and the demand has been insignificant. In the seaborne department the situation was practically unaltered so far as price is concerned, but only one cargo was sold, which, however, found a market without difficulty. Official quotations are unchanged, 17s. and 16s. being announced as the value of Hetton Wallsend and Hetton Lyons respectively—usual market terms in the pool. In the inland trade there was very little movement, and, with an absence of orders, there was in some cases evidence of a disposition to quote easier rates. Best West Yorkshire, 10s. to 10s. 6d.; Barnsley selected, 9s.; soft nuts 7s.; Sheffield silkstone, 8s. to 8s. 6d.; best Derby Blackshale, 9s. to 9s. 3d.; North Derby Tupton, 7s. 3d. to 7s. 6d.; Erewash brights and nuts, 7s. 6d. and 9s. 3d. respectively. Since Monday 15 coal-laden vessels have arrived in the Thames.

SUGAR.

The business done in sugar has been but moderate, though prices continue steady. Quotations:—Tate's cubes, No. 1, 15s.; No. 2, 14s. 1½d.; crushed, No. 1, 13s. 3d.; No. 2, 12s. 9d.; granulated, 13s. 3d.; yellow crystals, 12s. 6d.; Lyle's crystals, No. 1, 13s. 3d.; No. 3, 12s. 9d.; granulated, No. 1, 13s. 3d.; No. 2, 12s. 9d.; white, A, 12s. 9d.; B, 12s.; yellow crystallized, O and P, 12s. 6d. Foreign.—Granulated opened steady and ruled slow throughout the day, closing easy. Immediate D V sold at 11s. 1½d. and 11s. 0⅝d., combined to 11s. 0⅜d. Ready, Groningen, Glauzic, and E C H, 11s. 1½d. January, E C H and first marks, 11s. 1½d.; March, E C H, 11s. 3d.; March-April, first marks, 11s. 3d.; May-August, R A V, 11s. 6d.; first marks, 11s. 5½d., and sellers, f.o.b. Hamburg.—Cubes—F M S, ready, sold at 12s. 6d.; January-March, 12s. 9d., sellers; Meyer, ready, 13s., accepted; January-March, 13s. 3d., sellers; Hansa, prompt, 12s. 4½d., f.o.b. Hamburg.—W S R and S and T, prompt, 13s. 4½d.; A S R and cut loaf, 13s. 3d., f.o.b. Amsterdam.—Cane sorts firm and in fair demand, but little offering; beet futures steadier at ¼d. advance.

TEA AND COFFEE.

Tuesday's tea auction comprised 26,300 packages Ceylon, and common to low medium, also fine, met with good competition, and realised firm prices; while broken Pekoes ruled weak, many lots being withdrawn. Wednesday's auctions comprised 3,650 packages of Indian and 720 Java, which met with a steady demand. Terminal markets unchanged. At the coffee auctions on Tuesday 5,868 bags were offered, and on Wednesday 1,832 packages passed slowly. Futures on Wednesday opened weak upon continued large receipts in Brazil, and, after fluctuating, closed flat at fully 1s. decline. Closing values:—March, 31s. 6d.; May, 32s.; September, 32s. 6d.; December, 33s. Contracts registered, 6,000 bags Santos.

HEMP AND JUTE.

Hemp has been quiet, but steady and firm in price. At auction on Wednesday 30 bales fully fair to good Mauritius sold at £19. 10s. to £20. 15s. Manila—50 bales superior current sold at £19, and 250 good seconds, afloat by sailer, at £15. 15s., further 500 bales being withdrawn at the price. For shipment 1,000 bales fair current, February-April, sailer, sold at £17. 7s. 6d.; 1,000 superior seconds ditto at £16. 15s.; and a small lot, per distant steamer, at £17 5s. For May-July sailer there are buyers of fair current at £17. 10s. Jute has been generally firm. On Wednesday 600 bales first marks, January-February, steamer, London, sold at £10. 5s., and rather buyers, sellers holding for £10. 7s. 6d.

THE Bombay correspondent of the *Standard* says that the plague is still increasing in that Presidency. "Outlying districts which were free from the pestilence a few weeks ago now furnish every week scores of hundreds of victims." A far more severe trial, he adds, will have to be borne this winter than last in that part of the Peninsula. This is most serious news, and the only consolation to be found in it is in the hope that the sufferings of the people of India may at least rouse public opinion at home to take cognisance of the utterly forlorn condition of the bulk of the population in that misgoverned dependency.

THE companies that remain faithful to the Harvey-North combination—the Arauco Company, the Tarapaca Waterworks, the San Pablo Nitrate, the Great Boulder Mines, and a few semi-private concerns—have removed their offices from the old domicile to 55-56, Bishopsgate-street Within. The Woolpack building, which had such a notoriety in the palmy days of the late Colonel North, has, therefore, well nigh lost its character as the home of the group. Only the Nitrate Railways Company remains, for many other companies flitted some time back when they were able to shake off the grip of the North coterie.

THE PROPERTY MARKET.

Business was only resumed on Wednesday after the holidays at the Auction Mart, and there is consequently little to say about the week's business. Several sales of importance have, however, been recently arranged by private treaty. Mr. William Houghton has thus disposed of 3½ acres of building land in Walthamstow for £6,000, upwards of £1,700 an acre, a remarkable price for land in this district. At Launceston the little White Hart Hotel was sold the other day by Mr. J. Kittow for £2,350. Messrs. Maple and Co., of Brighton and Eastbourne, have recently had some good sales of leasehold and freehold properties in these places, the total amounting to £8,000.

Mr. Alfred Richards, of Finsbury-circus, is to have some rather important sales of stocks and shares at the Mart on the 28th inst. There are £11,701 of "C" capital stock to be raised under the provisions of the Tottenham and Edmonton Gas Act, 1882, ranking for a standard dividend of 7 per cent.; 1,000 additional ordinary £10 shares of the Lowestoft Water and Gas Company, ranking for a maximum dividend of 7 per cent.; £5,000 of ordinary stock in the Guildford Gas Light and Coke Company, ranking for a standard dividend of 5 per cent.; new issue of £5,000 four per cent. perpetual debenture stock of the Southend Waterworks Company; £4,100 four per cent. perpetual debenture stocks of the Ascot District Gas Company; and £970 of ordinary stock in the Taunton Gas Light and Coke Company; and £300 original stock in the Brighton and Hove General Gas Company.

Messrs. Newton, Edwards, & Shephard also announce sales at the mart, on the 15th inst., of freehold and leasehold properties and ground rents.

A GREAT SAVINGS BANK.

The Glasgow Savings Bank claims to be the greatest in the Kingdom. At the annual meeting held the other day, it was reported that the business of last year had been greater than in any former year. The balance due to 198,273 depositors was £7,402,509. The number of new accounts opened during the year was 35,302. There was a free surplus of £135,668. The Lord Provost, who presided, remarked that the Bank represented the largest amount of money invested by the public of any city. One gratifying feature in Glasgow was the large number of penny banks allied with the Savings Bank. In and around Glasgow there were 250 of these banks in active operation, conducted entirely by voluntary effort. The transactions totalled £80,000, and the number of youthful depositors was 90,000. Another speaker stated that the unfortunate engineering dispute had not affected the bank to any material extent. It had probably occasioned some withdrawals, but the general prosperity of the city had made up all deficiencies. Glasgow still justifies her motto.

The London and General Bank.—Mr. S. Wheeler, the Official Receiver and Liquidator of the Balfour group of companies, has given notice to the creditors of the London and General Bank that an eighth dividend of 7d. in the pound will be payable on Thursday next. This will make a total of 17s. in the pound returned to the creditors of the bank. Neither in this company nor in any of the other unfortunate companies connected with the "Balfour group" will a single penny ever be available for the shareholders.

The Editor of "Willich's Tithe Commutation Tables" writes to the *Times* to say that as a result of the corn averages for the seven years to Christmas, 1897, published in the *London Gazette* of Tuesday evening—viz., wheat, 3s. 5⅝d. per imperial bushel; barley, 3s. 1d. per imperial bushel; oats, 2s. 2d. per imperial bushel, each £100 of tithe rent-charge will for the year 1898 amount to £68. 14s. 11d. being on the commutation about 1½ per cent. less than last year The following statement shows the worth of £100 of tithe rent-charge for the last seven years:—For the year 1891, £76. 3s. 3¾d.; 1892, £75. 18s. 3½d.; 1893, £74. 15s. 2¾d.; 1894, £74. 3s. 9½d.; 1895, £73. 13s. 0½d.; 1896, £71. 9s. 6¾d.; 1897, £69. 17s. 11½d. The average value of £100 of tithe rent-charge for the sixty-two years which have elapsed since the passing of the Tithe Commutation Act of 1836 is £97. 9s. 11¾d.

Japan and China Mails.—A Post Office notice was issued Tuesday stating that mails for Japan and China will be dispatched from London, by way of Vancouver, during the next few months on the evenings of the undermentioned dates, which are all Fridays:—The 14th inst., February 11, March 11, and April 1. Mails will be made up in Ireland on the following day in each case. Parcel Mails for Japan will be made up at Liverpool in each case on the Saturday morning.

It is officially announced that the Spanish Government have consented to suspend the operation of the new regulations in respect to certificates of origin, which were to come into force on the 1st inst., until the 15th. Those interested in Spanish trade would do well, in the meantime, to inform themselves of the exact requirements of the new regulations.

According to Mr. Ottoman Haupt, the able Paris correspondent of the *Financial Times*, the total production of gold in 1897 will amount to £36,000,000; while the stocks of gold held by the leading banks and Treasuries of France, Austria, Russia, the United States, and Japan will have increased by about £47,500,000. On this reckoning some £11,000,000 of the old stock of the metal will have been absorbed. We believe Mr. Haupt under-estimates the gold production of the past year, but still there can be no doubt that it is less than the absorption, and the Bank of England has suffered by this absorption more than any other institution of the kind in the world. It is 20 millions poorer now in gold than it was eighteen months ago.

LAST YEAR'S SHIPPING AND FREIGHTS.

Mr. John White's annual review of the shipbuilding trade, supplemented by Messrs. Angier Brothers' report on the freight markets, give us a very vivid notion of the state of these important industries during 1897. One thing on which Mr. White very properly insists is the prejudicial effect of the prolonged engineers' strike upon shipbuilding. At the beginning of the year orders were abundant, and most of the yards had booked enough to keep them going for twelve months. There is no slackening of the orders now; but much of the work on hand has been waiting completion for months, and cannot yet be got rid of. From present appearances there is no saying when the work can be finished, and so the orders offered cannot be placed here. Some of them have been placed abroad. Mr. White, without expressing any opinion on the pending dispute, has some very cogent remarks on the injury done to trade by these incessant labour quarrels. He says most truly:—"The loss incurred by these strikes is immeasurable. Not only is there the loss to the parties directly concerned, but the distrust created among st customers as to when their orders will be executed through these incessant labour troubles causes many contracts to be placed abroad. The loss is therefore a national one, as other interests beyond the labour employed in building the ship and her machinery are involved in the production of every ship."

It was, therefore, only to be expected that there should be a diminution in the shipbuilding output of 1897 as compared with that of 1896. Mr. White gives the total at 1,122,824 tons gross register, comprising 712 steamers of 1,057,025 tons, and 222 sailing vessels of 65,799 tons. This is about 250,000 tons less than the output of 1896, and the loss may be ascribed to the engineers' quarrel. There still remains, however, a large addition to our mercantile marine; but in estimating the effect of this addition to our sailing power on the freight market we have to keep in mind the large amount of tonnage which is yearly removed from the British register. Last year the total so removed came to about 640,000 tons of steamers and 280,000 tons of sailing vessels, or 920,000 tons in all, so that the actual addition to the carrying capacity of our mercantile fleet is copmaratively small, and it can hardly be said that the present tonnage is in excess of the demand. There is yet, therefore no danger of a shrinkage in freights.

As to the fate of these old ships removed from the register, some doubtless represent losses at sea; others become dilapidated in various ways. Some are sold abroad, and continue competitors for freights for a year or two, while some are broken up and their materials sold. The foreign output of shipping has, however, also increased during the year—a fact mainly attributable, as we have said, to the engineering quarrel. At the end of September last our yards had under construction 877,387 tons of steamers and 9,740 tons of sailing vessels, and the greater part of the steam tonnage is still on the stocks. While our yards are thus lying idle, however, other countries are going a-head of us. Germany, for example, made considerable strides in shipbuilding; the United States have considerably increased their production; and even Japan has been making progress in the same direction. All which facts ought surely to be very carefully noted and remembered by the men who are now refusing to work, hardly knowing why they so refuse.

In regard to freights, the famine and plague in India greatly restricted the export trade, and homeward rates were consequently very low. Cargoes from the Black Sea and the Danube were also smaller than usual owing to the floods in Roumania, which destroyed large portions of the crops. Homeward freights from the Argentine were likewise small, through the failure of the harvest. It is true the cattle and dead meat business continued brisk, but the home trade proved largely unremunerative, so that towards the middle of the year many vessels, after discharging their cargoes at the River Plate, made sail for the Gulf and other ports of the United States in order to load up for home. In fact, the excellent business done with North America quite made up for disappointments in other directions. "America," says Mr. White, "has been the salvation of the freight market, and rates have continued remarkably good considering the large amount of tonnage thrown on this market from the Eastern and other trades." Messrs. Angier Bros. endorse this opinion. Not only was the American business very large, but freight rates gradually improved to a comparatively high level, and a large trade was done almost up to the end of the year, being only checked by the approach of Christmas. Australian business was not on a large scale, homeward freights having been contracted by the short wool-clip. The effect of the increased production of the American mines and the cheaper cost of rail transport to the Atlantic seaboard brought about a considerable diminution of shipments of ore to the Mediterranean. On the whole, however, the outlook for the present year is decidedly hopeful.

The gold shipments from Australia to London during last year are valued at £12,150,000. This is exclusive of Queensland and New Zealand.

The West India and Panama Telegraph Company announces that the rate from Europe to Jamaica has been reduced since the 1st. of this month from 5s. 10d. to 3s. per word. Rates to stations east of Jamaica and to Demerara will be reduced to a like extent. This notable fall in prices is the result of the projection of the Direct West India Cable Company last November. The latter company has a moderate short-dated subsidy from the Government, and will work in union with the Halifax and Bermudas Cable Company. The fight thus commenced will lead to the West Indies obtaining more reasonable telegraphic rates, as 5s. 10d. per word to Jamaica seems an anachronism, when one can communicate with Melbourne for 4s. 10d. per word, and the rate to New York is no more than 1s. per word. Altogether it seems a pity that the reduction in rates did not come before the second route was projected.

CONSUMPTION OF INDIAN TEAS.

MESSRS. GOW, WILSON, & STANTON report in their annual circular that the Home consumption of tea reached a higher figure in 1897 than ever before, viz., about 232,000,000 lb., or an increase of 5,700,000 lb. This increase benefited the India and Ceylon tea-growers alone, and the total consumption of British-grown tea rose last year to 261,000,000 lb., or thereabouts. This is more than half the tea consumed in one year by the civilised world. As the increase in the supply was smaller than the increase of production, the danger of an over supply seems less than many apprehended. Wherever the English language is spoken the use of tea is expanding, and now Australia and North America are the two best markets for Indian tea outside the United Kingdom. Russia, which has so long stuck by the Chinese, is now using increased quantities of Ceylon tea. The total output this season of Indian tea is estimated at 151,000,000 lb., against 149,000,000 lb. last. The tendency has been towards lower rates; the outturn of Ceylon is expected to reach 117,000,000 lb., as compared with 108,000,000 lb. last year. The total deliveries of tea in London in 1896-7 were:—Indian, 126,165,318 lb.; Ceylon, 90,677,108 lb.; China, 39,777,957 lb.; and Java, 3,912,380 lb.

Messrs. W. J. & H. Thompson remark a noticeable feature in the growth of the demand for Indian and Ceylon tea from abroad. The China tea trade is declining with other countries and markets besides London; stocks abroad appear to be gradually shrinking in their dimensions, and traders in various parts of the world are turning to Calcutta and Colombo to supply the deficiency. Business with these new markets is not yet extensive, as the progress, though sure and continuous, is slow; but it is sufficient to affect sterling values of produce in London as well as in Calcutta and Colombo, and promises to have an important influence upon the prosperity of the tea industry in future years. Looking at the position of tea from the broadest point of view it would seem to be thoroughly sound. The dreaded over-production has not been realised, and there are signs that planters in India and Ceylon, who hold the key, are alive to the necessity of moderating the policy of excessive plucking, and of reverting to methods which give rather smaller but much finer crops. Values of produce have been steadily maintained, and stand to-day at a moderate level.

The London figures for 1896-7 are:—

		Imports. lb.	Delivery. lb.	Stock, Dec. 31. lb.
Indian tea	1896	125,400,000	124,650,000	54,145,000
,,	1897	134,884,000	127,356,000	61,673,000
Ceylon tea	1896	89,992,000	85,450,000	18,355,000
,,	1897	93,445,000	95,172,000	16,629,000
China and Java tea	1896	40,584,000	43,789,000	25,995,000
,, ,,	1897	32,401,000	38,600,000	19,760,000

LESS gold coin by about £930,000, was issued from the Imperial Mints last year than the amount of old and worn coins withdrawn from circulation. But upon the two years 1896-7 the excess was the other way, £1,600,000 more gold coins having been issued than were withdrawn. The issue of silver was also considerably less active, but still about £600,000 in excess of the amount withdrawn. In regard to silver, the public should take note of the fact that the Bank of England will not now accept as good any silver coins with holes in them, but all worn or cracked coins which are not so completely defaced as to make it impossible to tell what they are will still be exchanged for new money.

EXCELLENT reports have been received concerning the Uruguay wheat crop, and the condition of maize is said to be very promising.

LAST year's operations at the Melbourne Mint were the largest since its opening in 1872. The value of the coin issued was £5,130,565, and of bullion, £213,439. The receipts of gold amounted to 1,380,364 oz.

THE Canadian Pacific Land Department sold, during 1897, 200,000 acres for 650,000 dols., as compared with 88,000 acres for 307,000 dols. in 1896—an increase beyond anything ever before experienced in the business of the Department.

ACCORDING to the report of the Labour Department of the Board of Trade for 1896, it seems that the total income of 100 of the principal trade unions, with a membership of 966,953, was £1,675,645, and the expenditure £1,239,230, the membership in 1895 having been 921,686, the income £1,573,925, and the expenditure £1,403,095. The funds in hand at the end of 1896 amounted to £2,168,989, against £1,732,574 in the previous year.

THE Washington Treasury are preparing fresh instructions to Customs officers to assess additional countervailing duties on French sugars, which receive indirect as well as direct bounties. There is no protection for the consumer in America.

THE Marquis Ito has not yet apparently succeeded in forming his new Cabinet. His first combination seems to have failed, and on Wednesday we were told from Yokohama that he was engaged in trying another.

MR. W. J. BRYAN, the Silver champion of the United States, has been on a visit to Mexico. He was received with "all the honours," was the guest of the nation, had the freedom of the capital conferred upon him, and had to deliver an address in Congress on the invitation of the Speaker! Even the President of the Republic did his best to make Mr. Bryan's stay in Mexico a pleasant one.

ACTING on the recommendation of the Indian Secretary, the Bombay, Baroda and Central India Railway Company are to apply to Parliament next session for powers to borrow any sums on bonds "not exceeding one-half of the capital of the company instead of one-third as provided by their Act of 1859." The money is wanted to construct and improve certain stations and generally to improve their undertaking.

Answers to Correspondents.

Questions about public securities will be answered week by week, in the REVIEW, on the following terms and conditions:—

A fee of FIVE shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of FIVE shillings must be sent to cover the cost of such letter, the fee then being TEN shillings for one query only, and FIVE shillings for every subsequent one in the same letter. While making this concession the EDITOR will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Correspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus:—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway?"

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The EDITOR has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market munipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The EDITOR further respectfully requests that merely speculative questions should as far as possible be avoided. He by no meant, sets himself up as a market prophet, and can only undertake so provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the INVESTORS' REVIEW, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

VERAX might retain his holding for the present. Traffics generally are good. There is little chance, however, of any dividend.

H. F. G.—We do not possess the particulars you require. If you will send the list we will examine it; meantime do nothing. There is no haste.

Next Week's Meetings.

MONDAY, JANUARY 10.

London Tramways Company	303, Camberwell New-road, noon

TUESDAY, JANUARY 11.

Belgian Mining Trust of South Africa..	Brussels, 2 p.m.

WEDNESDAY, JANUARY 12.

Chicago Great Western Railway Company (Gen. and ex-Gen.)	Cannon-street Hotel, 2 p.m.
Leamington Tennis Court Company ..	Club Room, Leamington, noon.
Oak Spinning	Oldham, 7.30 p.m.
Union Bank of London	2, Princes-street, noon.

FRIDAY, JANUARY 14.

Blackpool and Fleetwood Tramroad (Ex. Gen.)	Manchester, noon.
Dominion Atlantic Railway (Special) ..	6, Great Winchester-street, noon.
East and West India Dock	Winchester House, 2 p.m.
English Sewing Cotton Four per Cent. First Mortgage Debentures., ..	Call of 50 per cent. = £375,000.
English Sewing Cotton, Preference ..	Call of 5s. per share = £187,500.
English Sewing Cotton, Ordinary ..	Call of 5s. per share = £187,500.
North and South Western Junction Railway	Euston Station, noon.
Peel River Land and Mineral	Palmerston Buildings, 1 p.m.

SATURDAY, JANUARY 15.

Watney & Co., Three and a Half per Cent. Debentures	Call of 50 per cent. = £300,000.

DR. JAMESON, it is announced, recently paid a visit to Johannesburg. It was "secret" but friendly, and the Transvaal authorities were not alarmed. They did not scent a new conspiracy, but carefully watched the doctor and his friends while they were in the City.

OWING to the death of Mr. Walter Hayes Burns, new partnership arrangements have been made by Messrs. J. S. Morgan & Co., who have admitted as partners Mr. John Pierpont Morgan, jun., the son of their senior, and Mr. Walter Spencer Morgan Burns, the son of the late partner.

MESSRS. BROWN, SHIPLEY, & Co. announce that Mr. Lawrence Edlmann Chalmers, son of their Mr. Frederick Chalmers, and Mr. George Harrison Frazier have been admitted partners in their firms in London and the United States (Mr. G. H. Frazier continuing to reside in Philadelphia). Mr. Edward Clifton Brown, nephew of their Mr. A. H. Brown, has been authorised to sign for Messrs. Brown, Shipley, & Co. per procuration; and Mr. James Crosby Brown, son of their Mr. John Crosby Brown, has been authorised to sign for Messrs. Brown, Brothers, & Co. in Philadelphia.

ALLIANCE ASSURANCE COMPANY.

ESTABLISHED IN 1824.

Subscribed Capital, FIVE MILLIONS STERLING.

Directors.

Right Hon. LORD ROTHSCHILD, *Chairman.*

James Alexander, Esq.
Charles Edward Barnett, Esq.
Right Hon. Lord Battersea.
Hon. K. P. Bouverie.
T. H. Burroughes, Esq.

Money Market.

A transformation scene almost invariably takes place in the Money Market at the end of the year. On December 31 all is hunger and want, and on January 1 comes abundance. So was it last week, but the first view was that the ease of the early days of January could not last beyond the middle of the month. It would be for the good of many things if it did not, but we cannot be sure. The Bank of England, which is now managed with vigour and consistency, has a full bill-case for January, and ought to be able to obtain control of the rates outside again, after all the short loans and discounts have run off this week. On the other hand, banks in general are free from the dread of balance-sheet exhibits for some time—the monthly shows being now considerably dodged—and can lend with a free hand. By doing this they have already brought floating money down from 4 per cent. or more on December 31 to 1½ and 2 per cent. We do not see how the decline is to be stopped just yet.

Discount rates have, of course, gone down with money rates, and last night three months' bank bills were quoted at 2⅜ per cent. The worst of it is that foreign Exchanges no longer wear a threatening aspect, and the demand for gold for export has shrunk so much in the open market that bars may have to be sent to the Bank. A week ago the quotation for these was 77s. 11½d. per oz. now it is a penny less. The half million in sovereigns taken out of the Bank for Buenos Ayres yesterday did stiffen the loan market slightly, and made the bill brokers hold back from reducing their deposit rates, but not the bullion market, with which it had nothing to do, representing, as it does, little other than an episode in the process of rehabilitating Argentine Government finance. In this process a good harvest out there, demanding coin to move it, may play a considerable part.

Such indications in current events appear, therefore, to point in the main to moderate rates and a quiet market for some little time, and not even the Bank's holding of January bills, unusually large though it be, may prevent some further shrinkage, although the low rates of last spring cannot come this year. The gold demand of last autumn was largely a credit-originated demand on account of Russia and Austria. The demand arising from Europe's short harvest has not yet come upon London direct, and if the United States buy their railroad securities freehandedly this year it may never come. If they intercept, as they have been doing, part of the Australian supply, we shall not miss it.

At the moment, however, the outlook is rather uncertain, and may change, like an April day, without warning. We must not forget that India is just now a point of danger for our markets more threatening than the United States. Something will have to be done soon to extricate Indian finances and commerce from their danger, and that something might take the shape of exports of gold bought here with money raised by loans. We hope no step of the kind will be taken, because gold is not what India requires. This possibility, however, should not be left out of account, nor yet that attached to developments in China under British patronage.

Yesterday's Bank return tells little. The Bank seems to have lent a million to the Government "for deficiency," but that does not help the market much.

"Other" deposits, which contain the current cash of the market, have barely increased £1,200,000 on the week, and the Bank's reserve is £21,000 less at £19,885,000, notwithstanding the increase of £768,000 in the coin and bullion. Notes have gone out against the gold come in, and the open market is not particularly flush.

BANK OF ENGLAND.

By the retirement of Mr. G. E. Noble, one of the joint managers of the London branch, the Hong Kong and Shanghai Banking Corporation loses one of the oldest members of its staff. He joined the Kong Kong branch in January, 1866, of within a year of the formation of the bank. After serving for many years in the East, with chief command in Calcutta for five years, Mr. Noble became general manager, which post he filled for two years. Long residence in the East had, however, undermined his constitution, and he was compelled to relinquish the heavy burden, and subsequently became joint-manager. He has now joined the London committee of the corporation, so that his services will not be entirely lost. Mr. John Walter, who has been inspector of branches for the last six years, will fill the vacant post. The London office of the bank was opened concurrently with the head office at Hong Kong in October, 1865, and then consisted of two small rooms on the first floor in Gresham House with a staff composed of the agent, two clerks, and a boy, one of the clerks being Mr. G. H. Burnet, the present sub-manager in London. Since then the London office has been shifted to a large ground floor in Lombard-street, and the staff numbers seventy-five in all. At the start the bank had ten offices, and its first report showed notes and deposits totalling 3,000,000 dols. The offices now number twenty-five, and in the last balance-sheet the notes and deposits aggregated no less than 147,000,000 dols. Not a bad record in these degenerate days.

The Week's Stock Markets.

Stock markets, an experienced jobber remarked the other day, are of three sorts. First, there is the market where you can't deal because all the stocks have been absorbed by investors, and it is dreary waiting for "deceased estates." Secondly, there is the market where you can't deal because nobody wants to buy the rubbish offered. Those who hold it, hold hoping it will go up, and those who have it not could only be tempted to purchase at lower prices. This is a market hanging where Mahomet's coffin is supposed to be.

Finally, there is the manipulated market wherein securities move like awkward squads on parade at the bidding of groups, cliques, wire-pullers, syndicates, millionaires, apes of millionaires, underwriting forlorn hopes, &c. In this last, most of the recent activity lies. The public is buying Grand Trunks freely—bless it!—Argentine securities to a limited extent, and sundry miscellaneous fancies by fits, but it does not buy Rio Tintos, nor De Beers, nor mines of any sort to the least appreciable degree. Nor has it got much beyond the selling humour for United States railways. So the manipulated market is rather treacherous, and the range for speculating in many of the "securities" it embraces so limited as to justify this skit, "What price Snooks's Hope?" "There isn't a price. The market has gone for a drink." He who plays under such conditions, tosses knives whose sheaths are loose.

Although business has been curtailed by the New Year holidays the tone has been generally firm, with a fair amount doing. Interest has largely centred on the progress of affairs in the Far East, and hopes are high that our Government will out-trump its rivals. A sharp recovery is therefore apparent in the various Chinese bonds, and an English loan to China would be popular.

Consols were firm at the commencement of the week on cheaper money, but "bear" sales on the part of speculators caused a relapse. The possibility of a new Chinese loan, guaranteed by the British Government, also helped to weaken the price, as this would mean the absorbing of a large amount of floating credit. Indian and Colonial issues show no material change. A new three per cent. loan of £1,500,000 is announced by the New South Wales Government. Several of the leading Home Corporation stocks mark a rise on the week.

Home Railway stocks have been firm, the traffic returns being satisfactory on the whole. The principal feature has been the large dealings in Great Central issues, which were bought on the favourable reports concerning the London extension, and as the market was rather short of stock prices rose sharply. South Eastern was depressed at one time, it being rumoured that the dividend to be announced next week would not be more than 3¾ per cent., not 4 per cent., which was the rate the market was going for. Underground stocks again advanced, and it is said that a selling limit in Districts which has been hanging about for some time is

now closed. North British drooped slightly, owing to the collision near Dunbar, but soon recovered.

Canadian Pacific Railway shares gave way on the publication of the traffic returns for last week, which did not come up to expectations. Grand Trunks were at one time pressed for sale, holders taking advantage of the good November statement to realise. There was only a temporary set-back, however, and a sharp recovery soon followed, the weekly traffic being much better than had been anticipated, and prices accordingly show a big rise since last week.

United States Railroad shares have been wobbly, despite the large increases in earnings again reported. Following the agreement between the Presidents of the Trunk lines and the Western connections, the East bound and West bound freight rates were restored on the 3rd inst. It is thought that most of the large increases in earnings was due to the pushing forward of cargoes before the advance in rates agreed upon came into force. Prices were also depressed by a report that the President of the Chicago, Milwaukee, and St. Paul road had said that the rates were so unsatisfactory that there was no profit in the competitive through business under present conditions. Other officials, however, who have been interviewed do not bear out this statement. The *Financial Chronicle* makes the gross earnings of seventy-five roads in the third week in December show an increase of 7·59 per cent. A report was circulated on this side that the Southern Pacific Company had defaulted, but this was found to apply only to the Central Pacific Government aided bonds, on which default was generally looked for. The November statement of the Pennsylvania Company was a very satisfactory one, the business of the road now outstripping all previous records. The Wabash Company announces that it has reduced its floating debt during the year by 400,000 dols. After being a dull market for the greater part of the week there was a much steadier tone apparent towards the close, owing to better prices coming to hand from Wall-street.

Among Foreign Government bonds the principal movements in the upward direction have been in Chinese descriptions, for reasons just given. Egyptian stocks advanced when it was announced that more troops were to be despatched to Egypt, and prices generally have been well supported by the firmer tendency exhibited on Continental Bourses. Among South American issues Argentine Government and the various Cedulas have been very firm, helped by the decline in the gold premium and the encouraging harvest prospects; Brazilian bonds weakened on the continued fall in the Rio Exchange, and Uruguayan stocks have lost part of the recent rise. As regards some of the other active counters, Spanish "fours" have been pressed for sale on Berlin account. A Reuters telegram from Madrid states that the Minister of the Colonies believes that he will be able to raise 100,000,000 pesetas by the sale of Cuban Mortgage Cedulas, while the Minister of Finance hopes to obtain a like sum by a fresh issue of Treasury bonds guaranteed by the Customs receipts. As the expenses of the campaign in Cuba only amount to 40,000,000 a month, these operations will furnish a sum sufficient to last until the re-opening of Parliament. Turkish groups have again attracted considerable attention, at higher prices, on talk of consolidating them. South American Rails have not maintained the rise registered during the earlier part of the week, one of the reasons given for the weakness of Argentine Railway stocks, being a three days' strike among the engineers.

In the Miscellaneous section Coats's have been a very active market, and finish firm after displaying a rather weak tendency. A great deal of dissatisfaction has been expressed by the tardy way in which the allotments of the new English Sewing Cotton Company have been sent out, and the premium is now quoted at only 13/16. Bank shares have moved up a bit, the dividends

announced so far being quite up to expectations. Anglo-American Telegraph issues continue to attract attention

and maintain last week's rise, but in Hudson Bays a slight set-back is apparent.

Brewery stocks have been rather dull in tone, and this also applies to Gas stocks. A feature has been the steady rise in Waterlow and Sons Deferred, and Prussian Petroleum continues on the up grade, and now stands at a big premium. Welsbach Gas ordinary shares, after slipping back to par, recovered slightly, but the preferred are still quoted at a small discount. John Crossley and Sons announce a dividend at the rate of 7 per cent., which goes against 10 per cent. last year, hence the weakness in the price of the shares.

Markets close with a very firm tendency, the principal movements being a further considerable advance in Canadian and Grand Trunk stocks, partly due to the glowing statements made by the High Commissioner for Canada last night. Americans have also to a lesser extent participated in the rise, and there is also a small "boom" in Mexican rails. The Home Railway market closes firm, with the exception of a slight reaction in Great Centrals.

Consols are unaltered on the week, and this also applies to most of the leading Indian and Colonial stocks. Foreign bonds leave off fairly steady, apart from Chinese bonds, which have again risen sharply. Among mines, Copper shares wind up with a further advance, but Kaffirs and Westralians exhibit no special feature.

MINING AND FINANCE COMPANIES.

The South African has been very inactive, but the tone remains steady, helped by a few buying orders from Paris, but there is no special feature to note. Among Western Australian ventures, Lake View Consols have been adversely affected by the absence of any news from the mine. Several others of the leading counters, notably Hannan's Brownhill and Ivanhoe have risen slightly, but business has been quiet, and does not seem to have been much helped by the reopening of the Adelaide Stock Exchange. There has been very little real business in the General Mining section. Copper shares advanced owing to the rise in the price of the metal, the Mount Lyell group and the other leading producers being chiefly influenced. Indians close firm, the monthly crushings being up to expectations.

ENGLISH RAILWAY TRAFFIC RETURNS.

Cleator and Workington.—Gross receipts for the five days ending December 31 amounted to £916, an increase of £214. Since the commencement of the half-year the total receipts amount to £26,560, showing a decrease of £1,223.

Cockermouth, Keswick, and Penrith.—Gross receipts for the six days ending December 31 amounted to £641. Total gross increase for the half-year, £1,925.

TRAMWAY AND OMNIBUS RECEIPTS.

Increases for past week :—Belfast, £239; Croydon, £90; Glasgow, £182; Lea Bridge, £156; London, £481; London & Deptford, £52; London Southern, £96; London General Omnibus, £685; London Road Car, £251; Metropolitan, £378; North Staffordshire, £36; Provincial, £103; Southampton, £37; South London, £51; Swansea, £3; Wolverhampton, £46; Woolwich & S. E. London, £65; Calcutta, £145.

Decreases for past week :—Sunderland, £7; Barcelona, £38; Bordeaux, £218; Calais, £34.

Anglo-Argentine, week ending December 2, £78 increase. Vienna Omnibus, week ending December 25, £363 increase. City of Buenos Ayres, week ending December 6, £402 increase. Melbourne, gross receipts for December, £36,000.

GOLD CRUSHINGS FOR DECEMBER.

BRILLIANT AND ST. GEORGE.—Last three weeks' crushings 1,725 tons of quartz yield 4,579 oz. of gold. Approximate value, £15,800.

CALIFORNIA MILLING AND MINING.—Ore milled, 3,200 tons. Estimated income, 4,392 dols.; estimated expenditure, 3,352 dols.; estimated profit for month, 1,040 dols.

ST. AGNES GOLD REEFS.—The clean-up to December 22 (thirteen days) was 200 tons quartz, yielding 163 oz. of gold. Average sample of tailings is under 5 dwt. per ton.

UTAH CONSOLIDATED.—Ore shipments during November and December :—Lot 16—48 tons gave 825·26 dols. Assay value, 14 per cent. copper, 4·18 dols. gold and 2·45 oz. silver. Lot 17 66 tons gave 1,031·59 dols. Assay value, 13·6 per cent. copper 3·04 gold and 2·5 oz. silver. Lot 18—45 tons gave 875·69. Assay value, 15·2 per cent. copper, 3·50 dols. gold, and 2·5 oz. silver. Lot 19—43 tons gave 615·47 dols. Assay value, 13·4 per cent. copper, 3·13 dols. gold and 2·25 oz. silver. Lot 20—44 tons gave 495·02 dols. Assay value, 12 per cent. copper, 2·18 gold, and 2·2 oz. silver. Lot 21—42 tons gave 575·69 dols. Assay value, 13·5 per cent. copper, 2·56 dols. gold, and 2·4 oz. silver. Lot 22 - 50 tons gave 1,107·32 dols. Assay value, 16·35 per cent. copper, 6·55 dols. gold, and 3 oz. silver Lot 23—117 tons gave 2,367·65 dols. Assay value, 16 8 per cent. copper, 3 dols. gold and 3·5 oz. silver.

MAYALL'S UNITED GOLD MINING COMPANY.—Clean-up for fifteen days to December 20, crushing 940 tons of ore for a yield of 350 oz. of gold.

THE IVANHOE GOLD MINING COMPANY crushed during the six months ended September 30 last 5,802 tons, yielding 15,250 oz. of gold.

THE GREAT BOULDER COMPANY crushed 1,183 tons during the fortnigh ending January 3, yielding 3,038 oz. of gold.

PESTAKENA UNITED GOLD MINING COMPANY.—Return for December, 461 tons of ore produced 751 oz.

QUEENSLAND MENZIES GOLD MINING COMPANY.—Crushed 330 tons for 953 oz.

GLENROCK PREMIER MINE, NEW ZEALAND.—Have crushed 480 tons and obtained 321 oz. of gold. Cyanide 24 tons tailings produced 19 oz. gold; total, 340 oz. of gold, value £1,300.

MOUNT YAGAHONG.—Summary for month of October : Ore on hand, 105 tons; ore raised and carted to battery, 300 tons. Ore milled during month, 196 tons.

AMALGAM recovered 460 oz. Retorted gold, 242 oz. 160 dwts.

EASTLEIGH.—Sixty stamps ran 24 days 15 hours; crushed 4,927 tons, yielded 577 oz. Cyanide treated, 4,030 tons; yielded 1,504 oz. Slimes treated, 780 tons yielded 263 oz. Total for month, 1,344 oz.

BURMAH RUBY MINES.—75,000 loads washed, producing rubies valued at Rs. 90,000.

CHAMPION REEF GOLD MINING COMPANY OF INDIA.—7,108 tons of stone produced 9,054 oz. of gold; 2,400 tons of tailings, 595 oz.; and 4,895 tons of tailings (cyanide process), 1,225 oz.

CITY OF LONDON GOLD MINES.—Return for thirty-two days : Crushed, 196 tons; produced, 209 oz.

COROMANDEL GOLD MINING COMPANY OF INDIA.—1,200 tons of stone produced 954 oz.; 900 tons of tailings (cyanide process) produced 50 oz.

CUE 1 GOLD MINE.—Crushed, 740 tons; obtained, 545 oz.

GOLDFIELDS OF MYSORE.—41 oz. of gold from 700 tons, sand cyanide process, and 269 oz. of gold from amalgamation.

GREAT BOULDER PROPRIETARY GOLD MINES.—Fortnight ended January 3 : 1,183 tons of ore crushed for 3,038 oz.

MYSORE GOLD MINING COMPANY.—7,280 tons produced 11,002 oz.; 2,985 tons tailings, 745 oz.; and 1,820 tons of tailings (cyanide process), 322 oz.

MYSORE WEST AND MYSORE-WYNAAD, TANK BLOCK.—1,400 tons for 966 oz. of gold.

NUNDYDROOG COMPANY.—5,050 tons of quartz produced 4,934 oz.; 715 tons of tailings, 94 oz.; 2,900 tons (cyanide process), 312 oz.

OOREGUM GOLD MINING COMPANY OF INDIA.—5,831 tons of quartz produced 4,062 oz., and 4,475 tons tailings, 533 oz.

CONSOLIDATED MURCHISON GOLD MINES.—Crushed 292 tons; yield, 295 oz. gold.

PREMIER TATI MONARCH REEF COMPANY.—Crushed 1,830 tons; yield of gold, 503 oz.; includes 840 tons at grass of low grade ore. Shipped two bars of gold worth £1,850.

MOUNT YAGAHONG GOLD MINING AND EXPLORATION COMPANY.—December crushing, 575 tons of ore, 612 oz. of gold, exclusive of tailings—about 10 dwt. per ton. Ore from new lode on the Mount Yagahong Lease is averaging nearly 30 dwt. per ton.

STANHOPE.—Last month's crushing yielded 1,089 oz. Decrease on November, 39 oz.

KOFFYFONTEIN.—Returns for December were 3,300 carats.

CONSOLIDATED MURCHISON.—Crushed, 292 tons; obtained, 295 oz. of gold.

MALAYAN (PAHANG) EXPLORATION.—December : 1,300 tons crushed; 618 oz. of gold; value, £2,100; twenty-two days; thirty stamps.

NEW GUADALCAZAR.—The production of quicksilver for the past month, according to a cable received from the mines, amounts to 8,400 lb., equal to 112 flasks.

HANNAN'S OROYA.—During last month mill worked twenty-six days; crushed, 766 tons; yielded, 275 oz. gold. (Average, 7 dwt. 4 gr. gold.)

IVANHOE GOLD CORPORATION.—Clean up for the three weeks ending December 31, results : 1,178 tons crushed; yield, 2,273 oz. gold.

LADY SHENTON.—Started December 11. Cleaned up December 24; 215 tons crushed; yield, 1,000 oz. Also 355 oz. obtained from plates. Mining costs 18s. per ton. Milling, £1. 12s. per ton.

BRITISH BROKEN HILL PROPRIETARY.—"Mill returns for the fortnight ending December 29, 1897 :—4,092 tons crude ore produced 749 tons concentrates, which contain 455 tons lead and 18,956 oz. silver."

NIGEL DEEP.—Still improving "D" shaft, east drive. Assays average for month 98 dwt. over 6¾ in. West drive—57 dwt. over 9 in. "C" shaft—Samples over 6 in. gave 52 and 145 dwt.

PREMIER TATI MONARCH.—"Thirty stamps running twenty-four days; crushed 1,830 tons. Yield of retorted gold, 503 oz.; includes 840 tons at grass of low-grade ore. Have shipped two bars of gold, worth £1,850." Increase on November, 184 oz.

MOUNT MALCOLM.—Cleaned up 31st ult. Mill working 214 hours (nine days); crushed 202 tons for 362 oz. Average value of tailings, 17 dwt. (Office note—This makes total return for December 472 tons for 680 oz., exclusive of tailings. This clean up was made in order that the battery might start afresh with the New Year.)

JUMPERS.—From the report for November :—Working expenses—Mining, cost per ton, 9s. 8·85d.; hauling and pumping, 2s. 5·48d.; transport, 1s. 4·90d.; milling, 4s. 7·72d.; redemption, 3s. 0·00d.; cyaniding tailings and concentrates, 1s. 8·27d.; charges, 1s. 2·10d.—24s. 1·32d. Profit for month, £7,372. 7s. 9d., or 12s. 9·86d. per ton. Mine development, 582½ ft. Ore developed by the footage was 13,815 tons.

OOREGUM.—4,595 oz. from 5,831 tons, including 533 oz. from tailings.

NUNDYDROOG.—5,340 oz. from 5,050 tons, including 94 oz. from tailings and 312 oz. from cyanide.

COROMANDEL.—1,004 oz. from 1,200 tons, including 50 oz. from tailings.

GOLD FIELDS OF MYSORE.—310 oz.

CUE 1 MINE.—545 oz. from 740 tons.

CITY OF LONDON MINE.—209 oz. from 196 tons.

MYSORE GOLD MINING COMPANY.—Return of gold for the month of December, 7,280 tons of quartz, yielding 11,002 oz. of gold : 2,965 tons of tailings 745 oz. of gold; 1,820 tons of tailings (cyanide process), 322 oz. of gold; the total yield for the month, 12,069 oz. The return includes 205 oz. collected from slags.

CHAMPION REEF GOLD MINING COMPANY OF INDIA, LIMITED. Last month's returns of gold, 7,108 tons of stone, yield 9,054 oz.; 2,400 tons of tailings, 595 oz.; 4,895 tons of tailings (cyanide process), 1,225 oz. of gold; total production for the month, 10,874 oz. of gold.

BURMA RUBY MINES.—Result for December was 75,000 loads washed, producing rubies valued at 4s., 90,000.

CITY BANK, LIMITED.—Dividend at the rate of 10 per cent. per annum, against 9 per cent. last year.

STOCK CONVERSION AND INVESTMENT TRUST.—Dividends of 1s. 9d. per ordinary share, and 10s. per Founders share, carrying forward £5,391.

FORE STREET WAREHOUSE.—Dividend of 5s. 6d. per share, making 5 per cent. for the year, carrying forward £267.

DISCONTENT IN PERSIA.

PERSIA is said to be on the brink of revolution, and the discontent is worst in the district where Russian and British interests are most in conflict. According to the Berlin correspondent of the *Standard*, a dissolution of the central authority and the conversion of the provinces into independent states is anticipated. The cause of the discontent is said to be the extravagance of the new Shah, who has spent all the enormous accumulations of his predecessor, and overburdened the inhabitants with taxation. It is three months since Shiraz expelled its governor, and set up a triumvirate of its own. It pays tribute to the Shah, but that is all. If other districts do not follow this example it will not be the fault of the Shah apparently. Even the priests accuse him of incompetence.

ACCORDING to the *Railway Age* of Chicago only 1,864 miles of new railroads were built in the States last year. This was but 164 miles more than the total for 1896, and is a very tiny figure compared with the glorious times of 1880 to 1890; but then, in that happy period, the American railroad constructor could draw any number of millions of money from England. Now English purse-strings are drawn tight, and this particular industry shrivels. We hope the purses will not be opened again in a hurry. American railroads require another ten years' starvation to settle down and consolidate, and for their managers to get some glimmering of what goes to make up common honesty.

Prices Quoted on the London Stock Exchange.

Throughout the INVESTORS' REVIEW middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the INVESTMENT INDEX published quarterly—January, April, July, and October—in connection with this REVIEW, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the REVIEW almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the INVESTORS' REVIEW any subscriber can follow for himself the movements of securities from week to week, and the INVESTMENT INDEX will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S.F. Snk.Fd. *sinking fund*; Certs., *certificates*; Debs. or Dbs., *debentures*; Db. or D.Stk., *debenture stock*; Pf., Prf., or Pref., *preference*; Prefd. or Pfd., *preferred*; Dfd., *deferred*; L. or Ltd., *limited*; Sh., *share*; Ans., *annuities*; Cu. or Cm., *cumulative*, Gu. or Guar., *guaranteed*; Bds., *bonds*; S., Sr., or Ser., *series*; In., Ins., Insc., *inscribed*; Dr., Drgs., Drwgs., *drawings*; Stg., Strlg., *sterling*; Lia., *liable to*; Sp., Surp., *surplus*; Per., Perp., *perpetual*; Ln. *lien*; Lo. *loan*. Prices marked † signify they are *ex. div.*

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.

The Investors' Review.

Economic and Financial Notes and Correspondence.

A Call to Arms.

Much of the following letter has had to be deleted as being of too flattering a character to us, and more because less than respectful towards neighbours, but the advice it gives is too valuable to be ignored. We shall be glad indeed to do our part if only shareholders will do theirs. The difficulty lies in their lack of cohesion, and apathy. Most of them seem ashamed to own that they have been victimised; they never attend meetings when meetings are held; and they merely swear in private when a fresh infamy perpetrated at their expense comes to light.

To the Editor.

Sir,—There is but one thing to be said against the new departure announced by the Investors' Review: its light ought to be shed on the dark places of finance, not once in the week only, but once at least on every working day. There never was a time, within the recollection of City men of this present generation, when honest and independent financial journalism was more greatly needed than at present, and in none of the markets is fearless criticism more urgently required than in that wide field of speculation which comes under the category of mines.

There is one object alone which has only to be accomplished in order to ensure for the Review a lasting place in the gratitnde of all who allowed themselves to be drawn into that maelstrom of speculation which eclipsed all previous phenomena of the kind a couple of years ago. Much of the paper for which the public gave their good money when they once got into the vortex, was found to be representative of interests in genuine properties managed by honest and capable men. Much, on the other hand, could only be regarded as counters in wild-cat ventures emanating from the cupidity of some of the choicest rascals north or south of the line; but betwixt and between these two distinct categories come a number of concerns which were sound enough in their inception, and have a basis of genuine value to rest upon, but have proved nothing but disappointing and ruinous in the hands of those by whom they are controlled. These people, notoriously ignorant of the first principles of mining and industrial direction, are manifestly indifferent to the duties and responsibilities that attach to them in respect of the issues they brought out. They are indifferent because they believe themselves beyond the reach of the arm of the law. Mere remonstrance evokes nothing but their derision and contempt. They introduced companies by the dozen and planted the British public with shares by the million. Never a prospectus did they issue; but they employed every species of advertisement, journalistic and social, to persuade the gullible public that they were giving away sovereigns for ten shillings. They sold, in many instances, every share that existed, in some instances shares that did not exist, and then—not satisfied with their plunder—they must needs plunge the companies into debt as deep as they could go, shut down the mines, and pursue every course that was calculated to make the too confiding shareholder believe that his senses had deceived him, and that his holding was not worth pence where he had acquired it for pounds. It will be a service to the community, an encouragement to honest men, and a wholesome example to those who live by force and fraud, if The Investors' Review will drag these malefactors into the light of day, so that they may be known and exposed, and never be able to fatten upon the widow and the orphan again.

The first step to this end is that shareholders should be roused to action on their own behalf. They *must* act, and that soon, or the interests that are now in jeopardy will have to be placed in the list of "total loss." The game which the wreckers clearly propose to play is a game they have played before, with impunity and with eminent success. Will The Investors' Review not signalise its new departure by rendering impossible that disregard of shareholders' interests which the law, or the absence of law, seems positively to encourage? There is no transaction in Transvaal shares, entered into in England, upon which the Chancellor of the Exchequer does not levy toll, and no light toll either, but the victim of this imposition looks to the law in vain for aid or recognition when he happens to need redress. The magnates who have had his money afford him no information concerning his property; they hold no meetings of English shareholders; they deny him the right of finding out the names of his partners, so that he may communicate with them on matters of mutual concern; they even refuse to let him have a copy of the Articles of Association; and the law as it stands says it can afford him no help in the matter.

The most effectual way to avoid the injury and the inconvenience which this state of affairs involves is, of course, to leave all such ventures alone; but that is a counsel of perfection for guidance in the future; and meantime I venture to hope that The Investors' Review will emphasise the fact, for the benefit of its readers and the community at large, that the case is pre-eminently one in which Heaven will help those who help themselves. The snug Semites in the City, hidden by the millions which the too confiding British public have entrusted to their administration, will not feel quite so confident in their airs of lordly indifference and security if they have to face the ordeal of a meeting of angry shareholders every few weeks, and a careful regard for their own skins will inculcate the expediency of stopping short of the point at which the cup of shareholders' endurance must overflow. When the shareholder does rise in his wrath, he will be so completely and agreeably astonished by the results, that he will be inclined to kick himself for having remained so long supine. His lamb-like acquiescence is being used, not only as "an object lesson to the Transvaal Government," but as a means of filling once again the pockets that have been already filled at his expense. He has only to bestir himself to discover that the first and the last principle of successful speculation in mines is to be well assured of honest direction and good management of the mine itself.—I am, sir, your obedient servant,

One who Understands the Game

London: January 6, 1898.

The Midland Railway of Western Australia.

Yes, we shall be happy to further the course recommended in the subjoined letter :—

To the Editor.

Reform Club, Pall Mall, S.W.
January 12, 1898.

Sir,—Letters have appeared from time to time in financial papers from bondholders in the Midland Railway of Western Australia, and you have expressed a very strong opinion with regard to the directors, but no united action has ever been taken against them. I, for one, believe they are liable for any loss incurred, and have obtained a legal opinion to that effect, and if other bondholders will join me, am ready to try the issue.

If nothing is done soon, there will be little left for the bondholders.

I hope you will insert this letter in your influential paper.—Yours truly, A Bondholder.

Chatham and Dover Extravagance.

Stockholders in the London, Chatham, and Dover Railway should not be too sanguine about coming dividends on anything. The enterprising board of the undertaking has been spending money like the reckless men they are, and on the repair of Camberwell Station, of all places. True, the utmost economy has been exercised ; scraps of wood from old hoardings, packing-cases, and such like, to judge by their appearance, have been used in the building operations going on upon the platforms. So that there has been no waste. The outlay for paint, however, must be considerable, and the work has been in hand for the best part of a year, exhausting the energies of the staff, and causing serious inroads on the company's resources. If this sort of thing goes on, and the board should have the courage to undertake similar extravagant works at Brixton, Loughborough Junction, Walworth "Shoot," or the "Elephant," there is no saying what may happen. The day might even arrive again when the Arbitration Preference stock would have to go short of its full dividend. Stockholders, please take note, and have a care.

Klondike—A Hint.

Astronomers tell us that they think the Northern hemisphere of this earth of ours enjoys an age of ice about once in every hundred thousand years. They cannot tell us, though, when the last ice age ended, nor are they yet sure whether we are receding from one or going towards it. It is a pity that the knowledge we possess is thus limited, because there might be hope for Klondike were we approaching that period in the cycle of a hundred thousand years when the summer north of the equator is at its longest. Under present conditions we do not see how the Canadian North-West, and especially this Klondike region, can possibly be permanently benefited by the gold so many deluded people are hoping to rake out of it. That some population may stick and struggle in parts of British Columbia is possible ; that the North-West, as a whole, can become a thickly-peopled, well-tilled part of the earth is, under present physical conditions, entirely impossible. And about the gold itself we may say that fully 95 per cent. of the tales about it circulated in the Press are purely romantic.

Gold-Absorbing Rhodesia.

A seasonable warning was given the other day by the Bulawayo correspondent of the *Standard* to those who contemplate going out to Rhodesia in search of a fortune. The labour market, he said, is overstocked there. Bulawayo is filled with good carpenters, masons, bricklayers, plumbers, electricians, &c., some of whom are at work on small jobs at comparatively low rates of pay, some living "on their means," and some on "charity" work, provided by the Government at 5s. a day. He stated that no one should go out without enough money to keep him for at least a month, and a small sum will not do that, for food is extremely dear, and will remain so until a dry season comes, and enables heavier trains to be run over that wonderful Bulawayo Railway. It was the wet season when this correspondent wrote, and then flour cost £4 per 100-lb. bag ; Boer meal, £4. 10s. ; mealies, £3. 10s. ; mutton, 2s. to 2s. 6d. per lb. ; beef, 2s. 6d. to 3s. 6d. ; and bread 6d. per loaf, always less than a pound in weight, and varying in size with the price of flour. Butter was 3s. 6d. a pound ; tea, 3s. to 5s. ; potatoes, 1s. to 1s. 6d. ; fresh milk, 1s. to 3s. per bottle, and so on. The hope is expressed that a great improvement will set in once the mines get fully to work later on in the year ; but in the meantime people need be in no hurry to rush out. They should not arrive until April or May, the writer says ; and we may add if they arrive in too great numbers then they run considerable risk of starvation.

In a speech at the Salisbury Chamber of Mines, Rhodesia, Mr. J. Scott, a delegate from the Bulawayo Chamber, made some interesting remarks which have a certain suggestiveness, and add force to the above warning. After pointing out that, what with war and rinderpest, no work had been done on mining claims in Rhodesia for some eighteen months, he went on as follows :—

They found that the majority of mining properties in the country were held by large companies aggregating between £15,000,000 and £20,000,000 of nominal capital, while the working capital was not, he supposed, more than £1,500,000, and that £1,500,000 is all that we have to depend upon until we can show a gold-producing country, if we do not get a boom. We have a certain number of companies who can only be protected by the principle of concentration, or paying for their protection certificate. He thought if they got these companies to spend their money they must allow them to do it in the way most advantageous to their shareholders, and in a way where there was a chance of getting their mines into a gold-producing stage ; but if you pass a law that they would have to work a certain number of claims in certain districts, irrespective of merit, cost of labour, machinery and transport, probably they would lose their claims, and having got this enormous amount of money from the British public, it would be an injustice to us and them. The principle is, of course, that people who have claims should work them, but they should make an exception in the peculiar circumstances of this case. If you leave the law as to concentration, as it is applicable only to each district, the result will be that people would pay inspection certificate under the smaller tariff, which would not become due until 1898. It would affect no mine materially for people in one district, and would not operate in some districts until 1899. It would be a pity to keep to a law which would prevent companies devoting their money to where they wished, and force them to pay it to the Chartered Company for protection certificates. If they were starting a new country, they might insist upon every block of claims being worked to a certain extent, but this country was being developed by British capital, and if the British public, in their haste and greed to secure properties, have got more than they are able to work, they must make allowances in the circumstances. It would ensure an early production of gold, and that was the one thing they wanted to do. It would be best to spend £20,000 developing one mine to get an output, than in proving six. The best mines, with three or four exceptions, were held by the smaller companies, who did not own claims in other districts but one. The Willoughby was doing the best of their work on three mines. Negotiations were going on to divide the larger companies into separate smaller ones, and settle with the B.S.A. Company for their interests. Things would right themselves gradually. He instanced the Mashonaland Central, which had floated other companies, and reduced their holding to 400 claims.—*Rhodesian Times.*

Financial Crisis in Japan.

Japan is just now in the throes of a financial crisis, induced by the reckless speculation and company promotion of the past two years and precipitated in part by the adoption of that gold standard which was designed to avert it. Our friends appear to have miscalculated their commercial strength. Much of the large sum of money brought into the country after the war has gone to the effete West to pay for such expensive toys as battleships and other munitions of war; and the rest has been embarked upon more than doubtful ventures—railways, banks, merchant ships, and so on—most of which have by this time demonstrated their utter inability to make profits. The foreign capital that was to have been induced to try its luck in Yokohama and Osaka by the gold standard, has kept studiously away, and Japan's trade with silver-using countries, especially China, has fallen off. Meantime, the country finds itself saddled with a lot of unsaleable silver; the gold reserve is small and is rapidly disappearing; and every month's trade returns show a balance of imports over exports large enough to be a serious menace to a country situated as Japan is. Our mail advices tell us that—to say nothing of the mushroom banks which have gone under by the score—some of the leading institutions of Osaka have been compelled to suspend payment, while others have been kept going only through the aid extended by the Bank of Japan. Business house failures have also increased, and the general tightness of money is described as alarming. It has for some time been apparent to dispassionate observers that Nemesis would not long stay his coming. Now that he has paid his visit, the Japanese are beginning to realise what a panic is. It is to be feared that the worst is not yet over.

In this connection, some figures, published by the Department of Finance, showing the amounts of hard and paper money circulated in Japan in the past twenty-one years, should be interesting. In 1871 the total was 72,712,000 yen, equal to $2\frac{1}{5}$ yen per head of the population. This was the period of "awakening." By 1880 the total had grown to 203,994,000 yen, equal to $5\frac{1}{2}$ yen per head; by 1890, to 205,483,260 yen, equal to a trifle over 5 yen per head; and by 1896 to 293,168,000 yen, equal to $6\frac{3}{4}$ yen. In September, 1897, the last month for which returns have been received, the total circulation was 296,747,000 yen, equal to about 7 yen per head. With few breaks, the total has gone up in the two decades, but the *per capita* distribution shows that the country is too poor to indulge in startling financial breaks.

Forsaken Crete.

Crete has, for the present, been apparently abandoned by the European Concert. The candidature of Prince George of Greece has been withdrawn. Indeed, it is now declared that it was never formally proposed by Russia. But though the other Powers would have adopted the Prince as Governor, Germany would not, and so the Prince is dismissed, as were Colonel Schaefer, M. Petrovitch, and others. Diplomatists have also, according to the Athens correspondent of the *Times*, discovered that there is no great hurry for the settlement of the Cretan question. It will "simplify matters" if the settlement is left over until the traces of war are effaced, the indemnity paid, and Thessaly evacuated. Mr. Balfour, at Manchester on Monday, suggested a further simplification of the business by "tossing up" for a Governor, as it had been found impossible to hit upon one that fulfils the high ideals of the Powers. This is pretty sarcasm, but affords no consolation to the miserable inhabitants of Crete, who are suffering both in purse and person by the state of anarchy in which the island is allowed to remain by the carelessness of Europe, and who may disturb at least the equanimity of the Powers at any moment by a new violent attempt to settle the question of Government for themselves.

The Ottoman Railway.

If the approval of the Council of Ministers at Constantinople is of any value, the Ottoman Railway is to be congratulated; for such approval has been unanimously granted to its demands to extend its line to Dinair. For years the company has been endeavouring to extend its system eastwards, and, in spite of the fact that it had years ago given up its guarantee, and that all subsequent extensions have been effected without Government aid, its reasonable proposals have been simply ignored. Meantime the Porte has been granting heavy subsidies to the German system in Asia Minor, known as the Anatolian Railway, whose avowed object is to draw the railway business of the Peninsula to itself.

Only by extending eastwards can the Ottoman Railway, the English Company, shake itself free from the encroaching power of the German financiers, who years ago bought up the Smyrna and Cassaba line, and thus obtained entrance into the most important part of Asia Minor. In the past we have not failed to criticise the financial methods of the Ottoman Railway Company, which have been infantile in their lack of foresight, but we have always deprecated the injustice of their treatment by the authorities at Constantinople. Let us hope a turn for the better has come, or is coming.

Needless to say the hungry Germans have not been idle, and have been credited with successfully obtaining an increase in the guarantee of the proposed extension fron Chai to Dinair. This is an extension of the Smyrna Kassaba line to the same point that the Ottoman Railway is aiming for, and where, it is hoped, the line which reaches the town first will have the best chance of securing the caravan trade from the interior. The difference between the policy of the two sets of railway builders must strike even the dull-witted Porte, but perhaps there it is only a matter of palm-oil. Turkish railway guarantees in the past have always been repudiated, and when the Germans have served the Turk's turn there may be a difficulty about the guarantee of the Anatolian system.

A Persian Coup d'Etat!

Of International troubles there seems no end just now. With China seething, Crete groaning, troubles in the Soudan, and England, France, and even Germany looking crosswise in West Africa, here we have the possibe addition of a *coup d'etat* in Persia! The present Shah has squandered the immense treasure left by his

predecessor, and has been squeezing his subjects for taxes until they—quiet and peace-loving as they are—seem ready for revolt. One provincial Governorship has already become virtually independent, and others are following the example. The Shah is losing grip of the country; and Russia has taken prompt note of the state of affairs, and is apparently prepared for its absorption. Her first business will be to seize Khorassan; the rest may follow as opportunity offers.

The Soudan Expedition.

If there is mystery about the ultimate aim and object of the Soudan expedition, we are not to be permitted to know anything at all of its progress towards its goal. Newspaper correspondents are not to be allowed to accompany the force. An exception is to be made in favour of Reuter's agent, who is to act, apparently, as official chronicler of such information as the Sirdar wishes to be known. But this is not what the public wish to know. They want independent testimony as to the conduct of the expedition. It is not because there is any difficulty on the ground of military expediency. Sir H. Kitchener does not suggest that. It is the difficulty of transport that he fears. But newspaper correspondents, as a rule, find their own transport, without troubling the military authorities. There must be another reason. What is it? Are we going, not only to Khartoum, but beyond—to Fashoda, say, in order to checkmate the Marchand expedition?

Germany and Sugar Bounties.

A month or two ago the German Finance Minister announced that, as the result of negotiations with other countries granting sugar bounties, he hoped to lay before the Reichsrath this session a measure dealing with this foolish and costly form of protection. Hopes were therefore entertained that some practical step was about to be taken for the abolition of the bounties. A semi-official statement just published in Berlin, however, seems to throw a considerable stream of cold water on these hopes and anticipations. Germany is favourable to the abolition, we are assured, and so is Austria-Hungary. That is so far satisfactory; but nothing is said of France; and all that has been done in the matter appears only to amount to this. The Belgian Government some time ago asked Germany whether she would be willing to take part in an International Conference on this sugar question, and Germany, having consulted with Austria, agreed. There the matter rests. Belgium has done nothing more, though her decision is expected very soon. But if it is only in favour of an International Conference, it means that we are practically no nearer the abolition of the sugar bounties than we are now. The taxpayers of the sugar bounty countries show great forbearance under the burden imposed upon them by their rulers in order to supply us with cheap sugar. But nothing can be done unless they themselves take action. Meantime, British Guiana has joined in the cry to the Government for countervailing duties, without which, it is declared in a memorial about to be presented to her Majesty and the House of Commons, that the colony must inevitably be ruined, and every one above the peasant class be driven out of it. The prospect thus pictured is no doubt very sad, but there is probably another side to the picture; and at any rate the House of Commons is not at all likely to listen just yet to this urgent cry and prayer.

The Sealskin Bill in Operation.

If the United States Customs officers aim at making the famous Sealskin Bill intolerable, they may possibly succeed in their object. They have been able to inflict a vast amount of annoyance on people about the Canadian border. If a Canadian goes out for a stroll, and happens to cross the border with a sealskin overcoat, or cap, or pair of gloves on, he is instantly pounced upon, and compelled to give up these useful and ornamental coverings—unless, indeed, he can produce a certificate from a United States Consul that his sealskins were not obtained by pelagic fishing. Tourists intent upon viewing the Niagara Falls, and crossing to the American side without thought of the character of their clothing, have had their sealskin coverings ruthlessly taken from them, and sent forth to bear the winter cold as they might. Ladies are the chief sufferers, and have been extremely forcible in the expression of their indignation. We may sympathise with them; but as the obnoxious law is enforced in the sacred cause of American monopoly, the United States Government are not likely to award them even sympathy.

Danish Neutrality.

It seems that the Government of Denmark have been making an appeal to the Powers to grant a guarantee of the permanent neutrality of Denmark. But the Powers refused; they declared it impossible. Why it should be impossible we do not altogether understand. Denmark is not in a position now to disturb the international equilibrium, and is not likely to rouse the cupidity of any of the Powers. There can be no thought of its further "partition," and there is small probability of a coalition with Norway and Sweden. Indeed, all three countries are desirous of securing this guarantee of permanent neutrality. They are peopled by industrious folk, who are steadily advancing in trade and commerce; and a guaranteed neutrality, which would enable them to continue their work undisturbed by the dread of war or other serious commotion, would surely be an unmixed benefit to the world.

South African Republic Railway Bonds.

For the second time the bank of Williams Deacon has stepped forward and purchased the coupons of the Northern Railroad of the South African Republic Four per Cent. bonds. The issue is for £1,500,000, and it is a notorious fact that the railway upon which the bonds have been issued has been in a comatose condition for more than a year past. Presumably the coupons are purchased on behalf of the Transvaal Government, which guaranteed the interest upon the bonds, but the fact that the line is not completed, long after the date agreed upon, raises the prospect of some embarrassing difficulties in the future. The matter, we believe, is before the Courts on the Continent, the company being a Belgian one, but the bulk of the money was, of course, found in Great Britain. No doubt seems to have been thrown upon the right of the bondholders to claim their interest under the guarantee, but it would certainly be more satisfactory if some statement were made from official sources, as there must be great disinclination to buy the bonds under present conditions. The issue was made by the Railway Share Trust and Agency Company, and surely that concern should be in a position to inform the public on the business.

New Cable Scheme.

The Pacific Cable scheme of Sir Sandford Fleming slumbers, probably because the Colonial Ministers of Finance do not see the fun of paying for the toy they wish to possess. In the interim, if intuition goes for anything, we have in an apparently inspired article in a leading journal, a new scheme for a cable connecting the outlying colonies with the Mother country. The scheme is admittedly the proposal of the Eastern Telegraph group of companies, and must be considered as the alternative of that powerful group to the Sandford Fleming Pacific scheme, which was conceived out of enmity to that system.

The projected cable of the Eastern Company would run from Cornwall to Gibraltar, from there to Capetown, *via* Sierra Leone and the Islands of St. Helena and Ascension, and from Capetown to Perth, West Australia, *via* the Mauritius and Christmas Isle, the latter an islet, to the south of Sumatra. In this way an all-British cable would be provided that would not have the fault of the tremendous stretch required by the Pacific route, and it would not, moreover, have to depend upon foreign companies, which the Sandford Fleming scheme has had to do. We have not, however, been told the cost of the projected cable, or how the money is to be provided. Apparently the Eastern Company is hankering after a subsidy, but one cannot be sure of that until the demand is made.

Pawned Greece.

There was no help for it we suppose. The Greeks committed the crime of making a mistake, or, if we are to believe the diplomatist who has been writing to *Truth*, they were betrayed into making war with Turkey in order to further the domestic schemes of their alien king. Their position now, however brought about, must cause some qualms of conscience to those who hounded them on to their fate a year ago. For the whole nation is put in commission and under the control of the six delegates composing it—one for each mitigating power. This Commission will administer the revenues assisted by a Greek company sitting in Athens, working under its absolute control. With the help of the collecting company the monopolies now in existence will be maintained and in all probability multiplied. All the money encashed by the Greek company will be paid over weekly to the Caisse of the Control and will be converted into gold within fifteen days. The power of issuing debt will be withdrawn from the figure-head Greek Government, and the Commission will take in hand the unification of the existing public debt, issue all further loans to cover floating debt, and, to a limited extent, for public purposes, and will reduce by degrees the 94,000,000 drachmas of paper money. Sentimentally it is a pity to see the very life of a nation thus pledged to its creditors; yet compensations may be given even to the unhappy Greek. In all probability the taxes will now be more ably and honestly collected and more carefully spent than they have ever been before. Democratic Governments are never distinguished either by the upright or economical administration of their finances. Greece, therefore, may emerge more solvent, possessed of better administrative methods, and possibly more able to rule itself, when it has cleared itself of the burdens now laid upon it.

City of Buenos Ayres Six per Cent. Loan, 1888.

Messrs. Louis Cohen & Sons, who issued this loan, have the conspicuous merit of sticking to those who invested in it on the faith of their name. The negotiations have been long and difficult, but the firm would not give in, and the result is an arrangement as satisfactory as could be expected in the circumstances. Under it new Argentine Government four per cent. sterling bonds for 6,950,000 dols., or the equivalent in pounds sterling, will be issued par for par in exchange for the bonds of the City, interest on which has been paid in depreciated paper. In addition to the 4 per cent. interest the new bonds will enjoy a fund of ½ per cent. per annum from 1901, and a sum of £121,884 in bonds, equivalent to about 20 per cent. for every £100 in drawn bonds or coupons, will be handed to the agents for distribution. We trust the Argentine Government will prove able to keep this contract.

"India" as a Weekly Newspaper.

We welcome *India* among the weeklies. It is a paper which the true Imperialist, as distinguished from the opera bouffe impostor, ought to know and read. A side of Indian affairs is presented to our eyes in it, which the ordinary organs of public opinion systematically ignore. We may not subscribe to all its opinions, but we assuredly shall have to give more attention in the future than we have done in the past to the native questions, its principal aim is to bring before the British public.

Scotch Paraffin.

In speaking of the new "Anchor" oil last week we forgot, and the lapse of memory is unpardonable, to mention the Scotch oil, which is a domestic product whose flash point is 105, and which ought not to be forgotten by the consumer. In the whole fifty years during which this oil has been on the market there has never, we believe, been an accident through its storage or use. And, by the bye, will the introducers of the "Anchor" oil, to whose enterprise every credit is due, see to it that the flash point of their article is kept up to 103. We are told that some of the cargo now on sale in Manchester goes off below the advertised temperature. Also the smell might be made a good deal less rank.

INDIAN CURRENCY ISSUE.

It is proposed to introduce a Bill to-day (Friday), into the Legislative Council in Calcutta, to enable the Government of India to issue currency, not only, as hitherto, against gold held by that Government in India, but also against gold held by the Secretary of State for India in this country. The object of this measure is to give the public the means of obtaining such issues immediately on payment of an equivalent sum in England, without having, as they now have, to wait for the arrival of gold in India.

Between April 1 and Saturday last the total receipts into the Exchequer amounted to £74,140,088, compared with £72,767,410 in the corresponding period of the last financial year; whilst the expenditure was £79,005,820, as against £78,437,853. On the latter day the Bank balances stood at £2,868,215; on the same day last year they were £1,297,106.

The Crisis in India.

So the Indian Government is going to copy the Japanese plan and issue notes in India against gold deposited with the Bank of England. This sounds nice, but we do not see how the plan is going to work. The Japanese Government had the advantage of being the owner of the gold it left in the hands of the Bank, but the Indian Government has no gold, only a multitude of debts. So it is the gold of other people that it wishes to see deposited in order that it may put more paper money in circulation in India. In other words, the artificial scarcity of money which has been created in India by the absurd policy of attempting to create a fixed exchange there, is to be utilised to compel bankers and merchants here to employ their own means in helping to make good the deficiency. We fancy they will be much more likely to send the gold out to India as hitherto and sell it in the bazaars at its market price. For how are they going to get this gold back again supposing they want it? Are they to have the power of expanding and contracting the Indian currency at their pleasure? If so, we should have two forces at work sometimes—the Government and the private trader or corporation. The lot of the people cannot fail to be a hard one under such a régime.

The truth is this silly proposition, which has come apparently from that refuge of all the cranks and nonentities of the race, the India Office, is put forward as a means of averting the storm now ready to burst over India. Many months ago we warned the British public that it was coming; but the only interest the bulk of us take in anything Indian is "Ranji's" latest score or catch at cricket. We have gone so soundly to sleep about the most dangerous portion of our Empire, that neither the brutalities of that mountain campaign —which has brought enough misery in its train to sensibly diminish our feeble hold on the allegiance of the natives—nor the sight of money at 12 per cent. in Calcutta and Bombay at the languid season of the business year, has the slightest effect in rousing us. "Why should it, India pays?" This is the legend which deceives us, the fact being that India is more than three-parts bankrupt, and that the day for the exhibition of her insolvency in the gaze of men is being hastened by the dementia of her British rulers. Having depleted the Treasuries by their extravagance and folly, having impoverished the people by their exactions, they conceived the noble idea that all would be put straight if only "a gold standard" could be introduced.

You know the story. Ever since the coinage of silver was suspended, matters have been going from bad to worse with the finances of the Indian Government and with Indian trade, but the stoppage of the coinage of silver is not alone responsible for the present critical state of affairs. The money difficulty merely serves to bring the other consequences of administrative folly to a head, and the position is such at the present time that if we at home do not put our hands in our pockets, and pretty deeply too, in order to relieve Indian finances from their embarrassment, the Government out there will have to make a composition with its creditors. That is the blunt fact. It is no use for us to dream and dream about India's wealth, about its marvellous development under our rule, and so on, for the truth is that India is very poor, and would be utterly bankrupt, save for the money we pour into it every year. Behold the secret of the rapidly succeeding loans its Government has issued and must continue to issue!

Within the last twelve months about ten millions sterling have been added to the debt of this British dependency, mainly, if not entirely, in London. The Indian railways have also been considerable borrowers. At this moment there is a floating debt of six million pounds in Indian Treasury bills on the London market, one million of which is now offered for renewal in three, six, or twelve months' bills, and not one penny of which could India pay out of her own resources.

By such devices it has been possible, year in and out, to lift off to some extent the weight of Indian Home Charges from Indian trade. Were these charges to be borne in full by that trade, India's available means could not stand the strain for three years. People here never think what the development of India, as we glibly call it, implies to the Indian people. Were the entire burden laid upon these people it would mean the remittance to Europe every year of from eighteen to nineteen million pounds in payment of Home Charges incurred by the Indian Government and by railway interest and dividend obligations to British investors; also it would mean the payment of all freights out and in upon the merchandise of India, which is almost exclusively conveyed to and fro in British ships. And a multitude of other items have to be provided for in the shape of money saved and profits earned all remitted home by British producers in India or British officials. All the profits of the tea-growing industry, for instance, come home to this country every year, and a large proportion of those of the cotton manufacturing industry; all the profits of gold mining, also, and a variety of small items of which no exact estimate could be formed.

Many years ago we made a somewhat minute investigation of the whole of these burdens, and came to the conclusion that they could not be less than thirty millions sterling a year all told. Probably the total is now considerably higher; but put it at only thirty millions still, and how does India stand? What is the power of her people as exhibited by her commerce with every part of the world to meet this charge? It can only be met by the excess of exports over imports, and for last year, the year ended June 30, 1897, this excess was just about fifteen million pounds, or, say, on a moderate estimate, one half of the full amount required. Sometimes it is less than this, sometimes more, but never by any chance is the surplus enough. People frequently talk as if the payment of the obligations of India to England was a mere matter of drawing Council bills. There is so much to pay, therefore so many bills on the Indian Treasuries are sold in the London market, and the thing is finished. But if there be no sufficient surplus of exports over imports to meet these bills, how are they to be paid? They cannot be paid, and the practical proof of India's inability to pay them has been abundantly given in recent years by the expedients to which the Government has resorted in order to avoid having to remit bills on the Presidency Treasuries for payment. Last year drawings were discontinued altogether for some considerable time, partly because there was no money in the Treasuries to draw against, partly owing to the insane folly of trying to create a gold standard for India out of nothing, and less than nothing. This gold standard will-o'-the-wisp appears to be the

last effort of minds gone crazy, and to be destined to break down the entire structure of India's public credit. Well, it is no use arguing with Indian bureaucrats on this subject. Their minds move in a vicious circle, and only when too late will they wake up to the fact that in trying to reach the unattainable they have brought visible insolvency upon the Indian Empire.

Shall we have Dearer Money soon?

One of the dominant problems of the moment is the near future of the Money market. Is the rate of interest going up or down? Just now, of course, the market is in its usual sloppy condition. After dividends and interest payable in the beginning of the month have been distributed, short loans become cheap, and many people are ready to suppose that the cheapness will continue. In recent years, through a variety of causes, it has continued, the quietness of trade and the great increase in the production of gold being the chief. Will it continue cheap this year? We confess to have doubts on the point. A position materially altered in several respects has to be faced. To begin with, there is less money in the market than it has been accustomed to—we may say for the past three years; then the demands upon this money promise to be larger in the coming spring than for a long time back. We say nothing about such apparent pulls upon our supply of banking credit as the New South Wales and Western Australian loans, because these really bring money into the market instead of taking it away. The Governments of these Colonies borrow here in order to save themselves the necessity of remitting home, or in order to pay for railway and other materials ordered in this country. By acting thus they can keep their revenues for domestic expenditure, and plume themselves on their riches and the ease with which they carry their burdens. The subscription on Colonial loans, therefore, means that money is collected from all parts of the country to lie in banks until dispersed again by interest and other payments, and swell the amount of credit available on the London market.

But this year we shall be subject to demands upon our gold, and therefore to a reduction of a serious description in the credit handled by the market. The position of India is dealt with elsewhere, and we need only say here that if her finances are to be saved, at least ten millions sterling will have to be supplied to her, most of it within the next six months. Then it is highly probable that a Chinese loan may be issued before next May, and if that Empire obtains sixteen millions on our endorsement, some considerable portion of this will have to be sent to the East. This loan must be raised if China is not to become a prey to land-grabbers from Russia, Germany, France, and perhaps other countries, and if the full payment on her existing debt is to be kept up. Again, Europe has not yet paid for the grain it has required to import in order to make good the deficiencies of its harvest. The full weight of this debt may not be experienced until well on in the summer, but it is a factor to be kept in view as tending to increase the pressure upon our Money market. There are other sources of danger to us, more or less artificially created, which also have to be taken note of, such as further shipments of gold to Buenos Ayres to sustain the great financial scheme for restoring Argentine credit, and the demands of Russia in connection with the still incomplete establishment of her currency upon a gold basis.

Against such sources of exhaustion as we have indicated, we must not forget to place the great and steadily increasing output of gold from mines in all parts of the world. South Africa alone turned out more than 3,000,000 oz. of gold last year, and the yield of Australian mines and of Indian has been well sustained. A new source of supply of considerable magnitude may possibly develop in that region in Canada which lies at the back of the North Wind, but without counting this it may fairly be assumed that the entire gold production of the world in the year 1898 will approach £50,000,000. We may certainly assume that it will be over £45,000,000, and it is impossible to over-estimate the effect of this supply in mitigating the dangers our Money market may be threatened with. Should an export of gold to the United States occur in the coming spring, then, indeed, money might rise to 5 per cent. with us, but we see little prospect of this. It can only come if the British public loses its head once more about American railroad securities, and such a lamentable catastrophe is not yet in view. On the whole, then, we are disposed to think that although money will not be so cheap this year as it was for the greater part of 1897, and although it may become dearer next month and continue dearer for some time than it is now, we are in no danger of a 4 per cent. Bank rate, at least not before the end of the financial year. The collection of the taxes always tells against the market in February and March, and without that the ability with which the Bank of England is now conducted, and which has given it a strong independent hold over the market, should save us from further decline after the next week or two is over. A steady, firm market at moderate rates is what we have every reason to look for on all grounds. If rates were only stiff enough to check reckless speculation, the future, even the distant future, would not give cause for much anxiety, but it is to be feared that the new gold alone will keep the market free from anything approaching real stringency.

British Trade in 1897.

Taken as a whole, the foreign trade of the United Kingdom was fair last year. The gross value of it in and out was over 745 millions; and when we remember that prices have been low in most branches of trade, that we have had adverse circumstances to contend with, both in India and in the further East, and that for the latter half of the year the United States tariff has obstructed business, we may consider the sum total of the year's business almost encouraging. It is not quite so good, however, as we should like to see even in adverse circumstances.

The *Standard* of Monday drew attention to the remarkable increase in our imports of food and drink, and was quite justified in so doing. The gross value of this portion of our import trade has risen to nearly £180,000,000. The whole of this prodigious total is not retained for home consumption; but the greater part of it is, and it does not say much for our enterprise as farmers, cattle grazers, and dairymen, that we have required over ten millions' worth of live cattle, a millions' worth of sheep, and nearly six millions' worth of fresh beef from abroad last year, besides five millions' worth

of fresh mutton, a millions' worth of fresh and salted pork, and preserved meats of various kinds amounting to another million and a half. Nor is it seemly that we should be dependent—upon France, Holland, and Denmark principally—for about sixteen millions' worth of butter, let alone two and a half millions' worth of margarine. We bought nearly six millions' worth of cheese last year, and over six millions' worth of foreign fruit, much of which might have been produced at home. And our imports of food grains have become altogether phenomenal. The value of the wheat and wheat flour received at our ports last year was nearly thirty-three millions, and grows with comparative regularity, good harvests and bad. Altogether the value of the cereals of every description imported by us in 1897 exceeded fifty-three and a half millions, almost the whole of which was retained for our own food.

We don't want to play alarmist in any sense, but we decidedly think that the soil of England, if properly cultivated, is capable of reducing to some extent this dependence upon the foreigner for our daily bread. Happily, there appears to be no danger of such a thing as a famine now anywhere by mere failure of crops. The Northern hemisphere came nearer to scarcity last year than it has done at any time since the United States began to feed Europe. But on our grain imports, at any rate, the short European harvest has left little trace; we have paid a little more for the grain, and that is about all. If the United States had us alone to look to to absorb their redundant crop of last year, they would be very poorly off. They have done better, in a sense, with their cattle than with their grain, so far as we are concerned. Turning to other sections of the trade returns, we find the imports of tea steadily increasing, those of coffee almost stationary, as also the imports of foreign spirits, although those of wine have gone up. We bought less sugar last year than in either of the two preceeding years, and got our supply materially cheaper. Raw products used in manufactures have also been on the whole cheap, without material variation in price. Cotton has decidedly fallen in the market, for a quantity less in weight by merely 275,000 cwt. on a gross import of about 15,700,000 cwt. in 1896 cost us four millions less in money.

With food still on the whole cheap, with raw materials not difficult to buy at moderate prices, our export trade ought, one might have hoped, to be showing expansion. Unhappily it does not, and this is where the most unsatisfactory element in these returns comes in. At no point can we just now say that our export business is progressive. We should not have the slightest objection to see imports mounting rapidly, especially imports of the raw materials used in our industries, were there visible, at the same time, a steady growth in the volume and value of our exports, but that is just what is not now visible. Our imports rose last year by nearly 9½ millions to a total of 451¼ millions, and our exports fell off about £5,800,000—exports of British and Irish produce, *i.e.*—to £234,350,000; the difference between the two thus exceeded 215 millions, or, if we add the value of the re-exported foreign and colonial produce to that of strictly British exports, the balance against us is still 157 millions. Making allowance for the movements of bullion, which were but slightly against this country for the whole year, and for that unknown quantity, the value of ships built in British yards for foreign owners, we may still place the excess value of the imports over that of the exports at more than 150 millions. How do we find the means of paying such a large adverse trade balance? It is found, in part, from the earnings of our unrivalled mercantile marine and from the profits of our exports which are sold when they reach their destination at prices more or less higher than those at which they are entered at the port of departure. Probably also our imports are put down at the Custom House at a higher price than the invoice cost at the point of origin.

It would be ample to allow fifty millions for these earnings and differences in favour of the British trader both ways, and still there remains 100 millions to pay for which no visible means are provided. Of course, the real source of our power to go on thus lavishly spending more than we can afford lies in the interest received by us from our foreign investments, and in the revenue we draw from the debts incurred at our instance by India and from all those incurred by our many self-governing dependencies. Let any mishap take away a portion of the magnificent income which these investments afford and the nation must at once become pinched. We shall have a good deal to say from time to time on this aspect of our economic position, but for the present all we desire to do is to insist upon the necessity for greater energy in the development of our export business, which is dwindling at too many points. The United States, we know, have dealt a sharp blow at us; but that ought to stimulate us all the more to strike out elsewhere, and the gain we should receive in neutral fields from the self-immolating policy of the American Union ought to be made diligent use of, lest one of these days that Union should turn free-trader and catch us asleep. There is room for a larger trade in English goods with all South America, with China and Japan, and probably with Spain, Italy, Roumania, Mexico, Egypt, and perhaps Portugal. From our own dependencies there is not much to be hoped for; unless we lend them the money they cannot increase their trade with us to any large extent. Some of them, notably Canada, have deliberately slammed their door in our face, and it may not be long before they erect barriers against each other similar to those now standing between peoples of the same origin in North America.

It is a remarkable fact that the country to which the world primarily owes its railways and steam-engines should have been able to export only a million's worth of locomotives last year, and that the total value of the steam engines exported, including ocomotives, should have been little more than three millions. Our largest trade in this class of industrial product is in textile machinery; but even that was less last year than for some years back, owing to the dispute between the working engineers and their employers. Our exports of mining machinery also fell off, and this, in some respects the most valuable of our great industries, is threatened with decay. Our exports of cotton textiles also fell off last year with a large number of countries, and is not remarkably progressive at any point. China and Japan both took less goods from us. Turkey and Egypt took more, Belgium more, France and Germany less, Dutch India rather more, the United States more, Mexico less, Central America less, and most of the South American States decidedly less. Compensation was not found either in our possessions and dependencies, not

even in South Africa. The same tendency was displayed by our woollen industry, which has suffered more than any other by the Dingley tariff; but on the whole, exports of woollen goods appear to stand their ground rather better than cotton. Still, it is not a progressive trade, and we cannot afford to allow it to decline further. We must make up our minds either to regain lost ground or conquer new. Linen manufactures have lost less than might have been expected, the total amount in yards exported to the United States being rather larger than in 1896, although smaller considerably than in 1895; but on the whole this is also a declining branch of business, and if we do not take care our foreign export trade may become a trade in "smalls" everywhere. In few directions do we now "hold the field."

Shipping "Rings."

Mr. Chamberlain succeeded the other day in ridding himself of the very unpleasant question of shipping rings which he is responsible for having brought into the full prominence it now enjoys. In that Blue Book of his on Great Britain's commercial relations with its Colonies, the operation of the British shipping rings is one of the agents expressly named as working to the detriment of British traders in competition with Germans, Americans, and others, and some very plain language is used condemnatory of them. Straightway the South African Mercantile Association, through its chairman, asks the Colonial Secretary to receive a deputation, with a view to a Select Committee of the House of Commons to investigate the whole matter. But the shipping interest is enormously powerful in the House, as Mr. Chamberlain knows, and the shipping interest is bitterly opposed to any public consideration of shipping rings—any public revelation of the little tricks of this big trade. So Mr. Chamberlain's secretary is instructed to reply "that as this matter primarily concerns British trade and British merchants and shipowners, any representations to the Government should be made to the Board of Trade, to which department Mr. Chamberlain must refer" the Association. No doubt he acted with strict propriety in this matter, and probably he was glad to shift the responsibility. But when he sent out his dispatch to the Colonial Governors, he told them he was "impressed with the extreme importance of securing as large a share as possible of the mutual trade of the United Kingdom and the Colonies for British producers and manufacturers," and that he therefore wished to investigate thoroughly the extent to which in each of the Colonies foreign imports are displacing British goods, and the causes thereof. When a chance presents itself of doing a real service to British manufacturers and traders by the unmasking of an abuse which has become a vile blot upon our commercial system, he quietly backs down from this high resolve, refers the aggrieved ones to that monument of ineptitude, the Board of Trade, and points out that if they please to take action on their own account there is nothing to prevent them from getting a member of Parliament to move for a committee of inquiry. He probably thought it superfluous to add in so many words what his remarks imply—that the Government would not encourage any private member to injure their friends the shipowners by ventilating this grievance. The Association is hopeful that good may result to its cause by the discussion of the question in the House of Commons, and that a committee will be appointed. We confess that we are not very sanguine on this last point; and if it were possible to secure full publicity for the whole question in any other way, we should not be sorry if the Government were to discourage the appointment of a committee of inquiry, for it is notorious that this institution exists now merely as a purgatory where inconvenient questions are tortured, and then left languishing; and it is a dead certainty that no legislation would ensue. But even a committee of inquiry would be able to throw some much-needed light on the dark ways of the shipping rings, and that would be a step at least in advance.

The Association which is moving for the committee concerns itself only with the abuses which have sprung up in the carrying trade to South Africa, and, whether it speaks for a large or for a small proportion of the South African traders of London, it has made out a case for inquiry, and has proved, in spite of Sir Donald Currie and those who are with him, that German shippers can send goods from interior points of their country to South Africa at considerably less than the English shipper can do from the port of departure, provided he ships them through and avoids making a bargain with the Hamburg owners, who are part and parcel of the South African Conference. Mr. H. H. Clarke, in his evidence before the Merchandise Marks Act Committee, gave some instances of the difference against British traders. Eleven cases of hardware, shipped through from Pinnebergen, are landed at Durban for the equivalent of £6. 13s. 9d., whereas the Conference rate from Hamburg or a British port is £10. 15s. 9d.—that is, £4. 2s. 9d. more. Now, something of this difference is due to the German preferential railway rates, for which no British shipowner can be held responsible, and it is argued for the Conference that it possessed no knowledge of what arrangement exists for the division of charge or revenue between the railways and the German steamship lines. But it knew of the existence of the arrangement, and it is an obvious rejoinder that British owners should have made no terms with the German lines until furnished with the information which was necessary to enable them see how far they were protecting themselves—to say nothing of any supposititious protection for the British manufacturer. We were told that much advantage would accrue to British commercial interests, seeing that the sea-freight from foreign ports would be the same as from British. But this piece of optimism ignored the sea-freight arrangement under the through-rate system, and Mr. Clarke is authority for the assertion that this freight works out at from 5s. to 20s. per ton less than the rates at British ports on many classes of goods. It is impossible to believe that the special advantages admittedly possessed by German shippers through the tender solicitude of a paternal Government anxious to spoil the English can account for differences running in some cases to as much as 60 per cent. in favour of the German trader. In the case of steamship lines sailing from New York to South Africa, but owned by British firms in the "ring," there is a more direct and unequivocal discrimination. In that Blue Book on Colonial trade, which is Mr. Chamberlain's pride, we find the chief of the Customs Department at Cape Town stating that the rates of freight from the United States

to South Africa "are actually lower than from the United Kingdom, notwithstanding that the distance is longer, and there is absolutely no return cargo." This does not, we understand, apply to all South African ports touched at by the steamers; but to East London the American rate is 5s., and to Port Natal, 7s. 6d. per ton under the lowest British rates. Then there is the China Steamship conference, which asks 47s. 6d. per ton for British cottons to Shanghai, while it carries American cottons transhipped at English ports for 17s. 6d. or 19s.; which again loads iron girders at Antwerp at 19s. per ton, and then goes to London and charges 25s. for British girders. An instance of the killing of independent enterprise by this body and by the Indian ring is afforded by the case of the Manchester Canal, which these two have materially contributed to ruin. We all know what happened to the Nippon Yusen Kaisha when it entered into competition on the Bombay-Japan route with the P. and O., the Austrian-Lloyds, and the Rubattino lines. Some further examples of discrimination in favour of foreigners may be found in the evidence given before the Commissioners on the operations of the Merchandise Marks Act above alluded to. The Holt line loads foreign iron at Amsterdam for Java at 14s. 2d. per ton, carries it to Liverpool and there loads British iron at 25s. per ton, plus 10 per cent. Examples of this kind of thing might easily be multiplied, but enough have been adduced to afford a prima facie justification of the charge that, in their anxiety to grab the earth, these iniquitous rings are doing their level best, with their eyes wide open, to aid the foreigner at the expense of their own countrymen. We indulge in no sentimental prate about patriotism — there is none of this weakness about your keen man of business. But shipping rings are in the position of renegades, and we are entitled to ask for some protection against them. Their methods do not amount to an illegality, and we suggest nothing that can operate in restraint of trade—quite the reverse, for it is the rings which operate in that way; and if some means could be devised to curb them somewhat, trade would be materially benefited. We might also, while we are about it, do something to compel our railway companies to deal equitably, and without discrimination, with British traders; but that is another matter. Meantime, would it not be well if we ceased to grow indignant at the contemplation of Yankee trusts and monopolies, and began to recognise that we ourselves are far from being free from that reproach?

The rebate abuse is intimately bound up with the existence of the rings. The rebate is, in fact, the trump card which the shipowner keeps up his sleeve to spoil the shipper who may essay to play the giddy goat with him. The ring keeps up rates, and incurs the shipper's displeasure; the rebate acts as the medium of reconciliation, and at the same time becomes the badge of servitude. For if the trader offers any of his patronage elsewhere, he forfeits the rebate of 10 per cent. which has been accumulating for months in the shipowner's cashbox in respect of his previous dealings with that gentleman. If this does not make the shipper a slave to the owner, we should be glad of duce to hat will more accurately define the relation.

Stock Market Notes and Comments.

Were a stockbroker to be asked in the curt way of the City, "how's business?" the chances are he would answer "nothing doing." This could not be true in a literal sense, because there are some three thousand people in the Stock Exchange living and apparently becoming rich on "doing nothing." What the broker really means is that there is not much volume of speculative business going on. Investment business has never been better than it is now, it's only drawback being the difficulty of finding securities to invest in. But it is speculation which "makes markets hum," and feeds the minds of the brokers and jobbers there with visions of sudden fortune. And speculation is in a curious position. We cannot say it is bad, because the movements in prices indicate plenty of life, but it is speculation conducted to a great extent by syndicates, combinations of financiers, arbitrageurs, and wire-pullers of all sorts, who are busy making prices move to attract the public. For the most part the public is looking on. Grand Trunk stocks are the only ones we know at the moment in which there is a daily widening public interest, a fine fat gamble developing. They are old favourites to which John Bull has been accustomed now for a generation and a half, and therefore a stir in them produces a very widespread interest. They have been under a long eclipse, and it took some little time to rouse attention, but once roused, people began to buy right and left, and we are now in for a good, old-fashioned inflation in the good, old-fashioned style. We know its symptoms well. All the dark lines have disappeared from the Trunk "spectrum"; it is bright throughout. Receipts are improving and will continue to improve for ever and a day; honest management has succeeded the reverse; economies have been introduced which will tell powerfully on net receipts. "The system never was in better order." Everything, in a word, is first-rate and prosperous, and the public believes it. All we can say is, do not believe it too long, good public. For some months to come, perhaps for the best part of this year, the roseate tints, now sending a glow through the hearts of all "bulls" as they gaze and buy, will continue to entice men on; but the world is not improving, not even in Canada, quite with the speed the Press would have us believe; and the day is not so far distant when the prudent holder will sell to the less prudent believer. It is a "faith-healing" process. If we might give a "tip" about this particular section of the market, it is to get ready for selling when the whole financial Press is singing in chorus "now is the time to buy." It does not all do this from corrupt motives, but merely because men, even journalists, are imitative animals. A few interested ones start the chant, others catch it up, and soon all are eagerly repeating the same bit of "gag."

But other sections of the market have risen quite as remarkably as Grand Trunk. Are the people not behind those movements also? Not yet, to any great extent. The Stock Exchange itself has dabbled pretty freely in United States Railway Shares, but up to now the outside public has sold more than it has bought. And the rise in prices, which has now got under weigh for the third time, is mostly a professional one, the work of houses here and in the United States who want to unload. We think, however, that the public is now going to buy these shares, and the probability, therefore, is that during the next six months they may see considerably higher prices

than they do now. All we can say here, also, is the higher prices go the more sceptical let people become, for the United States are by no means in the condition of prosperity, nor is railroad management there in that perfection of honesty which would justify a permanent investment on our part in such treacherous securities.

Argentine Railway and Government stocks, again, form another division of the market in which there has been great apparent activity, and the public has been buying the stocks of the railways steadily and quietly for a long time back, justifiably buying, too, although the quotations for some of them are now decidedly as high as they ought to be. The stocks of the Government, however, whether national or provincial, have likewise been hoisted by the financiers interested in preparing the way for handing over to the public the heavy risks they have incurred in keeping Argentine finance on its legs since the crisis of 1890. Outsiders, no doubt, are now joining to some extent in the movement, and helping these bankers and financiers; the more is the pity. But it is not a solid movement yet, except in the sense that those who conduct it command enormous wealth. So far as we can judge, the end sought is a unification of all the debts of the Republic in one low interest-bearing stock, with which shall be wrapped up new debt to the tune of anything you please from 10 to 20 millions sterling. The accumulated deficits of the Argentine Republic cannot at the present time be much less than ten millions. As far as the governing class goes there, nothing has been changed for the better since the crisis. Both Houses of the Legislature are just as spendthrift, just as incompetent, as any similar body in America. There is no such thing as economy known in the public offices of the country. Of course, population is increasing, more land is going under tillage, and the great foreign element, steadily increasing in the Republic, gives promise of stability, and perhaps of a higher order of public morality in the Government at a date far ahead. Possibly also the present and past operations of the financiers may in that long future be justified. The immediate outlook, though, is not very grand, and it will be quite prudent to discount the inspired language about "wonderful harvests," and all the rest of it, by at least 50 per cent.

There remains the mining market to touch on. Other sections may be left for a future day. In this department also there has been considerable movement—at least in the South African division—and there likewise the thing is worked and sustained by the financiers, trust companies, and speculative syndicates whose purpose it is to unload enormous quantities of shares on a foolish public. Already that public is nibbling, because it never can be brought to suspect a rising market. There are so many signs of greater prosperity to be spread out before it by a Press almost wholly in the direct or indirect control of these masters of the market. Every nerve is being strained also to make the output of gold from the Rand mines, and particularly from the Deep Levels, phenomenal in its riches. We shall have much to say on this matter as the weeks go by, but at present the subject cannot be pursued. To all, however, who are itching to buy, we say, weigh the facts, and wait before taking any step which may involve risk and disappointment, and perhaps bitter loss. Above all, remember that the Barnato fraternity, the Consolidated Goldfields and its group, the Robinson Bank and its group, with any number of trusts and share-punting combinations, have enormous piles of shares which they are anxious to sell at a profit.

Why are Great Central stocks going up—the old Sheffield that was? Because the company will require more money, and wants a good price for a new issue of stock. Is that a good reason for buying? We should say not. The "rig" is being overdone, and is quite African in its unscrupulousness, for the prospects of the company are not very good.

ENGLISH RAILWAY TRAFFIC RETURNS

Cleator and Workington.—Gross receipts for the eight days ending January 8 amounted to £945, a decrease of £248.

Cockermouth, Keswick, and Penrith.—Gross receipts for the nine days ending January 9 amounted to £877, an increase of £120.

East and West Yorkshire Union.—Gross receipts for the week ending January 7 amounted to £241, an increase of £27.

TRAMWAY AND OMNIBUS RECEIPTS.

Increases for past week :—Belfast, £240; Croydon, £94; Glasgow, £139; Lea Bridge, £148; London, £874; London & Deptford, £55; London Southern, £103; London General Omnibus, £2,213; London Road Car, £798; Metropolitan, £915; North Staffordshire, £4; Provincial, £162; Southampton, £1; South London, £165; Wolverhampton, £30; Woolwich & S. E. London, £36; Calais, £16.

Decreases for past week :—Barcelona, £38.

Anglo-Argentine, week ending December 9, £112 increase. Vienna Omnibus, week ending January 1, £31 increase.

BIG LINEN-THREAD COMBINATION.

The *Belfast Evening Telegraph* of Wednesday states that a gigantic thread combination, in which the North of Ireland manufacturers are chiefly concerned, has been arranged, and that the agreement was signed in London by the following firms :—Barbour and Sons, Hilden, near Belfast, and America; the Marshall Thread Company, Paisley and New York; Finlayson, Bousfield, & Company, Paisley; and Knox & Company, Kilbirnie, Ayrshire, with several other smaller concerns. The combination will deal with linen thread tonly, and will, according to the Belfast journal equal in capital he Coats combination. The headquarters of the new firm will be in London.

It is reported that work has been begun on the extension of the Beira Railway, to Salisbury, in Rhodesia. Up to date 90 miles of permanent way material have been shipped from England.

The first instalment of relief for the Cubans from America has arrived at Havana, and has caused great dissatisfaction among the Spaniards, as the distribution of the relief may be used as a pretext for interference in Cuban affairs by the United States Consols and others.

What is supposed to have been the "mother lode" and quartz origin of the Klondyke placer goldfields is said to have been discovered. It was found 30 ft. below the surface. The ledge is 18 in. wide, and is generally sprinkled with free gold. It is added that the quartz seems to be immensely rich.

The revised return of Victorian gold for 1897 shows a total of 892,632 oz., the highest reached for fifteen years, and 10,546 oz. more than in 1896.

Messrs. Pixley & Abell state in their annual circular that during the past year the Bank of England did not receive a single bar of gold, owing to the great demand in other countries. By the middle of May about five millions had been sent to Japan; India took about two-and-a-half millions of small ingots for bazaar purposes; New York received about £600,000 in October, while the Continent, particularly Russia, bought largely throughout the year. This demand kept the price up to over 77s. 11d. per oz. standard, except for a short period, when it dropped to 77s. 9½d. per oz. £12,500,000 arrived in London from South Africa, being an increase of over £4,000,000 in the previous year, exclusive of 2,500,000 sovereigns from the Cape. With regard to silver, India bought about five-and-three-quarter millions as against under five millions in 1896. China wanted rather less than in 1896, and the Straits less than in any year since 1888. The fluctuations in price were greater than in 1896, when the variation was only 1 1/16d., whereas last year it was 6 1/16d., the highest being at the commencement of the year; and dropping gradually as the months went by, till it reached the lowest of 23¾d. in August and again in September. On Japan adopting a gold standard many speculators were induced to sell bars for long delivery, and a rapid covering of sales caused prices to go up in the autumn until the announcement that the Indian mints would not be re-opened for the free coinage of silver. On the cessation of Council sales and renewed enquiries for the East, the prices became considerably higher towards the end of the year.

Critical Index to New Investments.

Western Australian Government Three per Cent. Inscribed Stock.—Issue of £1,000,000, being the first instalment of a loan of £2,500,000; minimum price, 95 per cent.; interest due January and July; principal repayable at par January 15, 1927. Loan is raised to provide a permanent water supply to Coolgardie goldfields. All the money is to be paid up by March 14, but payments may be made in full on January 21 at 2 per cent. discount. Recent issues of the Colony have been as under:—

Date.	Interest per cent.	Minimum price per cent.	Amount offered.	Average price obtained per cent.
			£	£. s. d.
May, 1895	3½	99	750,000	103 1 4
April, 1896	3	98	750,000	100 16 8
May, 1897	3	95	1,000,000	95 0 10
January, 1897	3	98	1,100,000	98 3 11

Of the last-named stock, which was issued by the Government in payment for the properties of the West Australian Land Company, only £233,300 was taken at the time, but the balance was afterwards placed, partly through the London and Westminster Bank, at the minimum. The new issue raises the public debt of the Colony to about £8,000,000, and the debt per head of population, which may be estimated at 150,000, to over £53. This is an enormous figure for a Colony, the future of which depends entirely upon the permanence of its goldfields, and Coolgardie has as yet done precious little.

Chichester Corporation Three per Cent. Stock, redeemable at par February 27, 1946, or after February, 1916, on six months notice being given. Further issue of £55,000, offered for tender at a minimum of 100½ per cent., the object of the loan being to purchase the undertaking of the Chichester Waterworks Company for £49,848, and to improve the works at a cost of £5,190. Dividends due March and September. Rateable value of city, £48,935; total debt, including present issue, £118,368. The existing Three per Cent. Stock stands at 101, so the new issue is full priced. The issue, however, was well applied for, the total tendered being £124,670, at prices varying from £100. 10s. to £102. 10s.; but tenders at only sixpence over the minimum got 19 per cent. The average price obtained was nearly £101. 8s. 3d.

Westminster Electric Supply Corporation, Limited, offer for subscription at par an issue of £200,000, out of a total of £250,000, first mortgage 3½ per cent. debentures, interest being payable January and July. The fully-paid share capital is £399,500, and the £5 shares are fetching £16 apiece. The business of the company has grown rapidly from 2,582,801 units generated in 1894, to 5,018,023 units in 1897, and the gross income has increased from £53,407 in 1894, to £70,511 in 1895, and to £87,986 in 1896, the dividends being respectively 5, 7, and 9 per cent. The accounts for last year are not yet completed. The present debentures will be a first charge on the whole of the assets, present and future, and they will be redeemable on March 1, 1920, or may be paid off before then at 5 per cent. premium on six months' notice given. In connection with the present issue the 5 per cent. and 4½ per cent. first mortgage debentures are to be paid off next March, and the balance of the money will be used in extending existing stations and in providing plant and machinery to meet increase of business. The Westminster is about the best of the electric lighting companies, and the debentures are amply secured, but 3½ per cent. is getting up to the gilt-edged level.

Johannesburg Waterworks, Estate, and Exploration Company, Limited.—Share capital £500,000 in £1 shares. Company now offer £250,000 5 per cent. mortgage debentures in bonds of £100 and £50 each, the whole to be redeemed by the end of 1925 at par, by a cumulative sinking fund commencing 1901, or by purchase thereafter if price is below par; and the company reserves the right of redeeming the whole from the end of 1911 at 3 per cent. premium on six months' notice. Applications at par will be received by the Johannesburg Consolidated Investment Company. Interest payable April and November. Present debenture capital £42,000 in first mortgage 7 per cent. debentures, redeemable by annual drawings, and the whole to be paid off by December 31, 1900. Issue is made simultaneously in Johannesburg and Capetown, and instalments may be paid up in advance at 2½ per cent. discount. Holders of existing 7 per cent. debentures can exchange into the new bonds receiving in addition a cash payment of 4 per cent. and a bonus of 1 per cent. The company was formed to work a concession to supply Johannesburg with water, and has since acquired the right to supply thirteen suburbs of the town, the population of both being 103,000. The company has eighty-five miles of main and distributing pipes, several large reservoirs, with a capacity of 323 million gallons, and extensive pumping and filtering machinery. It holds 83,334 £1 shares, out of 120,000, of the Zuurbekom Water Company, and has secured the right to take all the water that may be obtained at Zuurbekom at a price to be agreed upon. The whole of the plant laid down for this scheme and the works at Zuurbekom have been paid for and belong to the Johannesburg Waterworks Company, and the present issue is made to introduce further improvements in the present machinery, and to extend the works, for paying off floating debt amounting to £50,000, and for completing works, machinery, and laying down pipes from the Zuurbekom site; also for redeeming the 7 per cent. debentures. Profits for last four years were £20,770 in 1894; £36,078 in 1895; £29,585 (after paying £11,663 special services) in 1896; and £4,946 in 1897; while the dividend in 1894 was 6¼ per cent., and in the three following years 7½ per cent. Amount required for the service of this loan is £12,500 per annum, and for sinking fund, to commence in 1901 and within twenty-five years to pay off £250,000, is £6,857. The company is, of course, a Transvaal concern, and English investors would have no say in the management, but the share capital is large, and reasonable dividends are being paid, so the debentures should be a fair venture.

Canning Jarrah Timber Company (Western Australia), Limited.—Share capital, £250,000 in £1 shares, of which 83,333 shares and £166,667 in cash are taken by the International Trust and Finance Corporation, who are the vendors and promoters, and resell at a profit; and the company is also to take over at cost price valuation the stock of sawn timber, logs and stores, timber afloat, and additional plant in transit. Remaining 166,667 shares and £75,000 five per cent. first mortgage debentures are offered at par. The debenture issue is part of a total of £100,000, redeemable in twenty years by annual drawings at 105 per cent., and are a first charge on the concession, railway, and lands in Perth and elsewhere. Interest is due June and December. Company buys a Government concession for an unexpired term of twenty years, a railway of about thirty miles, three saw mills, timber yard, and a plot of about 14 acres at Midland Junction. The auditors certify net profits for last three years to have averaged £11,678, and that last year's profits were £18,183, while another authority estimates future profits of the Canning business at £45,780 per annum, and the Donnybrook property is estimated to give a profit of £12,000. But still another authority goes one better, for the Conservator of Forests to the West Australian Government estimates the net profits obtainable from the sale of marketable timbers growing on the concession at £1,218,750 "if disposed of at the present price." Of the estimated revenue of £57,780, debenture interest will claim only £3,750. The point is how much reliance is to be placed in these estimates? And if they are reliable, why is such a promising property sold, and why are the directors satisfied to take only one-third of the purchase money in shares? The public have had several of these Jarrah undertakings offered to them of late, which suggests that competition is growing. We do not admire the thing.

Princes' Hall Restaurant, Limited. — Subscriptions are invited for 8,000 £5 shares at 10s. per share premium, as the business is to be extended at a cost of £30,000 by taking over a long lease of the fully licensed premises, 37 and 38, Jermyn-street, known as Rawlin's Hotel, together with part of 36, Jermyn-street, which premises are to be pulled down and a new building erected communicating with the present restaurant. This company was formed January, 1896 with a capital of £40,000, and, from May 15 that year to May 31, 1897, made a net profit of £7,112, and paid a dividend of 10 per cent. a further interim dividend at the same rate being paid this month. It appears that one of the directors lately acquired the new property and now lets the company have a long under-lease at a profit rental of £300 per annum to the director. It is proposed to fit up a Masonic Temple in order to cater for the banquets given by lodges. As these lodges are known to be wealthy, we should feel disposed to leave the new issue of shares to them.

The gold produced in New South Wales during 1897 amounted to 292,217 oz., a decrease of 3,854 oz. as compared with 1896, but the value showed an increase of £15,053.

A Bill is to be promoted in the coming session of Parliament for the incorporation of a company to construct a new railway, fifty miles in length, from Llanilaw, in Cardiganshire, to New Radnor.

In a recent interview with Senator Chandler, Mr. McKinley is said to have declared himself still firmly in favour of bimetallism. He further considered that the negotiations on the subject were only suspended in consequence of the condition of affairs in India. The President is to resume the negotiations as soon as the conditions are favourable.

Company Reports and Balance-Sheets.

CLERICAL, MEDICAL AND GENERAL LIFE ASSURANCE SOCIETY.—Last year, ended 30th June, this company issued 831 policies insuring £582,000, and, allowing for a small amount of re-assurances, this gave an addition of £19,710 to the annual net income, which rose to £277,600. The Society's total income was £410,600, claims paid took £220,367, the rate of interest earned was £3. 17s. 3d.—a fall of 1s. 6d. on the previous year—but the Company is one of those which values at 2½ per cent. only, so the margin is ample, as was proved by the fact that the valuation last year, on the strictest lines known, gave a surplus of £605,000, to divide among 11,761 participating policies.

THE MOUNT LYELL MINING AND RAILWAY COMPANY.—There is not a great deal of information in the report of the Board of this Company for the half-year ended September 30 last, but what there is is highly satisfactory. The first five furnaces and convertors put up and now in operation have done their work so well that the Directors are now duplicating them. Thus the output ought soon to be doubled. With only part of the five in full blast the last six months the Company was able to make a net profit of nearly £67,000, and two dividends each of 4s. per share have been paid; but the first one only on that portion of the capital then issued. In order to pay 4s. per share per quarter on the present capital, a net revenue of £200,000 will now be required over and above the sums necessary for writing down the cost of the property, plant, &c. Granted a continuance of the supply of ore on the same scale and of the same quality as that at present mined, we see no reason why this income should not be forthcoming, and a great deal more. But this Company must not be confounded with the Mount Lyell North.

UNION DISCOUNT COMPANY OF LONDON, LIMITED, made £139,554 gross last half year, including £15,184 brought forward. Deducting £75,258 for rebate, a handsome sum, and current expenses, the board has enough net profit to pay the 10 per cent. per annum dividend declared, leaving £16,853 for the new half-year. This is excellent and progressive, but we trust the board will rest satisfied with 10 per cent., for the reserve would bear increasing.

DEVAS ROUTLEDGE & COMPANY, LIMITED.—The old-established company of this name—it was formed in 1878—reports the satisfactory profit of £11,134 for the past year. Dividends equal to 6½ per cent. for the year are declared, being the rate paid for years past, and the balance forward is increased from £4,907 to £5,934. The Company has a reserve of £15,000 invested in Consols, and its buildings stand for nothing in the balance-sheet. Unfortunately no attempt is made to supply a profit and loss account, which materially reduces the value of the information supplied.

PAWSON AND LEAFS, LIMITED.—During 1897 this Company had an important windfall in the shape of £3,900 received from letting its windows to view the Jubilee procession. Of this sum, £3,450 was devoted to paying a bonus of 1s. 6d. per share, and £450 went to the benefit of the ordinary accounts. Eliminating this exceptional revenue from the total, the net profit for the year is not satisfactory, as it amounts only to £15,928, as against £16,327 in 1895. The difference, however, is accounted for by the increased charge for debenture interest, since the new buildings were completed, and this charge may prove less onerous when the portion unused by the company is fully let. Fortunately the concern has been paying dividends well within its means of late, and it is therefore able to announce the usual dividend of 5 per cent. in addition to the bonus previously alluded to, which is equal to 1¼ per cent. more; and then the balance forward is increased £2,578 to a total of £38,248. This balance forward is really the company's reserve, and we are glad to see that it is now within £2,000 of the total at which it stood prior to the unfortunate absorption of Leaf's business.

THE DEBENTURE CORPORATION, LIMITED, continues a career which we frankly admit has hitherto been considerably more prosperous than we think it deserves to be, some of its business methods considered. Besides paying 7 per cent. for the year on the ordinary shares, the directors are able to give them a bonus of ½ per cent.; to hand £3,866 to the Founders' shares, to add £8,000 to reserve, and to carry forward £4,206. There is no information whatever in the report about any of the company's investments, but we fancy it has some trouble still with its Mauritius property. Its reserve, however, is now £210,000, and it has a large amount of cash in hand.

THE UNION BANK OF LONDON did not do so well as other London banks, the net profits for the six months being £96,831 against £98,938 in the corresponding period. But a larger amount was brought into the accounts so that the available total is slightly increased. The dividend is again at the rate of 10 per cent. per annum; £5,000 is, as usual, applied in reducing premises account, and £22,233 carried forward. The banks deposits are fully £250,000 lower, and are now below 15½ millions, while acceptances are still above 2 millions. On the other side, there is £414,000 less in bills, and £498,000 more in loans and advances. The cash is more than £200,000 larger, while money at call and notice is down £385,000, and investments have been reduced by £139,000. Beyond the larger amount out as loans and advances, these changes indicate diminished earning power.

THE LONDON AND MIDLAND BANK is still growing—we hope not beyond its strength. During the past year the paid-up capital has been increased to £1,467,000, and the reserve to £1,250,000, which is an excellent proportion. And good employment seems to be found for the extra capital, for the profits for the second half of the year come out at £177,085 compared with only £119,983 for the corresponding period, and the dividend of 8 per cent., and bonus of 1 per cent. makes 17 per cent. paid for the year against 16 per cent. for 1896. When the directors established the officers' pension fund a year ago they appropriated £10,000 to it, and this year they add £5,000; but they carry forward as much as £100,000, compared with £40,000. During the half-year the bank took over the business of the North-Western bank, and established half-a-dozen new branches, so that the balance-sheet figures are naturally swollen. Deposits at £21,725,000 are up nearly six millions, and a larger business is done in acceptances, while bills have increased from £1,667,000 to £2,759,000, and advances from £8,669,000 to £11,566,000. The stock of cash has risen from £2,297,000 to £3,174,000, and money at call from £1,294,000 to £2,191,000. Of the investments, Consols still stand at £1,211,124, but its other investments have increased from £2,129,619 to £3,248,158. Against its deposits the Bank holds cash, inclusive of call and notice money, and investments to the extent of 45 per cent., which, although slightly above the proportion held a year ago, is not so large as a bank of this description ought to hold.

MANCHESTER AND COUNTY BANK.—The accounts of this bank show substantial progress, after allowing for the absorption of the Bank of Bolton last year. Profits in the last half-year came to £83,671 as against £69,066 a year ago, but the Board has taken the opportunity to fulfil the promise to start a Superannuation Fund for the officers, and for this purpose has set aside the considerable sum of £10,000 out of revenue. Consequently, after paying the usual dividend at the rate of 15 per cent. per annum, no allocation is made to reserve, but the amount forward is raised by £5,236 to a total of £15,278.

NOTTINGHAM JOINT STOCK BANK.—A much increased profit is shown by this bank in the past year, but as it raised its distribution from 10 to 12½ per cent., the amounts placed to reserve and so forth are rather lower. Thus £1,000 is placed to reserve, as against £3,000 a year ago, and the amount forward is reduced from £2,275 to £1,235. The reduction of £1,000 in the Bank Premises account is at the usual figure. Current and deposit accounts are about £30,000 higher at £1,530,316, but a good deal of the cash received from the recent issue of shares has been used in discount and advances, the total of these being £137,000 higher at £1,327,674.

The London, Brighton, and South Coast Railway Company are seeking power next session to raise £1,000,000, and to borrow upon their capital £333,000, for the purpose of widening their railway on the western side from a point near the Victoria Station to within a few chains of Clapham Junction.

The Ottoman Government has made arrangements with a group of financiers representing the Ottoman Bank, the Deutsche Bank, and the Anatolian Railway Company, for a loan of £1,200,000, bearing interest at 7 per cent., the principal being guaranteed upon the Greek war indemnity.

A Bill to incorporate the Bideford and Clovelly Railway Company has been deposited. The proposed company seeks power to construct a railway of about ten miles, commencing in the parish of Abbotsham, by a junction with the authorised Bideford, Westward Ho! and Appledore Railway, and terminating at Clovelly.

In a recent conference with the Chamber of Commerce at East London, Cape Colony, Sir J. Gordon Sprigg stated that he thought they might have a much more advantageous mail service for South Africa, and that he intended to lay before Parliament next session proposals upon which tenders could be based.

By the Bill deposited by the Isle of Wight Railway Company Parliament is asked to sanction the acquisition by them of the undertaking of the Brading Harbour and Railway Company, which is one of the assets of the Liberator group of companies. The price to be paid has been agreed upon at £16,500.

The South Eastern Railway Company's Bill for next session seeking power to construct about eight miles of new lines, which, taken together, will form a duplication of their existing system from Deptford, through Lewisham, Lee, Bromley, and Chislehurst, to Orpington Station.

The *Engineering and Mining Journal* of New York thinks it "quite evident that the Klondike boom has collapsed." The American public, it is said, has got frightened at the number of illegitimate Company schemes which have been put forward in connection with the "boom." The feeling is far from being unknown in this country.

The Midland Railway Company have deposited Parliamentary Bills seeking powers for the construction of railways from Royston to Huddersfield, Halifax and Bradford. About thirty miles of new line are comprised in the proposal. For this purpose the Company proposes to raise a further sum of £3,600,000, £900,000 by debenture stock, and the remainder by the issue of New Preferred Converted and Deferred Converted Ordinary stock in equal proportions.

The London and North-Western Railway Company are to seek powers next session to provide and use steam vessels between Holyhead and Dublin, Kingstown, Greenore, and any place upon the Lough of Carlingford, and also between any places on the Lough. For this purpose the Company seek power to employ any capital not required for the purpose for which it was authorised.

We must not imagine that the new regulations which the Russian Government are going to put in force with a view to control the sale of spirituous liquors have anything benevolent about them; they are merely the outcome of a settled policy already put in operation over considerable areas of the Empire by which the entire monopoly of the manufacture and sale of intoxicants will be in the hands of the State. This policy is being ruthlessly pursued, and by its latest developments some 12,000 people are to be thrown out of employment, and cleared out of the cities to go back and probably die of starvation in their native place. A few thousand lives more or less makes no perceptible difference in Russia, and the multitude of the people have not yet taught their rulers to respect their existence. They will some day.

French Finance and Trade.

(*From our Correspondent.*)

The Bourse more Active—Railway Shares—The Industrial Outlook.

Paris, January 12th.

The Chamber of Deputies has resumed most quietly, real politics being very quiet. Attention is entirely drawn towards that strange and mysterious Dreyfus-Esterhazy affair. Very few interpellations, happily, are to be be expected in the near future; so the Budget, it is hoped, may be finished at last, the Chamber having to be re-elected not later than April or May next. We, however, had at the end of last week two Bourse days far less good than the preceding ones. Of course, quotations remained sufficiently high, and the tone was generally firm, but transactions were again far too rare and difficult, the causes of that restriction in affairs, somewhat unexpected indeed, being at once the general weakness of domestic politics, and fickleness towards great external questions.

This week the market has begun to be satisfactory again, the different questions which worked against the revival of brisk speculation, seeming to enter into a better phase. The Græco-Turkish question, at least, is settled, except some particular points; the Cuban question seems to shape more favourably; in the Far East, our Bourse financiers cannot believe that the constant efforts made these two years by all European Powers towards a peaceful agreement, can end in failure, peace prevailing at the end everywhere but there. Finally, the monetary "tension," so much feared, did not reach the point expected, the dreaded money scarcity not coming to anything.

Yesterday, and still more to-day, we have enjoyed a far better market. The ease of the London fortnightly liquidation, and the news coming to us from over the Channel, had the best effect on speculators' minds. Some hold that the Bank rate would, perhaps, be shortly reduced again in London, and the rumour has contributed to create better feelings. To-day's Bourse, steadily improving, has been a little more active at last, and, as we write, after some realisations due to profit-taking, the general tone remains firm and the quotations high, with a fair amount of business.

As far as Rentes are concerned, the 3 per cent. has again recovered the round price of 103 francs, attaining 103·20, the current of the reinvestments beginning to tell. Many transactions on account were done at 103·25, and 103·27½. Uncovered, the option vendors begin to feel threatened, and are gradually closing. You remember we told you last week they would be obliged to do so. The 3½ is firm also, between 107·35 and 107·37½. There are some big revenue giving "Fonds d'Etat," which derive important benefits from the difficulty capitalists find in re-investing their ready money. Amongst them is now the Emprunt 5 per cent. Minas-Geraes, which was standing still at a little more than 60 francs till the other day, and has now reached 67 francs. But the low price of this stock was due to the liquidation of the syndicate formed in the middle of last year to hold and vend the loan, which was not a success. The half-yearly coupon, representing 12·50 francs net, will be detached on the 15th inst., so the price stands still again; but we think it will soon improve. In fact the Minas-Geraes Special State Budget has been concluded always with excess receipts, which have permitted the construction or subvention of more than 300 kilometres of railway and other public works. We think much better indeed of this stock than of the Federal Brazilian bonds, or of Spanish Funds. Our Credit Societies stand firm after having suffered from selling to secure profits. The *Banque de France* remains unchanged at 3,520 fr. The *Banque de Paris et des Pays Bas* is up 4 fr. to 894 fr., under the stimulus of the rise in Argentine funds. The *Banque de Paris et des Pays Bas* is said to be at the head of a Syndicate formed with the *Banque des Pays Autrichiens* and some other powerful Banking Corporations, in order to undertake the conversion of the Bulgarian Debt. They say the Syndicate has already submitted tenders to the Sofia Government for the emission of a 4½ per cent. loan, taken at 90 per cent. *Credit Lyonnais* are at 723 fr., after 720 fr.; the *Comptoir National* at 592; the *Banque Internationale* at 617 fr., its recent increase of capital being well interpreted at a moment when industrial undertakings begin to enjoy a "boomlet"; *Société Générale* shares are in demand at 544; *Credit Foncier*, instead of falling, as yesterday, through "bull" realisations, stays at 665 fr.

The firmness continues in the shares of our great railway companies. We have not received yet the fifty-second week's earnings, but up to December 23, from January 1, 1897, they have aggregated 1,224,765,000 francs, instead of 1,189,896,000 francs during the corresponding period of 1896. This is nearly thirty-five million francs in favour of 1897. The Lyon shares are at 1835; Orleans, 1845; Nord, 2,050; Midi, 1425; Est, 1094; Ouest, 1219·50. The "*Banque foncière de la Noblesse*" *(Russ) obligations*, have not been allowed to be quoted in the official list; they, of course, have not been really issued to the public. The same difficulty has met the 3 per cent. Norwegian 1896, the 3½ per cent. Norwegian, 1895, and a good many foreign municipal loans, such as Christiania, Moscow, Odessa, &c. Our Government seems to be unwilling to allow any new admission at the Cote Officielle des Agents de Change of the Bourse to a foreign stock or bond without having obtained equivalent advantages for our foreign trade and commerce.

Most industrial shares continue their upward movement, and are standing firm. Suez shares leaped from 3·323 to 3·342, and the movement commenced some days ago does not seem to be exhausted. The Metaux Society shares have risen from 675-680 to 695, in conformity with the new arrangements settled between the manager, the well-known M. Secretan, and the Seciété d'Electro-Metallargie. The General Omnibus Company has attained 1,700, and the Paris Voitures Company, 780; this Company, under the able management of M. Bixio, is trying the last-invented electrical automotor systems. In 1897, the receipts were 21,033,055 for, against 19,778,063 in 1896. The dividend is expected to be 31 francs at least, instead of 28·50 for 1896. The French Thomson Houston Company should stand at 1,375, it having secured the contract to work the whole of the Nice and Riviera-Coast trams by electricity.

We hear that the Schneider (Creuzot) firm intends to build new iron and steel works at Cette, near Montpellier, on the side of the Thau Lake, communicating with the Mediterranean. These new works may cost some 30 million frs., and will be fitted for a yearly production of 200,000 tons of cast-iron. The situation seems to be a good one, adjoining the iron minerals of the Aude and of the Pyrénées.

The Exposition 1900 ticket *bons* have experienced a notable revival, and reach nearly 18 frs.; this firmness is accounted for by the scarcity of the stock, till now lying in the credit establishments which were the issuers. The public is thinking that the available *bons* are already scarce, and at this very moment comes the interdiction by the Government of sales of the chances of drawings without the *bons* themselves.

A decline of 136 pesetas has been experienced by the Madrid-Saragosse-Alicante Company's shares since the Tarragone-Barcelone-France Company, which it had decided to absorb, and to which it had lent in advance thirty million pesetas (by contract signed June 2, 1891), has suspended all payments. The "T. B. F." Company will be obliged to propose a very poor composition to its creditors, among which the Madrid-Saragosse is included.

The news reaches us from Berne that the Swiss Federal Council has sanctioned the agreement between the banks and the Jura-Simplon Railway Company to

raise the necessary money for the boring of the Simplon tunnel.

Here are some statistics relating to the wine and cider productions in France during 1897. The total production amounts to 32,350,722 hectolitres, i.e., an average yield of 20 lect. per hectare. These figures are normal ones compared with the general average of the last ten years, 32,476,000 hectolitres. But the two immediately preceding years gave very different results: 1895, 26,688,000 hect. only; and 1896, 44,656,000. The cider production has been much worse, hard weather having prevailed last year on the coast, the growing-place of the apple-tree; 1897 gave 6,788,711 hectolitres only, that is, 1,285,677 hect. less than in 1896, and 7,534,496 hect. less than the general average production of the last ten years.

Apropos of beverage, the peculiar assembly which figures as the dignified Paris Municipal Council has taken steps for lowering the heavy octroi duties on those drinks which are supposed to be "hygienic." The intention must be good, but the money lost in that way has to be recovered in another. To cloak their responsibility our Municipal Councillors have invited *referendum* consultations in a new manner. All the Parisians who think they have ideas about taxes or duties are kindly invited to present notes or memoirs on the subject up to a given date, at which the propositions will be examined. Most of the memorials presented up to now are naturally Socialistic, more or less advocating a single tax, which should be personal and progressive, and be borne by both capital and revenue, and saying nothing about hygienic or noxious drinks.

LOUIS DE TOURVILLE.

The Produce Markets.

GRAIN.

The wheat market, both in spot and futures, opened quietly, and continued so throughout the week. Sellers tried to secure an advance on Saturday, but buyers did not respond; indeed they were rather indifferent; and so values remained unchanged. At Mark-lane on Wednesday English and foreign wheat were unchanged in value, and a poor business doing. Flour was slow and unaltered, while arrivals are still on a large scale. Maize steady, with a fair business at 16s. 6d. for American mixed, ex ship; old crop, 17s. 3d., ex quay; and Galatz-Bessarabian, 18s. 6d. Barley was firm at 15s. 6d. for Odessa-Nikolaieff, ex ship. Oats had a good sale at firm to rather higher rates for mixed American; common Petersburg, 15s. 3d. ex quay; Canadian white, 15s. 9d. to 16s. ex ship; Canadian mixed, 15s. 9d. to 16s.; mixed American, 16s. to 16s. 3d. At Liverpool spot parcels were firmly held, and in some instances sellers asked 7½d. per cental more money, but the demand was quiet. Red American futures gained ¼d. per cental at opening in unison with the advance in America, but later, after some minor fluctuations, weakened, owing to disappointing Paris advices together with an absence of support, and values at the second call were unchanged to ⅜d. per cental lower. The market then became steadier, and closed steady and ⅛d. to ¼d. per cental lower except September, which was ¼d. per cental higher. American Maize, mixed, on the spot, was in moderate demand at full prices. European steady and unchanged. American mixed options opened ¼d. per cental dearer owing to higher cables, but afterwards weakened, the values at second call being unchanged to ¼d. dearer. The cargo market has been quiet, the only point of attraction being the Argentine. A steamer of 1,500 tons, La Plata, January-February, sold at 33s. 6d.; 2,300 tons Santa Fé, shipping or shipped, at 34s. 9d.; and 3,000 tons Rosario-Santa Fé. March-April, at 33s. February-March steamers are offered at 33s. 6d., and sailers at 34s. Californian prices are nominal—September, B-L., obtainable at 37s. 9d., and November and prompt at 36s. Walla Walla, on passage, may be had at 35s. 3d. to 35s., and January-February at 34s. 9d. No. 2 red winter, destination wanted, is offered at 36s. 9d. Parcels quiet.

OFFICIAL CLOSING VALUES (100 lb. deliveries—January 12).

	Jan.	March.	May.	July.	Sept.
Red American Wheat	—	7'1¾	7'0⅞	6'9½	6'4½

In New York on Wednesday wheat opened easy, with ½c. fall, due to bearish cable news, then reacted on covering and better late cables; but declined sharply later under realising, and a disappointing export demand, and closed weak, with January ⅛c. up and other months unchanged to ⅜c. down. Spot weak. Spring, 102⅝c. Winter, 100⅝c. Sales, futures, 1,200,000 bushels. Spot, nil. Corn opened steady, but declined under predictions of increased receipts and colder weather, and closed weak at ¼c. fall. Spot easy. Western, 34½c. Sales, futures, 100,000 bushels. Spot, 50,000 bushels.

COTTON.

The spot demand has been fairly active during the week, closing steady on Wednesday with a better demand. In American a good business has been done, though at the previous day's reduction of 1/32d. Brazilian and Egyptian have been quietly steady. Surats were in limited demand at unchanged prices. Futures opened at a loss of ½ to 1 point owing to a "bearish" circular issued by Messrs. Neill Brothers, but, with local "bears" covering, about recovered the fall during the day. Business has been restricted throughout, but the undertone was very steady, the close being partially ½ point lower than Tuesday. Wednesday's tenders at the clearing-house were 200 bales American and 250 Egyptian on new dockets.

NEW YORK CLOSING VALUES.

	Spot.	Jan.	Feb.	Mar.	April.	May.	June.	July.	Aug.	Sept.	Oct.
Jan. 12 ..	5 11/16	5'70	5'70	5'74	5'78	5'85	5'85	5'89	5'92	5'92	5'93

Messrs. Neill Bros., in their circular of the 11th inst., state:—"Mr. Henry Neill fully confirms his estimate at 11,000,000 bales, given in our circular of December 7. To us it appears, from the data received from himself and other correspondents, that his then figures may be rather large for Texas, but if so, and there is no certainty of it, the discrepancy may easily be made up in the other States, from several of which we have recently had still larger estimates than his, so we see no reason to make any change in the aggregate total, although the glowing reports we have had, especially from Alabama, Mississippi, Georgia, and the Carolinas would justify an increase on even his large figures!" They anticipate lower prices.

WOOL.

There has been rather an improved tone in the wool markets, and this has been fairly well maintained, during the week Messrs. Helmuth, Schwartze, & Co., in their annual report, seem to think that this improvement will continue, as it may fairly be assumed that no excessive stocks of goods remain in Europe, and with their disappearance "one of the main causes of last year's depressed trade is removed. The lowest estimates put the decrease which the Australasian clips have suffered from last year's unparalleled drought at 150,000 bales; the Cape will probably also show a distinct diminution and though there may be some increase in the River Plate States, its amount is not likely to be such as in any degree to counterbalance the huge deficit in the Colonies. In the matter of supplies, therefore, the article stands in as sound a position as can well be wished and an improvement in its value would appear to be only a matter of time." The first series of Colonial wool sales has been fixed to commence on Tuesday, January 18, and to close on Friday, February 4, thus allowing for sixteen selling days. The arrivals to date are as follows:—New South Wales, 30,200 bales; Queensland, 16,000; Victoria, 24,200; South Australia, 8,800; West Australia, 8,000; Tasmania, 100; New Zealand, 12,600; Cape and Natal, 39,100—total, 139,000 bales. Deducting about 54,000 which have been forwarded direct to Yorkshire and Continent, and adding old stock 32,000 bales, the total available amounts at present to 117,000 bales. Sheepskin sales will be held on Thursday and Friday next.

METALS AND COAL.

The improved tone in copper shown last week has continued this. Wednesday's sales amounted to about 1,200 tons. Opening rates marked a partial advance of 2s. 6d. on yesterday's close, and good buying on the part of leading operators caused a further improvement of a like sum during the morning; cash and three months starting at £48. 13s. 9d. and £49. 2s. 6d. respectively, and gradually rising to £48. 17s. 6d. and £49. 5s., while four months realised £49. 6s. 3d. and later £49. 7s. 6d. Early business at the afternoon session was very quiet, but towards the end the advance brought sellers forward, and on free offerings both cash and three months quickly fell to £48. 15s. and £49. 2s. 6d. respectively, at which prices the market closed with further sellers.

Little business has been done in coal, and no material alteration in value. Labour disputes threaten the stoppage of one or two collieries in the Barnsley district.

SUGAR.

Market quiet, and practically unchanged. Tate's cubes, No. 1, 14s. 10½d.; No. 2, 14s.; crystals, No. 1, 13s. 1½d.; No. 2, 12s. 7½d.; granulated, 13s. 3d.; yellow crystals, 12s. 6d., Lyle's crystals No. 1, 13s.; No. 3, 12s. 6d.; granulated, No. 1, 13s.; No. 2, 12s. 6d.; white, A, 12s. 9d.; B, 12s.; yellow crystallized, O and P, 12s. 6d. Foreign.—Granulated opened flat, and a moderate amount of business has been done at ⅜d. to 1½d. decline. Cane sugar steadier, with a better inquiry. Messrs. Tate's quotations:—Crystals, No. 1, 13s. 4½d.; small, 13s. 3d.; No. 2, 12s. 10½d.; granulated, standard, 12s. 7½d.; coarse, 13s. 3d.; fine, 13s. 4½d. Beet flat. January, 9s. 3d., v.; February, 9s. 4½d., s.; March, 9s. 5d., v.; April, 9s. 6d., v.; May, 9s. 6½d., b.; June, 9s. 7½d., b. Best futures weak at 1d. to 1½d. decline.

TEA AND COFFEE.

In coffee, spot market has been somewhat dull, and little business doing, prices remaining unchanged. At auction on Wednesday, 1,407 bags, consisting chiefly of ordinary qualities, met with slow competition at easy prices, except a parcel of good home trade, which sold readily at full rates. Savanilla, middling to good bold greenish coloury, slightly nipped, 72s. 6d. to 86s.; good ordinary dingy to fine ordinary bright greenish, 48s. 6d. to 59s. 6d.; ordinary mottled pale, 44s.; low brownish mixed, 31s.; peaberry, 80s. 6d. Colombian, low middling greenish, 67s. 6d.; fine ordinary bright pale and green, 54s. to 55s.; common dingy mixed grayish, 40s. 6d. Nicaragua, ordinary foxy green, 40s. Futures dull at 3d. decline. About 3,000 bags Santos sold—March at 30s. 6d. and May at 30s. 9d. Closing values:—March, 30s. 6d.; May, 30s. 9d.; September, 31s. 6d.; and December, 31s. 9d. Contracts registered, 7,500 bags Santos. At Indian auction on Monday 43,988 packages of tea were offered.

This is the largest amount of Indian tea ever offered at auction in one day. It met with fair competition, and realised generally steady prices, the exception being in teas from 9d. to 1s. 2d., which were easier, the weakness being most noticeable in broken kinds. At auction on Wednesday 8,000 packages Indian sold, common leaf ruling steady; medium to fine broken easier, Terminals dull—Indian, type 1, January-February, quoted at 7 5/16d.; March, 7¾d.; type 2, January-February, 6 11/16d.; March, 6½d.; Ceylon, January, 7¾d.; China, January, 4¾d.; February, 4 13/16d.; March, 4½d.

HEMP AND JUTE.

Though quiet, hemp remained firm during the week. At auction on Wednesday 250 bales fair current Manilla and 250 fair seconds were withdrawn at £17. 15s. and £16 respectively. There are sellers of fair current at £17. 10s., December-Febrnary, sailer, £18, and February-April £18. 5s. 240 bales barely fair current on spot sold at £17, 140 good roping at £19, and 100 superior seconds at £16. 10s. Jute firm on the whole, good first months December, February, and January, March steamer held at £10. 5s.

THE CHINESE CRISIS.

Things seem to be settling down in China. From the quietness reigning during the week it could scarcely be supposed that a crisis existed. Even in money matters the Pekin Government appear to be in no hurry. The negotiations for a loan are progressing very slowly, in consequence of the dilatory tactics of the Chinese officials. The only announcement likely to arouse keen attention is that made yesterday by the *Times'* correspondent at Hong Kong, that an English gunboat had been sent to Hainan, towards which the French are supposed to be looking fondly. Mr. Balfour's explanation of English Ministerial policy, that what Great Britain wanted was not more territory but freedom for the development of trade, seems to have given entire satisfaction both in Germann and France. The Berlin journals declare that Germany asks for nothing more. Kiao-Chau, they insist, is meant only as a *point d'appui* for trade. There will be no exclusiveness—no great scheme of military fortification. The *Cologne Gazette* even hails with goodwill the efforts being made by England to secure the Chinese loan. This, it is urged, would be good not only for Germany but for all the Powers.

But, though a hand-to-hand policy with England in China would be acceptable to Germany, there is said to be a growing conviction that a hand-to-hand policy all the way to China is not so agreeable. Prince Henry, on his voyage to Kiao-Chau, has to call at seven coaling stations, all of which are English. So the Berlin *Post* urges the establishment of a direct route to the Indian Ocean through Austria, Turkey, and Asia Minor; such a route, it is contended, terminating at Bosra or at the Strait of Ormuz, would present far smaller technical difficulties than the Siberian Railway. But that is a matter for future consideration and discussion. If Germany can arrange for a new route England will offer no objection. What is eminently satisfactory for the present, is that Germany endorses England's policy in China and declares her own to be precisely similar, intending to make Kiao-Chau a trading port rather than a warlike stronghold. Austria, it is now stated, will send no warship to China, will seek no territory, but a wealthy Austrian is understood to have left for China, and contemplates playing there a similar rôle to that played by Mr. Cecil Rhodes in South Africa. So the rumour goes in Vienna. We need hardly add that it lacks confirmation. The subject of an Anglo-Japanese alliance is discussed in the Japanese Press, and the military party in Japan insists on Japan asserting herself in the present crisis. But there is nothing yet to indicate the approach of violence. For the present the outlook is perfectly quiet and peaceful. The Chinese crisis may almost be regarded as at an end.

Spain has been added to the list of countries entitled to the benefits of the Canadian reciprocal tariff to the 1st of August next.

AUSTRALIAN GOLD PRODUCTION.

The figures of Australian gold production in 1897, which have been cabled over this week, do not pretend to finality; but they may be accepted as approximately accurate, and they show that mining activity in the various Colonies—those at least from which returns have been received—was last year great and general. Victoria's 810,000 oz. compares with 805,087 oz. in 1896, and 740,086 oz. in 1895; Queensland's 794,000 oz. with 640,385 oz. and 631,682 oz.; New South Wales's 292,217 oz., with 296,072 oz. and 360,165 oz.; and Western Australia's 687,000 oz., with 281,265 oz. and 231,512 oz. Though the New South Wales yield represents a decrease in quantity as compared with 1896, there is an increase of £15,053 in the aggregate value; and, save for 1894-5-6, last year's figure for this colony is higher than that of any year since 1873. Having regard to recent progress in Gippsland, Victoria's increase of nearly 5,000 oz. falls below expectations; but it is possible that the increased output of this field has served to compensate for decreases on some of the older mining grounds. That we shall find out when the official returns are available six months hence.

Queensland's contribution for 1897 constitutes a record for that Colony, and brings it very near to the realisation of its most ardent desire—to surpass Victoria. Its previous best years were 1889, with 739,103 oz., and 1894, with 679,511 oz. In 1896 the yield of the Charters Towers mines was 36,056 oz. less than in the previous year, the falling off being accounted for by the large amount of exploratory and development work carried on. Advices from this district indicate that during the twelvemonths just closed the companies were meeting with their reward for this costly "dead labour," in the shape of an enhanced output. Much appears to have been done also in the development of those minor mining districts which are so numerous in Queensland. But the feature of the year was undoubtedly the big upward jump made by Western Australia. If this pushful young Colony continues to go ahead at this rate, it will before long beat the best accomplished by Victoria in its palmiest days. It would, however, be unsafe to prophesy that it *will* go ahead at this rate. It is young, and in their days, the other Colonies did equally remarkable things which were not long maintained. And at present, the gold production is small enough when placed by the capital of the Westralian companies floated in London in the past few years.

LONDON CHAMBER OF MINES.

The following statement may have some interest to those interested in mining affairs:—"Some months ago a number of gentlemen interested in mining in the Colonies registered the Australasian Chamber of Mines under licence of the Board of Trade. As many of the members were interested in Canadian mining, a Canadian Chamber was afterwards formed. These Chambers have now been merged into one body, which, with the consent of the Board of Trade, will be known in future as the Incorporated London Chamber of Mines. The object of this change is to make the name of the Chamber agree more fittingly with the scope of the Chamber's work, more especially in connection with the proposed International Mining, Metallurgical, and Machinery Exhibition which the Chamber proposes to hold in London next year. It is not to be supposed that this change of name will lessen the Chamber's interests in or relations with the Australasian Colonies." As to the proposed mining exhibition in London the subject is said to be exciting considerable interest in Australia, and the Premier of Queensland has promised £15,000 towards it. The site has not yet been determined upon.

A NEW METAL.

Washington advices announce the discovery of a new metal which may revolutionise the iron trade. It is asserted that, admixed with iron, the new metal renders cast-iron as tough and strong as wrought iron. The *Chronicle* correspondent tells us that Mr. Edison refuses to go into details now; but he is about to begin a series of experiments to determine the conditions most favourable to obtaining the best results.

It is stated from Brazil that an English syndicate will sign a contract for purchasing, for the sum of 18,000,000 dols., several plantations between Sarandy and Bataiaes; and that another syndicate is reported to be organising in London, with Dutch and American capital to twice that amount, for buying plantations in the west or north of San Paulo.

In West Australia, during the month of December, applications for 19,982 acres of land were approved under the terms of conditional purchase, besides 6,600 acres as homestead farms, and 2,300 acres as homestead leases, as well as 49,288 acres for timber licences, while 613,000 acres under the conditions of the Land Regulations as pastoral leases were also approved.

Notices of Books, &c.

Norman's Universal Cambist: With an Exposition of the World's Present Mechanism of the Interchanges of Things. By JOHN HENRY NORMAN, of the London Chamber of Commerce; Expert in the Science of, and Practice with, Money. London: Effingham Wilson.

Mr. Norman is a revolutionary as well as an enthusiast in the cause of currency reform. He dedicates his book "to the world's first man of science who in the future produces a science primer of money such as will compel the world to accept and teach it as truth." This book he means as a help towards that science, if it does not quite fulfil his own aspirations. He is ingenious, well-read in his subject, with probably clear ideas in his own mind, though in his exposition he is occasionally somewhat confusing and erratic. He pleads for simplicity, and has no patience with bimetallists. He condemns the tendency to abstraction in economic discussion, and quotes approvingly a statement by Professor I. K. Ingram that "the study of the economic phenomena of society ought to be systematically combined with that of the other aspects of social existence." Mr. Norman's ideal currency system would be "one metal intermediary for the whole world," in place of the varying intermediaries at present existing. "The abolition of monetary signs, and the use of one weight measure, would be the true Volapuk of money." If this one standard were gold, the fluctuations in the exchanges would be confined within a very narrow margin; the conditions of barter would be preserved, and no ready-reckoner of the world's exchanges would be required. The great difficulty, however, would be to get the world to agree upon a standard weight measure. Mr. Norman is much taken with the notion; he discusses the question with considerable acumen; but he is fain to admit that it is only an ideal, a thing that "may be in the distant future." Currency philosophers may debate it, though they are more likely to pick holes in the argument than to tend towards agreement. But practical financiers will be slow to tackle it. To them it would mean a tremendous revolution; and revolutions, even if producing great advantages, are not readily embraced by practical men. So Mr. Norman betakes himself to the practical work of elaborating and applying his decigrams to existing intermediaries; and insists that, with the aid of less than 60,000 figures, 756 tables of exchange, consisting of from 13,800 to 200,000 figures each, may be dispensed with. By means of his decigrams he seeks to convert "the monetary sign for a weight of gold (or silver) in one country into the monetary sign for the same weight of gold (or silver) in another country . . . by means of the mint-issue weight of pure metal in each chief money of account of the world." Mr. Norman's book is decidedly ingenious, and should prove useful to those who can devote the necessary study to it.

The Law of Sales of Stocks and Shares: By CHARLES FRAMPTON STALLARD, B.A. London: Clement Wilson, Norfolk House, Norfolk-street.

Although at the present time nearly every one invests their earnings or savings in some security or other, very few persons have any ideas concerning their legal rights and liabilities. Mr. Stallard has furnished this information in the present book, which is both interesting and practical. The first part deals with the rules and customs of the Stock Exchange, following on which is a short statement of the law governing agency in the sale of stocks and shares. The two remaining portions of the work treat of the terms and discharge of the contract, the latter including the law relating to transfers and payment. It is certainly a volume to be perused by every investor who is not already acquainted with the legal part of the subject.

The Law of the Liability of Directors and Promoters. By R. STOREY DEANS, LL.B. London: Clement Wilson, Norfolk House, Norfolk-street.

The liability of company directors and promoters is stated clearly and briefly in this volume under three heads. First of all, to individuals dealing under this division with fraudulent prospectuses, notices, reports, and puffs in newspapers—under which heading the case of Andrews *v.* Mockford figures conspicuously. The author then shows how, and under what circumstances, a director or promoter may become liable to the company itself; and in the third part, discusses their liability in the winding-up for misfeasance and breach of trust. It is well-written, and the law concisely stated; but we should have liked to have seen a table of the cited cases with the dates of the decisions.

Answers to Correspondents.

Questions about public securities will be answered week by week, in the REVIEW, on the following terms and conditions:—

A fee of FIVE shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of FIVE shillings must be sent to cover the cost of such letter, the fee then being TEN shillings for one query only, and FIVE shillings for every subsequent one in the same letter. While making this concession the EDITOR will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Correspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus:—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway?"

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The EDITOR has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market munipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The EDITOR further respectfully requests that merely speculative questions should as far as possible be avoided. He by no meant, sets himself up as a market prophet, and can only undertake so provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the INVESTORS' REVIEW, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

H. F. G.—The board cannot be considered strong, prospectus is meagre. You will do well to leave the concern alone.

N. S.—You might wait a little longer. Company is reported to be interested in a scheme in connection with the opening up of the western country.

M. L. B.—I do not, as I anticipate the company will have a good deal of difficulty with its extension.

WAVERLEY.—Prefer Nos. 1 and 3; should not recommend investment of all the fund in this manner. Sinking Fund should be larger than you suggest.

ALLIANCE ASSURANCE COMPANY.

ESTABLISHED IN 1824.

Subscribed Capital, FIVE MILLIONS STERLING.

Directors.

Right Hon. LORD ROTHSCHILD, *Chairman.*

James Alexander, Esq.
Charles Edward Barnett, Esq.

THE LONDON AND COUNTY BANKING COMPANY, LIMITED,

Opens Drawing Accounts with Commercial Houses and Private Individuals upon the plan usually adopted by Bankers.

Deposit Accounts.—Deposit Receipts are issued for sums of Money placed upon these Accounts, and Interest is allowed for such periods and at such rates as may be agreed upon, reference being had to the state of the Money Market.

Circular Notes and Letters of Credit are issued payable in the principal Cities and Towns of the Continent. Letters of Credit are also issued payable in Australia, Canada, India, China, the United States, and elsewhere.

The *Agency* of Foreign and Country Banks is undertaken.

The *Purchase and Sale* of Government and other Stocks, also of English and Foreign Shares, are effected. *Dividends, Annuities, &c.*, are received for Customers of the Bank.

Great facilities are offered to the Customers of the Bank for the receipt of money both from and in the Towns where the Company has Branches.

The Officers of the Bank are bound not to disclose the transactions of any of its Customers.

By order of the Board,
J. H. ATKINSON, *Secretary.*

To Correspondents.

The EDITOR cannot undertake to return rejected communications. Letters from correspondents must, in every case, be authenticated by the name and address of the writer.

The Investors' Review.

The Week's Money Market.

The market during the week has been struggling against its over-supply of funds. A good portion of the money obtained from the Bank of England on bills discounted before the turn of the year remains upon its hands, and was increased to a slight extent by the release of Japanese funds, and these floating supplies beat down the rates for short loans. The banker and bill-broker must turn their spare money over, else their profits would be materially reduced, and consequently the rate for day to day money steadily slipped back each day until it is now no more than 1¼ per cent., as against 1½ to 2 per cent. a week ago. Weekly fixtures are likewise quoted lower at 1½ to 1¾ per cent., as compared with 1¾ to 2 per cent. last week. The increased ease caused some disturbance amongst the discount houses, and several meetings were held to discuss the advisability of putting down the allowances for money at "call" and "notice," but no action was taken.

Discount rates, however, have been fairly maintained throughout the week, and closed just a shade harder at 2⅜ to 2 7/16 for three months' bank bills. The knowledge that the Treasury will be sweeping in outside balances directly, and that the bills held by the Bank of England are also daily maturing, encouraged a spirit of caution, which was heightened by the aggravation of the monetary stringency in India, although this development has not led to gold being purchased this week for that quarter. Undoubtedly bidding would have been brisk for the metal on that account, but the propounding of the gold-depositing scheme by the Indian Government caused intending exporters to hold their hand. Much was talked about the shipment of the metal to the Argentine Republic; but, after all, only £80,000 was taken, which, with the withdrawal last week, stated to be for South America, practically constitutes the withdrawals from the Bank during its financial week. As a matter of fact, we have reason for stating that a fair proportion of the £520,000 taken a week ago ostensibly for South America went to the Continent.

The Stock Exchange settlement found the market more inclined to lend to the "House," and fortnightly loans did not often exceed 3¼ to 3½ per cent. The Indian Government announced the renewal of the £1,000,000 of Sterling Treasury Bills, falling due on the 23rd inst., a course that was fully expected. The New South Wales Loan for £1,500,000 went at an average premium of £1. 8s. 4d. above the minimum of 99, but although this appears a moderate premium in these days of investment hunger, it compares very favourably with the previous issue of Three per Cents. by the same Colony in October, 1895, when only £96. 18s. 3d. per cent. was obtained.

There is nothing at all unusual in this week's Bank return. It shows that the market has paid off £1,624,000 due by it on "other" securities at the expense of a reduction of £1,073,000 in "other" deposits. Probably the change of credits from the control of the market to that of the Bank would have been considerably larger but for the readiness of the Bank to discount bills. The banking reserve has been increased by about £800,000 to £20,685,000 by the return of the cash drawn out at the end of the year. Nevertheless, it lost £587,000 in gold by export within the week ended on Wednesday.

BANK OF ENGLAND.

The Week's Stock Markets.

Markets were dull towards the end of last week, due to some realisations in anticipation of the settlement, which commenced on Tuesday. When the account had been finally adjusted the tendency became distinctly firm in all departments, with the exception of Home Government Securities, although the latest prices in several instances are not the highest of the week. The account was somewhat heavier than a fortnight ago, but was easily arranged, rates being generally lower. The principal activity has been in Canadian and American Railway shares and Foreign Government stocks.

Consols have shown a drooping tendency, and "marked" as low as 112⅞ on Tuesday, after having touched 113 earlier in the week. Indian Government Securities have also declined, but there is a slight improvement in Rupee Paper, due to the further sharp rise in the Indian Exchanges.

Home Railway stocks have exhibited a firm tone, and business has been fairly active. Continuation rates were considerably lower, and all stocks, with the exception of South-Eastern Deferred, were scarcer for delivery than at the last account. On Chatham Ordinary and Great Central issues there was a backwardation; Great Eastern was continued at ⅛, Great Western at 5/16, Midland Preferred at ⅛, North-Western at 1/16, and South-Eastern Deferred at ¼ contango. Great Central stocks have again attracted most attention, and, owing partly to several misleading telegrams from Manchester, which gave the dividend as 4 per cent. on the Preferred, prices advanced rapidly. When it was found that the dividend was really at the rate of 2 per cent. on the Preferred (equal to 1 per cent. on the undivided Ordinary), there was a sharp decline in all the Great Central issues. A year ago the dividend was 3 per cent on the Preferred (or 1½ per cent. on the Ordinary) and practically the same amount has now been placed to reserve and carried forward. South-Eastern Deferred sprang up suddenly on Saturday and relapsed as quickly on Monday, on the manipulations of a clique. The Scottish stocks have been favourably influenced by rumours that the engineers in the North were preparing to desert the Union and return to work as non-unionists. The Caledonian and Glasgow and South-Western Companies announce a 20 per cent. reduction in passenger rates from Paisley and Glasgow, to take effect next month, and it is expected that the other

competing lines will follow suit. All the traffic returns were considered satisfactory.

United States Railroad shares have presented a straggling appearance, but after several ups and downs prices leave off with a considerable margin in favour of holders. Wall-street buying is principally responsible for the improvement, and the earnings published this week have helped to raise prices. The somewhat stale letters appearing in the *Times* on Monday, *re* the Silver campaign in the United States, created a mild sort of a "slump," but the effect soon wore off. There has again been some talk of the Union Pacific and the Chicago and North-Western Companies consolidating, but nothing definite is known on this side.

Union Pacific shares have also been largely bought on the report that the committee has secured control of the Oregon Short line and the Oregon Navigation Company; and a good traffic return for the first week in January is responsible for the rise in Chicago and Milwaukee. The East-bound railway freights despatched from Chicago during last week amounted to nearly 142,000 tons, as compared with about only 89,000 tons for the preceding week.

Canadian Pacific Railway shares have again attracted a good deal of attention, and large buying orders have come on the market from Germany. Grand Trunk Stocks continued their upward flight for a time, but the recent rapid rise has naturally been followed by a considerable amount of profit taking. The traffic return was again wonderfully good, although not up to market expectations.

Among Foreign Government securities Chinese bonds advanced steadily, but became dull owing to a reported hitch in the arrangements for the new loan, and there has been a good demand for Argentine Government and the various Cedula issues. The gold premium at Buenos Ayres continues to decline, helped in that direction by the shipments of sovereigns from London for payment of wheat, and more gold is expected to go either from London or Paris. Greek bonds mark a substantial rise, on the proposed settlement of the Debt, it being further announced that the Government will receive authority to raise a loan sufficiently large to wipe out the 1897 deficit, and also to provide for the deficit of this year. Spanish Fours have recovered a little on more cheerful news from Cuba; Turkish groups maintain last week's rise, and, according to a Reuter's telegram, negotiations are now on foot for a new Turkish loan for £T400,000 to the Government against an increase of the guarantee for the railway between Eskishehr and Konieh. Uruguay bonds have been dull, the country being again on a verge of a revolution, despite the energetic action of President Cuestas. The Peruvian Corporation issues advanced in sympathy with the firmness of Argentine Govt. bonds.

In the Miscellaneous market business continues to spread, and transactions have been numerous. Movements in the upward direction are apparent in Aerated Bread shares, Anglo-Argentine Tramways, British Electric Traction, D. H. Evans, and Waterlow & Sons, Deferred. Telegraph stocks are firmer, notably Anglo-American. The satisfactory dividends announced by the leading banks, has caused an inquiry for their shares, and brewery debentures have been actively dealt in at higher prices. Hudson Bays have moved within narrow limits, Coats are about 1⅛ higher, and Apollinaris also marks a rise.

Markets close with an irregular tendency. Among Home Railway stocks, Brighton Deferred advanced sharply on dividend rumours, a 7 per cent. distribution being looked for to-morrow. South Eastern and Great

Eastern close firm, but Great Central issues and the Scotch stocks were slightly weaker. Canadian Pacific, and Grand Trunk descriptions show heavy falls just at the last, and United States Railroad shares are weaker, with the exception of New York Central. As regards Foreign Government securities, the Greek loans, leave off firm, but there is a slight get back in Argentine, and the Cedulas, Italian, Spanish, and Turkish groups.

Dividends Announced.

Austro-Hungarian Bank.—A dividend of 23 florins 60 kreutzers, for the second half of 1897, has been declared.

Badcock & Wilcox, Limited.—Interim dividend 10 per cent. per annum.

Bank of Victoria.—A cable has been received from the head office, Melbourne, stating that the directors propose to pay off in advance on 15th April a further instalment of 20 per cent. of its deferred deposit receipts.

Bank of Liverpool.—Directors have declared the usual interim dividend of 12s. 6d. per share.

Bank of Madras.—For the past half-year a dividend is declared at the rate of 10 per cent. per annum, with a bonus of 1 per cent., carrying forward 226,000 rupees. The dividend is at the same rate as last year.

Bristol Brewery (Georges & Co.)—Dividend at rate of 15 per cent. per annum, and bonus of 6 per cent. per annum, making 19 per cent. for year against 17½ per cent. for 1896.

Beacon Gold Mines have declared a third interim dividend of 6d. per share.

British Columbia Development Association.—An interim dividend of 10 per cent. for the year is declared on the preference shares.

Capital and Counties Bank has declared dividend for the past six months at the rate of 16 per cent. per annum.

Debenture Corporation.—A dividend of 7 per cent. for the year is declared on the ordinary shares, with a bonus of ½ per cent., adding £3,200 to reserve, and carrying forward £4,206. The dividend last year was at the rate of 3 per cent., with ½ per cent. bonus.

De Keyser's Royal Hotel, Limited.—Dividend 7s. on ordinary shares, making 6½ per cent. for year; £3,472 carried forward.

Direct United States Cable Company.—Interim dividend of 3s. per share for quarter; £12,000 to reserve and £4,090 forward.

Distillers' Company.—Interim dividend of 8s. per share. Last year the dividend was at the same rate.

Great Boulder Proprietary Company.—Dividend of 6d. per share on the divided shares.

Great Central Railway Company.—Dividend for past half-year announced at rate of 2 per cent. per annum on preference ordinary stock. For corresponding half of 1896 the dividend on the undivided ordinary stock was at the rate of 1½ per cent. per annum; £7,000 is placed to reserve and £2,200 carried forward.

Great Northern Railway Company of United States.—Quarterly dividend declared of 1½ per cent. on preferred capital stock, and the regular quarterly dividend of 1½ per cent. on the capital stock of the St. Paul, Minneapolis and Manitoba Railway Company 6 per cent. guaranteed shares.

Halifax Joint Stock Banking Company announce a dividend at the rate of 10 per cent. per annum for half past year, carrying forward £7,119, the dividend being at the same rate as last year.

Liebig Extract of Meat Company.—Interim dividend of 20s. per share.

Lister & Co.—Directors recommend dividend at the rate of 2 per cent. to the ordinary shareholders, taking £4,874 from reserve.

Lloyds' Bank.—A dividend of 16s. per share is declared, being at the rate of 20 per cent., making a distribution for the year of 17½ per cent., adding £50,000 to reserve fund, placing £25,000 to premises account, carrying forward £32,000. The corresponding dividend last year was at the rate of 10½ per cent. per annum.

London and Greenwich Railway Company will pay dividends at rate of £1. 8s. 3d. per cent., out of an available balance of £12,226.

London and Provincial Bank.—It is proposed to pay a dividend at the rate of 17½ per cent., place £6,283 to reserve fund, to add £10,000 to reduction of premises account, £4,000 to pension fund, and to carry forward £21,773. Last year the dividend was at the rate of 17 per cent. per annum.

London and South Western Bank.—After placing £10,000 to reserve, writing £10,000 off premises account, a dividend at the rate of 10 per cent. is declared, and a bonus of 2 per cent., making, with the dividend and bonus paid in August, 13 per cent. for the year, carrying forward about £15,000. The dividend last year was at the rate of 10 per cent., with a bonus of 1 per cent., placing £20,000 to reserve, and carrying forward £15,000.

Manchester and County Bank.—After setting aside £10,000 towards officers' superannuation fund, a dividend at the rate of 15 per cent. per annum is declared, leaving £15,278 to be carried forward. The dividend remains the same as at the same period last year.

Manchester and Liverpool District Banking Company.—Dividend of 15s. declared and a bonus of 5s. per share, adding £15,000 to reserve, and carrying forward £19,249. The dividend and bonus were the same last year, with £21,438 carried forward.

Mercantile Bank of Lancashire.—After adding £3,000 to reserve fund, the directors recommend a dividend for past half year of £2. 10s. on the "A" share, and at the rate of 7½ per cent. per annum on the ordinary shares. The corresponding dividends were at the same rate.

Merchants' Marine Insurance.—Dividend of 1s. 6d. per share, making 6 per cent. per annum.

Redeem Tea Company.—Interim dividend of 2½ per cent. on ordinary shares.

New Tivoli, Limited.—Interim dividend for the past six months at the rate of 1£ per cent. per annum, and a bonus of 2s. per share. Last year the dividend was at the same rate, with a bonus of 3s. per share.

North Eastern Banking.—Directors propose to pay a dividend of 6s. 6d. per share, and to carry forward £2,843. The corresponding dividend last year was at the rate of 10⅓ per cent.

North Metropolitan Tramway Company.—Six per cent. per annum dividend. Carried forward, £4,700.

Nottingham Joint Stock Bank.—Dividend at the rate of 15 per cent. per annum, and a bonus of 2½ per cent. The dividend last year was at the same rate.

Oldham Joint Stock Bank.—Recommend a dividend of 4s. per share, making with the interim dividend 10 per cent. for the year, being at the same rate as last year.

Provincial Bank of Ireland.—Dividend for the past six months at the rate of 10 per cent. per annum. The dividend last year was at the same rate and £9,765 was carried forward.

Royal Brewery, Brentford.—Interim dividend on the ordinary shares at the rate of 7 per cent. per annum, being at the same rate as last year.

Union Bank of London.—The directors have declared a dividend of 14s. 6d. per share, placed £5,000 to reduction of bank premises account, and carried forward £22,232. The dividend was at the same rate last year, with £22,047 carried forward.

Williams, Deacon, and Manchester and Salford Bank.—Dividend of 12s. per share, placing £20,000 to reserve fund, £15,000 to buildings depreciation fund, and carrying forward £20,927. Last year the dividend was at the rate of 12½ per cent., with £17,629 carried forward.

City and South London Railway Company.—Dividend at the rate of 1¼ per cent. per annum for the half-year ended December 31, with £1,510 carried forward. Dividend same as last year.

Hong Kong and Shanghai Banking Corporation.—Dividend for the half-year ended December 31 of 25s. per share, adding 1,000,000 dol. to reserve fund (which will then stand at 8,000,000 dols.) and carrying forward about 300,000 dols.

Liverpool Union Bank.—Dividend of £1 per share is declared for the past half year, and a bonus of 10s. per share, making with the dividend already paid 12½ per cent. per annum.

GOLD MINING IN ONTARIO AND BRITISH COLUMBIA.

Mr. E. R. Rathbone delivered an interesting lecture on Tuesday evening at a meeting of the Royal Colonial Institute on "The Goldfields of Ontario and British Columbia." He had no doubt that the Dominion, taking advantage of the experience gained in other gold-mining countries, would be able to avoid many of the costly mistakes which had so frequently accompanied the first discovery of payable goldfields elsewhere. After alluding to the nature of alluvial and vein-gold mining, and explaining the methods, the lecturer said it was to hydraulic mining that British Columbia owed its principal production of alluvial gold at the present time. So far as could be ascertained from the Government reports of British Columbia and Ontario, the total gross value of gold derived from placer gold mining in British Columbia, principally from the district of Cariboo, and spread over a period of about forty years, amounted to something like £12,000,000 sterling. The greatest period of prosperity in this class of mining was apparently during the sixties, when the annual output ranged in value from about £500,000 to £1,000,000 sterling. During the past decade, however, it appears to have ranged only from £80,000 to £120,000. Doubtless in the next few years the gold production derived from placer mining within the Dominion would enormously increase owing to the recent discoveries in the North-Western Territories, on the Yukon and at Klondike. The amount of gold produced from vein-mining in British Columbia had, until quite recently, been hardly worthy of notice, and indeed even at the present time it was largely due to the production of one mine. Coming to mineral statistics and mining laws, Mr. Rathbone said there was no better method of illustrating the progress made in the mineral industry of a country than by the frequent and intelligent publication of its mineral statistics. The importance of the publication of facts and figures in order to draw the attention of the public to any newly-discovered goldfield could not well be exaggerated. Much useful work can be accomplished in this connection by the establishment of a Chamber of Mines. Having described the mining undertakings at work, the lecturer, in his concluding remarks, said it was in the nature of things that gold mining should be taken advantage of by ignorant and unprincipled persons to so exaggerate and confuse the minds of the investing public that it was often held in much disrepute. It was unfortunate that, whereas in nearly all other industries, some practical knowledge was considered as a necessary condition of success, yet in gold mining especially no such knowledge was demanded by the investing public, and any one, if he had only lived in a mining country, was supposed to have absorbed by contact a sufficient knowledge of mining to enable him to distinguish good properties from bad, and otherwise direct one of the most complicated of industries. It was also a drawback to mining that engineers were not obliged to qualify in some way in their profession; under present conditions it was competent for any jack-of-all-trades to suddenly pose as a mining engineer, whose opinion was seriously accepted by a gullible public so long as it was sufficiently favourable.

DR. CORNELIUS HERZ.

Now that the last of the Panama trials have been disposed of in France, Dr. Cornelius Herz, is trying to turn the tables on the French Government, for what he calls the persecution to which they subjected him. He has, through counsel, presented to the State Department at Washington, a claim for an indemnity in consideration of this "persecution," which he declares to have been illegal. It is urged that, though born in France of French parents, he is really an American, as, when three years old, his parents went to New York and obtained American citizenship. The claim demands that the State Department shall prefer a claim in full for the injury done to the name and health of Dr. Herz. Although a specific sum is not mentioned, the brief shows that Dr. Herz demanded a sum of 5,000,000 dols. in a letter which he addressed to the French President, which was never answered. The State Department has promised to consider the matter.

The exports of gold from Cape Colony, during December, amounted in value to £1,257,886, and the total exports for the past year to £10 991,926.

The *Heraldo* of Madrid states that the Minister of Finance has abandoned all idea of a credit operation based on any arrangement connected with the Almaden Mines.

PROPOSED NEW DEEP-SEA CABLE.

Sir Gordon Sprigg, the Cape Premier, told his constituents the other day that, while in England, he had discussed a project for laying a deep-sea cable to the Mother Country. The proposal is that the cable should go from England to Gibraltar, and thence *viâ* Sierra Leone, Ascension, and St. Helena to Cape Town, whence it would proceed overland to Durban, and from Durban be carried to Mauritius, and to Perth, Western Australia. The Premier added that should this scheme be carried out he would submit to Parliament that the Cape as its share should bear the cost of construction to Cape Town and Durban.

THE PROPERTY MARKET.

There has been renewed activity at the Auction Mart, and during the week some notable sales have been effected. The present home of the French Embassy at Albert-gate, Knightsbridge, held under lease from the Crown, has been bought by the French Government for something over £25,000. Messrs. Barker & Neale have sold to Mr. Stanley Leighton, M.P., the house occupied by the late Sir H. Havelock-Allan, 70, Chester-square. The price, however, is not stated. Messrs. H. E. Foster & Cranfield sold, at the Mart on Tuesday, a number of reversions at good prices. Among those was a moiety of a trust fund valued at £11,150, and one moiety in possession of five twenty-fourths, with the remaining moiety in reversion, of the York Hotel, &c., Albemarle-street, f., r. £2,758, life 52 years—£11,000. Messrs. G. B. Hilliard & Son sold the manor of Pebmarsh and Dagworth at £900; and that of North Weald, Essex, at £1,550. Mr. C. H. Brown had extensive sales of house property at the Mart yesterday. Among these were the houses 16 and 18, Dartmouth-street, Westminster, f., r. £180. 16s.—£2,310; 30, Great Chapel-street, f. r. £120—£3,030.

Only two lots were disposed of at Tokenhouse-yard on Monday, viz.: The Railway Tavern and Lyonsdown House, New Barnet, freehold properties, let at £80 and £30 a year, which were sold by Messrs. Rumball & Edwards for £3,400 and £410 respectively. The Donyland Brewery, Colchester, with twenty-eight tied-houses, offered by Messrs. Fenn & Co., was bought in at £120,000, the highest bid being £116,000.

Messrs. Hampson & Co. announce the sale, at the Mart, on the 17th inst., of a profit rental (£100 p.a.) on No. 25, King-street, Regent-street, W.; the town residence, 29, Duke-street, W.; a pair of leasehold houses at Camberwell; and residences at Maida-vale and Maidenhead.

The examinations (preliminary, intermediate, and final) of the Auctioneers' Institute will be held in London towards the end of March or the beginning of April. Forms of entry, which must be filled up and lodged with the secretary on or before March 1st, may now be obtained upon application at the Institute, 57 and 58, Chancery-lane, London, W.C.

The date of Mr. Alfred Richard's sale of stocks and shares at the Mart was incorrectly given in the last number of the INVESTORS' REVIEW as the 28th. It should have been the 25th.

THE BRINSMEAD CASE.

The case of the Queen *v.* Brinsmead was mentioned at the Old Bailey, where Mr. Justice Hawkins was presiding, on Tuesday, in reference to the question of the recognisances. It was stated by Mr. Carson, who appeared for some of the defendants, that an application was made on December 10 on behalf of three of these, for the removal of the trial to the Queen's Bench. The application was granted. Since then, Lomax, one of the defendants, had disappeared, but the other six defendants had done all that lay upon them in order to have the case tried in the superior Court. But the disappearance of Lomax had led to this—that the order of the Court had not been fully carried out. Under these circumstances he now applied on behalf of the remaining six defendants, that the original order might be superseded and a fresh order made for the removal of the trial of the six defendants to this Court. There was a good deal of discussion on the point. In the end Mr. Justice Hawkins said the Court would, in reference to three of the defendants, grant the rule asked for, but upon the condition that the trial should be actively commenced by the 25th of the present month, and that fresh recognisances should be entered into. This was accepted by Mr. Carson, who said the absent defendant would probably surrender, so as to facilitate the proceedings. Upon this, Mr. Justice Hawkins remarked that he would rather suppose that there would be a Bench warrant for him.

The name of Prince George of Greece as candidate for the Governorship of Crete has been formally withdrawn, in consequence of the opposition of Germany.

The gold exports from Western Australia during December amounted to 72,411 oz., valued at £275,211, as compared with 75,845 oz., valued at £288,211, during November, and 29,653 oz., valued at £112,683, in December, 1896.

The Glasgow and South-Western Railway announces a reduction of 20 per cent. in passenger rates between Glasgow and Paisley from February 1. This seems likely to be followed by the cutting of rates on the part of other companies.

Next Week's Meetings.

SATURDAY, JANUARY 15.

Watney & Co., Three and a Half per Cent. Debentures	Call of 50 per cent. = £300,000.

MONDAY, JANUARY 17.

Conde d' Eu Railway Company	Winchester House, noon.

TUESDAY, JANUARY 18.

Assets Founder Share Company	Worcester House, Walbrook, noon.
Assets Realisation Company	Worcester House, Walbrook, noon.
Buenos Ayres and Pacific Railway Company, 1st debentures	Winchester House, 2.30 p.m.
City Bank	5, Threadneedle-street, noon.
Lady Loch Gold Mines	Winchester House.
Lancashire and Yorkshire Bank	Manchester, noon.
London and Provincial Marine Insurance	2, Royal Exchange Buildings, noon.
North Mount Lyell Copper Company	Winchester House, 11.45 a.m.

WEDNESDAY, JANUARY 19.

Debenture Corporation	Cannon-street Hotel, noon.
London and Greenwich Railway Company	Winchester House, 12.30 p.m.
London and Provincial Bank	Cannon-street Hotel, 12.30 p.m.
London and Westminster Bank (Gen.)	Lothbury, 1 p.m.
Manchester and Liverpool District Bank	Manchester, noon.
Morton Rose Estate Debentures	6, Princes-street, E.C., noon.
National Discount	Cannon-street Hotel, noon.

THURSDAY, JANUARY 20.

Adelphi Bank	Liverpool, noon.
London Joint Stock Bank	Princes-street, E.C., noon.
Union Discount Company	Cannon-street Hotel, 12.30 p.m.

FRIDAY, JANUARY 21.

London and Midland Bank	Birmingham, 1 p.m.
Manchester and County Bank	66, King-street, Manchester, noon.
North-Eastern Banking	Newcastle-on-Tyne, noon.
Rafferty, Thornton, & Co.	42, Old Broad-street, 3 p.m.

It is stated that no new railways will be undertaken in India this year, but that Government will allot £7,000,000 to lines already under construction.

By his will, written in 1895, the late Sir Henry Doulton, of the firm of Doulton & Co., potters, left personal estate valued at £309,483.

For the first time for ten years the dividend of the Austro-Hungarian Bank is under 7 per cent.; consequently the two States do not participate in the net profits.

Canadian Pacific land sales for the past year show a great increase. For 1897 the figures are 200,000 acres, valued at 650,000 dols., while in 1896 88,000 acres were sold for 307,000 dols.

The Lands Department at Sydney is said to be arranging to withdraw large areas from pastoral lessees, and that about a million acres will thus be eventually available for occupation by farmers.

Germany has just appointed a Consul in Liberia, on the West Coast of Africa, an appointment which is regarded as significant. About three months ago the French established a new Consul at Monrovia.

The Ceylon Customs receipts of the past year, including port and harbour dues, which reach 903,455 rupees, amounted to 7,290,124 rupees, exceeding the receipts for 1896 by 757,000 rupees, and the receipts for 1895, the highest previous year, by 602,207 rupees.

It is announced from Berlin that the German Asiatic Bank has already arranged to establish a branch in the Chinese territory occupied by Germany. Other banks are preparing to follow the example.

The British Embassy is said to be quietly negotiating a series of treaties to extend the benefits of so much reciprocity as is obtainable under the Dingley tariff to British possessions in the West Indies.

Experiments are being made at the New South Wales Government farm in the growth of the ramie, or rhea plant, from the fibre of which various fabrics have already been produced by treatment in England. It is cautiously added that the industry is believed to offer great possibilities.

CRIPPLEGATE FIRE VERDICT.—The inquiry at the Guildhall by the City Coroner, Mr. Langham, into the cause of the Cripplegate fire was concluded on Wednesday, and the jury, after nearly five hours' deliberation, returned a verdict to the effect that the fire was not accidental, but was wilfully started by some person or persons unknown.

Tenders for £1,500,000 New South Wales Government 3 per cent. Stock were opened Tuesday at the Bank of England. The applications amounted to £3,908,400—at prices varying from £102 to £99 (the minimum). Tenders at £100. 3s. 6d. will receive about 31 per cent. of the amount applied for, those above that price being allotted in full. The average price obtained for the Stock is £100. 8s. 4d.

THE SUGAR BOUNTIES.—Mr. Czarnikow, in his weekly circular, dated yesterday, states that "a Sugar conference of European countries is shortly to be summoned to Brussels, and Austria, Germany, and Belgium are said to be actually agreed upon abolition of bounties, provided France will abolish both direct and indirect bounties. The latter proposal will meet with great opposition, unless England follows the example of America, or a formula can be invented and agreed to limit bounties strictly to home consumption."

Prices of Mine and Mining Finance Companies' Shares.

MINING RETURNS.

Alaska Mexican.—Bullion shipment, 30,193 dols.; ore milled, 14,322 tons; sulphurets treated, 291 tons. Bullion, 9,053 dols.

Block B, Langlaagte Estate Gold Mining Company.—Mill: ore crushed, 11,740 tons of 2,000 lb.; gold retorted, 3,044 oz. Tailings (cyanide process): 7,200 tons; gold recovered, 1,104 oz. Concentrates (cyanide process): tons treated, 178; gold, 336 oz. Total, 4,484 oz.

Durban-Roodepoort Gold Mining Company.—Quartz milled, 10,440 tons produced 4,850 oz.; tailings treated, 7,260 tons produced 1,230 oz. Total, 6,080 oz.

George Goch Amalgamated Gold Mining Company.—10,300 tons crushed, yielding 1,941 oz., and 1,238 oz. from tailings.

Glencairn Main Reef Gold Mining Company.—6,699 oz. Profit, £10,600.

Langlaagte Estate and Gold Mining Company.—Ore crushed, 20,876 tons of 2,000 lb.; gold retorted, 6,053 oz. Tailings (cyanide process): tons treated, 16,650; gold recovered, 1,707 oz. Concentrates (cyanide process): tons treated, 750; gold recovered, 1,269 oz. Total, 9,029 oz.

Langlaagte Star Gold Mining Company.—Ore crushed, 5,310 tons of 2,000 lb; gold retorted, 3,118 oz. Tailings (cyanide process): tons treated, 4,313; gold recovered, 902 oz. Total, 4,020 oz.

May Consolidated Gold Mining Company.—The yield of gold, 4,076 oz. from 14,489 tons crushed; cyanide, 2,010 oz. from 7,865 tons. Total, 6,086 oz.

New Heriot Gold Mining Company.—Last month's crushings, 6,610 oz.

North Randfontein Gold Mining Company.—Ore crushed, 6,167 tons of 2,000 lb.; gold retorted, 1,667 oz. Tailings (cyanide process): tons treated, 3,840; gold recovered, 687 oz. Total, 2,354 oz.

Porges Randfontein Gold Mining Company.—Mill: ore crushed, 7,520 tons of 2,000 lb.: gold retorted, 3,117 oz. Tailings (cyanide process): tons treated, 5,470; gold recovered, 980 oz.; Concentrates (cyanide process): treated, 98 tons; gold recovered, 405 oz. Total, 4,502 oz.

Robinson Gold Mining Company.—Crushed, 16,941 tons of ore; yielded by smelted gold, 11,041 oz.: from concentrates (by chlorination), 1,337 oz.: from tailings (cyanide process), 2,783 oz.: from slimes, 6,460 oz.; from concentrates bought (by chlorination), 3,835 oz.: total gold recovered, 26,683 oz.

Robinson Randfontein Gold Mining Company.—Ore crushed, 5,040 tons of 2,000 lb.; gold retorted, 2,525 oz. Tailings (cyanide process): tons treated, 4,085; gold recovered, 785 oz. Concentrates (cyanide process): tons treated, 57; gold recovered, 123 oz. Total, 3,373 oz.

Treasury Gold Mines.—Output for December, 5,517 tons yielded 3,770 oz.

Violet Consolidated Gold Mining Company during December crushed 4,965 tons. Total yield from all sources, 1,513 oz.

West Rand Mines crushed 3,965 tons, yielding 1,052 oz.; cyanide treated 2,888 tons, yielding 680 oz.

Witwatersrand Gold Mining Company.—Crushed 14,200 tons, yielding 3,813 oz. gold; 9,010 tons cyanide tailings treated, yielding 1,170 oz. gold.

Wolhuter Gold Mines.—Crushed 13,378 tons, producing 4,532 oz.; cyanide, 3,138 oz. Total, 7,670 oz.

Associated Gold Mines of West Australia.—Clean up from 1,750 tons ore produced 2,355 oz. gold.

Mountain Maid and Iron Prince.—36 dwt. per ton from 19 tons. Iron Prince: crushed 4 tons picked ore which yielded 106 oz.

North Star.—Crushing for December 352 tons, yielded 564 oz.

Champion Reef (Nannine, West Australia).—Crushed 730 tons, yield 175 oz. retorted gold.

Victory Charters Towers.—Crushing for fortnight from No. 3 shaft, 88 tons, yield 324 oz. gold. Approximate value £1,067; profit £517.

Worcester.—Last month 2,615 tons were crushed, yielding 2,615 oz. gold.

Agamemnon.—285 tons of ore crushed, yielding 130 oz. of gold. Assay of tailings show a loss of 2½ dwt.

Broken Hill Proprietary Company.—22,244 tons of ore produced 532 oz. of gold, 420,366 oz. of silver, 1,669 tons of lead, 63 tons antimonial lead, the copper matte containing 13 tons of copper and 31,004 oz. of silver.

Cassell Coal.—December output, 22,500 tons. Profit, £3,800.

Chiapas.—During December the concentrating mill ran thirty days; 1,750 tons crushed, yielded 75 tons of concentrates. The stamp mill ran twenty-seven days crushing 1,550 tons tailings, yielding 155 oz. of gold

Eastleigh Mines.—December crushing: 60-stamp mill ran twenty-four days; total output, 1,470 oz. of gold. Telegram adds: Labour short.

Geldenhuis Estate.—Results for December: crushed 17,000 tons. Obtained from mill, 6,591 oz. of gold; from concentrates by cyanide, 838 oz.; and from tailings by cyanide, 2,232 oz. of gold. Total 9,461 oz. (November yield, 9,471 oz.)

Glynn's Lydenburg.—Crushed during December 1,196 tons, obtaining 453 oz. of fine gold. Treated by cyanide 820 tons, yielding 298 oz. Total 751 oz. of fine gold, value £3,191. November yield 843 oz.

Golconda.—"Have cleaned up after a run of 10 hours. 10 stamps working. Crushed 370 tons yielding 550 oz. Assay of tailings 2 dwt. per ton."

Gold Fields of West Africa.—Cablegram: "Have crushed during December 200 tons of ore, which yielded 425 oz. of gold."

Grand Central.—Thirty stamps, worked 29½ days. Crushed 5,100 tons of ore, yielding bullion valued at £6,304, and concentrates valued at £1,746. Expenses for month, £5,150: and profit, £2,690.

Great Boulder Perseverance.—Milled, 780 tons; yield, 816 oz. Return by smelting, 601 oz.

Hauraki.—Twenty-eight days, crushing 130 tons, yielding 445 oz. of gold, value £1,335.

Henry Nourse.—December result:—Mill working twenty-nine days. Crushed 8,650 tons, producing 4,861 oz. of gold; treated 6,500 by cyanide, producing 2,473 oz. Total, 7,334 oz. (November yield, 7,678 oz.).

Hyderabad (Deccan).—The output of coal from the Singareni collieries of the Hyderabad (Deccan) Company for the five weeks ended December 18 was 37,481 tons. The output for the preceding five weeks ending November 13 was 35,982 tons.

Kalgoorlie Bank of England Gold.—Cablegram dated 7th inst from Adelaide:—"Kalgoorlie Bank of England struck an important body of ore 300 ft. level, assaying 3 oz. per ton, width not yet determined. Further information by later cable."

Klerksdorp Gold and Diamond.—December return:—1,031 oz. of gold estimated value, £3,183, against 565 oz. for November.

Lancaster.—Result for December:—Fifty stamps crushed 5,114 tons of ore, yielding 2,049 oz. of gold, from the mill. Assay of tailings, 3¼ dwt. per ton, which have not yet been treated. The company short of native labour.

Menzies Mining and Exploration (O'Driscoll's):—Stamps arrived. Will commence crushing about end of January. Last crushing 75 tons, yielding 15 85 oz. Mines look well.

Mount Morgan.—Result for December was:—Tons chlorinated, 13,5 ; producing 14,026 oz. of gold.

New Rietfontein.—Cable dated January 7:—Started crushing to-day.

New Zealand Crown Mines.—Cabled report for December:—"No 4 level extended 39 ft.; No. 6 level 53 ft. Tons mined, 1,110. Tons crushed, 1,49 . Value of bullion, £3,220. This return is for twenty-four days only, as the mill was stopped on December 24 for the Christmas holidays."

Nigel.—Last month's yield from battery 1,168 oz., from cyanide 1,635 o .

Otto Kopje.—Week ending 6th January, 6,204 loads, producing 1 3 carats. Note: Still treating top stuff to widen working face.

PAARL CENTRAL.—Mill crushed 6,673 tons, yielding 2,082 oz. of gold. Cyanide works treated 4,670 tons, yielding 1,203 oz. of gold. Total value £10,822.

ROODEPOORT UNITED.—Result for December: Crushed 7,225 tons, producing 3,447 oz., cyanide 967 oz. Total 4,414 oz.

SALISBURY.—Last month's crushing yielded 2,150 oz.

SPITZKOP.—Ore mined 832 tons. Tons crushed 808, producing 61 oz. Cyanide process 770 tons, yielding 156 oz. Estimated value £706, expenses, £940.

TRANSVAAL GOLDFIELDS.—3,742 tons crushed, yielding 2,228 oz.

ST. JOHN DEL REY.—Gold produced in December was valued at £17,168, being a yield of '74 oz. per ton.

BRADFORD MANUFACTURING COMPANY, LIMITED.—Dividend for the six months ending December 31, 1897, at the rate of 12 per cent. per annum.

TRANSVAAL GOLD MINING ESTATES.—Result for December:—Crushed 8,912 tons; obtained 3,901 oz. of gold. By cyanide, 5,410 tons, yielding 680 oz. Value of month's output, £19,493.

WEMMER.—Result for December was:—Mill ran twenty-nine days; crushed 6,661 tons, yielding 4,380 oz.; 4,500 tons treated by cyanide yielded 928 oz., and from concentrates 151 tons caught, assaying 90 dwt. per ton. Total, 5,987 oz. of gold.

GELDENHUIS MAIN REEF.—Crushed 3,646 tons, yielding 661 oz., 2,120 treated by cyanide, yielded 394 oz. Total 1,055 oz. of gold. Profit for month £3. This unsatisfactory result is due to crushing poorer ore.

TREHARN MONTANA MINES.—A further interim dividend of 9d. per fully paid shares.

BALMORAL.—Return for December, 1,596 oz.; 60 stamps ran fourteen days. Delay caused by accident to machinery. (November yield, 2,659 oz.)

The Manchester Ship Canal receipts from all sources during 1897 show an advance of only £20,000.

In addressing his constituents in Cape Colony recently, Sir Gordon Sprigg, the Cape Premier, stated that the future policy of his Government comprised railway construction in the colony, irrigation works, and compulsory education of Europeans, declaring that, if these measures were not carried, he was prepared to appeal to the country.

MINING AND FINANCE COMPANIES.

The account in the South African market was adjusted without much difficulty. Rates, after opening stiff, eased off, and there was not much of an increase apparent in the speculative account. Generally speaking, the rate was about 8 to 10 per cent., slipping back in several instances to half that amount. "Chartereds" were continued at from 1½d. to 2½d., and Consolidated Goldfields at from 5 to 8 per cent. "Record" Rand outputs are now looked for almost as a matter of course, and pass practically unnoticed, the return published on Tuesday having little or no effect on prices. Taking into consideration that there must have been a certain amount of interruption over the Christmas holidays, and that native labour is still reported scarce, the return is a good one, although a certain amount of the increase is due to the inclusion of a first crushing by the Nourse Deep Company. As regards Western Australian companies, the continuation rates ranged from 8 per cent. to 10 per cent. Business continues on a very small scale, cable interruptions being put forward as one excuse, but there is apparently very little backbone in the market. Among Copper shares Rio Tinto keep firm, and Indians are practically unaltered.

There is a report in Southampton that a new German shipping company is to be formed to develop the trade on the West Coast of Africa, and that Southampton will be the English port for the new line.

Mr. Worthington, of Manchester, is about to start as a Government Commissioner, to inquire into the conditions of the local markets of South America. He is to be accompanied by Sir Vincent Barrington, on behalf of the Associated Chambers of Commerce.

Prices Quoted on the London Stock Exchange.

Throughout the INVESTORS' REVIEW middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the INVESTMENT INDEX published quarterly—January, April, July, and October—in connection with this REVIEW, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the REVIEW almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the INVESTORS' REVIEW any subscriber can follow for himself the movements of securities from week to week, and the INVESTMENT INDEX will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S.F. Snk.Fd. *sinking fund*; Certs., *certificates*; Debs. or Dbs., *debentures*; Db. or D.Stk., *debenture stock*; Pf., Prf., or Pref., *preference*; Prefd. or Pfd., *preferred*; Dfd., *deferred*; L. or Ltd., *limited*; Sh., *share*; Ans., *annuities*; Cu. or Cm., *cumulative*; Gu or Guar., *guaranteed*; Bds., *bonds*; S., Sr., or Ser., *series*; In., Ins., Insc., *inscribed*; Dr., Drgs., Drwgs., *drawings*; Stg., Strlg., *sterling*; Lia., *liable to*; Sp., Surp., *surplus*; Per., Perp., *perpetual*; Ln. *lien*; Lo. *loan*. Prices marked † signify they are *ex. div.*

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.

The Investors' Review

Vol. I.—No. 3. New Series. FRIDAY, JANUARY 21, 1898. [Registered as a Newspaper.] Price 6d. By post, 6½d

The Investment Index,

A Quarterly Supplement to the "Investors' Review."

Price 2s. net. 8s. 6d. per annum, post free.

THE INVESTMENT INDEX is an indispensable supplement to the Investors' Review. A file of it enables investors to follow the ups and downs of markets, and each number gives the return obtainable on all classes of securities at recent prices, arranged in a most convenient form for reference. Appended to its tables of figures are criticisms on company balance sheets, State Budgets, &c., similar to those in the Investors' Review.

Regarding it, the *Speaker* says: "The Quarterly 'Investment Index' is probably the handiest and fullest, as it is certainly the safest, of guides to the investor."

"The compilation of securities is particularly valuable."—*Pall Mall Gazette.*

"Its carefully classified list of securities will be found very valuable."—*Globe.*

"At no time has such a list of securities been more valuable than at the present."—*Star.*

"The invaluable 'Investors' Index.'"—*Sketch.*

"A most valuable compilation."—*Glasgow Herald.*

Subscription to the "Investors' Review" and "Investment Index," 21s. per annum, post free.

The Investors' Review.

Economic and Financial Notes and Correspondence.

The New Indian Juggling.

For the life of us we cannot understand what the officials of the Government in Calcutta expect to gain by their last device for providing India with a currency. A long speech was made by Sir James Westland a week ago to-day, and we have read it. Without being able to guess what it all really means, it is easy to see that the Government is in a mess, which mess it sturdily refuses to ascribe to its own folly; but what we do not comprehend is the motive which dictates the latest proposal for escaping from the difficulties the Government has created for itself. As readers know, what seems now to be aimed at is to provide a "gold standard" in London for a silver and paper currency in India. Gold is to be deposited here, and, against it, silver notes and rupees will be issued in India to enable bankers there to buy bills on London, which they otherwise would not have the means to do, because the bureaucrats have stripped the dependency of money. This we understand; but how is the banker who operates in such a way to protect himself from losses by fluctuations in exchange? Sir James very justly said that at the present moment "the only effect of the rate of exchange upon the banker is to convince him that the less he remits to India the better for himself, for he is bringing out his money at the top of the market, but cannot possibly remit it on better rates, and he might have to do so on worst rates."

Just so. And does Sir James mean us to believe that keeping the gold in London will make any difference? That gold is used in India just as much as if it had been sent there, and the banker who speculates in exchange on the Government plan is not relieved from any of the substantial risks which he runs now if he sends out gold. It is pitiful to see men in charge of a great dependency peddling and muddling in this fashion, shutting their eyes to the facts, obstinately blinding themselves to the true economic position of India, and therefore hurrying that unhappy country towards a catastrophe.

"India is All Right."

But India is all right, said Sir Michael Hicks-Beach at Bristol. There is no more honest man in Parliament than the present Chancellor of the Exchequer, and he would not have said what he did had he not believed it. None the less is he and the country behind him being grossly deceived regarding the position of Indian finance. It may be quite true that the officials in India do not wish to appeal for help to us. They have got things into such a hopeless mess that they are naturally in terror at the prospect of investigation and discovery. None the less is India in sore need. Her famines, pestilence, and marauding expeditions on a grand scale beyond the frontier must have cost at least two hundred million rupees, and the Treasury has not two millions to pay with. Probably the misguiding men who preside over the unhappy peninsula nourish the hope of being able to resume their extravagant policy of railway extension, and thus procure the means to hide up the yawning deficit. They may have no hope except that of the ostrich. Perhaps it is just as well that the mess should be allowed to simmer and come to a head, since only through a breakdown and the prospect of impending ruin does it seem possible to induce the "imperial" British public to learn to take an intelligent interest in India. A large dole now would only enable the futile creatures, now masters of the destinies of 250 millions of people, to dribble on until remedy of any kind became impossible.

Midland Railway of Western Australia.

Debenture-holders in this unfortunate concern should take note of the following, and try to act together. They may depend upon it no means will be left untried to escape liability, assuming that it exists, a point upon which we are not in a position to give any opinion :—

Reform Club, Pall Mall, S.W.,
January 18, 1898.

Sir,—A meeting of the Midland Railway of Western Australia is to be held in about two months to consider a scheme for reconstruction to be proposed by Mr. A. Young, who has been appointed the receiver of the Company by the Six Per Cent. Debenture holders, and it will be well for the debenture-holders to consider before the meeting what their course ought to be.

Mr. Young quite ignores the liability of the directors to make good any deficiency or loss incurred by the debenture-holders through their neglect in not calling up the share capital, or from the misleading statements in the prospectus.

The first thing Mr. Young has to do is to ascertain what is the liability of the directors in this respect.

I have taken counsel's opinion and am informed that the directors are liable for all loss.—Yours faithfully, A Bondholder.

The Stock Conversion and Investment Trust.

Amongst Company Reports will be found reference to the Stock Conversion and Investment Trust, whose display for the past year is, we believe, the best ever made in its history. But we should like to draw attention to a glaring fault in the drawing up of its profit and loss account. All kinds of revenue of the Trust for the year are lumped together in the one item of: "By profit on investments, dividends, commission, transfer fees, interest, &c., £74,489." Now, to obtain any idea of the substantial character, or otherwise, of this revenue, this amalgamated total ought to have been split up into at least four separate items, so that the income from dividends, from profits upon realisations, and from commissions could be ascertained.

In the present form, all investigation into this matter from the side of the information supplied in the report leads to confusion rather than enlightenment. Thus the securities held by the Trust, including £34,369 loans on securities, amounted to £704,588, and form the whole of its assets outside cash. Nearly three-quarters of the amount is in Home Railway stocks, and so, if we allowed 5 per cent. interest upon the money as revenue from this source, our estimate would surely be a liberal one. Commission upon working the North Eastern and North Western Railways "split" stocks certainly should not exceed £2,500, and if this is added to 5 per cent. upon the investments we get an income of £37,600, or just about half of the amount, £74,489, returned as revenue for the year. Whether profits on selling stock, or sources of revenue of which we have no knowledge, provided the difference we have nothing to show, and perhaps the directors think that it is not necessary to explain the problem. But to the man who is inclined to buy the shares upon the strength of the 12½ per cent., such information is of prime importance. Profit from realisation of stocks is a most uncertain form of revenue, and if it provided last year anything like half the income, the probability of its continuance must be exceedingly doubtful.

Government and the Sugar Bounties.

Mr. Chamberlain was good enough at Liverpool to explain the general line of the policy Government has resolved upon in dealing with the distress and trade depression in the West Indies. Details are wanting; but enough was said to show that the policy proposed is right in the main, and, if properly carried out, will be helpful for the island, while involving no interference with freedom of trade. Mr. Chamberlain does not intend to fight the sugar bounties by countervailing duties, for the very sufficient reason that he does not believe they would be effectual. They would involve us in difficulties with powers with whom we have commercial treaties and most-favoured-nation clauses, while new duties would involve an expenditure altogether disproportionate to their amount. Finally, he considers it an unscientific way of attempting to benefit a trade of 260,000 tons per annum—the amount of the West Indian sugar output—by interfering with, and perhaps injuring, a trade of 1,500,000 tons, the amount of our sugar importation from other countries. Such a course must surely appear preposterous to any one. The Commission that inquired into the condition of the West Indies made certain recommendations, wise enough in themselves, and which the Government hoped to give effect to; but their action would be slow; and meanwhile something had to be done to save the Colony from ruin.

Government have, therefore, decided on giving a large grant in aid, which might enable the colonists to tide over the crisis until Continental nations shall have recognised the impolicy of the sugar bounties. This policy of a grant in aid was probably inevitable; but if spent in the reproductive interests of the colony at large, and not for the personal benefit of individuals, who may make use of the aid thus granted to turn their backs upon the colony, and so leave it poorer than before, may, on the whole, be advantageous. Mr. Chamberlain spoke as if he fully appreciated the danger involved; and if he takes care that the grant is used for stimulating the new industries suggested by the Commissioners, and in assisting the Colonists to help themselves, the West Indies may take a new lease of life—become in time even practically independent of the sugar-cane industry, with which their existence has always been too closely bound up.

By the bye, we hope the amiable and enterprising Secretary of State for the Colonies is in a position to be congratulated on the success of his own family enterprise in the West Indies. The Chamberlains in this case will be entitled to take a distinguished place among the men who have not sat themselves down and wept because sugar could only be produced by industry, intelligence, economy, and close attention to business. Thanks to the initiative of this Midland family, an industry was started in the Bahamas, by a company called the Andros Fibre Company, Ltd., and preparations made for the growth of a variety of agave, known as *Agave Rigida*, out of which a variety of hemp was to be manufactured of a quality deemed superior to Manila. So fine were the prospects of this new business that an issue of £200,000 in 5 per cent. mortgage debentures was made upon the personal guarantee of Messrs. Joseph, Austen and Neville Chamberlain in order to make the business grand. We have never heard how the thing got on, but feel perfectly certain that with such men in control it must have been an immense success. By this time all the debentures are no doubt paid off, and the company rich enough almost to keep the Lotus eaters of the Antilles out of their distress without calling upon us for any money at all.

The Dreyfus Affair.

At first sight the ferment in France, and especially in Paris, over this lamentable affair may seem to have nothing financial about it. Everything, however, touches the mundane interests represented by money at some point, and were it only for the race hatred it is bringing to the front, this turmoil deserves watching by everybody with any stake in the public securities of Europe. No one who has read only a fragment of the literature surrounding this case, without prejudice, can avoid the conviction that Captain Dreyfus was unjustly condemned, and after a perusal of the startling document, signed *Judex*, courageously published by M. Yves Guyot, last Sunday in the *Siècle*, it is impossible to resist the conclusion that the sentence was what we should describe in this country as a "put-up job," concocted apparently in hatred of the Jewish community in France, against whom a storm is undoubtedly gathering. *Judex* says that the judges who presided over the court-martial were about to acquit Captain Dreyfus because there was not sufficient evidence that the memorandum of which so much has been made, and which had really nothing in it, was in his handwriting. At the critical moment General Mercier, then Minister of War, entered the room and laid before them a letter containing the words "this scamp D—— is getting too exigent." He said this D—— signified "Dreyfus," and that the letter clearly proved Dreyfus to be in communication with enemies abroad. The sentence of acquittal was thereupon altered to one of condemnation, and Captain Dreyfus was degraded, tortured, and sent prisoner to a far away earthly hell, in a fashion which blasts the fair fame of the French Army in the sight of all civilised peoples, on evidence not only in itself vicious, but which, such as it was, had been withheld from his counsel. That this charge is true has been proved by the lame attempts at rebuttal which the military faction has since published in its organs. It speaks well for the real heart of the French people that a swelling tide of indignation has been rising up in the country which may yet be capable even of overcoming the prejudice which undoubtedly exists there against the Jews. We have no sympathy with that prejudice, but recognise that it may prove to be an agent of destruction in the Republic of the most powerful description, if not exorcised or beaten down by a display of right-minded public opinion. If this hatred of the Jew is so great amongst certain classes in France as to cause men, otherwise honourable, to perpetrate a deed so dastardly mean and cruel as this sentence on Captain Dreyfus, an Alsatian Jew; if formalism has so profoundly entered into the soul of the French politician as to make him incapable of sympathy with the wronged in spite of military cliques, clerical dictation and race antipathies, then the not distant future of France is calculated to fill her best friends everywhere with the profoundest anxiety.

Reform of the Company Laws.

Sir Michael Hicks-Beach spoke very plainly at Swansea as to the necessity of reforming the law relating to public companies. But it seems to have been merely the expression of a "pious opinion," not the prelude to more stringent legislation. Indeed, although the Chancellor of the Exchequer insists that the existing law is a "deliberate encouragement to frauds upon the public," he is doubtful if Parliament, unless actually forced by public opinion, will tackle the question. Governments have submitted amending Bills, but they have been of no use, for House of Lords' lawyers are "not eager reformers." They are already responsible for whittling down the Company Acts; they are not likely to favour renewed stringency. It is, therefore, urges Sir Michael Hicks Beach, a question for the public. Outside agitation must compel the Houses of Parliament to do their duty in this matter, and if, as the Chancellor of the Exchequer says, the existing law "deliberately encourages fraud," can Members of Parliament relieve themselves of responsibility for this fraud while deliberately neglecting to do anything to reform and amend this fraudulent law? Let us, however, by all means, have public agitation. There must be very few in this country who do not very much desire the reform aimed at. But how to begin it? The main sufferers by the action of existing Acts are hardly a united body, and as a rule would rather submit to loss than trouble themselves to agitate.

The End of the Engineers' Strike.

At last the engineers have acknowledged their folly. They have withdrawn the London strike notices for the forty-eight hours' week, and appeal to the Employers' Federation to stop the lock-out, which was only decided upon because of these strike notices. This, however, cannot be done at a moment's warning; and the employers naturally took time to review their position, so as to be able to act in unison. Yesterday they announced their readiness to close the lock-out on receiving a formal acceptance of the terms arranged at the conference. That the men are heartily sick of the quarrel is evident from the numbers who have already applied for work on the employers' terms—whether as unionists or non-unionists, they do not seem to care much. "All's well that ends well," and we welcome this tardy repentance of the workmen as ending a quarrel which should never have been raised—which has only brought serious loss and injury to themselves, and probably inflicted irreparable damage on the trade of the country.

But are the workmen of the kind that learn by experience, or will they be equally ready, a few months or years hence, to fall into another trap set by their somewhat erratic leaders? We cannot say that we can feel much confidence in their future action. We all know how keen is the competition of our foreign commercial rivals. It is becoming keener and more telling every day; yet the workmen never seem to give a thought to the serious danger lurking in this tremendous rivalry. At a time when employers should be devoting their utmost energies to seeking new markets, or in devising means to hold their own in the markets they have—a task by no means easy—their workmen, instead of sympathising with them and helping them, try to thwart them in order to force them to reduce the present not unduly formidable working week by a few hours.

That this danger of foreign competition is no mere bogey is shown by the weekly newspaper called *London*—a journal devoted to municipal affairs, and not unsympathetic with the claims of workmen—which has been inquiring into the possible effects upon home trade of the large expenditure contemplated by many provincial bodies on the extension of their tramway and light railway systems. Millions will be spent in this way during the next few years. And here are some of the results as regards our home trade described in *London*:—

> Liverpool City Council has accepted a tender for American rails, an American firm has the contract for equipping Plymouth electric tramways, and a Continental firm has secured the contract for Hull. Public authorities have to put work up to tender, and although they are not bound to accept the lowest tender, it is not likely that they will pay 20 per cent. more to home manufacturers. Our own manufacturers seem to be completely undersold. This question has another phase: It renders entirely nugatory the labour clauses introduced into contracts. Our town councils cannot bind foreign firms to trades-union conditions.

So that not only is the work lost to the home manufacturer, but the trade-union workman is placed at a disadvantage in carrying out the contract. But how is it that the foreign contractor is thus procuring a lodgment in the very heart and centre of England? Eight years ago England could produce steel rails cheaper than any other country. It certainly cannot do so now. As the above extract shows, the American manufacturer can undersell us at our own door. The Trade Unions may not be entirely to blame in this matter; but they must bear a large share in the responsibility. If they would give a little more thought to the difficulties with which employers have to contend, and a little less to the search for petty personal triumphs, trade and the workmen too would soon begin to feel the benefit in increasing work and better wages.

Our Position in the Soudan.

Affairs in the Soudan are much more serious than was imagined. If the Kalifa were a "man of war," and alert at taking advantage of an enemy's weakness, our position would be critical. The *Standard* announces that it is in a position to state "authoritatively" that the despatch of British troops to the Soudan is "a purely defensive measure." The line held by the Egyptian army extends from Kassala to Dongola, thence northward to Assouan. Then, as the *Standard* points out, the Kalifa at Omdurman "occupies a position from which, if he has the courage to advance, he may strike with overwhelming force against any part" of the long line held by the comparatively small army of Egyptian fellaheen. It has been supposed that he would attack Berber, but that is not certain; and as he has a large choice, he may strike at any moment at any one of a dozen or so of posts which are but indifferently defended by Egyptian troops. Were they British soldiers, the position would be an extremely awkward one, and it is not sure that we could even then come out of it with victory. With only overmatched fellaheen, if the Khalifa were now to attack, we should almost certainly suffer defeat—a disaster which would involve us in another desperate struggle for the mastery in the Soudan. It is clear that Sirdar Kitchener cannot trust his Egyptian force; hence his demand for British troops. Then the Nile is very low, and the gunboats on it are useless for attack or defence; they can neither advance nor retire. Fortunately the Khalifa remains quiet; let us hope he will continue so. But how is it that the Sirdar has allowed himself to get into this perilous position? We have heard nothing recently but of triumphal progresses and town after town taken from the Khalifa. Did it never occur to our commander that he was extending his line too far to be safe? And now we must spend a great deal of money in preparing to defend the positions taken, and to avert disaster. There must have been very serious bungling somewhere. Who is to blame? Fortunately it was announced yesterday that Sir H. Kitchener has received sufficient reinforcements.

The late Mr. Villiers.

Mr. C. P. Villiers, whose death took place on Sunday evening last, in his ninety-seventh year, was known as "The Father of the House of Commons." He might equally truly have been called "The Father of Free Trade." It was he who first introduced it to the notice of the House of Commons. Every year for fifteen years he hammered at the subject in the House, running the serious risk of injuring himself and his cause by getting himself regarded as a bore. But, fortunately, he never fell to this level. His speeches on the subject were ever fresh, ever new, and remain to us as amongst the best store-houses of Free Trade facts in existence. It is idle to discuss whether Villiers, or

Cobden, or Bright, or Peel, did most in establishing Free Trade. The work of all four was essential; and without the assistance of the vigorous eloquence of Bright, and the shrewd commercial presentments of Cobden, Villiers might have gone on till Doomsday with his annual motions in the House of Commons without bringing Free Trade legislation a bit nearer. He had clear views on the subject, and explained them with great lucidity; but, convinced and confident as he was of the excellence of Free Trade principles, Villiers could never have become the popular advocate of them in the country. His was the hard dry nature of the old Whig. Intellectual conviction guided him, not popular sympathy. But his share in the great work was well and thoroughly done. He did little more. He was President of the Poor Law Board in Lord Palmerston's second Ministry, and carried a valuable Union Chargability Bill. But he never joined another Cabinet, and though Member for Wolverhampton to the last, his voice has not been heard in the House of Commons for probably thirty years.

The Austrian Outlook.

It is far from pleasant, and anything but reassuring. There has recently been no serious external sign of the nationalist fires seething underneath, and even the Government were hopeful for a time that their efforts at compromise would be crowned with success. But the meeting of the Bohemian Landtag must have rudely undeceived them. Neither Czechs nor Germans will hear of compromise. They are both fighting for the mastery, and nothing less than that will satisfy them. Concessions on the language question were proposed to the Diet, but these were in the direction of practical equality for both languages, and were scorned alike by both parties. Reconciliation in such circumstances seems impossible; and external pressure—that is, the influence of the Crown—is demanded as the only method of putting an end to the present deadlock. They will not allow the poor Emperor to play the rôle of constitutional monarch, much as he wishes to do so. It was bad enough to begin his jubilee year by suspending the Reichsrath; it will be worse still to follow that up by coercing Czechs and Germans alike into a policy of decent toleration towards one another. But there really does seem no help for it. Matters have also been somewhat complicated by the turn events have taken in Hungary. The Government there conducted the discussions on the *Ausgleich* with far more moderation and statecraft than the Austrian Ministers showed; but the passage of a Bill revising the relations between the Magyar peasants and their landlords has roused the passions of the former until riots have become unpleasantly frequent in the country districts. The peasants cannot hold public meetings; but they may gather together at balls, and great numbers of these have recently been held, at which there was more denunciation of the obnoxious measure referred to than dancing. The Socialists fan the agitation; and present appearances indicate the approach of a condition of unrest as great in Hungary as in Austria.

Reports of Company Meetings.

The subjoined letter illustrates the mischief pointed out by us in our first weekly number with regard to the reports of company meetings paid for as advertisements. It is for shareholders themselves to put a stop to this subtle form of corruption. Unless they forbid their directors to spend money in this way they may be quite sure it will continue to be spent, and more largely, it is probable, in the future than in the past. The public should always bear in mind that the pressure put upon the financial journal or journalist by monied interests of all descriptions, to be either silent or in some way to disseminate what is not true, is constant and almost over-powering. We are bound to say that the great London and provincial daily newspapers, not exclusively financial, have, as far as we can judge, kept clear of this kind of thing; but the day may come when they also will give way, such is the unremitting determination of the more shrewd class of financiers to work upon public opinion unseen and un-noticed.

(*To the Editor*).

Sir,—Your Editorial Notes in The Investors' Review of the 7th inst., exposes a great wrong in allusion to the custom now followed in some public companies in issuing the published reports of their meetings.

Formerly the reporters from financial papers, who atttended meetings, reported fairly and independently, not omitting the criticisms and suggestions of shareholders attending; and that was only just, for the annual meetings afford the only opportunity for publicity to the shareholders' grievances.

Now it appears to be the custom for the reporters to submit their reports for curtailment by the directors, omitting any unpleasant criticisms and suggestions by shareholders; or else they make their reports over to the officials of the company who engage them, who then strike out all the directors wish omitted, and issue curtailed reports from the offices.

In November, 1896, and again in November, 1897, as a large shareholder, I attended the annual meetings of an Australian Land Company, at which there was considerable adverse criticism and some useful suggestions offered by shareholders, all of which were, however, carefully omitted from the printed reports of the meetings isssed from the office of the company to every shareholder. I am surprised that the directors could have issued such reports as representing all that took place at the meetings in question.—I am, Sir, yours faithfully,

A Subscriber to the "Investors' Review."

January 13, 1897.

Methods of Stating Accounts.

A glance at the reports of the Direct United States and Eastern Telegraph Companies brings out one radical difference in the method of stating their accounts. The Eastern puts down as a revenue charge the cost of repairs and renewal of cables, and only draws upon its reserve in order to provide funds for outlay that could clearly be put to capital account if the Board so wished. The Direct United States Company, on the other hand, charges against its reserve fund the cost of renewals and repairs during the half-year.

As a result its profit and loss account is given an undue appearance of prosperity, which is not altogether the best thing for a struggling Telegraph Company. To set aside £12,000 to reserve out of revenue in the half-year looks like opulence, but when we find that on the other side £10,325 is deducted for repairs and renewals of cable and depreciation of buildings, the poverty of the concern is displayed. Far better bring these items into the revenue account, and not allow shareholders and the public to imagine that after the dividends are paid, the sum of £12,000 is left for reserve.

The Linen Thread Combine.

The wise man will not accept too literally the assertion that the combination of linen thread manufac-

turers is designed "to effect ecomonies in distribution only." Under the circumstances of the present case, economies that must be considerable should result from proper management; but this is only one of the objects in view. It has been stated that one purpose of the arrangement is to counteract the operations of the two-fold cotton thread combine. This, however, seems scarcely reasonable. It is much more probable that the success of the movement in the cotton thread trade has suggested to a small group of leading linen thread men that the emulation of that movement in their line might prove equally profitable to them. Cotton thread is enabled to injure the sale of linen only with a very low range of prices, and cotton thread has gone up at least 25 per cent. in the last few years. The fact is that to all intents and purposes linen thread has its market unaffected by the cotton article; and it depends upon the various manufacturers in the trade whether their profits shall be large or small. The firms which have now "combined" have worked amicably for years past on the basis of identical price-lists, &c., and have dominated the market, because they are stronger than all their rivals put together. This arrangement, made ostensibly for "economies in distribution only," is undoubtedly, if it is anything at all, the first step in a process of absorption which has for its ultimate aim the control of prices by a handful of unscrupulous manufacturers; and in due time, if the combination has not misjudged its power, we shall see a big upward jump in the prices of linen thread.

Batten, Carne, & Co.'s Bank.

A little bank down Land's End way—Batten, Carne, & Carne's Banking Company, Limited—sold its business to Messrs. Bolitho, the great Cornish bankers, in November, 1896, and produced a balance-sheet at that date showing a surplus of £126,195, "subject to realisation." Alas for the "realisation"! On the 9th inst. another balance-sheet made its appearance "for the year ended" on that date, and not only does it show no "surplus" whatever, but Messrs. Bolitho have had to lend the liquidators nearly £16,000 to enable them to pay off mortgage to "Ford's Trustees." The shareholders are not likely to receive a penny. How many more, we wonder, of these little county banks are in a similar condition, hugging properties at book values which probably never at any time represented the true value, and which lapse of time has rendered moth-eaten—and the interest-moth is very destructive when allowed to cumulate—and altogether worthless.

The Grosvenor Hotel Scandal.

A preliminary canter was taken this week into the affairs of the Grosvenor and West-end Railway Terminus Hotel, in a libel action brought by one of the directors against a shareholder. This stage of the litigation surrounding the affairs of that company was brought to a termination by the withdrawal of a juror, without prejudice to any further litigation with regard to the affairs of the hotel. The present plaintiff was a nominee of a Mr. Drew, who, as was expressed in the course of the case, "ran the show," and the shares the plaintiff held in the company, by which he became qualified as a director, he held in trust for Mr. Drew. At this the Lord Chief Justice expressed surprise, and asked Mr. Newitt, the plaintiff, whether he did not think that it was a dishonourable thing to do, namely, to hold an office of trust without any real interest in the company. On being assured that it was done every day, he exclaimed, "Well, companies are bad enough, but they are not all so bad as that!" We are afraid it must be admitted that in many companies this form of "director" is far from uncommon, and the sooner the Legislature can see its way to protect the public from the appointment of such guardians of their interests the better.

Algerian Wines.

Algeria, profiting by the prevalence of black-rot in French vineyards seventeen years ago, started vine-growing herself, and is now possessed of an industry which, our Consul at Algiers declares, has a great future before it. Algeria has now 125,000 hectares of land under vines, and is improving its expertness in vinification. A large portion of its crop, of course, goes to France, which, in 1895, took 2,920,482 hectolitres; but Germany, Belgium, Holland, and Denmark also take considerable quantities of the wine. Very little comes to Britain—only 258 hectolitres in 1895; but if the phylloxera is kept at bay by the planting of American vines, and the quality is improved, with experience and knowledge, Algeria may some day be one of our most important sources of wine supply.

The Chinese Loan.

On Monday last the *Times* gave some welcome, because authentic, particulars regarding the proposed loan to China to be made by the British Government. Some things were a little obscure, but the outlines of the proposal are clear enough, and prove that the capacity for far-seeing statesmanship has not left us. Our own commercial interests in China have unhappily been decaying for a good many years back, our trade with that great empire, even if the whole trade of Hong Kong be included in its total, being not now much more than £12,000,000 a year. In fact, recently it has been under that figure. The trade of India with China has also been decidedly non-progressive, although it still amounts to nearly 15 per cent. of the entire export and import business of our Indian dependency. Something had to be done to arrest this decay and stagnation. If we had decided to sit still and allow Russia and Germany to lay their hands upon the Chinese Customs control, to carry out schemes for railway building and for land absorption at their will and pleasure, there could be no doubt that within a measurable period of time we should have been excluded almost entirely from assisting in the commercial and industrial development of the Chinese Empire. The methods of our rivals on the Continent are utterly different from ours. They aim at exclusive trade privileges for themselves; we set up barriers against no man. The real question, then, now pending in China, is whether the method of selfish exclusion, or the method of free and open dealing which has been the glory of England, shall prevail.

Unquestionably our Government has taken the right course to secure the victory for us. The demands made on China have been moderate. We think some ports of refuge might reasonably have been demanded, and we should have liked to see the stipulation made that

the control of the Empire's maritime customs should have been guaranteed to England for at least the whole of the fifty years during which the proposed loan of twelve millions sterling is to remain unpaid. But it was right, probably, to abstain from asking too much, and the important proviso that no part of the Valley of the Yangtse-kiang is to be alienated to a foreign Power is worth all the rest. Also the stipulation that the Burmah railway shall be allowed to run into Yun-nan may prove to be of the highest importance to our trade with South-Western China, and to the future of the British provinces of Burmah.

We are told that Russia and Germany are opposing these proposals, and can well believe it, for they do not love us and our free commercial ways. They ascribe to British greed, British unscrupulousness, and so forth, triumphs which are really due to the most enlightened, liberal, and unselfish mercantile policy the world has ever seen. But they may object as much as they please; we have the power of the purse, and, taken all in all, we have done most of any Western nation to secure the esteem and confidence of the rulers of China. They have suffered injustice at our hands, doubtless, and we have made wars upon them the causes of which were too slender to justify such a course. But we have never stooped to the meanness of the Germans, and seized and held Chinese ports to keep in perpetuity, because some missionaries have been maltreated or slain. Through our instrumentality China has a better Customs service at its open or "treaty" ports than any other Asiatic Power—better, probably, than that of most European Powers. The Chinese have every reason, therefore, to confide in us, and they know well that we have the power to stand by them even to war as Sir Michael Hicks-Beach said, were a war necessary to vindicate their independence and ours.

And we can find them cash. Were Russia and Germany to step forward and offer another loan they could not raise the money without our help. Close the London market to them and they are helpless, for Paris is so overloaded with the debts of its neighbours and with the burden which Russia has laid upon the French people that it alone could not find the money. Therein lies our true strength at the present juncture. We can not only find the money, were it twice twelve millions, but we can find it on less onerous terms than any of our competitors. Did our Government choose to directly guarantee this proposed loan it might be given to China at 3 per cent., and still leave at least a ¼ per cent. per annum for sinking fund. From this point of view our position is supreme, and we ought to use our advantage to the uttermost, because we are working not merely in the interests of our own and of Indian commerce, but also in the interests of peace. Let Russia and Germany, one or both, secure the guidance of Chinese foreign affairs, and at no distant date war must break out. The Japanese would not submit to be excluded from China by arbitrary barriers and vexatious restrictions, nor can we. The end of any such dominance of our rivals must, therefore, be a war in which the Japanese and ourselves might have to fight Germany, Russia, and possibly misguided France. It is surely better that we should risk a few millions of our money in lending it to a country whose resources in many directions are still undeveloped, whose population is capable of bearing the light additional burden our help asks them to carry, than that all might be lost in a destructive conflict out of which Japan, at least, might not emerge capable of maintaining a civilising Government even if victorious. Modern finance has its good side in that it does make for peace in many ways, and in doing so helps man onwards towards a higher plane of existence by giving him time to develop the arts which can only thrive when the nations are at peace.

The Exploration Company, Limited.

This concern cannot be said to have lived up to its first reputation. Issued by the banking firm of Sir Samuel Scott & Co., it had the then Sir Horace Farquhar, partner of the Duke of Fife, upon its board and the Rothschilds took a large portion of its capital. No less than 7,200 out of the 148,000 shares at that time allotted were taken by members of this firm, and the then powerful firm of Barings took 4,800 shares. With these leaders pointing the way, there was no lack of enthusiasm on the part of the public and the issue of the company was therefore one of the most successfu of the time, although the unhealthy activity of 1888-90 had well-nigh run its course when the company was floated. Apart from the Central London Railway scheme, out of which it made considerable profit, its most notable achievement has sprung from the attention paid to the Deep Level mines of the Witwatersrand. Under the guidance of its then managing director, Mr. Hamilton Smith, a considerable stake was laid in this direction. In February, 1893, the larger part of the Geldenhuis Deep capital was offered by the Exploration Company at £1. 1s. per share, and the company also gave its shareholders the opportunity to subscribe for Rose Deep shares at a moderate figure. It had a large interest in the Consolidated Deep Levels and Jumpers Deep, and no doubt reaped considerable benefits from the interest taken in these directions.

The Rhodesian mirage did not pass unheeded by this concern, and under the lead of Mr. Rochfort Maguire, with Major Ricarde Seave as his lieutenant, the Goldfields of Mashonaland and Goldfields of Mazoe were floated. Needless to say, these ventures did not come up to the level of the Witwatersrand "Deeps," and the first one is quoted a bad market at 2s. to 3s. per £1 share, while the second lies amongst the rubbish that is not considered worthy of a price. About this time two auxiliary companies—the Transvaal and General Association and West Australian and General Association—were formed to act as company sausage-machines in the two countries mentioned, but, after an existence of a little more than two years, these concerns were absorbed by their parent, and under guise of this operation the said parent's capital was inflated almost beyond recognition. The original paid-up capital had been £30,000 in 148,000 Ordinary shares and 2,000 Founders' shares. In the new company, formed in 1896, shareholders in the original company received four fully-paid £1 shares for every three 4s. shares in the old, so that the £30,000 of original capital was magnified into £400,000, and of course nothing further was paid up. The Founders, as a solatium for the loss of their rights, were allowed to subscribe for 50,000 shares at par. Shareholders of the Transvaal and General Association received 250,000

new shares, being share for share; and the West Australian and General Association received 250,000 new shares for their £200,000 of capital, or five new shares for four old. In addition, 150,000 new £1 shares were offered to the shareholders of the old companies at £2 apiece. In this way a capitalisation of £1,100,000 was created, of which £200,000 represented fresh capital subscribed, and no less than £420,000 was mere paper and ink.

After this notable expansion the old managing directors, Messrs. Hamilton-Smith and J. Rochfort Maguire, retired, and Mr. Lukach became managing director alone. But the business just antecedent to this change and afterwards had not been well conceived, and the new Exploration Company does not bid fair to equal the glories of its progenitor. The Alaska group of mines—the Alaska Treadwell, the Alaska Mexican, and the Alaska United—have certainly proved a moderate success, but the shares, despite New-courtly assistance, are quoted little above the figures at which they were introduced to the market. And, by-the-bye, we might note that the Exploration Company in its operations does not favour the common method of issue heralded by a prospectus. Rather, it prefers to deal with syndicates and market dealers, who take "blocks" of shares at prices unknown to the public, and then, with the aid of the Exploration Company and its *entourage*, these dealers "make a market" for the newly-created securities, just as spiders weave a web. It is therefore extremely difficult to follow the group's course of operation. It may be working in the market long before the public has the faintest idea of the affair. Suddenly there bursts out a flood of enthusiastic praise of the new mining company in the financial press, dealings become active, nay, turbulent, and the public see the shares of the newcomer quoted at a premium. For a time this premium is maintained, and then drops down a little, when possibly the public, in a fit of ill-judged enthusiasm, steps in and buys the shares. It foolishly imagines that if the Exploration Company and its allied dealers start the shares at a certain price, it must be good business to buy a little below that figure. But history does not say what the Exploration Company and its friends paid for the undertaking, and possibly great surprise would be expressed if the actual facts came out. As it is, every Exploration issue of recent years has been a source of loss to the public, for prices tend to fall as time goes on, and the more the public get bitten, the weaker, generally speaking, becomes the market.

We do not say that the subjoined list is a full statement of the mining issues of the Corporation in the past two years, for it is difficult to trace its windings. For instance, Mr. Dudley Ryder, who shares with Mr. Lukach the burden of service on the boards of many of the subservient undertakings, is connected with the Wentworth Extension and its offspring—the Lagoon Creek and Tambaroora Creek Companies—but we doubt whether the Exploration Company had any direct share in the production of that extremely nebulous group. Other of its allies are interested in a vast number of enterprises, in which it may have taken a hand, but we have no definite proof that it did so. We therefore confine our table to those mining companies that are believed to be true and acknowledged Exploration offspring, and the productions of the last few years may be taken as being included in the following list :—

Name.	Nominal Capital.	Capital Issued.	Capital Considered as Paid.
	£	£	£
Anaconda Copper	6,000,000	6,000,000	6,000,000
Aroha Gold Mines	100,000	100,000	60,000
Beacon Gold Mines	200,000	200,000	175,000
Consolidated Goldfields of New Zealand	225,000	185,000	185,000
Ejudina Gold Mines	100,000	100,000	75,000
Grand Central Mining	300,000	250,000	250,000
Lake George Mines	150,000	150,000	150,000
Norseman Gold Mine	250,000	200,000	200,000
New Australasian Gold Mines	80,000	75,000	60,000
New Zealand Crown Mines	200,000	200,000	200,000
New Zealand Exploration Co.	125,000	75,000	75,000
Progress Mines of New Zealand	250,000	250,000	200,000
Sulphide Corporation (Ashcroft's Process)	1,100,000	1,100,000	1,100,000

The Ejudina proved a terrible fiasco, and the property was sold at a knock-out price to the Triumph Leases, whose shares find no quotation amongst active mines. The Norseman is another West Australian property whose history has not been a success, while the New Australasian seems absolutely unknown to the market. The Sulphide Corporation was floated with great *éclat* in October, 1895, in order to try a process for treating sulphide ores, and also to take over the Central Broken Hill Mine. The mine has not developed well, while the process has not done all that was expected, and the shares, after running down to about 50 per cent. discount, have faded out of active lists. Four of the New Zealand group—the Aroha, New Zealand Crown, New Zealand Exploration, and Progress Mines of New Zealand—stand at heavy discounts or have no price at all, and only the Consolidated Goldfields of New Zealand stands at a premium, but then its shares were started at an absurdly high figure, and have been dropping almost ever since. The Anaconda shares, after passing through the hands of more than one syndicate, were started about £7 apiece, and on the whole their history has been one of declining quotations. At one time, we believe, they were quoted $7\frac{3}{4}$, but since the whole of the American proprietors' shares were quoted here, every rise has led to a break, as if shares were welling into the market from some hidden source. One reason for the latest decline was found in the bad news that came to hand early in December, and we begin to fear that this is only another case of a worked-out American mine foisted upon the British investor. The Grand Central is an almost exactly similar case. This company works eight gold and silver mines in Mexico that had formerly been operated by American capitalists, and when Capt. Mein, one of the representatives of the Exploration Company upon its board, went out to visit the property, he found the lode in the most important property far from what it had been represented. Hence there came a great break in the price of the shares, which has never been mended. In order to show the decaying tendency of the prices for the shares of these mines, we give the following table :—

	Price at or about Special Settlement.	Highest Price.	Present Price.
Anaconda Copper	$6\frac{1}{2}$	$7\frac{3}{4}$	$5\frac{1}{16}$
Aroha Gold Mines	$1\frac{1}{4}$	$1\frac{3}{4}$	$\frac{1}{2}$
Beacon Gold Mines	$\frac{15}{16}$	1	$\frac{7}{8}$
Consldtd. Goldfields of New Zealand	4	$4\frac{3}{4}$	$2\frac{1}{8}$
Grand Central Mining	$2\frac{5}{16}$	$3\frac{1}{4}$	$1\frac{5}{8}$
Lake George Mines	$2\frac{1}{16}$	$2\frac{3}{8}$	$2\frac{1}{2}$
Norseman Gold Mine	$\frac{1}{16}$ pm.	2	$\frac{1}{8}$
New Zealand Crown	$2\frac{1}{16}$	$2\frac{1}{2}$	$\frac{7}{8}$
New Zealand Exploration	*	$3\frac{3}{8}$	$\frac{1}{4}$

* No price obtainable about this date.

We have chosen the special settlement granted by the Stock Exchange Committee as the initial quotation

for the shares, because, no prospectus having been issued, in cases it is impossible to say when dealing assumed large proportions. Indeed, we fancy that often when special settlements were obtained, the activity of the shares was not very great, and that the highest price is more likely to fix the time when public interest was most pronounced. The Exploration Company will doubtless be undeterred by the misfortunes of the past—perhaps it has not suffered pecuniarily from the disasters—and it has, we believe, a string of undertakings with which it is quite ready to oblige the British public. There are such things as the Helena and 'Frisco Mining, the Oneida Gold Mine and Milling, the Steeple Rock Development Company, and the Tomboy Gold Mines, in which the company has a considerable stake it possibly means to market at the earliest opportunity. We should leave it to "explore" on its own account for a while—the mines, we mean, not British pockets.

Mr. Gage's Currency Proposals.

The reports of a Secretary of the United States Treasury are always valuable, and often interesting to read. A uniform plan has been adopted in framing the statistics appended to them, and the text preceding the figures is always packed with information. Greater interest, however, than usual attaches to this first report of Mr. Lyman Gage because he has embodied in it proposals for a reform in the United States currency. As most people know, the paper money of the United States is mainly of two kinds—one issued directly by the State, partly in greenbacks—a relic of the forced currency days of the Civil War—partly in "certificates" issued against deposits or purchases chiefly of silver—and the other bank-notes issued upon Government security. Metallic money of course there is in the country, but it is little used by the people, and substantially "money" in the States means paper. This might be all right if the holders of this paper money could be sure of changing it into the metal they want at any time. This is just what they cannot be. An ambiguity exists in regard to the liability of the Federal Government at Washington to redeem its promises to pay its greenbacks in gold. Mr. Gage explains this ambiguity in very clear language. "The earlier issues of our Government bonds were," he says, "payable in 'dollars.' With greenbacks a legal tender, with gold and silver on a substantial commercial parity, but both at a large premium over paper money, a similar question arose, What did 'dollars' mean? And in 1869, 'to remove all doubt upon the subject,' an Act was passed solemnly pledging the faith of the United States to the payment in coin or its equivalent of all its interest-bearing obligations, except when otherwise expressly provided in the law. The commercial disparity between our 'legal-tender dollars' and 'coin dollars' was not then essentially greater than the present commercial disparity between silver and gold. This Act of 1869 was judicious. To refund our outstanding bonds, now payable in coin, into bonds payable in gold, would strengthen and confirm the public credit and put us in a position to command the markets of the world for our securities on the most advantageous terms."

It will be seen from this that the United States Government is bound to pay its debts in coin merely; but there is nothing to bind it down that the coin shall be gold, it might be silver or any other metal the Administration might choose to select, and Mr. Gage is quite right in thinking that this ambiguity injures the credit of his country. He proposes to get over the defect by, in the first place, getting an Act passed to allow the interest-bearing debt to be refunded in 2½ per cent. bonds, the interest and principal of which shall be paid in gold coin. Then, in order to deal with the paper money, he proposes to set aside 125 million dollars in gold, to be used for the purpose of redeeming notes in the hands of the public. Besides this he would place in this fund all the silver dollars now held for the redemption of silver certificates and all the silver bullion bought under the Act of 1890. Along with these deposits of gold and silver he proposes to place 200 million dollars of the greenbacks withdrawn from circulation, the whole to be deposited in what he describes as the Issue and Redemption Division of the United States Treasury. His plan, in short, is a sort of copy of the Issue Department of the Bank of England, and the object he has in view is to, as it were, fence off the United States Treasury from the public. Coin and notes placed to this special reserve are not to be got at by the public, except by a circuitous route. Additional bank-notes are to take the place of greenbacks, and the paper money created by the banks is to be made expansive enough to meet all the requirements of the people without the necessity of falling back on the Treasury deposit. Mr. Gage's plan is highly ingenious, and, at the same time, it sounds to our ears like something coming almost from the dark ages of banking. At the foundation of the new scheme for giving plenty of money cheap to the American people is an extension of the existing banking law, which would enable small banks, with a minimum capital of £5,000, to start business in any place with a population of 2,000 or less.

Even tiny banks of this kind are to be allowed to issue notes. They can take their share in depositing with the Treasury, greenbacks, Treasury notes, or silver certificates to a total amount of 200 million dollars, against which the Comptroller of the Currency can hand out to them national bank-notes of an equal amount. After a time United States bonds are to be substituted for the greenbacks and other floating certificates of indebtedness first deposited; but that is a detail. On the top of the 200 millions of new paper money, this substitute for gold to the amount of 50 per cent. of the paid-up capital of the banks, they are to be allowed to issue an additional 25 per cent. in notes, without any specific security, but merely on their general assets. All this paper money is to enjoy a certain State guarantee, and to secure the Government against loss, a tax of 2 per cent. per annum is to be imposed upon the unsecured portion of the note issues, that on the secured portion being only one half of one per cent. In order further to prevent the improper multiplication of notes issuing banks are to be restricted as to the value of the notes they may create. No national bank-note is to be issued under 10 dollars (say £2). Such is briefly the outline of Mr. Gage's proposals, and the idea behind them appears to be found in the following sentence: "Paper money is the product of industrial, commercial, and financial evolution. Its economising effect in the use of metallic money precludes the idea of its abandonment until society shall relapse into anarchy." This sounds very fine, but it does not mean much, as a moment's thought should have convinced the man who wrote it, nor is it true. As a matter of fact, civilisation

is rapidly rising above the necessity to employ paper money of the kind Mr. Gage had in his mind. It may be that credit is so primitive in the United States, and so precariously based, that individual banks issuing notes, their promises to pay cash on demand, are an absolute necessity for the community. We have got past that stage in England; whether for good or for evil it is not now necessary to enquire. In all our larger commerce, and in much of our retail, the employment of bank notes has been gradually reduced until the day does not seem distant when it may disappear altogether. With the disappearance of the bank note must come the complete severence of the Government from all interference with the credit machinery of the nation. Surely this is a good thing, a higher ideal to aim at than the one set forth by Mr. Gage. It has never been good for his country that its Government should be so closely identified, as it now is, with the embodiments of credit represented by banks. The one function, as we understand it, of Government towards money, should be to provide coin—coin of definite weight, unalterable fineness, and perfect manufacture. Beyond this it is always unsafe to go; all else should be left to private enterprise. It is so to a very large extent in England now; and credit is so refined with us that the bank note is very little required in the daily transactions of life, most of which are carried out by means of cheques. Dangers may, and do, lurk in this highly-refined system, but certainly it is better than the one suggested in the report before us. Mr. Gage's plan gets rid of no difficulty; it does not lessen the liability of the Government for the conduct of the banking and bank-note issuing business of the nation or for the convertibility of the paper money; nor does it in the very least release the Treasury from the responsibility of having coin on hand at all times to meet any sudden demand. Had the Secretary to the Treasury proposed that the bank-note circulation should be based upon coin held in reserve by the banks themselves, say to the amount of 50 per cent. of their issue, some kind of buttress might have been got together to stand between the Treasury and the demands of the people. But nothing of the kind is to be attempted. Upon the 25 millions sterling of gold there is to be erected a large superstructure of paper money, of credit, and that is all. This will not deliver the United States from the troubles they are now afflicted by, nor will it restore confidence to the European investors in the ability or willingness of the United States people and Government to meet their obligations honestly, in honest money. It is merely a shunting of the difficulty, one more refusal frankly and squarely to face the position. At one point only is there a good suggestion made. It is that a definite pledge should be given by the Government that its debts shall be paid in gold; but that is just the suggestion which evokes the greatest hostility in the United States. The majority of both Houses of the Legislature are decidedly opposed to any measure of uprightness such as this would be. They much prefer to leave the door open for fraud. From a practical point of view, however, it seems waste of time to discuss these proposals, for they stand small chance of becoming law. They are interesting merely as disclosing the views of a practical American banker remarkable amongst his *confrères* for his business intelligence and probity; remarkable also, we should say, for the limitations of his economic insight.

American Life Insurance Offices.

Those of our readers, and we know there are many, whose memories go back to the days when this Review was a quarterly magazine, may recollect that we took up a position of such distinct hostility to these insurance offices as to absolutely refuse to insert any of their advertisements. We maintain this attitude to-day, and are moved to re-emphasise it, partly by a flaming puff of one of the New York Life Offices which appeared in many English newspapers late last week. For it is our conviction that the methods of business followed by these offices—they are not "companies" in the English sense of the term, at least, only one of them is—are calculated ultimately to bring disaster upon their clients, before the magnitude of which the downfall of the Balfour Group of Companies will appear an event of no magnitude. In the second edition of a little book, "Plain Advice about Life Insurance," published by us, we set forth in a table, worked out by us from the official returns filed in the State of New York, that the ratio of their working expenses to premium income was monstrously high, even taking the whole life policy as a basis for the calculation. The New York Life Office, for instance, paid away in 1896 more than 27 per cent. of its entire premium income to secure and conduct its business, and the Equitable disbursed 25 per cent. Had we calculated this expenditure on the basis of the duration of policies under the endowment system, these percentages must have been very much higher, for the simple reason that 80 per cent. commission paid to an agent on the first premium weighs much more heavily on a ten years' contract, or a twenty years' one for that matter, than on a whole life contract. Not only is the expenditure too high, but the whole system of business is repulsive to British ideas of life insurance, and of fair play towards policy-holders.

On this latter point, we need say no more than that in no instance did the returns show that 10 per cent. of the policies contracted for in one year appear to live to become claims. Surely here is reason enough for distrusting these offices; but there is another, and, if possible, more emphatic one, the existence of which is, we say it with the utmost deliberation and distinctness, attributable to the Parliament of the United Kingdom. Through its apathy and indifference, this Parliament has permitted these offices to come to England and contract liabilities towards British subjects, the aggregate of which, at the present time, may be forty, and might be more than fifty millions sterling, without asking them to invest one single shilling of the money drawn in premiums from the British people within the control of trustees for British policy-holders. This is a most scandalous thing, for which we are bound one day to suffer. All the money furnished by the British policy-holders in these concerns goes to the United States, and is invested there by people absolutely irresponsible to the people here. British policy-holders in these offices have no voice in the management—no policy-holder has for that matter. The offices are, all of them, run on strictly autocratic principles. Who elects their president, who appoints their officers, nobody here knows or seems to care. The Germans were wiser and more vigilant than we have been, and would not allow any of these concerns to do business within the Empire unless they invested German money in approved German securities. Is it not possible

to arouse our Parliament to do as much for us before it is too late? It may rest assured that a catastrophe must one day come as the result of its apathy and negligence, and it may not be long before it does come, for there are ominous symptoms beginning that, in spite of their outrageous puffery and illusory promises, recooked and redressed on every possible occasion, these insurance offices are slowly being found out. They cannot, in other words, fulfil their promises, in spite of their efforts after high interest, as exemplified by their investments in American railway ordinary shares and such like; and every year that passes, as successive series of short-term policies can be put to the test of experience, the imposture practised upon the credulous, and it may be greedy, British insurer will become more and more patent.

Already that wretched affair, the Mutual Reserve, which ought never to have been allowed to open an office in this country under any condition, has been pretty well found out. The turn of the other and more reputable concerns is about to come, in spite of their professions of being the "largest, best, and strongest life offices in the world." In actual fact we might go so far as to say that the ways of the most fourth-rate British office may soon be easily better than those of the best American ones known here. We shall have a good deal more to say on this subject from time to time, but for the present must be content with stating one or two facts. To illustrate these facts let us quote the following from the "Jubilee" prospectus of the Mutual Life Office of New York:—

> The best company for the policy-holder is the company that will give him the best return for his money in the form of guarantees and options most suited to his requirements. . . . There is, however, a growing tendency on the part of the public to exact a definite pledge in regard to policy results, thereby encouraging insurance companies to compete for business by means of estimates. The evil of this practice has been so fully illustrated in the experience of some companies, that it cannot be too severely deprecated. . . . A man's character and service in the *past* is the accepted measure of the confidence to be reposed in him in respect to any *prospective* service, and the principle involved applies with equal force in the choice of an insurance company.

This is profession. Now for an actual fact. Experience shows that there is not the slightest justification for this unctuous boasting. Figures have been laid before us detailing actual results, which show that the bonuses recently given by this concern are miserably below those of good, or even middling, British offices. Two of its policies lately became entitled to bonuses. One was on a life aged thirty at entry, and the bonus in this case was something over 25s. per cent. per annum reversion, or about 9s. 6d. per annum in cash. The other life, aged fifty-nine, got a bonus of a little over £2. 6s. per cent. per annum in reversion, or about 31s. 6d. per cent. per annum in cash. Thus the extravagant expenditure of this office caused the strain to be heavier on the younger than on the older life, and there are at least twenty life offices in Great Britain each of which would have given the younger life 30s. per cent. per annum in reversion, and at least six who would have given between 34s. and 64s. per cent. This is an example of how "the best and cheapest" life insurance can be done by an American office at an annual expenditure of at least 34 per cent. of the premium income. Not much foresight is required, nor any very abtruse calculation, to enable us to reach the conviction that only a comparatively brief number of years will now have to pass until no bonuses at all can be forthcoming. A little longer still, and deficits must take the place of surpluses, unless the whole system of the business is root and branch reformed. We shall return to the whole subject at an early date, because the peril is great, and the mischief now being done incalculable.

Critical Index to New Investments.

CAPE OF GOOD HOPE CONSOLIDATED THREE PER CENT. STOCK.

The London and Westminster Bank will on Monday receive tenders, the minimum price being par, for an issue of £1,250,000 stock, interest being payable February 1 and August 1. It is repayable at par February 1, 1943, but it can be redeemed at par ten years earlier on twelve months' notice being given. More money is wanted for railway and harbour works now in progress, on which a considerable amount of ordinary revenue has already been spent, and the occasion is not missed to state that the net revenues received from the Government railways have, for some time past, been more than sufficient to pay the interest charge and sinking fund on the total debt of the Colony. Payments may be made in full under discount on February 1 at the liberal rate of 1 per cent. In 1894 half a million of Three per Cent. stock was offered for tender in Capetown and London, and it went at an average price of £100 1s. per cent. The Public Debt is near twenty-five millions, and the total population some two millions, of which it would not be too much to say only 25 per cent. are whites The loan is sure to go well, and hardly required the issue of favourable trade reports by the Agent General to help it.

LIVERPOOL CORPORATION STOCK.

Issue of £1,500,000 stock, being part of a proposed £2,500,000. Minimum price, 98 per cent; interest January 1 and July 1. Tenders received to-day at the Bank of England. Stock is redeemable at par at the option of the Corporation on and after January 1923. The money is wanted for various purposes, chief among which are tramways, waterworks, and electric lighting. The total debt of the Corporation for all purposes except waterworks is £4,369,265. Of this mortgages or temporary loans for £400,000 on account of the purchase of the electric supply undertaking, and £600,000 for the purchase of the tramways undertaking, will be paid off out of the proceeds of this issue. The rateable value of the City is £3,846,321. The Corporation owns a large estate, as well as other municipal property, and the average income from revenue-producing property during the past ten years has been £110,000 per annum, or more than sufficient to pay the interest on the present debt irrespective of rates. The waterworks debt is £4,424,251. The stock will no doubt be largely applied for by trustees and others who have to confine their investments to this class of security.

EAST INDIAN RAILWAY COMPANY.

At various dates from July, 1895, this company has emitted 2½ per cent. debentures having eight years to run, until the aggregate of such is £950,000. The directors now propose to issue another £600,000 of these bonds, bringing up their total to £1,550,000, and have fixed the minimum at which they will receive tenders on Wednesday next at £97 per £100. Two of the previous sales were effected at prices which illustrate the fluctuating condition of credit, excellent credit, of course, at its lowest dip. In June, 1895, £300,000 were sold at an average of 102⅜, having been offered at par as a a minimum, and in February last year half a million offered at 99 sold at only 1s. 8½d. or so above that price on the average. The bonds, which are little better than long-dated bills with coupons have never been cheap.

TORQUAY CORPORATION.

Issue of £82,000 3 per cent. redeemable stock; interest due January and July. Stock redeemable at par December 11, 1943, but can be redeemed on six months' notice after December 11, 1913. Minimum price, £100½. Money wanted to redeem part of existing debt, and for various works, including water and electric lighting. Rateable value of borough, £137,000; population last census 25,534; total debt, £348,000. Four years ago similar stock was sold at an average price of £98. 4s. 11d. This time an average of £101. 6s. 11d. was secured, the applications reaching £236,800

ILLINOIS CENTRAL RAILROAD COMPANY.

Issue of 10,000,000 dols. Louisville division and terminal first mortgage 3½ per cent. gold bonds, due July 1, 1953; and 5,000,000 dols. St. Louis division and terminal first mortgage 3½ per cent. gold bonds, due July 1, 1951. Interest in each case due January 1 and July 1; and both issues are direct obligations of the Illinois Central Railroad Company. Bonds are offered at 98⅝ per cent., which at the present exchange is equivalent to 95 per cent. for sterling bonds, but ·3 per cent. discount can be saved by paying up in full. Allowing for repayment at par, the bonds yield investors on this side £3. 14s. 4d. per cent. per annum. These are excellent gold bonds, and it is no small merit that they cannot be paid off for more than fifty years.

THE AMERICAN FISHERIES COMPANY.

This hails from New Jersey, viâ Dublin, and is formed to buy the principal works and steamers engaged in the Menhaden fisheries on the Atlantic coast of the United States, from the Fish Oil and Guano Syndicate, Limited, as well as patent rights for the treatment of fish and fish oils. Capital, 10,000,000 dols., in 5 dol. shares, of which 40,000 are 7 per cent. cumulative preferred, and the rest ordinary shares. The preferred, on which interest is payable, January and July, are offered over here at £1. 0s. 10d. per share, and subscribers for 100 shares have the option to also subscribe for fifty ordinary at par. The Stanley patents are to be bought, and paid for in ordinary shares, but no figures are given as to what the purchase price is to be either for these or the various businesses to be acquired. Annual sales for last five years certified at 1,007,621 dols., and experts say expenses of a catch of 600 million fish will not exceed 501,594 dols.; deduct preference interest, there remains 366,027 dols., which, by additional profits to be derived by the adoption of the new process, is to be increased to a net annual sum of 1,881,027 dols. for expenses, ordinary dividends, reserve, &c. There you are! Could anything be more promising? But beyond this, little information is given in the prospectus to guide investors over here. What annual profits, it may be asked, have been made in the past by the concerns brought into the combination, and what is being paid for the works, and steamers, and the patent rights? And how comes it that only half the capital is taken by the Yankees? Is it because they really are 'cute?

THOMAS BROWN & SONS, LIMITED.

This is a company formed to acquire, from last July, the business of general merchants, warehousemen, agents, and manufacturers, carried on by the vendors, under the styles of Thomas Brown at Glasgow, and of D. L. Brown & Company at Brisbane. The capital is £270,000 in £5 shares, equally divided into Ordinary and five-and-a-half per cent. cumulative preference shares. This is also an issue of £130,000 four-and-a-half first mortgage debenture stock, repayable at par May 15, 1923. Interest due May 15 and November 15, and the security is a fixed charge on the freehold properties and a floating charge on the other assets of the company. All the debebture stock and preference shares are offered for subscription at par. Sir James Garrick is a trustee, but this is not an unusual way for a former Agent General of a Colony to increase his income in these days. The company takes the profits from July 1 last, and pays vendors 5 per cent. interest on the purchase-money from that date, by which plan the company may be out of pocket, for all investors can tell. Some Brisbane valuer puts the value of the freehold land and warehouses in that city at £146,398, and the stock-in-trade in Brisbane and Glasgow is stated at £175,581, while book debts and bills receivable, "guaranteed by vendors," are put at £79,426. Deducting trade liabilities, £83,161, and putting in goodwill at £60,894, a good round sum of £400,000 is worked up as value of the property and assets. The purchase price is therefore fixed at this amount, of which £135,000 will be taken in shares. But no details about profits are given; all that the vendors have the courage to show is that the average net profits for the past seven years is £29,290. What about last year's profits? If these had been given, investors might have rubbed their eyes—or noses.

S. W. ARNOLD & SONS, LIMITED.

A company formed to acquire the business of Messrs. Arnold & Sons, of the Rowbarton Brewery, Taunton, to which will be joined the business of the West Somerset Brewery, Taunton, recently bought by this firm, who will continue to hold practically all the share capital, which amounts to £100,000. Applications are now invited for an issue of £60,000 First Mortgage Four per Cent. Debenture stock, at £102 per cent., interest being payable April 1 and October 1. The security is a first mortgage on the properties and plant, and a floating charge on the undertaking, and the stock will be redeemable after October 1, 1905, at 110 per cent., subject to six months' notice. The company is at liberty to create another £25,000 of this stock, which will rank *pari passu*, the proceeds to be applied only to the purchase of further properties. Mason & Son value the freehold Rowbarton Brewery and the West Somerset Brewery, and the seventy-two licensed houses and other properties, at £97,415, and the stock-in-trade, book debts, &c. at £20,461. The profits of the Rowbarton Brewery alone for the three years and nine months ending September 29 last are stated year by year, and give an average of £5,016 per annum. Mason and Son estimate the annual increase of profits from the West Somerset Brewery at £2,000, whereas the amount required to pay the interest on the present issue is only £2,400. The vendors who themselves promote the company, take £126,200 as the purchase price, including £51,200 in cash. No figures are given respecting the past profits of the West Somerset Brewery, but the debenture stock now offered appears to be well secured and a satisfactory brewing investment.

RUSSELL'S GRAVESEND BREWERY, LIMITED.

Share capital, £95,000, in £10 shares, 3,000 being preference, carrying as much as 6 per cent. interest. There is now offered an issue of £125,000 4 per cent. first mortgage debenture stock at 105 per cent., part of an authorised sum of £150,000. Stock can be redeemed after 1910 at 110 per cent.; interest due June and December. Company formed in 1893, and bought a thirty-five-year-old brewery, with a wine and spirit business. Properties and plant valued at £200,950, but there is no statement as to what profits have been. With the proceeds of this issue the £70,000 of 4½ per cent. debenture stock will be paid off, and the balance of the money is wanted to buy more public-houses. Whole of share capital is held by directors and friends, who now try to borrow too cheaply by a large issue of high-priced debentures, for which there is insufficient "cover."

THE WANDSBROUGH PAPER COMPANY, LIMITED.

Company buys the business of paper manufacturers and paper-bag manufacturers carried on for many years by Alfred Colmen, Wansbrough and Partners, at Watchet and Cheddar. Mills, plant, &c., are valued at £87,466, exclusive of stock, book-debts, and goodwill. Profits for 1894 were £6,781; for 1895, £7,659; and for 1896, £8,124; while for six months to June 30 last they were £5,955. The whole year's figures, we should have thought, might have been got out by this time. Of the purchase price of £135,000, stock represents £20,577. and goodwill £26,957. Share capital, £100,000 in £5 shares, half ordinary and half five and a half per cent. cumulative preference, which, with an issue of £55,000 four and a half per cent. first mortgage debenture stock, is offered at par. Interest due May and November. Debenture stock redeemable at 110 from January 1, 1915, on six months' notice. Only £3. 17s. 6d. will be called up on ordinary shares. Average profits for three and a half years, £8,148, leaves a margin of £2,923 after paying interest on debentures and preference shares, both of which appear to offer satisfactory investments.

THE MANSIONS PROPRIETARY, LIMITED (ST. ERMIN'S, WESTMINSTER.)

Authorised share capital is £100,000 all issued; the company now offers £75,000 of 4 per cent. first mortgage debenture stock at par, and this will only be allotted in multiples of £10. It is repayable at par at the end of 1937, or redeemable at £107 after 1901 on six months' notice. Interest due January 1 and July 1, and a sinking fund will be provided for the repayment of the stock by which the trustees may purchase in the open market. The stock will be secured by a trust deed vesting St. Ermin's and the furniture, fixtures, &c., which are valued at £152,975, in trustees, and the present issue is made to repay a mortgage loan to the company, amounting to £30,000, now charged upon St. Ermin's, and for improvements, furniture, and other purposes. It is the intention of the directors to continue the present policy of furnishing suites of apartments as the present tenancies expire, and to re-let them as furnished suites. We regard the affair as sound, and the debenture stock a moderately good 4 per cent. investment.

SPENCER, SANTO & CO., LIMITED.

Share capital, £300,000 in £1 shares, two-thirds being ordinary and the remainder 5½ per cent. cumulative preference shares, on which interest is due January 1 and July 1; 66,667 shares of each class are offered for subscription. The company is formed to buy

two building estates, one at Felixstowe and one at Linford, near Tilbury, and to acquire the building business of Spencer, Santo, & Co. The prospectus contains very eulogistic accounts of both places, but all we are told about the business to be taken over is that the profit for thirteen months ending September last amounted to £9,420. The vendor undertakes to be chairman of the company for three years, and guarantees for this period a minimum net income of £10,500 each year. The purchase price is £150,000, of which £83,334 is to be cash! We regard this as a highly speculative and undesirable investment.

WEBB & ELLEN, LIMITED.

Capital, £100,000 in £1 shares, 60,000 being ordinary, and remainder 6 per cent. cumulative preference. All the latter, with 21,000 ordinary, are offered for subscription. Company buys and consolidates two businesses of tea, provision, and food produce merchants, carried on chiefly at Woolwich and Plumstead. Properties are valued at £45,268, which is the purchase price, but the vendors do not want more that £9,000 in shares. All we are told about past profits is that for the last three years they have been at the rate of £5,550. So they may have been; but this is insufficient information to appeal to the public upon, and, in the absence of further details, we should leave the shares to gentlemen engaged in the tea trade, who may know more about the businesses.

THE CENTRAL SUPPLY COMPANY, LIMITED.

This is an undertaking formed to acquire and carry on under one management, from a central depôt, a large number of businesses of provision merchants, general store-keepers, and contractors in various London districts. The capital is £200,000 in equal moieties of ordinary and 6 per cent. cumulative preference shares, but a portion only of each class is now offered. All that there is to judge of the value of the businesses is the chartered accountant's certificate, which says that the average aggregate sales amounted to £251,997 per annum, producing an average annual net profit of £17,105 before writing off any amount for amortisation of leases, interest on capital, and proprietors' drawings. Of the present issue £25,000 will remain for the purchase of stock-in-trade and book debts, and for working capital. The value of the thirty retail shops to be acquired, including good-will, but exclusive of stock-in-trade, is certified at £117,735. Mr. G. Hilderbrandt is to be managing director for five years, and the City Stores Syndicate, Limited, fix the purchase price at £90,000 in cash and shares, proportions not stated. Combination stores we have had, good and also bad, and although a mass of shops can be often worked together more cheaply than separately, it is not conceivable that a man would part with a good business unless the promoters paid him a high price for it. With these good businesses there are often roped in many concerns "with a past" and no hope of a future.

Company Reports and Balance-Sheets.

WILLIAMS DEACON AND MANCHESTER AND SALFORD BANK are able to report a fair improvement. Profits for the year were larger by £10,000, and a bigger balance was brought in. Consequently, after paying the same dividend of 12½ per cent., and adding £20,000 to reserve, the amount set aside for Buildings Depreciation Fund is increased from £5,000 to £15,000. Deposits are down some £300,000, and there is an equal reduction in bills, but advances are up £270,000 to the lofty total of £5,834,000.

YORKSHIRE BANKING COMPANY, LIMITED.—In the half-year ended 31st ult. this company made a profit of £32,000, and it gave £41,516 for distribution, including a balance brought forward. Out of this a dividend of 17s. 6d. per share, or at the rate of 14 per cent. per annum, is declared, and £10,000 added to reserve, leaving £5,266 to go to the new half-year. The bank seems to have realised a large profit by the sale of some securities, and £60,000 of this profit is also added to reserve, raising its total to £300,000, which is decidedly good policy.

LONDON JOINT STOCK BANK.—A satisfactory feature is an increase of £1,100,000 in the bank's deposits, especially as nearly £500,000 more is in bills discounted and loans, including money at call (these items are not yet given separately). Cash in hand is up £307,000, and about £100,000 more has been put in securities. Profits for the half-year were £12,000 better than in the corresponding period, but £10,000 of this is credited to Superannuation Allowance Fund, the dividend for the shareholders being kept at 10 per cent. per annum.

LONDON AND WESTMINSTER BANK.—An increase of £19,000 in the half-year's profits suggests that the new branches being opened have not yet proved expensive. Of this increase £14,000 is used in paying the higher dividend of 13 per cent. per annum, against 12 per cent. per annum distributed a year ago. Deposits are up £350,000, but there is a sharp falling off in bills discounted, and loans of £1,500,000, the total now being £14,616,000. Cash in hand and at the Bank of England is up £300,000, while £1,600,000 more is out at call and short notice.

PARR'S BANK LIMITED.—Including £56,365 brought forward, the net profit for the past half-year was £204,081. From this, two quarterly dividends at the rate of 19 per cent. per annum have to be deducted, absorbing £125,400. £20,000 is placed to Bank premises account, and £58,681 left to carry forward. The balance-sheet now exhibits big figures: Deposits, &c., £20,321,552, and a total liability to shareholders and the public of £26,134,201. Among the assets are bills discounted, £2,316,571, and loans and advances, £11,287,994, much about the usual proportion now a days. The bank possesses £1,000,000 of consols taken at 90, and is otherwise in an eminently comfortable-looking position.

THE CITY BANK increased its profits by £11,000, and brought in a larger balance from June; so it puts its dividend up from 9 to 10 per cent., and still carries forward a rather larger balance. Deposits are nearly a million higher, and there is also a fair increase in acceptances. Investments have increased by £64,000, but cash is down £130,000. A good feature is an addition of £290,000 in bills discounted, and £700,000 in loans and advances. Bank premises have been written up from £164,000 to £190,000, owing to the opening of new branches. Directors of banks should be in no hurry to write up this item; it will be time enough when he branches pay.

THE LONDON AND SOUTH-WESTERN BANK continues to reap benefit from the numerous branches it opened some years ago, and the time has come when the board might be materially strengthened. Net profits for the half-year are returned at £53,586, against £41,102 a year ago, but this is after placing only £10,000 to reserve against £20,000 in the corresponding period. As a larger balance was brought in, the available total is increased from £51,731 to £67,509, so the bonus paid, in addition to the 10 per cent. dividend, is increased from 1 to 2 per cent., absorbing an extra £6,000. Deposits at £9,421,000 are nearly a million up, but, while bills discounted show little change, the amount out as loans and advances has risen £660,000 to close on 4½ millions. The reserve fund might with advantage be increased more rapidly,

CITY AND SOUTH LONDON RAILWAY COMPANY.—This company is making good progress. Its net profits for the past half year were £11,493, or, with the balance forward, £12,567. So a dividend at the rate of 13s. 4d. per cent. per annum is to be paid on the ordinary stock, and still £1,511 will be left to carry forward. We wish its line ran from Streatham to Waterloo or Blackfriars.

GREAT CENTRAL RAILWAY COMPANY.—Gross revenue for half year to December 31 was £45,324 more than in the corresponding half of 1896, and the working expenses were £49,458 more. It follows that the net revenue was less in spite of the increase in gross income. Allowing for other credits and debits, including an increase of £8,478 in the debenture interest, &c., the amount available for distribution is smaller by nearly £14,000. Hence the reduction in the Preferred ordinary stock dividend to 2¼ per cent., against 2½ per cent. a year ago. The expenditure on capital account in the half-year was £1,198,000, and another £1,200,000 is expected to be spent in the present half-year.

LONDON, BRIGHTON, & SOUTH COAST RAILWAY COMPANY.—In the directors' report for the past half year it is stated that, besides the 500 new goods waggons ordered in 1896, they have had to order 500 more, as well as 500 coal waggons and a dozen new goods break vans. In the six months the gross income was £1,523,548, and the working expenses £764,912, an increase of £55,573 in the one, and of £32,341 in the other. Fixed charges have also expanded £1,843. As elsewhere announced, the dividend on the undivided ordinary stock for the half year is to be at the rate of 8¼ per cent. per annum, which gives the deferred half of the divided stock 7 per cent. for the year. A balance of £26,243 is left to be carried forward. Sir Allan Sarle, who joined the audit department in 1849, and lately retired from the general managership, is recommended for a seat at the board. For the past half year the capital expenditure was £206,000, and for the current one it is put at £241,000.

GREAT EASTERN RAILWAY COMPANY.—Last half-year the gross income was £2,724,480, an increase of £114,790 on the corresponding half of 1896. Working expenses, however, increased by £88,150, so that the net gain was nothing like so large as anticipated. In fact, the ratio of expenditure to gross receipts was 55·35 per cent. last half-year, against 54·41 per cent. the year before. Then fixed charges absorbed £7,651 more than in the corresponding half-year, so that the increase in the dividend on ordinary stock to 5 per cent. per annum was quite as much as was to be expected. The better gross income is attributed by the board to the growth of the suburban traffic, the better harvest, a successful fishing season and higher prices for grain. Some progress was likewise made by the Continental traffic, which gained £2,620 gross, in spite of the active Belgian competition. Excluding the £188,962 paid for the Walton Railways, &c., the capital outlay of the past half-year was £216,485. That for the half-year now current is estimated at £250,000.

FOSTER, PORTER, & CO., LIMITED.—The net profits of this old-established wholesale drapery firm amounted last year to £17,010, which allowed of 16s. per share, or about 7½ per cent., being distributed in the way of dividend, and the addition of £1,011 to the amount forward. This latter sum constitutes the reserve of the undertaking, and now amounts to £21,050, all being employed in the business. There is very little variation in the amount of the stock and debtor items.

THE NATIONAL DISCOUNT COMPANY, LIMITED.—It cannot be said that this company makes much progress, but that may be just as well. Progress as indicated by swelling bulk does not invariably mean prosperity either in banking or discount business. All that the National Discount Company was able to do last half-year was to

pay the usual dividend at the rate of 11 per cent. per annum, to set aside £28,000 odd for rebate, and to carry forward about £4,400. There is nothing in the accounts to call for notice, only we should like to see this fine old company wake up a bit.

Lister & Company, Limited.—What can we say more about this astonishing concern, which still has a reserve, although that is now reduced to £64,000? It still also keeps its goodwill, patents, and trade-marks at the original valuation, although it did write £23,000 off properties, &c., last year, or say, £17,500 net, after deducting the additions. It made a profit, too, and the profit was actually almost £45,000, so that the preference share dividend was paid in full, thanks to Lord Masham's surrender of the £15,800 due on the debenture stock held by him. Perhaps some day the company might pull round a bit, but its story is thus far dreary enough, and last year's gloomier than that of the year before.

Burlington Hotels Company.—A youthful disregard of the future is displayed by the board of this new company. Hotel-keeping is not a business devoid of risk, and yet this board distributes all but a mere fraction of its earnings. In the year, £59,782 was received from business done, of which £43,021 was absorbed by working expenses. The balance of £16,761 was employed in paying preference and debenture interest, and a dividend of 10 per cent. upon the ordinary, only the trifle of £1,536 being left to be carried forward. No building up of a reserve is attempted, and yet the fixed charges of this heavily capitalised company come to £9,650 per annum. This is not the way to build up a solid business, and we fear the future.

Direct United States Cable Company.—In the past half year revenue was £2,497 higher than in the second half of 1896. Expenses in the same time were £93 lower, so that the sum to be dealt with was £2,590 more. Consequently, after distributing the two interim dividends amounting to 6s. per share, or at the usual rate of 3 per cent. per annum, the Board is able to set aside £12,000 to reserve, and carry £4,090 forward. The reserve also benefited by £5,604 received from interest upon investments, but had to bear the outlay of £8,325 upon repairs and renewals of cables, and £2,000 for depreciation upon certain buildings. It therefore only increased £7,279 to a total of £345,767, which is virtually invested in high class securities.

Law Debenture Corporation.—A very good profit—£39,395—is shown by this company in the past year. This allows of a dividend of 7 per cent. upon the Ordinary shares and £27. 12s. 11d. per £10 share upon the Founders', or a trifle over 275 per cent. The reserves of the company, however, have been increased £9,800 in the year, and now amount to £33,474. They still represent a small proportion upon the £952,000 of capital for a company doing a fairly hazardous business. The weakest point, however, of the report is that £10,742, or about 25 per cent. of the net profit, is derived from profit upon sales of securities—a flimsy reed to lean upon for any length of time.

Mazawattee Tea Company.—Profit on trading in the year was £2,425 higher, at £56,695, and after meeting administrative charges a balance of £51,198 remained. The sum of £12,000 is set aside to reserve, raising it to £24,000, and £2,175 is allowed for depreciation, which seems a fair amount. Dividends amounting to 8 per cent. are again declared upon the ordinary shares, and the amount forward is increased £1,203 to a total of £2,466. "Trade marks and goodwill" still stand in the balance-sheet at the enormous figure of £382,489, against which the reserve of £24,000 is a mere atom, and this reserve, too, is still wholly locked up in the business. For the present, however, the company is doing well, and tea vending in retail is evidently a much more prosperous business than we thought it.

Thomas Wallis & Co., Limited.—The bad weather of the two last months of 1897 are said to account for a falling off of £4,247, to a total of £42,116, in the net profits of the year. Rather strangely, the directors' fees only amount to about half what they were in 1896, and debenture interest took less, so that after meeting these charges and preference interest the disposable balance is only about £1,500 below that of a year ago. The usual sum of £10,000 is set aside to redeem debentures, £1,000 is written off the new stables, and dividends amounting to 10 per cent. for the year declared upon the Ordinary shares, which is the same distribution as that made for 1896. The debenture debt will now be reduced to £90,000, as against £150,000 at the inception of the company, and the steady reduction of the capital thus effected is a strong guarantee for the maintenance of dividends in the future.

Bryant & May, Limited.—Only a balance-sheet is vouchsafed to shareholders in this concern, the board still deeming a profit and loss account to be an unnecessary appendage. One, therefore, cannot say very much about the reduction of £3,273 in the net profit of last year to the total of £66,999. Depreciation is apparently met by charging all additions to premises and plant to revenue, and in this way £8,016 was spent in 1897, which seems a fair proportion of the £281,500 set down as the value of the properties. The company has a splendid reserve of £160,000, entirely invested in high-class securities, but stock has risen £18,000 in the year, to the detriment of the liquid assets. Dividends amounting to 17½ per cent., or the same as for 1895 and 1896, were declared, the payment of which will cause the balance forward to be reduced by £3,000 to £2,755. It is remarkable that the company does not seem to have attempted to accumulate a fire insurance fund, for we presume its buildings and works are not covered in the usual way.

Stock Conversion and Investment Trust.—For the year ending December 31 this Trust earned a net profit of £54,865, which allowed of dividends amounting to 12½ per cent. on the ordinary shares, of 10s. per share, or 1,000 per cent., on the founders' shares, and the carrying forward of £14,247 to the reserves of the company. After deducting £1,246 for losses, these reserves amount to £74,418, as against £490,900 of ordinary and preference capital, and £217,650 of loans and debentures. In 1896 the profit was £43,495, which allowed of 10 per cent. dividends on the ordinary, 600 on the founders', and the placing of £17,497 to the reserves. The improvement, therefore, is considerable, and, in fact, the past year is probably the best ever experienced by the Trust, for the 20 per cent. dividend paid in 1889 was a little peculiar. Unfortunately, the profit and loss account is very poor, and one cannot, therefore, speak with assurance as to the manner in which profits are made. The proposed reduction in the nominal amount of the capital will reduce the uncalled capital to £1 per share.

Eastern Telegraph Company.—In spite of reductions of rates, the income of this company from telegraph business increased £7,066 in the half-year ended September 30 to a total of £418,758. Revenue from investments in Telegraph shares was also slightly larger, but expenses were about £15,000 higher at £150,569, mainly on account of an additional charge of £9,517 in respect of cable renewal and repairs. The net balance of £293,158 for the half-year was, therefore, only £6,582 less than in 1896. Of this, £105,000 was set aside to various reserves, £50,195 went in interest upon debenture and preference capital, and £100,000 was distributed in the usual interim dividends, amounting to 2½ per cent. for the half-year. The various reserves of the company now amount to £1,087,640, and although £67,287 was taken to pay for the new Vigo-Gibraltar cable now being laid, the company has increased its investments in securities in the year by no less than £290,000. The whole of this large sum, it may be interesting to note, has been invested in Home Railway prior charge stocks. The preference stock of the company is to be rendered less cumbrous by exchanging £18. 10s. of new 3½ per cent. preference stock for every £10 share of existing 6 per cent. preference capital. There will be no increased charge by the operation, which is similar to that carried through by many of the railway companies, but the new preference will probably stand at par, and will form a cheap medium for raising fresh capital.

More Laplanders and reindeer are about to be sent out to Klondike with relief for the citizens of Dawson City.

Nine thousand cotton operators in New Bedford, Mass., have struck against a reduction in wages announced by the employers. The reduction affects 125,000 operatives in New England.

The Newfoundland Government are negotiating with Mr. Reid, who built the railway across the island, to work the railway system of the colony for an extended term of years.

Reports continue in circulation as to the discovery of placer gold in various rivers in Labrador. Prospecting parties are preparing to start, and no doubt a "gold boom" will follow. The geological formation of Labrador is said to be the same as that of Klondike. The ice conditions are undoubtedly similar.

In a speech at Swansea, Sir Michael Hicks-Beech declared that what Government wanted in China was not territorial acquisition, but an open door for the commerce of the world; and the Government were absolutely determined, even at the cost of war, if necessary, that the door should not be shut again to us.

According to the Paris *Temps*, Russia is still pressing the candidature of Prince George of Greece for the Governorship of Crete, advising the Sultan to accede to this in order to avoid fresh embarrassments certain to arise, and probably lead to the annexation of Crete and Greece. At least two of the Powers, however, are said to be opposed to the Prince's candidature.

Essex county, in the extreme south of Ontario, has taken to tobacco-growing, and has made a good thing of it. Owing to the profits made from last year's crop, the acreage under tobacco is to be largely increased. It is said that an acre of good land, if carefully tilled, will produce from 1,000 to 2,000 lb. of leaf, which sells at 4d. to 7d. per pound, thus giving a gross profit of £16. 13s. 3d. to £33. 6s. 6d. per acre, which is far better than the £5 to £7 per acre given by wheat.

Speaking at a dinner of the Swansea Chamber of Commerce on Monday night, the Chancellor of the Exchequer expressed himself strongly in favour of a reform of the law as to limited liability companies. In its present state it deliberately encouraged fraud on the public. Does the right hon. gentleman contemplate legislation in the coming session? If the present law encourages fraud, no time should be lost in altering it.

The French Government Savings Bank returns for 1895 were only issued on Monday—a much longer delay than we are accustomed to even in this country. The deposits amounted to 355 million francs, and the withdrawals to 342 million francs. The law reducing the interest and limiting deposits to 1,500 francs caused a falling-off in the deposits, and in the last five months of 1895 the withdrawals exceeded these by seven million francs, but the aggregate deposits have now again increased, though at a slackened pace.

A Promoter's Failure.—The first meeting of the creditors under the failure of Fordyce Sheridan, barrister-at-law and company promoter, has just been held. Mr. Sheridan has been fifteen years in the promotion business. Mr. R. Raphael stated that the debtor had prepared accounts showing liabilities £56,956, and assets estimated to produce £17,475. These liabilities included a sum of £50,000 due to the debtor's wife, who had been advised to tender a proof for only £25,000 at the present time. A scheme was being prepared under which Mrs. Sheridan's claim would be entirely withdrawn. Other claims would be either modified or entirely withdrawn, and 20s. in the £ would be paid to the remaining creditors. In these circumstances the meeting was adjourned until the last day of February.

The Produce Markets.

GRAIN.

Business has been slow during the week, buyers continuing indifferent, but prices were generally maintained, and at Mark-lane on Wednesday the tendency was distinctly firmer. The supplies of English wheat were moderate. White quality quoted at 34s. 6d. to 39s. 6d., and red 33s. up to 38s. 6d. Holders of foreign kinds also a shade firmer in their demands, and supplies sparingly offered. Quotations of Californian and Walla remain nominal. Red Winter, 39s.; Manitoba, 39s. 6d. to 40s. 3d.; and Russian, 34s. 3d. up to 38s. 3d. Flour fully maintained at last Monday's rates, and meets with moderate attention, the following being the quotations:—Town households, 31s.; whites, 34s.; American top patents, 32s.; bakers, 27s. to 28s.; Hungarian, 39s. to 40s. per sack. Grinding barley is rather firmer, with a steady demand, and very little malting on offer. Oats in fair supply at firm to rather dearer rates, and the supply of Canadian white short. American mixed quoted at 15s. 6d. to 15s. 9d. ex ship, according to position, and 40 lb. ditto 16s. ex ship, 16s. 6d. landed. Maize meets a quiet sale, but rates are very steady. Beans upheld at fully last Monday's rates, peas remaining very firm. At Liverpool spot parcels were firm, but the demand was small. Red American futures began nominally ¼d. per cental dearer, fluctuated a good deal during the morning, though in the afternoon there was a steadier feeling. At second call, however, values were irregular, ½d. per cental lower to ½d. higher. The market afterwards moved within narrow limits, and closed ¼d. to ½d. per cental lower, excepting March which advanced ½d. per cental. In London the movement in American options was ignored on Wednesday, and the market opened with unchanged values, while buyers were rather cautious and reserved. There was altogether a lack of urgency, and the close was quiet. Maize also was quiet, though a fairly good figure was obtained for a February mixed American, with further sales at the price, buyers were 3d. worse. Options in wheat ⅜d. to ½d. lower, and maize ⅜d. to ½d. down.

OFFICIAL CLOSING VALUES (100 lb. deliveries—January 19).

	March.	May.	July.	Sept.
Red American Wheat	7'3⅜	7'0⅝	6'10	6'5

In New York the Wheat market has shown less fluctuation, with a decided tendency to firmness, and on Tuesday there was a slight advance, but the response from Liverpool was disappointing, and the advance was not maintained. At the opening, on Wednesday, there was a reaction, May starting ¼ c. lower; but after further moderate recessions the tone became firmer under repurchases by "bears." A fairly good export inquiry helped near months, but trading throughout the afternoon was dull and featureless, the market closing steady at ⅛ c. to ⅜ c. advance except for May, which remains unchanged. Maize opened steady, and continued firm throughout the day, in sympathy with Chicago and on large purchases for export. Flour and oats both steady at unchanged rates. Spot firm. Spring wheat, 103½ c.; winter, 102 c.

COTTON.

The spot market at Liverpool has been steady, with a fair demand and good business, chiefly in American, which was less pressed for sale, at previous rates. Brazilian remained quiet, unchanged. Egyptians record a somewhat larger demand, and Surats are idle. Futures opened at a further decline of ⅛ to 1 point and remained in this position throughout the day, with a moderate business passing. The close was barely steady at the opening fall. Wednesday's tenders at the Clearing-house were 600 bales American and 50 Egyptian on new dockets.

NEW YORK CLOSING VALUES.

Jan. 19 ..	5⅜	5'66	5'65	5'63	5'72	5'75	5'79	5'82	5'85	5'86	5'88	5'90

WOOL.

The first series of colonial wool sales for this year commenced on Tuesday. Referring to these, Messrs. Jacomb, Son, & Co. state:—"The list of arrivals closed on the 14th inst., and the available total only amounts to 171,000 bales, as against 263,000 for the corresponding series last year. Three catalogues, comprising 7,277 bales, have been offered; these, though small, contained, however, a fairly representative assortment. The attendance from all quarters is a very large one, including several representatives from America. With brisk biddings nearly all the wools offered were sold at an average advance of 5 per cent. for merinos (including South Africans), while cross-breds show no change from the rates ruling at the close of last auctions." The third auction at Liverpool took place on Wednesday afternoon. The bidding was irregular, and the general tone poor. Good export yellow sell well, and some of the better whites are reported fairly steady, but all classes of wools suitable for the American trade sell with difficulty and at reduced values. Otherwise the wool markets show cheerfulness, and in London on Wednesday there was great animation, with advancing prices. Merinos now rule from 5 to 10 per cent., and cross-breds partially 5 per cent. above previous closing rates. America was again very active, and secured some of the finest merino grease—viz., Sidney, G R L Y's at 10½d., C W S Mungadals at 11d., and Dungalear at 9½d.; while the bulk of the good selection of scoureds were sold on Belgian account at full rates.

METALS AND COAL.

Copper has been steady from the outset, and, as a consequence of the prospects of an early close of the engineers' strike, prices have been advancing. On Monday the market opened firm, and 3s. 9d. dearer. On Tuesday there was a partial advance of 1s. 3d., while on Wednesday the rates were 2s. 6d. higher than the previous close. During the morning no less than 1,000 tons changed hands, quite 800 of which were for forward delivery and chiefly for three months at £49. 11s. 3d., cash realising £49. 5s. and four months £49. 12s. 6d. In addition to these bargains a fair business was, concluded privately on the basis of £49. 5s. for the 1st, 2nd, and 3rd of February, and £49. 7s. 6d. for the 19th. At the afternoon session there was a slight set back to £49 10s. three months, and £49. 6s. 3d. one month, but buyers again came forward, and the latter price and £49. 7s. 6d. combined was paid for February 11, the close being firm at the opening advance.

SETTLEMENT PRICES.

	Jan. 19. £ s. d.	Jan. 12 £ s. d.	Jan. 5. £ s. d.	Dec. 29. £ s. d.	Dec. 22. £ s. d.	Dec. 15. £ s. d.
Copper ..	49 5 0	48 17 6	48 10 0	48 5 0	48 2 6	48 7 6

In pig-iron at Glasgow a considerable business has been done with a firmer tone throughout. On Wednesday the market was decidedly oversold, and were the public to come in higher prices would be seen. Shorts are nervous. Scotch closed unchanged, while Cleveland rose 1d.

SETTLEMENT PRICES.

	Jan. 19. s. d.	Jan. 12. s. d.	Jan. 5. s. d.	Dec. 29. s. d.	Dec. 22. s. d.	Dec. 15. s. d.
Scotch	46 0	45 9	45 6	45 4½	45 6	45 0
Cleveland ..	40 10½	40 7½	40 4½	40 3	40 6	40 1½

There has been no special movement on the Coal Exchange, and no change in values, though the tendency is rather downwards than otherwise. There is a steady reduction in merchants' stocks, and an upward movement may not be far off.

SUGAR.

Market quiet, but steady, with no change in prices. British cubes and pieces are in fairly good demand at steady prices; crystals show a good inquiry for yellows, and a moderate trade in others. Prices firm. Foreign—Granulated has ruled flat at ⅜d. decline. Ready Z R M, O F, and G D sold at 10s. 10½d.; January, first marks, 10s. 10½d. and sellers; February, 10s. 11½d., sellers; March-April, 10s. 11¼d., value; May-August, 11s. 2½d., paid, and sellers f.o.b. Hamburg. February, P P Z, sold at 11s. to 10s. 11½d., f.o.b. Stettin. Cubes—Hausa, prompt, 12s. 3d.; F M S, 12s. 3d.; Meyer, 12s. 10½d., f.o.b. Hamburg; W S R, prompt, 13s. 3d.; S and T, 13s.; A S R and cut loaf, 13s., f.o.b. Amsterdam. Crushed—Dutch, A S R, prompt, 12s. sellers, f.o.b. Amsterdam. Austrian, T T D and V, prompt, 11s. 10½d., f.o.b. Hamburg. French—crystals, super 3's, prompt, 11s. 6¾d., c.i.f., sellers; Say's cubes, prompt, 13s., sellers; loaves, 12s.; fine granulated, 11s. 6d.; Lebaudy's fine granulated, 12s. 3d., f.o.b. Paris. No. 3 crystals in Paris close firmer but quiet—January, 31f. 62½c.; March-June, 32f. 25c. Cane sorts quiet at unaltered prices. Beet futures dull, and 1d. lower. January sold at 9s. 3d., 9s. 2¾d.; February at 9s. 3d.; March at 9s. 4¼d.; April, 9s. 5¼d. sellers, 9s. 4¾d. buyers; May sold at 9s. 5¼d., 9s. 5¾d., 9s. 6d., 9s. 5¾d.; June at 9s. 6¼d.; July, 9s. 7¼d. sellers, 9s. 7d. buyers; August, sold at 9s. 8d.; September, 9s. 7¼d. sellers, 9s. 7¼d. buyers; October-December, 9s. 6¾d. sellers, 9s. 6¼d. buyers.

TEA AND COFFEE.

The market has ruled quiet, with a tendency to dulness. At auction on Tuesday 4,981 packages met with slow competition at irregular prices; common qualities, of which the bulk consisted, only a small part sold at easier prices, Jamaica being 1s. to 2s. lower, while good to fine sorts, especially Ceylon and Costa Rica, brought very full rates. Ceylon, good middling to fine bold blue, 107s. to 116s.; peaberry, 151s. At auction on Wednesday 1,825 packages were offered, Ceylon and Costa Rica selling readily at full rates, while common sorts are still slow of sale, and Jamaica again lower. Ceylon—good middling to fine bold blue, 114s. to 116s.; fine small, 94s.; peaberry, 128s. Costa Rica—good bold smooth greenish coloury, 94s. to 99s.; good middling dull green, 85s. 6d.; peaberry mixed flats, 87s. Columbian—low middling dingy green mixed, 65s. to 70s.; bold soft dark coloury mixed, 62s. 6d.; good to fine ordinary dingy green mixed, 49s. to 57s. Jamaica—bold common brownish to good dull coloury, 77s. to 88s. 6d.; low middling to middling mixed, 64s. to 72s.; ordinary greenish to fine ordinary dull green, 41s. to 52s.; peaberry, 60s. to 67s. 6d. Futures steady, but quiet. Tea also has been quiet, though there was fair competition at the auction on Tuesday of 21,200 packages Ceylon, all good quality, medium and orange Pekoes maintaining previous prices. 14,500 packages Indian were offered on Wednesday; but, although a few good qualities maintained previous rates, the bulk of common to good medium grades ruled easier. Terminals quiet. Indian, type 1, January, quoted at 7⅛d.; February, 7 1/16d.; March, 7¼d.; type 2, January, 6 15/16d.; February, 6 15/16d.; March, 6¾d.; April, 6 13/16d.; Ceylon, January, 7½d.; China, January, 4¾d.; February, 4 13/16d.; March, 4 15/16d.

HEMP AND JUTE.

In the early part of the week hemp was rather flat. Though prices were maintained, buyers were certainly not eager. There was more firmness towards the close. At auction on Wednesday, seventy bales Mauritius, good to prime, sold at £20. 15s. to £22; Manila, F.C., February-April, sailer, sold at £18. 10s.; and May-July at £18. 15s. Jute has throughout been dull, though rather steadier on Wednesday, when 500 bales long group, first marks, January-March, steamer, London, sold at £9. 12s. 6d., and 1,000 six good marks at £9. 15s.

PRICE OF WHEAT IN 1897.

According to Government returns the imperial average price of wheat last year showed a rise of 4s. a quarter—the average being 30s. 2d., against 26s. 2d. in 1896. The highest weekly average was 34s. 4d., and the lowest 26s. 6d., a fluctuation of 7s. 10d. a quarter. In 1896 the fluctuation was 11s. a quarter. Of barley, the average price in 1897 was 22s. 11d., a rise of only 7d. a quarter. The highest price attained was 29s. 10d., and the lowest 17s. 4d., or a fluctuation of 12s. 6d. a quarter, against a fluctuation of 13s. 5d. in 1896. During five weeks last year barley was below the price of oats, the latter, in the week ending August 7, being 1s. 2d. above barley. The average price of oats in 1897 was 16s. 11d. per quarter, or 2s. 2d. a quarter higher than in 1896, that year's average being 14s. 9d. The highest price in 1897 was 19s. a quarter, and the lowest 16s., showing a fluctuation of 3s. a quarter. In 1896 the fluctuation was 4s. 6d. The average price of wheat in 1857 was 56s. 4d.; in 1867, 64s. 5d.; in 1877, 56s. 9d.; in 1887, 32s. 6d.; and 1897, 30s. 2d. Willich's tables state that the septennial tithe rent-charge for 1898 will be £68 14s. 11d. for £100, or 1½ per cent. less than last year. The average for 62 years from the commutation in 1836 is £97 9s. 11¾d.

THE PROPERTY MARKET.

There is little being done at the Mart—less even than is usual at this dull period of the year. Messrs. J. R. Kemp & Co., of Albany-street, acting in conjunction with Messrs. Debenham, Tewson, & Co., have sold by private treaty the freehold of Paul's Wharf, on the River Thames, near the Cathedral. The property fronts the Thames and Upper Thames-street, and has an area of upwards of 13,600 square feet. The large buildings on part of the site date from before the Great Fire of London in 1666, from the ravages of which they narrowly escaped.

The lease of the St. George's Hall, Langham-place, W., together with the minor hall, 76, Mortimer-street—occupied by the London Academy of Music—and premises in Mark's-court, Great Portland-street, will be offered under the hammer, on the 24th inst., by Messrs. Elliott, Son, & Boyton.

Mr. Alfred Richards' sale at the Mart, on the 25th inst., comprises a number of important Gas and Water debentures and ordinary stocks and shares, including £11,701 of ordinary "C" capital stocks of the Tottenham and Edmonton Gas Light and Coke Company, £3,900 four per cent. perpetual debenture stock of the Ascot District Gas Company, and £5,000 ordinary stock of the Southend Water Works Company. Messrs. Hampson & Co. had a good deal on offer at the London Mart, on Monday, but did nothing. Perhaps the reserves were responsible for this.

On Tuesday, Messrs. Weston & Son sold, at the Mart, the Haverstock Arms, Haverstock-hill, freehold, rent £100, for £4,800. Beyond this the transactions of the day were small, the total realisation being only £7,640.

At Masons' Hall Tavern, on Tuesday, the free lease, with possession, of the White Horse, No. 100, High Holborn, immediately facing the Royal Music Hall, held for sixty-eight years, at a rent of £185 per annum, and subject to a mortgage of £21,000, was sold by Messrs. Fleuret, Sons, & Adams, for £32,000, the New London Brewery being the purchasers. Two smaller houses were also offered, but without result.

At Messrs. Edwin Fox & Bousfield's sale of stocks and shares at the Mart on Wednesday, the following prices were realised:—Epsom Grand Stand Association, £20 original shares, fully paid, £51; £6. 13s. 4d. "New Thirds" shares, fully paid, £17. 10s.; Sandown Park, Limited, £10 shares, fully paid, £12; Bushell, Walkins, & Co., Limited, Westerham Brewery, Kent, £10 ordinary shares, fully paid, £20. 15s.; £10 six per cent. cumulative preference shares, fully paid, £15; Freehold and Leasehold Investment Company, Limited, £10 shares, £5 paid, £4 and £3. 17s. 6d.; British Farmers' Association, Limited, £1 shares, fully paid, 16s.; Otis Steel Company, Limited, £10 preference shares, fully paid, £1. 5s.; London and Australasian Debenture Corporation, Limited, £6. 13s. 4d., founders' shares, fully paid, £1. 12s.; Municipal Trust Company, Limited, £1,500 deferred stock, £20 per cent.

The *Frankfürter Zeitung* mentions a rumour that the Schweizerischer Bankverein, Basle, proposes shortly to establish a branch in London. As a consequence, it is said the capital of the bank would be increased from 35,000,000 francs. to 50,000,000 francs. The report is not confirmed.

Negotiations have been taking place between a Rand house and the Imperial and Natal Governments with a view to the acquisition of certain lands on the north and south banks of the Sordwana River, on the boundary of Zululand and Amatongaland, with a view to the construction of a harbour at Sordwana Bay.

Another suggestion for crossing the Channel under the sea. It is to build a viaduct from shore to shore, some 50 ft. below the level of the lowest tides, on which a platform, containing the train, will be run by electricity, gripping the viaduct with steel legs. It is hardly likely that much more will be heard of this original idea.

The Manchester Ship Canal is progressing. The total traffic last year was 2,065,935 tons. In 1896 it was 1,826,237 tons, showing an increase in 1897 of 239,698 tons. The advantage 1896 had over 1895, however, was 474,866 tons, so that the progress can hardly be said to be uninterrupted. The revenue is stated at £204,414, against £179,834 in 1896.

THE PRODUCTION OF COPPER.

The copper statistics have an unhappy knack of disappointing those who place much trust in them, but the figures published as to the position on January 15 are worth a little attention. For one thing, the absorption of the metal has continued at a high level, and the stock of copper is estimated on January 15 to have been no more than 31,033 tons, or less than 200 tons above the lowest total of the three years just previous. Compared with January, 1895, the falling off in stocks is about 25,800 tons, or very nearly one-half, and this, in face of the diminished demand that must have occurred, in some quarters through the engineering strike, is a little remarkable.

Now, one must not take these statistics too seriously, as a strong speculative movement is proceeding in copper mining shares, and it is a great temptation for operators in such shares to work the copper market at the same time in order to encourage a rise in the shares. But even allowing for this circumstance, the recent reductions in the stocks may be considered as partially the result of natural causes, for the diminution in the supplies is mainly due to a falling off in United States exports. Thus in the last four months of 1897 the receipts from that quarter only came to 31,100 tons, as against 44,700 tons in the same months of 1896. Coinciding with the news that the Anaconda mine has been producing less in that time, it is possible that the actual surplus of the American copper market has been less, for, of course, home demands, especially in regard to electrical enterprises, have been very large.

The Anaconda production represents no mean proportion of the American output, its out-turn in the twelvemonths ended June 30 last having been put at 66,182 tons, or more than the whole exports from North America in 1895, which amounted to 65,321 tons. In the two subsequent years these exports increased largely, having been 124,224 tons in 1896 and 130,363 tons in 1897, despite the diminution in the last four months. It is possible that production may have been pressed forward rather sharply in the United States, especially in the case of the Anaconda Company, where a distinct motive existed for such an aim in the shape of the selling of the shares upon the London market. Thus the out-turn of the mine in 1893 was 40,723 tons, and in 1894 it was 49,340 tons. Then came a broken period of six months, owing to the mine being turned over to the new Anglicised company, which took place in July, 1895, and in that time 24,962 tons was produced, or about the level of the previous year. The twelvemonths that followed saw a jump in production to 53,518 tons, and this was followed by the "record" out-turn of 66,182 tons in the twelvemonths ended June 30 last. Is it not at least possible that this progress has been too rapid, and that the mine needed the rest that the management admit to have been given last half-year on account of alterations to furnaces and flues?

STOCKBROKER AND CLIENT.

A curious point was raised in a case heard in the Coventry County Court on Tuesday. Last summer Mr. Joseph Cash, of Coventry, directed Messrs. Whittendale & Watson, a firm of stockbrokers in Birmingham, to buy five hundred shares in the Coventry Stamping Company, Limited, which had just been formed to take over a business in which Mr. Cash was interested. Owing to some statements in the prospectus, however, the directors decided to return the subscribers' money, but, in the meantime, Messrs. Whittendale and Watson had purchased 300 shares at 3s. premium, and they claimed from Mr. Cash the difference of £48 15s. This Mr. Cash refused to pay, on the ground that the purchase was for the special settlement and no such settlement had taken place. The chairman of the Birmingham Stock Exchange and another member were called in support of plaintiff's case, and judgment was given for the plaintiffs for the amount claimed.

Mercantile Failure in London.—In connection with the failure of John Clark Forster, carrying on business as Ferguson & Forster, wholesale spice merchants and liquorice importers, at 11 and 12, Great Tower-street, and 6 and 7, Osborne-street, Whitechapel, E.C., the debtor has submitted a statement of his affairs. He returns his gross liabilities at £34,143, of which £18,212 are expected to rank for dividend, with assets estimated to produce £11,639. It appears that the business is an old-established one, and on the death of his uncle in 1870 the debtor succeeded to a share in it. Since October last he has traded alone. He ascribes his insolvency to interest on borrowed money, to interest on advances made against warrants for liquorice juice, to bad debts, and to the expenses of an abortive attempt to convert the business into a company. An adjudication of bankruptcy has been made and a trustee appointed.

The London Water Supply.—Sir A. Binnie, chief engineer to the London County Council, has this week been giving evidence before the Royal Commission on the water supply of London. The witness quoted figures to show how nearly there might be an approach to the absorption of the whole flow of the Thames during comparatively long periods in the drier half of the year, and that the whole flow of the River Lea was practically absorbed in dry weather. The Lea Conservators afforded no protection to the public, because they were entirely overshadowed by the water companies. The witness referred to the bitter complaints which had reached the County Council as to the shocking state of the Lea. He did not altogether accept the finding of Lord Balfour's Commission that the Thames and Lea were satisfactory sources of supply. He would not abandon the present sources of supply, but supplement them. At the sitting of the Commission on Tuesday, Sir A. Binnie said his opinion was that the existing supply would have to be supplemented in ten or fifteen years. He was in favour of obtaining an additional supply from Wales, at a first outlay of over £14,000,000, and an ultimate expenditure of £26,000,000.

ENGLISH RAILWAY TRAFFIC RETURNS

Cleator and Workington.—Gross receipts for the week ending January 15 amounted to £1,164, an increase of £89. Total from January 1, £2,109, a decrease of £159.

Cockermouth, Keswick, and Penrith.—Gross receipts for the week ending January 15 amounted to £840, an increase of £97. Total from January 1, £1,837, an increase of £217.

East London railway traffic for month of November amounted to £4,288, showing an increase of £244.

TRAMWAY AND OMNIBUS RECEIPTS.

Increases for past week :—Belfast, £276; Croydon, £81; Glasgow, £27; Lea Bridge, £124; London & Deptford, £56; London Southern, £109; London General Omnibus, £1,882; London Road Car, £677; Metropolitan, £915; North Staffordshire, none; Provincial, £155; Southampton, none; South London, £132; Swansea, £28; Wolverhampton, £10; Woolwich & S. E. London, £29.

Decreases for past week :—Barcelona, £38; Bordeaux, £7; Calais, £2.

Anglo-Argentine, 11 days ending December 20, £346 increase. Vienna Omnibus, week ending January 8, £264 increase.

Next Week's Meetings.

MONDAY, JANUARY 24.

Birmingham and District Counties Banking Company	Birmingham, 3.30. p.m.
Bradford Old Bank	Bradford, noon.
Folkestone Gas Light and Coke Company	Folkestone, 3 p.m.
Lancaster Banking	Lancaster, 11 a.m.
Reliance Marine Insurance	Liverpool, 11.30 a.m.
Robert Campbell & Sons	Winchester House, 2 p.m.

TUESDAY, JANUARY 25.

British and Eastern Shipping Company	Liverpool, noon.
Bryant & May	Cannon-street Hotel, 3 p.m.
Burlington Hotels	Buckingham Palace Hotel, 1 p.m.
Caledonian Railway	Glasgow, 1 p.m.
Direct United States Cable	Winchester House, 2 p.m.
Folkestone Waterworks Company	Folkestone, 3 p.m.
Lister & Co.	Bradford, noon.
Sea Insurance	Liverpool 2 p.m.

WEDNESDAY, JANUARY 26.

British Shipowners Company	Liverpool, noon.
Craven Bank	Skipton, 2 p.m.
Great Central Railway	Manchester, noon.
Halifax and Huddersfield Union Bank	Huddersfield, noon.
Halifax Joint Stock Bank	Halifax, 11 a.m.
Liverpool Union Bank	Liverpool, 1 p.m.
London, Brighton and South Coast Railway	London Bridge, 1 p.m.
Maritime Insurance Company	Liverpool, noon.
Mazawattee Tea	Cannon-street Hotel, 2 p.m.
Provincial Bank of Ireland	8, Throgmorton-avenue, 11.30 a.m.
Union Bank of Manchester	Manchester, 11 a.m.

THURSDAY, JANUARY 27.

Bass, Ratcliff, & Gretton 3½ per cent. "B" debentures	Call of 50 per cent. = £280,000.
Bradbury, Greatorex, & Co.	Aldermanbury, noon.
Cranbrook and Paddock Wood Railway	Cannon-street Hotel, 10.45 a.m.
Foster, Porter, & Co.	47, Wood-street, 11 a.m.
Mercantile Bank of Lancashire	Manchester, noon.
Metropolitan Bank (of England and Wales)	Birmingham, noon.
National Bank	13, Old Broad-street, 1 p.m.
New York, Pennsylvania, and Ohio First Mortgage Trust	Winchester House, 2 p.m.
Oldham Joint Stock Bank	Oldham, 1 p.m.
Parr's Bank	Cannon-street Hotel, 1 p.m.
River Plate and General Investment Trust	52, Moorgate-street, 2 p.m.
South-Eastern Railway	Cannon-street Hotel, noon.
York City and County Banking Company	York.

FRIDAY, JANUARY 28.

Buenos Ayres Northern Railway Company	Winchester House, noon.
City and South London Railway	Winchester House, noon.
Liverpool Mortgage Insurance	Liverpool, noon.
London and St. Katharine Docks	Cannon-street Hotel, 2 p.m.
Metropolitan Railway	Cannon-street Hotel, 12 p.m.
Royal Aquarium, &c. Society	Royal Aquarium, Westminster, noon.
Thomas Wallis & Co.	Holborn, 3 p.m.

SATURDAY, JANUARY 29.

Australian Mortgage and Agency Company	Edinburgh, noon.

A new omnibus company is to start business in London. It is to have 400 'buses, and 4,000 horses. It is to be hoped the vehicles will be an improvement upon those we already possess.

It appears from the report of Mr. Consul Boyle that the foreign trade of Denmark is chiefly with Great Britain and Germany. In 1896 we took £9,427,000 of the exports and contributed £4,348,000 of the imports, against Germany's £3,213,000 exports and £7,004,000 imports.

Mr. Hobbs, ex-colleague of Jabez Balfour in the Liberator business, has been released from prison on account of the state of his health. His victims will be interested in knowing that the ex-convict has arrived at the family seat, Norbury Hall, Streatham, and that "the family carriage met him at the railway station."

Answers to Correspondents.

Questions about public securities, and on all points in company law, will be answered week by week, in the REVIEW, on the following terms and conditions :—

A fee of FIVE shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of FIVE shillings must be sent to cover the cost of such letter, the fee then being TEN shillings for one query only, and FIVE shillings for every subsequent one in the same letter. While making this concession the EDITOR will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Correspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus :—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway ?"

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The EDITOR has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market munipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The EDITOR further respectfully requests that merely speculative questions should as far as possible be avoided. He by no means sets himself up as a market prophet, and can only undertake to provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the INVESTORS' REVIEW, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

Y. F.—1. Brazil is not a tempting field for investment at present; we cannot advise a purchase. Financial position of company is not strong; quite recently vendor was endeavouring to raise a loan on his shares. 2. The ordinary dividend was only paid by drawing on the reserve, and the last report was a melancholy affair. 3. I hear good accounts of the prospects of this company, but it is too speculative to be described as an investment.

The total number of street railways in the United States is 806, of which 698 are worked by electricity.

The Lanarkshire and Dumbartonshire Railway Company are applying for parliamentary powers for raising additional capital, not having enough to defray their outstanding liabilities, though the railway and works are nearly completed. They propose to create additional ordinary capital to an amount not exceeding £225,000, with power to raise £75,000 additional debenture stock. The bill deposited proposes to empower the Caledonian Railway Company to subscribe £147,000 of the total amount required.

It is suggested by a correspondent of the *Daily News* that Russia is the Power to which Dreyfus was accused of selling information. It was at first supposed to be Germany, and the prosecution was begun on this supposition. As the case proceeded, however, it was found that the Power involved was Russia, and, as Russia is France's ally, strict silence had to be observed on the subject. But is it possible that the French legal authorities would have started a prosecution of this sort without knowing what Power was involved in it?

MINING IN THE YUKON DISTRICT.—The Canadian Government have issued amended regulations respecting placer mining in the Yukon district. Every miner and the employee of every miner must take out a miner's certificate, the fee for which will be 10 dols., and in the case of a company 50 dols. or 100 dols., according to the amount of capital stock. The miner's licence confers the right to mine, fish, hunt, and cut timber. The general size of mining claims is 250 ft., and of discoverer's claims 500 ft. Every alternate ten claims are reserved by the Government. Sub-aqueous mining leases will be issued in five-mile sections at a fee of 100 dols. per mile per annum and the usual royalty. The fee for recording and renewing mining claims is 15 dols.

TRADE UNIONS IN GERMANY.—In the German Reichstag on Tuesday, during the debate on the estimates for the Imperial Home Office, Herr von Kardorff, after pointing out the growth of Social-Democracy, which had followed the repeal of the Anti-Socialist Law and the depression of agriculture, declared that advantage ought to be taken of England's experiences, and dilated on the danger of handing over millions of workmen to the Social Democrats through trade unions. Dr. Lieber declared that the Centre would agree to no settlement of the question of the right of combination that was not based on absolutely equal rights for both employers and employed. Herr Pachnicke (Freisinnige Volkspartei) said that his party regarded the right of combination as the first essential for the protection of the working classes. The struggle in the Reichstag on this subject is becoming keen.

ALLIANCE ASSURANCE COMPANY.

ESTABLISHED IN 1824.

Subscribed Capital, FIVE MILLIONS STERLING.

Directors.

Right Hon. LORD ROTHSCHILD, *Chairman.*

James Alexander, Esq.
Charles Edward Barnett, Esq.
Right Hon. Lord Battersea.
Hon. K. P. Bouverie.
T. H. Burroughes, Esq.
Francis William Buxton, Esq.
Major-General Sir Arthur Ellis, K.C.V.O.
James Fletcher, Esq.
Richard Hoare, Esq.
Sir George C. Lampson, Bart.
Francis Alfred Lucas, Esq.
Edward H. Lushington, Esq.
Hon. Henry Berkeley Portman.
Hugh Colin Smith, Esq.
Right Hon. Lord Stalbridge.
Lieut.-Colonel F. A. Stirling.
Sir Chas Rivers Wilson, G.C.M.G. C.B.

Auditors.

John Cator, Esq. | Victor C. W. Cavendish, Esq., M.P. | Ian Murray Heathcoat-Amory, Esq. | Hon. Lionel Walter Rothschild.

CHANCERY LANE BRANCH—64, Chancery Lane, W.C.
NORFOLK STREET BRANCH—3, Norfolk Street, Strand, W.C.
WESTMINSTER BRANCH—1, Great George Street, S.W.
MINCING LANE BRANCH—3, Mincing Lane, E.C.
WIGMORE STREET BRANCH—24, Wigmore Street, W.

The Company have also Branch Offices at Edinburgh, Glasgow, Dublin, Liverpool, Manchester, Sheffield, Birmingham, Bristol, Ipswich, Bury St. Edmunds, Newcastle-on-Tyne, Shrewsbury, Wrexham, Leicester, and Nottingham.

LIFE DEPARTMENT. Moderate Rates of Premium. Large Bonuses, including Interim Bonuses.
Unclaimed Surrender Values applied in keeping Assurances in force.
Claims paid immediately after proof of death, age, and title.
New Policies free from all restrictive conditions, Whole-world, and Indisputable.

DEATH DUTIES.—Special Forms of Policies have been prepared in order to enable the owners of Property to provide for payment of the ESTATE DUTY. Full particulars will be forwarded on application.

FIRE DEPARTMENT.—Fire Insurances granted at current rates.

Leasehold, Sinking Fund, and Investment Insurances granted.

Proposal Forms, Prospectuses, and Statements of Accounts may be had on application to the Head Office of the Company, or to any of the Branch Offices.

Head Office—Bartholomew Lane, E.C.

ROBERT LEWIS, *Chief Secretary.*

"INVESTORS' REVIEW."

NOTICES.

BACK NUMBERS.

Less than a dozen complete sets now remain of the first four Quarterly Numbers of the "Investors' Review," so that the first Number of all can only be supplied in volume form, price **21s.** net. The Volume for 1893 is also composed of Quarterly Parts, and its price is the same. The seven Quarterly Parts from Number II. onwards can still be had separately, price 5s. net. For the succeeding four years down to December, 1897, the "Review" is in Monthly Numbers.

All Monthly Numbers more than six months old will now be charged 1s. 6d. net, and all Half-yearly Volumes, 10s. 6d. net (by post, 2d. and 10d. extra for the Number or Volume).

Cloth Cases for binding the "Review" and the "Index" are charged for as follows:—For Annual Volumes of the "Review," 1s. 6d.; for Semi-annual Volumes, 1s. 3d.; and for Yearly Volumes of the "Index," also 1s. 3d. Postage, in all instances, 2d. extra.

The Investors' Review.

The Week's Money Market.

Ease in the market has made further progress this week. The discount houses on Friday last had to reduce their allowance for deposits by ½ per cent. to 1½ per cent. for money at "call," and 1¾ per cent. for money at "notice," and the course of rates since has proved the necessity of the step. Day to day money has these last few days been so plentiful that the "call" rate has gradually drooped to 1 per cent., and loans for a week command no more than 1¼ per cent. So the market has not yet felt the influence of the maturing of bills held by the Bank of England.

In these circumstances discount rates could no longer be maintained, although the most was made of "impending gold withdrawals to the River Plate," and other such rumours to try to keep the market up. Shipments to Argentina, however, have all along been fully expected on a moderate scale during January, and after all the matter is not one of first-class importance. Accordingly, the great ease in money had full play, and discount rates have fallen steadily throughout the week, so that three months' remitted bills can be melted at 2⅛ to 2¼ per cent. as against 2⅜ to 2 7/16 per cent. a week ago. Sixty days' paper has fallen to a like extent, but rather significantly the six months' rate has shown less weakness, declining only to about 2⅜ per cent. Foreign exchanges have moved against this country to a trifling extent, in spite of the reduction in the German Bank's official premium, and the price for gold in the open market has risen ¼d. to 77s. 11d. per ounce. About £130,000 in gold arrived from Japan as a result of sales of yen in that country, sent from the Straits Settlement. At intervals more may filter in from this quarter, but at present no one attaches importance to the movement.

A factor contributing towards the market weakness was the low average rate at which the £1,000,000 of India Treasury Bills were renewed. The whole amount went in six months' bills at £2. 4s. 5d. per cent., and after this announcement on Monday the market gave up any serious attempt to maintain rates. An issue of £1,000,000 Western Australian three per cent. stock went at an average of £96. 6s. 4d. per cent., or £1. 6s. 4d. above the minimum. The last issue by the colony, which was also in three per cents., produced £95. 0s. 10d. per cent. This difference shows that the credit conditions are a shade less favourable.

In one sense the Bank return published yesterday indicates a reason for the greater cheapness of money, in another it does not. The Banking Reserve has increased £1,206,000 to £21,891,000, and a large reserve always helps to ease the market. On the other hand the market itself is really poorer, as the decrease of £1,485,000 in the "other" deposits which comprise the bankers' balances, proves these deposits are now down to £38,885,000, by no means a total to rely upon for prolonged ease. All the money back from circulation, and the above amount off the "other" deposits in addition, has gone to swell the Government balances which are greater by £2,056,000, and to enable the market to reduce "other" securities by £629,000.

SILVER.

The Silver Market has weakened considerably during the week, the price for immediate delivery dropping 1 1/16d. to 26½d. per oz. and for delivery two months hence by ⅝d. to 25¾d. per oz. Support has been lost through the easing of the monetary position both in China and India. Whereas discount rates in China a few weeks back were over 30 per cent., they are now no higher than 5 to 6 per cent., as the arrangements to meet the requirements of the Chinese New Year, which falls on the 22nd inst., have been completed. The stringency had caused Mexican dollars to be bought up in the Straits and shipped to China, and thus left room for the new British dollar, which is being actively minted at Bombay. Silver, of course, had to be purchased for this operation, and these orders have recently played an important part in maintaining the quotation. Now that the Chinese exchanges have fallen so heavily, —¼d. to 1d. in the week—this operation is no longer so profitable. In India the ease is only relative, but "forward" rates of exchange keep low, so that the worst of the pressure may be over for a time, Consequently the demand for remittance has diminished, and the India Council did not allot any drafts last Wednesday, the applications being only for 6½ lacs, at low quotations. This, of course, militates against the demand for silver, and at the same time the Bombay market—the chief one in India for the metal—is disorganised owing to the flight of most of the dealers from the city in consequence of the outbreak of the plague.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7 and 8 Vict., cap. 32, for the Week ending on Wednesday, January 19, 1898.

ISSUE DEPARTMENT.

Stock Market Notes and Comments.

The past week on the Stock Exchange cannot be described as a lively one. Much of the speculative business has been of the "mark time" order. We have had no excitement and very little to do. Of course, the chief point of interest has been the Chinese loan, which many in the Market have talked about as if it were to be issued next week. Everybody is delighted that the British Government should have taken the line it has apparently done in this business. It is one that the poorest head in the Stock Exchange thinks it can comprehend in all its bearings, and members jingled the coins in their pockets with an increased sense of satisfaction as they thought and talked about how neatly John Bull has "dished" the Russians and the Germans. There can be no doubt at all that the loan will be subscribed with enthusiasm when it does come. Are not Consols falling almost daily in preparation for it? It would be a dreadful thing if the Post Office, after all, took the lot!

So far the market has been somewhat disappointed with the dividends on Home Railways. That on the Great Eastern Company's stock was specially looked upon as a blow to milleniumites or "bulls." We fear there are more of the same kind to come. "Ah, you pessimist!" crows the man in the market; and he is

quite right from his own point of view. Traffic receipts have been astonishingly good all through the past year, but it by no means followed that the bulk of the gross increase will prove to be net gain, as many people assume. Even in the passenger traffic, which has been remarkably well maintained, the tendency is for mere working expenses to grow faster even than the receipts, and a great deal of the increase in the goods traffic is attributable to the very heavy imports of food, the freights upon which obtainable by the railways are not particularly remunerative. From this point of view it might be worth while for the "bulls" to consider whether great increases in gross receipts may not be a sign that the country is living on its capital. That is just a hint by the way, thrown out with a view to cause the speculators for the rise to refrain from transports of exultation. All our Home Railway stocks are now at very high prices indeed—prices which would crumble with great rapidity were anything of an adverse kind to arise. There is scarcely one Home Railway stock in the entire list which can be looked upon as a solid permanent investment ; that is to say, the man who buys now as an investor buys not far from the top. The collapse of the engineers' conflict has given a stimulus to this section of the Stock Exchange, and has caused a demand to arise for the stocks and shares of the iron and engineering companies affected by that contest. In consequence of this, and given a continuance of low rates for money, prices seem likely to advance beyond their present points, yet we certainly cannot advise any outsider to buy "bulls" of any stock in the list. They are all dear, hardly even excepting the Metropolitan—looked upon, that is, as investments. Should the Metropolitan line be able to run its trains by electricity, then certainly the price of its stock will go considerably higher, quite irrespective of its intrinsic value.

Next to the Home Railway Market, the most interesting division of the Exchange just now is that for United States railways, and we have some difficulty in giving any definite opinion about its prospects. On the whole, our impression is that prices will go higher, in spite of the eccentricities of Senator Wolcott and of the Silver party behind him ; in spite, also, of the fact that nothing is likely to be done by the present Congress to settle the currency difficulties. The main reason we have for leaning to this opinion is not found so much in the expansive traffic returns, although these have a considerable influence, as in the enormous financial interests whose prospect of gain rests upon a large advance in prices. It must not be forgotten that many big railway systems in the States have been reorganised of late years. In the process of reorganisation the stocks fall into the hands of finance houses in America and England at comparatively low prices and in enormous amounts. It is the object of these financiers to sell this "bankrupt stock" at a profit. They cannot do this very well in the States, and must consequently look to London, the one free market Europe has. At the present moment there are very heavy amounts in Northern Pacific, Norfolk and Western, Atchison, Southern, Union Pacific, Baltimore and Ohio, and other properties—either rehabilitated or about to be—in this way held ready for sale. Prices accordingly are bound to advance. They will fluctuate, of course, and timidly-wise people, who rush into the market and buy bits of this and that, will always be checking the upward movement by taking their profits ; but the bent of the market will be steadily upward for months to come as far as we can see, and we hope it may be so, because the English public has still a good many millions sunk in these securities which it would be just as well to get home again on any favourable opportunity. We by no means advise buying for investment any of these stocks ; in shares, least of all. As a speculation, many of them may be all very well, but even the speculator, after a little time, will often have to jump out nimbly if he is going to escape loss. This is not said because we have no belief in the distant future of the United States, or of these railroads. On the contrary, both country and railways may, in the course of another generation, make enormous strides towards wealth, but the near prospect beyond the effects of the past harvest is not good. There are too many ugly questions unsettled, and there is too little honest disposition to settle them, to make the United States just now a safe repository of British money, so far as its large corporations are concerned.

The speculation in Grand Trunk stocks goes merrily on, and is not in our opinion near breaking-down point yet. Therefore, holders since long ago, who are waiting patiently to escape and have done for ever with one of the most treacherous properties Englishmen have ever put money in, should wait a little longer. The fever cannot be at its height by any means, when we think of all the coming fury about Klondike and of how the peopling of the North West is to excite imaginations and tempt men to buy and buy. As a fact, too, the property is now in better case and better managed than it ever was at any previous period of its history.

About the Mining Market nothing need be said this week in the way of advice. We are told that preparations are being quietly made to start a "boom" in Rhodesian shares of all descriptions, and certainly it is badly wanted. Also we hear that there are two or three really promising mining properties within that vast territory, and we may be sure the most will be made of them to carry the prices of the swarms that are worth nothing as high as they can be made to go. It will be as well, then, to act here very cautiously ; but does not this advice apply to all classes of mine shares, even the Rio Tinto and De Beers, which surely cannot be regarded as substantial investments of a high class at present figures ? As a whole, however, the Mining Market has been very listless, and the dealing in it mostly professional, not exactly of that kind described in the Stock Exchange as "dog eat dog," but the pitch and toss of syndicates, all of which, although seeming to buy, are anxious to sell. Thanks to them, all the Mining markets, except that for Indian gold mines, resemble the island on which Sindbad camped, only to discover that he was on the back of a monster of the deep. They will slide from under you some day.

The Week's Stock Markets.

Business on the Stock Exchange has not been very active all the week, the principal features being the announcement of several of the Home Railway dividends, and a further considerable appreciation in Canadian Railway shares. Consols have been dull, and the disturbances in France caused a weakness on the Paris Bourse which reacted on markets generally.

In the market for Home Government securities Consols have been dull on the coming Chinese loan, and touched 112½ at one time. The Indian sterling loans have risen slightly, and rupee paper advanced early in the week in sympathy with firmer exchanges, but the price eased off on Wednesday when it was found that the Indian Council had made no allotment of drafts. Bank of Ireland stock rose 5 on a satisfactory dividend, and Bank of England stock is higher. Among Colonial stocks the new Cape loan is quoted about 3 premium ; the New South Wales at 1½ premium ; and the West Anstralian at 2⅛ premium.

The Home Railway market has presented a firm aspect for the greater part of the week, owing to the more hopeful outlook in the engineering trade, the

strike being to all intents and purposes settled, and this, coupled with several satisfactory dividend announcements, has tended to keep prices steady. The distribution by the Brighton Company, at the rate of 8¼ p.c. on the Ordinary, compared with 8 per cent. a year ago, was quite up to market expectations. This gives a return of 7 per cent. on the deferred stock, against 6¾ per cent. for 1896, and despite a certain amount of realisations the recent sharp rise in the price of the deferred has been maintained. South Eastern Deferred advanced just before the dividend was announced, and relapsed as quickly when it was found that the distribution was at the rate of 6⅝ per cent. on the Ordinary (giving 3⅞ per cent. on the Deferred against 3⅜ per cent for 1896). Great Eastern stock fell nearly 2 points, the dividend at the rate of 5 per cent., or only ¼ higher than last year, being less than had been anticipated. The dividend for the whole year is 3½ per cent., against 3⅜ per cent. for 1896. The distribution made by the Metropolitan Company was quite up to expectations, viz., 3¾ per cent., and the fact that the company's Electric Traction Bill is to be discussed at a meeting next week also helped to keep the price steady. Scottish stocks were bought at one time from the North, on the understanding that large numbers of engineers were returning to work. After the excitement caused by the several dividend announcements had worn off, prices became dull, although traffic returns (with the sole exception of the Midland) were satisfactory.

United Stated Railroad shares have been rather more active. Towards the end of last week there was renewed buying of New York Central and Lake share issues, on the statement that closer relations were going to be entered into between the two roads, and other of the leading shares advanced on the publication of satisfactory traffic returns. Later, the tone became dull, due to the weakness of Wall-street, but a resumption of home and Continental buying caused a slight rally. Union Pacific issues have more than maintained last week's rise, the November traffic return just published being a very satisfactory one. Wall-street has been agitated by rumours of fresh rate-cutting in the West, followed by the statement that American warships had been ordered to Cuba; and as the clique which has lately been responsible for most of the buying has ceased operating, prices exhibit a ragged appearance. The weaker tendency was also partly due to the decision of the Finance Committee to report to the Senate in favour of Mr. Teller's resolution, which gives the Government the option of paying United States bonds in gold or silver.

Canadian Railways have again been much to the front, and Canadian Pacific shares have been favourably influenced by the report that the company is trying to obtain a lease of the Seattle, Lake Shore, and Eastern road.

As regards Foreign Railway stocks there was a steady all-round rise for several days, and Argentine descriptions continued to find favour. Traffics generally were fair, but a little profit-taking towards the close has resulted in a slight set-back. Mexican Railway issues, notably the First Pref., advanced when the traffic returns appeared, showing an increase of 6,800 dols.

Foreign Government Securities have shown considerable strength, but the improvement in prices has not been quite maintained up to the close, the disturbances in France causing a set-back on the Paris Bourse. One of the principal features has been the demand for the loans of the Argentine Government, and the Cedula issues. The gold premium at Buenos Ayres has declined slightly, and a further shipment of gold from London has also been notified during the past week. Brazilian issues advanced owing to a rumour that a Belgian syndicate was being formed for the purpose of leasing with the Brazilian railways. The confirmation of the news of a loan from the British Government to China caused an advance in Chinese bonds, and Egyptian Unified, and Greek Bonds have also been inquired for.

The Miscellaneous market has presented a quieter appearance, although a fairly good demand continues for high-class industrial securities for investment purposes. A feature has been the recovery in the shares of the various iron and steel companies, due to the collapse of the strike among the engineers. Aerated Bread shares continue on the up grade. Electric lighting companies again mark substantial rises, the dividends announced so far comparing very favourably with those of a year ago. Among brewery stocks, Allsopp ordinary has risen sharply; Telegraph securities have been active at higher prices, and several tramway and omnibus stocks are quoted firmer, notably the General Omnibus. Russian Petroleum Ordinary is rather lower, owing to the resignation of the chairman of the comany. The long looked-for dividend on Bovril Deferred has at last appeared, but did not meet with approval, a 5 per cent. distribution being considered poor, and no mention was made of the amounts carried to reserve or forward. Colonial Bank shares rose £3 on Mr. Chamberlain's statement with regard to the West Indies.

Mines and Finance Companies.

There has been little or nothing doing in mining shares, and members are migrating from this market to others where business is more active. Prices of South African ventures have drooped, more especially of those companies dealt in on the Paris Bourse, and a dead set is being made at the Barnato group, which has apparently been left to take care of itself. De Beers Diamond shares, however, have not participated in the general dulness, rumours that the shares are to be split into Preference and Ordinary again cropping up. Among Western Australian companies, the higher-priced shares have met with most support, and there has been a little more business, helped by a few buying orders from Adelaide. Copper shares have been very active, especially Rio Tinto and Anaconda, on the firmness displayed in the price of the metal owing to the aspect of the engineers' dispute, and the general understanding of an improved statistical position. As regards miscellaneous mines, the advance in Wassau (Gold Coast) shares is a feature, a circular to the shareholders stating that a Government engineer is to leave at once for the Gold Coast to commence the construction of a railway from the Port of Secondee to the mining district. Indian mines continue firm.

Markets on the whole close with a firm tendency. Consols rose ¼ just before the close; Canadian Railway stocks continued their upward flight; and United States issues were also firmer at the last, with the exception of a slight reaction in Louisville, New York Central, Southern and Wabash. Home Railway stocks closed strong, notably Brighton Deferred, Great Eastern, and South Eastern Deferred. In the Foreign market, business was on a very small scale, and the tone was dull. South African and Western Australian mines closed weak, but copper shares were again in good demand.

The reported discovery of the "Mother lode" at Klondike is declared by the *Times* Ottawa correspondent to be a *canard*. It is not the first of the sort about Klondike, nor is it likely to be the last.

The plague continues to spread in India, and there is no sign of its having yet received an effectual check. The Indian Government has telegraphed for eight more doctors, two more lady doctors, and twenty-five more lady nurses.

We are not surprised to hear that at the annual meeting of the Association of Chambers of Commerce, to be held in March next, a resolution will be put forward approving of trade unions, and other combinations of workmen, as long as they are used for the purpose for which they were originally created, but expressing the opinion that such purposes have been greatly exceeded, and have given place to constantly growing demands by trade unions, which, in face of the steadily increasing competition from foreign countries, constitutes a grave danger to the prosperity and the very existence of our national trade and industry; and asking for a Parliamentary inquiry into the whole working and tendency of trade unions. Such an inquiry would undoubtedly be of great importance. It is time we took into practical consideration how best to overcome the constant friction, which so severely handicaps our manufacturers in their struggle with foreign rivals.

Prices of Mine and Mining Finance Companies' Shares.

Shares £1 each, except where otherwise stated.

a For two months. *b* Mill restarted January 7. *c* Scarcity of water stopped milling.

MINING RETURNS.

St. John Del Rey.—Gold produce, January 1 to 11, £5,425, yield per ton, '62 of an oz. troy.

Crescent Gold Mining.—Result of crushing for past month, 400 tons—84 oz.

British Broken Hill Proprietary.—For fortnight ended January 13, 2,095 tons crude ore produced, 383 tons concentrates, containing 220 tons lead and 8,914 oz. silver.

Brilliant and St. George.—Crushed during fortnight 950 tons for 2,252 oz.

Simmer and Jack.—5,591 oz. from mill and 2,529 oz. of gold from tailings by cyanide.

Geldenhuis Deep.—For December, 18,394 tons crushed; yield in smelted gold, 6,484 oz.; 12,330 tons of sand and concentrates treated by cyanide, yield in smelted gold, 3,564 oz; total, 10,008 oz.

Bellevue Proprietary Company.—Tons crushed, 230; yield, 461 oz.

Hannan's Brownhill.—Lot 7: smelters' returns, 227 tons ore treated, yielding 1,339 oz. gold.

Robinson Gold Mines (W.A.).—Result of clean up, 610 oz. gold, making a total for the year of 7,391 oz. from 5,243 tons, exclusive of concentrates and tailings. Value, £28,100.

Wassan (Gold Coast) Mining Company.—During November the ten-stamp 750-lb. mill worked twenty-one days, and the twelve-stamp 550-lb. mill fourteen days. Ore crushed, 389 tons; produced 459½ oz. standard gold from 438 bar gold, which realised £1,795.

Wassan (Gold Coast) Mining Company.—For December, 606 oz. gold from 488 tons ore; twenty-two stamps worked nineteen days.

Moodie's.—Last month's return: 1,000 tons crushed, yielding 700 oz. gold.

Buffelsdoorn Estate and Gold Mining.—For December, 3,750 oz.

Le Champ d'Or French Gold Mining Company.—For December, crushed 5,300 tons, yielded 2,255 oz.; 4,015 tons treated cyanide yielded 1,113 oz. Total, 3,368 oz.

Regina (Canada) Gold Mine.—For December, 429 tons crushed, yielding 200 oz., including 55 oz. from cyanide.

Geldenhuis Main Reef Gold Mining Company.—3,646 tons crushed, yield 661 oz.; 2,120 tons treated by cyanide, yield 394 oz.

Great Boulder Proprietary.—Crushings for fortnight ended January 17: 1,740 tons, yielding 3,233 oz. gold.

Anglo-Mexican.—Output for December: crushed, 1,792 tons, 18,585 dols. (United States gold); cyanide plant: tons treated, 1,060; 14,800 dols.

Frank Smith Diamond Mines.—1,800 loads washed, producing 92 carats.

Gullewa.—During month 169 tons crushed, yielding 247 oz. gold.

Princess Royal (Cue).—Clean up from 140 tons gave 205 oz., exclusive of tailings.

Lake View South (W.A.)—Total amount crushed in twenty-six days, 1,500 tons. Clean up, 331 oz. Approximate total concentrates 50 tons, containing 383 oz., equalling 10 dwt. per ton.

Dividends Announced.

BANKS.

City Bank.—Dividend of 10 per cent. per annum. £15,529 carried forward. Previous year, 9 per cent.

Bradford Old Bank, Limited.—Dividend for the half-year to 31st ult. at the rate of 9 per cent. per annum. £4,138 carried forward.

Union Bank of Australia.—Dividend of 12s. 6d. per share, being at the rate of 5 per cent. per annum. About £24,500 carried forward.

Wilts and Dorset Bank.—20s. per share declared for half-year ended December last, and a payment of 10s. per share on the new shares.

West Riding Union Banking Company.—Profits for past year, £31,927. Final dividend declared of 8s. per share, making, with last interim dividend, 16s. for year. Balance of £5,242 placed to reserve, which will then amount to £50,007.

Metropolitan Bank (of England and Wales), Limited.—Dividend declared for the last half-year at the rate of 12½ per cent. per annum, free of income tax; £13,945 carried forward.

Parr's Bank, Limited. — Dividend recommended for past quarter at the rate of 19 per cent. per annum, and a further dividend at the same rate for the quarter ending March 31. £20,000 placed to bank premises account, and about £58,680 balance forward.

Wilkinson & Riddell.—Dividend for the past year of 5 per cent. on the preference shares, and 10 per cent. on the ordinary shares—the latter free of income tax, less the 5 per cent. interim paid August last.

Williams Deacon and Manchester and Salford Bank.—Dividend declared of 12½ per cent., £20,000 added to reserve fund, £15,000 to buildings depreciation fund, and £20,927 carried forward.

Foreign and Colonial Investment Trust.—5 per cent. per annum on pref. stock, and 5½ per cent. per annum, making 5 per cent. for year, on deferred stock, £12,911 placed to reserve, and £2,578 carried forward.

MARITIME INSURANCE.—2s. per share dividend recommended, free of income tax, making, with interim dividend of June 11 last, a total distribution at the rate of 11¼ per cent. for the year on the paid-up capital.

RELIANCE MARINE INSURANCE.—Dividend of 2s. per share, making, with interim dividend paid in July last, 10 per cent. for year.

LONDON AND COUNTY BANKING COMPANY.—Dividend 10 per cent. for half-year, and bonus of 1 per cent.; £25,000 written off premises account; £80,000 added to reserve, and £49,966 carried forward.

BANK OF EGYPT.—Dividend of 6 per cent. (making 9 per cent. for the year), and a bonus of 5s. per share, adding £5,000 to reserve fund, and carrying forward £4,734.

RAILWAY COMPANIES.

CITY AND SOUTH LONDON RAILWAY COMPANY.—The accounts for the half-year ended December 31 show a balance, after providing for the debenture interest and the dividend on the 5 per cent. preference shares, sufficient to allow the payment of a dividend on the consolidated ordinary stock at the rate of 1¾ per cent. per annum, carrying forward £1,510. The dividend for the corresponding period last year was at the rate of 1¾ per cent. per annum, the balance carried forward being £1,314.

SOUTH-EASTERN RAILWAY.—The accounts for the half-year ended December 31, 1897, subject to the completion of the audit, show a credit balance which admits of the following dividends on the ordinary stock:—At the rate of £6. 12s. 6d. per annum on the undivided stock; £6 per cent. per annum on the preferred ordinary stock; £3. 17s. 6d. per cent. upon the deferred ordinary stock for the year 1897; leaving a balance of about £4,000 to be carried forward.

BELFAST AND NORTHERN COUNTIES RAILWAYS.—Dividend on the ordinary stock at the rate of 6½ per cent. per annum for the half-year ended December 31. Upwards of £11,000 carried forward to next half-year's accounts.

GREAT EASTERN RAILWAY.—Payment of dividend on the ordinary shares at the rate of 5 per cent. per annum, as against 4¾ per cent. per annum for second half of 1896. Balance forward about £51,000; previous year, £50,918.

LONDON, TILBURY, AND SOUTHEND RAILWAY COMPANY.—Dividend on ordinary stock for past half-year, 6¼ per cent. per annum, carrying forward £14,600. The dividend last year was at the rate of 6 per cent., with £820 carried forward. The increased amount carried forward is to provide for any payment to be made to the Great Eastern Railway Company in respect of the widening of the London and Blackwall Railway.

MISCELLANECUS.

BRENTFORD GAS.—Dividends recommended for the past half-year at the rate of £5, £12, and £9 per cent. per annum on the preference, consolidated, and new stock respectively.

ELECTRIC CONSTRUCTION COMPANY, LIMITED.—The transfer books for the ordinary shares will be closed from January 18 to 31 inclusive, for the payment of the second half of the dividend of 6 per cent. per annum declared on July 22 last.

GLOBE TELEGRAPH COMPANY.—Interim of 1s. 9d. per ordinary share.

GAS LIGHT AND COKE COMPANY.—Usual half-yearly dividend at the rate of 12¾ per cent. per annum.

EL MUNDO (MEXICO) GOLD MINING COMPANY, LIMITED.—Interim dividend of 6d. per share, payable February 1.

BRADFORD MANUFACTURING.—Directors recommend dividend for half-year ended December 31 last at the rate of 12 per cent. per annum.

BRILLIANT AND ST. GEORGE UNITED GOLD MINING COMPANY.—Directors have declared a dividend of 1s. per share, payable on the 22nd inst.

BURLINGTON HOTELS.—Dividend, at the rate of 10 per cent. per annum, will be posted on the 25th inst.

DE KEYSER'S ROYAL HOTEL, LIMITED.—Directors recommend final dividend of 7s. per share, making, with interim dividend, 6½ per cent. for year. Balance forward £3,472.

HENRY & COMPANY (A. & S.).—Dividend on the Ordinary shares at the rate of 6 per cent. per annum, for the half year ended November 30 last, making 6 per cent. for year, as against 7 per cent. for previous year; £22,628 carried forward.

GEORGE NEWNES, LIMITED.—Interim dividend at the rate of 10 per cent. per annum, for the half year ended December 31, has been declared.

CAVE, AUSTIN, & COMPANY, LIMITED.—Dividend of 5 per cent., on both classes of shares, for six months ended September 30, 1897, representing, with previous dividend, 5 per cent. per annum for the first 15 months' trading. £1,550 also carried forward to reserve.

R. & J. HILL, LIMITED.—Interim dividend at the rate of 6 per cent. per annum will be paid on 24th inst. on the ordinary shares for period ending December 31, 1897.

ROBERT CAMPBELL & SONS, LIMITED.—Dividend of 2s. 6d. per share; £1,345 carried forward.

RUBBER TYRE MANUFACTURING.—Interim dividend for the past six months' trading of 10 per cent. per annum.

WELFORD & SONS, LIMITED.—Dividend at the rate of 12 per cent. per annum, making, with the interim dividend, 10 per cent. for the year.

HARROD'S STORES, LIMITED.—Dividend 15 per cent. for half-year on ordinary shares, making 20 per cent. for year. Reserve left at £251,720.

LONDON AND ST. KATHARINE DOCKS COMPANY.—A dividend at the rate of 1½ per cent. for the past half-year, making 2½ per cent. for the year 1897, with £7,972 carried forward, as against 2¼ per cent. for the year 1896, with £3,116 forward.

EAST AND WEST INDIA DOCK COMPANY show balance of revenue account £70,663, as compared with £63,894 for the corresponding half of 1896. After paying fixed charges, a small balance is left, from which ½ per cent. on account of the arrears of interest on the deferred debenture stock will be paid.

LONDON ROAD CAR COMPANY.—Dividend recommended for half-year ended December 31 at the rate of 8 per cent. per annum. Balance left about £6,000, of which it is proposed to place £2,000 to a depreciation reserve fund, and carry forward about £4,000 to the credit of next half-year.

BELFAST STREET TRAMWAYS.—Directors recommend dividend at the rate of 6½ per cent. per annum, and a bonus of 1s. per share. About £800 carried forward. Previous year at the same rate.

BIRMINGHAM AND ASTON TRAMWAYS.—Dividend declared at the rate of 10 per cent. per annum for the six months ended December 31 last, as against 5 per cent. for corresponding period in 1896.

BIRMINGHAM AND MIDLAND TRAMWAYS.—Interim dividend at the rate of 5 per cent. per annum for six months ended December 31 last to all shareholders registered on the 12th inst.

Prices Quoted on the London Stock Exchange.

Throughout the INVESTORS' REVIEW middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the INVESTMENT INDEX published quarterly—January, April, July, and October—in connection with this REVIEW, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the REVIEW almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the INVESTORS' REVIEW any subscriber can follow for himself the movements of securities from week to week, and the INVESTMENT INDEX will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S.F. Snk.Fd. *sinking fund*; Certs., *certificates*; Debs. or Dbs., *debentures*; Db. or D.Stk., *debenture stock*; Pf., Prf., or Pref., *preference*; Prefd. or Pfd., *preferred*; Dfd., *deferred*; L. or Ltd., *limited*; Sh., *share*; Ans., *annuities*; Cu. or Cm., *cumulative*; Gu or Guar., *guaranteed*; Bds., *bonds*; S., Sr., or Ser., *series*; In., Ins., Insc., *inscribed*; Dr., Drgs., Drwgs., *drawings*; Stg., Strlg., *sterling*; Lia., *liable to*; Sp., Surp., *surplus*; Per., Perp., *perpetual*; Ln. *lien*; Lo. *loan*.

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.

The Investors' Review

Vol. I.—No. 4. New Series. FRIDAY, JANUARY 28, 1898. [Registered as a Newspaper.] Price 6d. By post, 6½d

The Investment Index,

A Quarterly Supplement to the "Investors' Review."

Price 2s. net. 8s. 6d. per annum, post free.

THE INVESTMENT INDEX is an indispensable supplement to the Investors' Review. A file of it enables investors to follow the ups and downs of markets, and each number gives the return obtainable on all classes of securities at recent prices, arranged in a most convenient form for reference. Appended to its tables of figures are criticisms on company balance sheets, State Budgets, &c., similar to those in the Investors' Review.

Regarding it, the *Speaker* says: "The Quarterly 'Investment Index' is probably the handiest and fullest, as it is certainly the safest, of guides to the investor."

"The compilation of securities is particularly valuable."—*Pall Mall Gazette.*

"Its carefully classified list of securities will be found very valuable."—*Globe.*

"At no time has such a list of securities been more valuable than at the present."—*Star.*

"The invaluable 'Investors' Index.'"—*Sketch.*

"A most valuable compilation."—*Glasgow Herald.*

CALEDONIAN
INSURANCE COMPANY.

The Oldest Scottish Insurance Office.

LIFE ASSURANCE WITH AND WITHOUT MEDICAL EXAMINATION ON EXCEPTIONALLY LIBERAL TERMS.

Example of the Company's Threefold Option Investment Policy.

Entrant at age 26 may secure in return for an Annual Premium of only £30 the following benefits—

A. An Assurance of £1,000, payable if death occur before age 65;

B. An Endowment of £2,000 on attainment of age 65; or in lieu of B. one of the following options:

C. A paid-up Assurance of £2,800, commencing at age 65; or,

D. An Annuity after 65 of £106 : 11 : 8,* with a paid-up Assurance of £1,400 commencing at 65; or

E. An Annuity after 65 of £213 : 3 : 4,* without any paid-up Assurance.

* The Annuities quoted are for males, and are dependent on the present prices being still in force when age 65 is reached.

Fire Insurance at moderate rates and on good security.

Head Office: 19, GEORGE ST., EDINBURGH.

Economic and Financial Notes and Correspondence.

THE STRUGGLE IN PEKIN.

There is a lull at present over the question of the British loan to China. Rumours still continue to circulate notwithstanding, and we must be careful not to excite ourselves about them. So far as things have gone the victory has been substantially with British diplomacy, and it is bound to remain with us if we stand quietly and firmly on our treaty rights. To fall into violence might be disastrous. Already our activity at Pekin has brought Germany to announce that Kiao-Chau is to be a free port, thus detaching her from Russia. This is a distinct gain and an acknowledgment of the equity of British contentions. It would have been a distinct violation of existing treaties with China had Germany laid hold of this place and constituted it an exclusive possession. In another way we have to some extent got the better of Russia, for in the eagerness her representative before the Emperor of China has displayed to prevent us from obtaining the opening of Ta-lien-wan as a treaty port, the intention has been disclosed to seize Manchuria and treat it as a sphere exclusively in the hands of Russia. By letting this out, Russia, we think, has put herself in an entirely false position, not only as against Great Britain, but in relation to the whole of Western Europe. No power, if the Western nations are alive to their interests, ought to be allowed to take possession of any portion of the territory of China and shut out the other European Powers from it. Our Ambassador ought, therefore, to bring this

Russian design into high relief, and hold fast to the righteousness of his position. No war is in prospect through our firmness. We stand for the common right of all nations to share in the trade and development of China, and so standing are unassailable.

While this dispute rages, any question of a loan is, of course, in abeyance. The loan, however, must come forward again because China must have money to pay off Japan with, and there is no country except ours, as we have said before, which can find the money. But it must not be found on too easy terms; we do not mean as regards interest, for that might very well be low, but as regards the concessions to be granted in exchange for the use of British credit. These concessions ought to be extensive, and as we ask no exclusive privileges, there can be no objection whatever to pacifying the Germans by allowing them to participate in the loan if they please, we taking strict care that the concessions obtained from China are to be the unalienable right of every nation trading with the Chinese Empire. With Germany detached, and possibly France, and with Japan behind us, Russia will be powerless for mischief.

Greek Finance.

The first report of the International Commission appointed to control the finances of Greece has been issued, and proves a moderately-worded and sensible State paper. If the Commission goes on as it has begun, the creditors of Greece will by-and-by receive their own with usury. At present, of course, Greek finance is in considerable disorder; but as it stands, the Commissioners look for a revenue of over 85,500,000 drachmas, and by 1903 they expect an income exceeding 100,000,000. Of this the State is to be allowed to spend 63,250,000 in 1898. The rest goes principally to the creditors of Greece, but we do not yet know exactly what the holders of the foreign loans will receive. It cannot be very much, because a new loan of £5,000,000 is to be issued forthwith to provide the indemnity due to Turkey, and to fill other gaps. Greece is also, according to the Constantinople correspondent of the *Times*, to be allowed to borrow another £1,000,000, so that the total of the nominal amount of the Greek Debt will in a year or two's time be about £27,000,000. Of course, the new loans will be issued under favourable conditions, and the whole of the new £6,000,000, if obtained at 4 per cent., should not cost much more than a quarter of a million sterling for interest and sinking fund, but when that is paid the margin over for the other creditors must necessarily be small for some time to come. Both Greece and her creditors, therefore, must ultimately benefit materially from the strict control now to be exercised over her financial affairs.

India Saved.

At last the bill which is to ease the transaction of commercial affairs in India has become law. Thanks to it, Indian exporters may now buy exchange on London, when they cannot help themselves, at the lofty price of anything over 1s. $4\frac{5}{32}$d. per rupee. The Government now in Calcutta will accept deposits of gold in London, and the India Council here will telegraph out to it to give rupees—silver and paper—to banks on the spot against this gold, so that there may be no lack of currency. This is capacity and statesmanlike foresight for you, and it is sure to be deeply appreciated by all Indian bankers and merchants. True we have not yet heard of any deposits of gold made for this purpose; true also is it that Indian exports are being choked as with a viper's grip by the artificially elevated rate of exchange; but these are passing inconveniences, sure to be removed by the high wisdom now made manifest. May we not, then, offer our profoundest admiration to those enlightened bureaucrats on the skill and resource they are displaying in steering India, not exactly through, but towards the most stupendous economic crisis in her history under British rule! "We are all tight and snug now," as the sparrow said when she built her nest in the house gutter.

The London Joint Stock Bank.

A suggestive and interesting little speech was made by Mr. James Stern, the chairman of this Bank, at its recent half-yearly meeting. He had a pleasant story to tell, business prosperous, staff not forgotten in the prosperity, branches being opened in suitable places, and so on. Thus far the directors have not thought it prudent to open branches outside London, and there should be plenty of scope within it yet for extension. Mr. Stern's observations on the effect of the enlarged supplies of gold are worth quoting because they endorse so heartily the doctrine of large reserves which we have almost wearied of preaching:—

> About the year 1851, at the time of the Californian and Australian gold discoveries, a former Director of this Bank maintained the seeming paradox that the effect of a greater production of gold would be rather to raise than to lower the value of money, as he held that for every 20s. of gold produced, trade would increase 21s. This bold forecast, by the aid, however of the great waste and the vast expenditure of the Crimean War, was fully realised. While no one would venture to-day to anticipate a similar issue, we may fairly expect that an enlarged volume of trade and an enlarged volume of values will at least mitigate the effect of an enlarged production of gold, and that room will still be left for profitable banking, when based on prudent management and on well-established connection. With, too, the extension of the gold currency of the world, there must be an ever-widening sphere for London banking, so long as England retains her pre-eminence as the special, I might say, the only, home of free gold. This unique and leading position carries with it however, corresponding duties. For as it is evident that the wider the use of gold becomes, the greater may be the calls made on us, we are more than ever bound to see that our reserves (already not too large) are kept entirely in gold. It is on this sure foundation, and not on the unstable basis of treaties, that we must continue to stand; and while casting aside, as antiquated and obsolete, the permission given 50 years ago to hold part of our reserves in silver, which is quite out of harmony with the facts of to-day, we must more than ever insist that as our engagements are made in gold, so our ability to fulfil those engagements must be placed beyond all possibility even of suspicion, by our reserves being held in gold and in nothing but gold.

Golden Cement Claims.

In October, 1895, this Western Australian Company, with a fascinating name, was brought out with a great flourish of trumpets and a nominal capital of £200,000, one quarter of which was assigned as working capital. In a letter from the secretary, forwarded with the prospectus, it was stated that Messrs. Bewick, Moreing, & Co. had made an independent report upon the property, in which they estimated the ore in sight to be worth £2,500,000. Naturally such a statement, coming from such a quarter, led the public to apply for the shares, and they went, for a brief period, to a considerable premium on the market. None of the predictions and estimates of the prospectus have been justified, the

report of the eminent Western Australian engineers least of all, and it is now, we fear, impossible to sell the shares at any price, their nominal quotation being 1s. to 2s. per £1 share. In these circumstances one of the unfortunate allottees has asked us to make a public demand for information about the property. Is there any paying ore in the "mine" at all? Has any of the capital remained unspent? What have the vendors done with the 90,000 shares taken by them in part payment for the "mining leases" over about thirty-two acres of land, leases which have given no return?

Perhaps the West Australian Venture Syndicate, the West Australian Mines Development Syndicate, the Anglo-German Exploration Company of Western Australia, and the Anglo-French Exploration Company of Western Australia, Limited, who united to invite subscriptions for 85,000 of the shares, will condescend, should they themselves still exist, to supply some information to the shareholders, since none seems to be extractable from the board itself. We fear there is very little to be hoped for, but even the brokers in London and Glasgow who put their names on the prospectus ought to do their utmost in the circumstances to recover some of the money of their clients. If they cannot do this, they might, at least, tell the public into whose pockets it went. Did the promoting syndicates pay dividends out of it and prate about the "prosperous condition of their business"?

The Curtin Davis Proprietary Company.

In September last* we spoke well of the manner in which this adventure had been handled and placed before the public. From our language many seem to have inferred that we spoke in terms of praise about the mine itself. That was not the case, we are happy to say, for the mine has not turned out at all according to expectations. The ore found in it has been difficult to extract, and is not worth much when got out. This is unfortunate, and if the directors had behaved as mine directors usually do, the shareholders would have had to lament the loss of their money. Happily we are still able to commend the board, which is composed of the same people who developed and brought out the Mount Lyell mine. Instead of rushing into large expenditure for plant and machinery before they tested the property, the directors in Melbourne kept the money in hand until they had made a thorough examination, and as soon as they obtained proof of the disappointing character of the property, they, on their own responsibility, and with their own means, bought a half interest in the Colebrook Company, which interest, less amount expended in improving it, they have transferred without cost to the shareholders of the Curtin Davis Company. This seems to us honourable and straightforward conduct, and we trust the Colebrook property will amply compensate the Curtin Davis shareholders for any disappointment their original possession may have caused them.

Mortgage Company of the River Plate.

As will be seen in our Company Report and Balance-Sheet columns, the Mortgage Company of the River Plate had an excellent time of it last year. But while a 10 per cent. dividend, with £15,000 to reserve, will naturally satisfy shareholders, we cannot forbear to point out that the liabilities of the company have risen rapidly of late. Two years ago, with the same amount of paid-up share capital as now—£200,000—the Debenture bonds and Debenture stock totalled £545,070, whereas the total of this form of debt is now £689,514. Possibly the "loans on mortgages," which form the bulk of the assets of the company, may be more liquid than they were a couple of years ago, for properties on hand have been reduced by nearly two-thirds in the interval; yet £3 10s. of Debentures to every £1 of paid-up share capital is not a happy combination.

Experience of Land Mortgage Companies in Canada, in the United States, in Australia, in New Zealand, and in the River Plate itself is dead against this excess of borrowed to paid-up share capital. While everything smiles it is a fat time for the shareholders, who rake in fine dividends from the profit margin upon the loan business of the concern; but the high dividends thus attained serve to attract other capital into the business, and when a bad time comes, as it does with great regularity in these new countries, the interest upon the debt becomes a serious burden. So far this company has fared well, but it should be borne in mind that until recently the proportion of borrowed money to share capital was usually 2½ to 1. As it is, the charge for interest now nearly equals the net profits of the concern, much as they have risen of late.

The remedy is, of course, to call up more share capital, say £1 per share, which would mean £100,000, without taking into account any aid from premiums, and with the proceeds pay off some of the Debenture bonds as they mature. It will very likely be urged that £517,766 of the Debenture debt is in Debenture stock that does not mature for a good many years, if at all, but although this circumstance would certainly guard the company against a sudden demand for the return of principal, the dead-weight of the interest charge cannot be avoided. Many Mortgage Companies have congratulated themselves upon the conversion of Terminable Debentures into Debenture stock, but such a change does not take away the danger of carrying too much dead-weight of debt.

Municipal Trust Company.

It is doubtless a wise step of the Municipal Trust Company to proceed to the reduction of its capital. Unfortunately many of its assets have permanently deteriorated, whilst the majority of the holdings have no market, so that the Trust cannot hope to benefit much from the steady appreciation in prices upon the Stock Exchange. The holding of United States Municipal, County, and Water and Light bonds has, we believe, proved more disastrous than the most bitter critic of such investments could have imagined some years back, and a confession of the parlous condition of affairs was absolutely necessary. But to suggest that the Preference capital should be written down 20 per cent. seems to us a very strong measure.

For one thing, before such a proposal can be even considered, a detailed statement as to the present revenue, probable revenue in the future, and condition of securities in default, should be rendered to the shareholders. Even then it seems to us that the Deferred

* Investors' Review, monthly issue, No. 53, vol. 10.

stock ought to bear the whole of the loss, as it would have gained the whole of the surplus revenue had any existed. There is, however, the difficulty that the charge of 5 per cent. upon the Preference capital is too heavy for the company to bear, and to meet this we would suggest that a better arrangement might be found in reducing the Deferred capital by 60 per cent., and at the same time cutting down the interest upon the Preferred stock from 5 to 4 per cent. In this way revenue would be relieved, and, should it grow again, the surplus above the 4 per cent. required for the Preferred stock might be divided equally between the Preferred and Deferred stock. We are afraid, though, that there would not be much difficulty about this division.

The Future of Rhodesia.

Mr. Rhodes's estimate of the future of Rhodesia is the reverse of roseate if a *Chronicle* correspondent has correctly reported our "African pro-consul's" statements. Mr. Rhodes is said to have declared that Rhodesia can never be self-supporting. It is no agricultural country; neither food for the settlers, nor fodder for the cattle can be raised in the colony. It must stand or fall by its gold—and its coal. But both are as yet to seek. At least no proof is forthcoming that they exist in quantities sufficient to found a State on. Says Mr Rhodes—"When the railway has brought up our machinery from the coast, and we have discovered good coal in Rhodesia, and if we can get the natives to work in our mines, we ought to be able to pay dividends." Here, however, we have nothing but "oughts" and "ifs," not much to make an impression even on "Imperial" financiers. Of course, gold may be found, coal may be discovered, and natives may be induced to work in the mines; but by the time these not very hopeful hypotheses are fulfilled—if they ever be—would there be earnable a dividend sufficient to give a return for the sacrifices of shareholders? All that can now be said is, that whatever may be the expectations or dreams of Mr. Rhodes, there is as yet no tangible proof of their probable realisation. The only thing the confiding shareholder has received is an abundant stock of hope deferred, and his heart may well be sick to death long before his "dividend" is in sight. Without an agricultural backbone to keep it erect, it would require an enormous output of both gold and coal to make Rhodesia worth its salt. Mr. Rhodes wants no immigrants but capitalists; but without agriculture, and with gold and coal things that have only entered into the "study of imagination," on what could their capital be bestowed with utility and profit?

Agriculture at the Cape.

The "Agricultural and Live Stock Returns" of Cape Colony for 1896-7 are valuable as presenting us with a comparatively accurate picture of the present economic condition of the colony. Agriculture has long—may be said to have always been—its weak point; for the farms are mainly worked by Boers; and whatever else may be said of the Dutch in South Africa, they are not devotees of modern agricultural methods. They dislike change. Such farming as their ancestors have been accustomed to, they consider "good enough for them." It provides them with something more than a mere subsistence; and to the Cape farmer, as a rule, the fuss and fret and forceful push of the modern agriculturist, with his complicated machinery, are personally distasteful and even irritating. For long the Cape formed the main source of our wool supply; but it has allowed itself to be outdone by more careful and energetic competitors. Cape farmers have still large numbers of sheep—the total is given at 14,000,000 in these returns—and last year the colony produced 43,000,000 lb. of wool; but only a comparatively small portion of it, we fear, commanded the top price of the market here. The number of ostriches returned—237,000—strikes us as rather small, though we have not the statistics of previous years to refer to for comparison. In a country with so vast a pastoral area 2,250,000 head of cattle seems a meagre possession; and even that small number must now be infinitely less by reason of the ravages of the rinderpest. Of horses the colony only boasts the ownership of 357,000, while of goats it has 5,000,000, though of what commercial value these may be there is nothing to show.

In the matter of cereals, the agriculturists of the colony can scarcely be said to have yet awakened from the long sleep of years—almost ages. These returns tell us that in the year under review about 81,000 muids of wheat (a muid being equivalent to some three bushels) were sown in an area which is about twice the size of Great Britain! There may be exceptional difficulties of climate to contend against; but whatever these may be, surely if wheat is worth sowing at all, it is worth sowing in much larger quantities than are stated here. The produce of those 81,000 muids sown was 1,400,000 muids, and of this total nearly one-half was lost through rust, drought, and other causes. Barley was rather more successful, for though only 22,000 muids were sown, the total produced was 320,000 muids, of which 250,000 muids were safely harvested. 63,000 muids of mealies were sown, 920,000 muids saved, and 375,000 muids lost. But, though the losses seem very great, colonial experts regard the net product satisfactory enough to encourage a much larger cultivation. There are plenty of markets waiting for the corn to be produced. The real want of the Cape agriculturist seems to be energy, mental alertness, and readiness to grapple with difficulties of soil and climate—as well as a willingness to adopt the new methods and machinery which even the peasants of many parts of Russia have begun to work, or are preparing to do so. The vine industry seems improving. Cape wines have so far recovered the character they lost through careless manufacture and bad vinification; but still the growers have been thus far beaten in the competition for English markets by their shrewder and more energetic Australian rivals. The vines in Cape Colony numbered, in 1896, 86,000,000, 5,000,000 having been planted in that year. Unfortunately, 7,000,000 were destroyed in the same year by the phylloxera—a considerable loss, but, if that wretched pest can be checked, far from an irrecoverable one. There is no reason to fear that, with careful management on the part of the growers, and increased skill in wine manufacture, the export of wines may not become an important source of income for the Cape.

The Mazawattee Tea Company.

A correspondent sends the following defence of this company's finance. We plead guilty to the "retail" error, having been led thereto by the packet tea system worked through agents. But we cannot assume a

penitent attitude in regard to the company's balance-sheet. When most of the capital of any company is represented by goodwill and trade marks, a day must some time come when this capital will be wanted and not found unless profits are meanwhile accumulated to replace it. For money paid on account of goodwill and money clean gone out of a business cannot possibly be capital in a company and available for it :—

To the Editor.

January 22, 1898.

SIR,—I see you notice this company's report; but there is a mistake in it. You do not yet know quite what the Mazawattee Company is. You say tea vending *in retail* is evidently a much more prosperous business than you thought it. The Mazawattee Company never sells an ounce of tea in retail, they are exclusively wholesale, and never directly or indirectly get any *retailers'* profit. You speak about the goodwill being enormous, which I grant, though I do not say it is too much, that remains to be seen, and when you say the £24,000 of reserve is a "mere atom," to some extent I am with you, but not altogether. It represents more than 6 per cent. of the "enormous goodwill" put back into the business in *two* years.

I can see no reason in investing the reserve separately, while it can be usefully employed in the business. It seems to me rather a farce to imagine you are better off by having £24,000 Consols in a cupboard, while you have £382,000 goodwill figuring as an asset on the other side. However, that is matter of opinion. I hope to see the company add a bit more to the reserve fund, and then begin scoring the "goodwill" out.

I should not give 50 per cent. premium for the shares myself until they have shown their capacity to put by £12,000 a year for, say, *five* years at least, but the public must do as they like—they make the price of Mazawattee—there is not, and never has been, any "support" given by the vendors.

If they can go on paying 8 per cent. and putting by £12,000 a year, you will very soon alter your opinion as to the goodwill being too large; but I am not a prophet, and will not say they are going to prosper.

The Imperial Continental Waterworks, Limited.

Appended is an effective rejoinder to the letter which appeared in our issue of the 7th inst. :—

To the Editor.

Genoa, January 18, 1898.

SIR,—I trust you will allow me to reply, as shortly as possible, to a letter, dated 28th ult., from Mr. George F. Deacon, enclosed in one from the Secretary of the Imperial Continental Waterworks, Limited, which appeared in your number of 7th inst.

I need not reply to the Secretary's official communication, because it is based on Mr. Deacon's letter. I cannot hope to persuade him that I am not opposed to this scheme from interested motives; or that the "steel mains" which are "being shipped" are likely to meet the fate of the cast-iron pipes shipped for the Genoa Waterworks Company, Limited; or that his company may not reasonably hope to make £51,000 a year out of Genoa, "without encroaching on the parts supplied" by the existing companies. It stands to reason that if a valuable unsupplied area existed in Genoa, it would be eagerly competed for by the Genoese companies; but I cannot expect him, as Secretary, to acknowledge this. He may, however, be surprised to learn that, as against his estimate of £51,000, the two companies (the Nicolai and the Gorzente), who serve an area inhabited by about 367,000 persons, encash from them, for water supplied for domestic purposes, about £28,000 a year—say, rather more than 1s. 6d. per head of the population.

As to Mr. Deacon's letter, I see in the first place :—

1. That he disclaims responsibility for a very rash statement in the Company's prospectus, which he whittles down, on his own account, to what seems at first sight an innocent expression of opinion. It is, however, calculated to mislead any one who does not know Genoa. The "population lying next to the company's proposed reservoir," which has at present "no adequate public supply," is contained in the villages of Cavassolo and Doria, and in Staglieno, the well-known suburb of Genoa where the cemetery lies. Some few thousand people live in these places (perhaps 10,000 in all), the chief group being Staglieno near the entrance to which are the Gorzente mains, which will be extended into Staglieno as soon as it is worth while. It is absurd to talk of this area as if it could give an important contribution to the company's expected £51,000 a year.

2. Mr. Deacon says that the Gorzente Company cannot increase their supply, because "their concession only permits the withdrawal of 250 litres per second."

For his information, allow me to state that during 1897 the average quantity drawn by the Gorzente Company from its reservoirs was 424·24 litres per second, besides about 30 litres spring water, tapped by the tunnel through which the water flows.

Of this quantity 47·92 litres per second, on an average throughout the year, was run to waste at Isoverde, after driving the company's electric plant, as it was not required in Genoa. As these requirements are increasing the quantity carried to Genoa will be increased this year. It is quite safe to assume that the Gorzente Company know what they are about, and that as they take more than 250 litres they have the right to do so. Mr. Deacon probably does not know that they own the chief part of the 4,200 acres of barren hillside which constitute their gathering ground, and can therefore, independently of their concession, dispose of the water that falls on their land.

3. Mr. Deacon says that the authorities do not allow the Gorzente Company's lower reservoir to be filled, and suggests or implies that although this reservoir may have held 475 million gallons "on an occasion" in 1892, it would not be safe to work it normally at this figure. I beg to assure him that it is worked normally and continuously at anything up to 500 million gallons. It contains about 450 million gallons just now, and is supplying Genoa, while the upper reservoir is standing full (800 million gallons).

4. Mr. Deacon says that I have "omitted to mention the Bisagno area," which is to form part of the proposed gathering ground.

I did not include the Bisagno, because Mr. Deacon, in his report of July 20 last, says that "the position of the proposed reservoir on the Bisagno was open to objection on account of pollution from the village of La Presa." Mr. Deacon very wisely gave up the Bisagno altogether for the present (besides being polluted, it is completely controlled by the intakes for the Municipal aqueduct), and stated that "about 240,000 persons" could be supplied "from the Concasca alone." I pointed out that the Concasca was far too small for such a supply, and Mr. Deacon now tells me that I must take in the Bisagno!

5. As to the letter addressed to the company by fifty-two residents, it would be more to the purpose to tell us how much the residents have subscribed; £100,000 were reserved for subscription in Italy; has any "leading citizen" in Genoa subscribed £50?

6. Finally, I venture to point out to Mr. Deacon that, although "from a physical point of view" he may fairly claim that his areas were originally the best, he must not forget that the world has moved along since these "gathering grounds" were created.

When the Municipal aqueduct was built, hundreds of years ago, the Italian engineers rightly went to the nearest source for good water, and took up the Concasca and the Bisagno.

Since then Genoa has grown immensely, and these sources have become insufficient and objectionable; the Italian engineers had to look about for a further supply, which led them to tap the Scrivia and the Gorzente. Does Mr. Deacon think they would not have preferred nearer gathering grounds? or that they do not know their own hills? or that they are not capable engineers? If these questions must be answered in the negative, I fear it must be assumed that Mr. Deacon's plan will not do.—I am, Sir, your obedient servant,

FREDK. A. G. BROWN.

Tea Company's Tables.

Complaint has been made that in our standing table of tea companies we do not state the item of working capital correctly. Our object in showing this item is to set forth the resources of the company outside its estates, and we arrived at the amount by deducting the value of the estates, factories, &c. from the share and debenture capital. In several cases, especially where large reserves exist that have been employed upon the development of the estates, their value considerably exceeds that of the capital, and so a *debit* balance is brought out. In order to prevent misapprehension on this head, we have carefully included the amount of the reserve and balance forward in the table, so that any one can deduct these items from the *debit* working balance, and thus arrive at a fair estimate of the position. On the other hand, if we deducted the reserve, and then showed

the amount in the table, it would lead to erroneous conclusions, for it would almost invariably be counted twice over.

Sweating on the Great Eastern Railway.

Apropos of the 5 per cent. per annum dividend declared by the directors of this railway, an Eastern Counties correspondent writes to tell us how the thing is done. He gives a concrete example which is calculated to dispel the wonder that railway servants should be discontented. At Wisbech station for three or four months back the clerks in the Great Eastern goods office have been working from 9 a.m. till from 9 to 10 p.m., with an hour for dinner and a few minutes for tea; also they have to work eight hours every Sunday, receiving only six days' wages from their taskmasters for the whole seven days. Last Sunday week, when the clerks had at length risen in protest, they were given one day's extra wage for eleven hours' work. Our correspondent adds:—"A 5 per cent. dividend is of course very satisfactory to the shareholders, but I think many of those people who receive this dividend would not feel quite so comfortable in their minds if they knew the kind of sweating that is going on, and presumably by no means confined to Wisbech." We are not so sure about the consciences of the dividend receivers as our correspondent appears to be, but the truth had better out.

Unrest in Italy.

Things are not by any means in a satisfactory condition in Italy. Bread riots have been frequent; on Tuesday the Government found it judicious to reduce the duties on grain by 2½ lire; but on Wednesday they took the most serious step of all—they decided to increase the effective winter strength of the Army from 140,000 men to 180,000. In Rome and the principal cities throughout the kingdom the police service has been strengthened; so that Ministers evidently regard the probabilities of grave disorder to be very great. The harvest in Italy was this year a good deal below the average, but that in itself would not account for the widespread and still extending distress, nor all the hunger which is impelling the poorer inhabitants of the cities to try to steal the bread which they cannot buy. The truth is Italy has long been grievously overtaxed. Vast sums were sunk in mad African expeditions, while her partnership with Germany and Austria in the Triple Alliance is more costly than Italian finances can stand. If the unrest and rioting of the past week or two continues, it may become a very serious thing for the Italian monarchy. There is no doubt that the Jesuits are in earnest, for their own ends, in encouraging a Republican agitation among the Catholic population. It is probable that the Pope himself is cognisant of their aims, if he does not cordially sympathise with them. In the first instance, this Jesuit agitation is aimed directly at King Humbert. Its main object is revolutionary; and the bread rioters are unconsciously helping the ecclesiastical agitators.

Debenture-Holders' Security.

A hard blow was struck this week against the holders of Debentures in Castell & Brown, Limited, in particular, and Debenture-holders in general, concerning their security. The question was raised whether the bankers of the company who had advanced money on the security of its title-deeds were entitled to priority over the Debenture-holders, notwithstanding that the property to which those deeds related was comprised in the Debentures, and the company was prohibited expressly from charging such property in priority to the charge created by the Debentures. Of course, in the present case, although the Debentures were prior in date, the bank at the date of its charges had no notice, express or implied, of the prior incumbrance. Mr. Justice Romer has held that the bank was entitled to a declaration that their charge had priority to the Debentures of the company. This decision, undoubtedly, will reduce the value of this class of security, for companies will in this way be able to create a charge on their property which will take precedence of Debentures, although the money advanced on those securities was expressly lent on the stipulation that no prior charge should be created.

The scientists seem perfectly satisfied with the results of their observations of the total eclipse of the sun in India; so do the natives on the whole, with a difference. To them it is a sign and presage of the downfall of the British Raj. But they are no doub "pessimist" Hindoos, who resent heavy taxation, restricted trade and artificially-created scarcity of money. Still, even Indian Jingoes might usefully reflect on the significant fact that the Indian native's first notion is to associate the dreaded phenomenon of the solar eclipse with the oppression of the British Raj.

Mr. Commissioner Kerr's advice to a disappointed mining shareholder who appeared before him to answer a summons for the payment of some share calls, was to have nothing to do with any gold company. The defendant shareholder pleaded that he had been misled by misrepresentation in the prospectus, but the Commissioner could not see that there had been misrepresentation; he "had been entrapped in exactly the same way as a good many other silly members of the British public were." The defendant lost the suit, but gained this further advice: "Never believe a director again for the rest of your life." What a tremendous "pessimist" Mr. Commissioner Kerr must be! That, we believe, is the proper way to label a cautious adviser nowadays.

According to the directors' report, the profits of the Queensland National Bank for the past year amounted to only £8,000. The low rate of interest and the losses caused in the colony by severe drought are said to have seriously restricted the directors, and the report, under the circumstances, is said to be regarded as satisfactory. It is a poor satisfaction.

Mr. W. A. Carlyle, provincial mineralogist, estimates that the total output of the British Columbia mines will amount to $10,000,000 for the past year. In 1895 the output was $5,655,302, and in 1896 $7,146,420.

King Humbert has signed a decree reducing the Italian customs tariff on cereals from 7·50 lire to 5 lire until April 30. The decree came into force on Tuesday last.

The *Speaker* has just entered on its ninth year of publication. It has done much for the furtherance of Liberal principles, and has lost none of its vigour and freshness; nay, it is aiming with new energy at a further extension of its usefulness, and is soon to devote special attention to the great constitutional question of the House of Lords, on which a number of well-known writers will contribute a series of articles. We wish the *Speaker* every success.

A clandestine printing establishment in London has been issuing forged certificates of the Two and a Half per Cent. 1866 Tontine as well as Paris bonds. The plot was discovered by Scotland-yard, which at once communicated with the French authorities.

Trade in Japan is said to be suffering seriously from the scarcity of money. Traders have little or nothing to pay for the goods which the importers have for distribution.

The following are the returns of the gold yield for the various districts of Victoria during the year 1897:—Ararat, 32,833 oz.; Ballarat, 178,910 oz.; Buchworth, 123,785 oz.; Castlemain. 62,608 oz.; Gippsland, 112,658 oz.; Maryborough, 59,601 oz.; Sandhurst, 200,323 oz.; unspecified, 42,047 oz. The dividends paid amounted to £532,294.

Herr Johannes Trojan, the editor of the *Kladderadatsch*, has been sent to a fortress for two months for the audacious caricature of the Emperor which appeared in his paper. It is *lèse majesté*. The Imperial reputation cannot stand a joke.

The average production of French wine during the last ten years has been about 730,700,000 gallons. The amount for last year was 727,791,245.

The Vienna Bourse Committee and the Bankers' Union have memorialised the Minister of Commerce against the decree permitting Savings Banks—official institutions—entering into Bourse speculations not entailing any risk.

Fermenting France.

However much our minds may be preoccupied with the affairs of Empire in the far East, we must not quite take our eyes off France. Events are happening there which bear an ominous aspect from many points of view. It may not be that we are on the eve of another French Revolution, but the symptoms are assuredly those which past revolutions have always been heralded by. A great social ferment has broken out, not in Paris only, but all over the country, and even in Algiers, and this ferment bears a singular resemblance to the outbursts which preceded the Revolution of 1789. Essentially the cause is the same. Hunger is at the bottom of it. While a certain section of the French people have been growing richer, and displaying their wealth with more and more ostentation every year, the great mass of them have been growing poorer. Oppressive taxation is stripping them ; discontent, bred of this poverty, with its pinching want, has been festering in the cities of the Republic these many years back, and its existence has been only too well known to those in authority, many of whom have been living in fear, trying to avert the evil day by yielding sometimes to unjust demands, and by coddling and bribery more or less secret.

It is this element of discontent among what are called the masses which gives significance to the Dreyfus affair. Democracies in the bulk are never enlightened ; they suffer, and know not the cause of their suffering. It is so in France ; but true as this may be the popular instinct generally causes social movements to concentrate upon some point not unconnected with the real cause of the suffering. In the present instance all the ferment has arisen over the degraded Captain Dreyfus, and France is apparently divided into two camps because of the unjust condemnation passed upon this Jewish officer, formerly in the French Army. In its essence, as we pointed out last week, this question is a simple one enough. It impugns the honour of the French Army in a sense, and, much more, the just spirit of the officers composing the secret court-martial by which Captain Dreyfus was condemned. This at first trivial-looking question might easily have been settled by a revision of the sentence before a Civil Tribunal ; and it would have been so settled had France possessed an administration of able and enlightened men—of men not cowards before the military organisation which is still, it appears, the one master France has—instead of one apparently made up of martinets and ciphers. It has not been settled, and around it has come to rage a great tempest of angry passions, expressive of all the concentrated hate of the down-trodden. The multitude has taken up the cries "Down with the Jew," "Save the honour of the Army from the Jew," "Save France from the Jew," and amid the din thus raised the voice of those calling for righteousness in high places is lost.

Out of the miserable tragedy of a mock trial, and, as we believe, an unjust condemnation, France has awakened to find herself in the midst of a dangerous crisis, the ugliest which has threatened the Third Republic since its foundation amid the national disasters of 1870-1.

Why should the nation in its masses suddenly rage so furiously against the Jew as to threaten not only the Republic with overthrow, but all Europe with convulsions, and the French people with one more blighting military dictatorship? It is, we believe, because to the mind of the country's multitude, the Jew is the living embodiment of that tyranny of France which has proved to be more blood-draining to the modern democracy than the tyranny of the old *régime* was to the slaves who lived before the first Revolution. No doubt the personal qualities of the Jews as a race, and a long down-trodden race, have served to inflame the prejudices which go to foment popular hate ; but in the main the Jew is held accursed because he seems to be for ever riveting fetters of debt round the limbs of every workman in France; because he seems to control public opinion through his all-grasping power over the Press, to set up ministries and pull them down again in furtherance of his financial combinations; because when any great financial scandal comes to light, such as that of the never-forgotten Panama Canal, the Jew is found to be the bribing agent, the universal corrupter, the man who degrades Frenchmen by employing some of them to buy the souls and consciences of their brethren—deputies, journalists, even preachers and monks. For it is the concrete example, such as that of the Panama Canal, which sinks deepest into the minds of the unlettered common people and peasants throughout the land, and a hate thus born is nourished there against these conspirators, as they are called, which is as likely as not to be quenched only in blood.

The people do not see that, however degraded many of the Jews may be in their moral standards, they would be perfectly powerless to do any harm were it not for the eagerness of their victims. If we behold the people ready always to fall into the snares laid for them, surely it is not the Jew so much as Frenchmen of pure descent who must stand accused of having caused France to be so weighted with debt of every description that she can hardly now stagger along beneath her load. The French people have attempted, and continue to attempt, public works all over the country which do not pay the cost of construction. The merchants of France have insisted upon excessive subsidies to their mercantile marine. French agriculturists have combined with the sugar boilers to lay a monstrous bounty for their own benefit upon the backs of the people in order that beet-root cultivation and sugar manufacturing may flourish. It is monopoly and privilege everywhere, and the man with the gun standing over all. If the Jew steps in and, by his superior abilities in finance, smoothes the way for carrying out the nefarious plots of Frenchmen against Frenchmen, can he be blamed any more than those with whom they originated? And if he does take care to fence himself by buying the Press of Paris until there seems to be hardly a journal published in it entirely free from some controlling interest in finance, is he more to be blamed than the Frenchman who prides himself on the purity of his blood and sells his conscience and his pen to the best payer? All this may be quite just, and is, but it will not alter the fact that the passions of the French people are now at fever heat against the race by whom they believe themselves to have been enslaved and brought to their present misery ; nor does it lessen the danger that out of the present turmoil and excitement a passionate movement of revolt may spring which will sweep away Jew and bureaucrats and Parliamentary Government in one great tempest of destruction. At this moment, we imagine, it is only the

Army, that plague spot of French life, which stands between France and a new season of anarchy. If the Army fails to maintain order all will be lost, and yet the triumph of the Army must mean the destruction of liberty. We confess to have our doubts about the capacity of the French Army to do good of any kind. For one thing, it has no great leader, and that, perhaps, is well for France; but what is not well is that it appears to have no higher *morale* now than it had when Napoleon III. was betrayed into launching his enervated and undisciplined battalions against the solid masses of a reawakened German nation. If the Army, such as it is, and with its insolent pretensions that override the civil liberties of its citizens, fail to maintain order all may fail, and chaos come again in France. We are on the way towards some upheaval, most assuredly. It may be that the present ferment will die out, and M. Méline has still time, perhaps, to vindicate individual rights before all the world, and in so doing to calm the passions now at fever heat. But if he delays much longer popular passions will grow hotter and hotter, breaking out, now here, now there, between to-day and the coming General Election. If not calmed before that election takes place, some four months hence, polling day may be the signal for a new upheaval, the waves of which will disturb every civilised Government on the earth's surface. What hope of good can we have in a nation which is willing to see its liberties trampled under foot by an insolent military caste, if only in their destruction its mad thirst for insane revenge can be gratified by the persecution of the Jew? With all his faults the Jew, at least, is on the side of civil liberty and the majesty of equity, not on the side of brute force. Is France once more to become the prey of this force? We wait her answer with anxiety.

Syndicates and the Liverpool Loan.

Two loans were announced last week which have met with a curiously different fate at the hands of the public. The Corporation of Liverpool offered a million and a half of Two and a Half per Cent. stock, at a minimum of 98, through the agency of the Bank of England. When the tenders came to be opened, it was found that only about one-third of the amount had been applied for. In rivalry with this domestic issue, the London and Westminster Bank offered a million and a quarter of Cape of Good Hope Three per Cent. stock at a minimum of 100, and this was apparently rushed after with such eagerness that the applications amounted to 4,654,300, at prices ranging from 100 up to 105. Why should this remarkable difference be exhibited in the apparent treatment of these two securities by the investing public? Of the two, prudent people should certainly give the preference to the domestic stock. Liverpool is one of the great ports of the world, the greatest export centre of the United Kingdom; its Corporation is very wealthy, possesses enormous and highly-valuable properties, and is able, one would suppose, to offer as good security for the money borrowed by it as the County Council of London, whose Two and a Half per Cent. stock stands at 102. At the best, the Cape of Good Hope cannot be regarded as being in a position to offer more than a second-class security. Its continued power to pay on the present very heavy debt contracted by it, depends not upon its own resources, which are scanty and poorly developed, but upon the gold of the Transvaal and Rhodesia and the diamonds of Kimberley, won from territory stolen from the Orange Free State. No appreciable progress has been made by the Cape in agricultural or pastoral industries. It has developed no great trade in any domestic product. Were the supplies of diamonds and gold to become less abundant there would be a reduction in the through traffic of the Cape railways, and should either precious mineral cease to be forthcoming it is highly improbable that the purely domestic traffic of the Cape railways would be sufficient to meet their working expenses. As it is, and assuming a continued increase rather than a diminution of the output of gold and precious stones, the railways of the Cape are threatened, as we have more than once pointed out of late in this Review, with formidable competition both from Natal and from points in Portuguese territory. Should it ever happen, as has been rumoured, that the Delagoa Bay Railway passes into British hands, the continuance of that railway into Rhodesia cannot fail to divert the great bulk of such traffic as that territory may afford to the much shorter route thereby opened up to the sea.

Considerations of this kind ought to have been well enough known to the market, and yet it apparently dashed after this Cape security with frantic haste, and left the gilt-edged Liverpool one out in the cold. Again we ask, why should this be so? The answer is simple enough. As things are now managed in the City of London these monster subscriptions so frequently brought before the eyes of newspaper readers are not made by the investing public at all, they are the work of syndicates. A few men get up these syndicates, arrange a price at which the new emission is to be applied for, and rush about the City and obtain subscriptions to the new loan from underwriters. Sometimes there are two or three of these syndicates working in opposition to each other, and when that is the case the subscription price may have to be pitched high in order to secure an allotment. Generally, however, they agree by laying their heads together. Underwriters are given half the broker's commission, plus the chances of unloading the stock at a profit upon the investors. In the competition thus manufactured intrinsic quality has no weight. The end looked at is the immediate market premium, and it is the business of the brokers and bankers interested in these operations to keep the quotation for the as yet unissued scrip of the new stock slightly above the price at which they propose to tender. Frequently, in the days which elapse between the issue of a prospectus and the hour for opening the tenders, the premium on the unissued stock is run up considerably above the price the syndicate means to subscribe at. But it is always let down again near that price about tendering time. In this way the enthusiasm of the underwriting phalanx is stimulated, and at the same time the desire on the part of rival syndicates to outbid each other is damped in sufficient time to cause some of them to pause.

In the light of this explanation it is only necessary to say that one syndicate wrote for the Cape Loan twice over, that syndicates swarmed over it in fact, and that the Liverpool Loan was not underwritten at all, or only to a very small extent. The fact is, Liverpool is not just now popular on the Stock Exchange. On a previous occasion when the Corporation made an issue

of new stock it was managed badly. London did not get the chances it expected out of that operation, and disappointed brokers, with their supporters, made all sorts of charges of unfairness against the method of allotment, and particularly against the Corporation for having handled the issue itself in Liverpool instead of leaving it to be done in London City. So this new emission was, in a sense, boycotted by the market, but as far as it was subscribed, the buyers were probably, for the most part, individuals and institutions whose intention it is to keep what they bought. In this respect, therefore, Liverpool is in a far better position than Cape Colony, for the Cape Loan is held by groups of people whose only purpose is to sell it by degrees at a profit to themselves as investors give them the opportunity. The loan, in a word, is not placed: it is only held in suspense; and the same is true of all these Colonial issues whose astonishing subscription lists week by week dazzle the public. The New South Wales Loan issued the other day is still mostly in the hands of its underwriters. So are the Western and South Australian Loans, and if we could get a peep under the surface we should most likely find that there are considerable amounts of all the Colonial loans floated in London for years back still in the hands of the middlemen composing the syndicates which climbed over each other in their haste to "get a bit." Indeed, we have had repeated proofs that this is the case, and none is more significant than the condition of the Colonial Market in the Stock Exchange. When any tremor passes through it, or when money threatens to get a little dearer than usual, Colonial stocks of all descriptions have an awkward knack of becoming unsaleable. Dealers in them are paralysed by the load of unplaced stock lying behind them or on their backs, and simply dare not buy. This is the position, and it discloses a most unwholesome inflation. Unfortunately, we see no way of remedying it, except the drastic way of such a collapse among the underwriters as might eventually kill the practice for many a day. In all such operations, it is hardly necessary to say, the public are never considered. No chance is given to any private investor to purchase these securities at a reasonable price: the whole market is held up against him. It is overburdened by sellers, and yet these sellers can keep prices up because they command an unlimited amount of banking credit, and can hold many millions of stock in pawn to wait for the unwary investor in search of a security in which to place his money. If we had a 5 per cent. bank rate, with money in the open market about as dear, and with Stock Exchange loans running at 6 per cent. to 7 per cent. for a matter of three or four months, then the whole artificial fabric of the syndicates would crumble and come to pieces, enabling the public, in all probability, to pick up many a stock from 10 per cent. to 15 per cent. cheaper than it can be bought to-day. The moral of this is, do not let these fancy subscriptions deceive you as to the quality of any security. Look at everything carefully, and if investigation does not warrant confidence, do not buy.

Parliament meets on February 8. Ministerial and Opposition leaders have this week issued the usual letters to their supporters.

The £10 fully-paid shares of the Great Horseless Carriage Company changed hands on Saturday at 6s.

The Monetary Circulation in France.

(FROM A FRENCH CORRESPONDENT.)

France is more fully supplied with monetary "tokens," metallic currency as well as notes, than any country in Europe, or probably in the world. Without guaranteeing the accuracy of the figures, we give the following estimate by an American statistician of the stocks of money per head of population in 1896 :—

	Gold.	Silver.	Uncovered Notes.	Total.
	$	$	$	$
United States	9·35	8·78	5·90	24·03
France	20·10	12·82	2·55	35·47
England...	14·86	3·10	2·84	20·80
Germany	12·91	3·96	2·41	19·28
Italy	3·25	1·26	5·45	9·96

Those in France who see in the abundance of the precious metals a sign of wealth ought to be satisfied, yet this is not the case with every Frenchman. As Baron de Courcel said, at a conference held at the Foreign Office on July 15 last, "Our population, notably our agricultural population, finds that it has not at its disposal sufficient resources in currency—in metallic currency." All are not, however, of that opinion, any more than all are agreed to regard the maintenance of a low fixed rate of discount as an ideal, at the same time that gold is quoted at a premium for exportation—a premium which last year reached 4 per cent. Discount fluctuations are frequent in England and in Germany. Rates there are apparently higher than that of the Bank of France; yet we may say that commercial and industrial affairs are more active with these rivals of France than with herself. People do not concern themselves either in England or Germany with the decadence of the mercantile marine, for in these countries there is progress; the total emissions of new capital in London exceed £160,000,000 per annum, those of Berlin £80,000,000, while those of Paris hardly reach £18,000,000. France suffers from a sort of economic anæmia for which the Protectionist and fiscal régime to which she submits is in great part responsible.

Monetary statistics are always ticklish to handle; for you have to deal not only with tangible facts, such as the amount of cash in banks or the number of notes issued, but to estimate the amount of money in circulation and in the pockets of the public. M. de Foville estimated in 1892 the amount of gold money in France at £180,000,000, that of silver at £88,000,000 in five-franc pieces. M. Ottomar Haupt's estimate for 1896 is as follows, reckoning 25 francs to the £ :—

Gold coin and bars at the Bank	£76,000,000
Gold coin in circulation	104,000,000
French five-franc pieces at the Bank ...	33,000,000
Foreign „ „ „ „ „ ...	16,200,000
French „ „ „ in circulation	75,200,000
Foreign „ „ „ „	4,800,000
French fractional currency	10,400,000
Bronze money	2,000,000
Uncovered bank-notes	28,000,000
Total	£350,200,000

Since January 24, 1893, the maximum fiduciary issue of the Bank of France has been fixed at four milliards (£160,000,000). The new law increases it to five milliards (£200,000,000). The average circulation was 3,445 millions of francs in 1893, 3,476 in 1894, 3,526 millions in 1895, 3,607 millions in 1896, and 3,710 millions in the autumn of 1897. The average reserve of the Bank was :—

	Gold.	Silver.	Total.
1893	1,684 millions	1,271 millions	2,956 millions
1894	1,821 „	1,262 „	3,083 „
1895	2,047 „	1,243 „	3,291 „
1896	1,978 „	1,244 „	3,222 „
1897	1,959 „	1,206 „	3,166 „

In the month of September, 1897, there were at the Bank 465 millions in foreign five-franc silver pieces. At various times there has been, on a given day, an inventory taken in France of the composition of the effective cash in the Government Treasuries and in the tills of some of the principal finance houses. These have served as a guide to indicate the monetary condition of the country at certain intervals. Such inventories have been made in 1878, 1885, 1891, and, lastly, by order of M. Cothery, on September 15, 1897. On this last occasion every public office handling money was embraced in the inquest — Treasury-payers-general, private receivers, collectors, receivers of indirect taxes, customs licences and registration fees, and all post and telegraph offices. Altogether 26,000 Government *Caisses* were included in the investigation, besides the Bank of France, the Bank of Algeria, the Crédit Foncier of France, the Crédit Lyonnais, the Société Générale, the Comptoir d'Escompte, the Crédit Industriel et Commercial, with their numerous branches. The summation embraced (1) bank-notes, (2) money in gold, (3) silver five-franc pieces, (4) smaller silver coins, and (5) bronze or copper coins. This monetary census gave the following results :—

	Francs.	Proportion.
Bank-notes	173,358,020 ...	82·21 per cent.
Gold coins	23,199,640 ...	11·10 „
Five-franc pieces ...	9,311,370 ...	4·45 „
Fractional moneys ...	2,968,875 ...	1·42 „
Bronze or copper coins	243,650 ...	0·82 „
	209,081,555 ...	100 „

It is interesting to place these figures beside those previously obtained :—

	1885.	Proportion per cent.	1891.	Proportion per cent.
Bank-notes	35,737,720 ...	67·63 ...	97,100,165 ...	80·51
Gold moneys	11,860,430 ...	22·44 ...	16,365,080 ...	17·57
Five-franc pieces	5,247,885 ...	9·93 ...	9,311,370 ...	5·92
	52,846,035		120,593,275	

The results of the 1878 inquiry not being comparable have been left out. What is most clearly established by these figures, as M. Fournier observes, is that the bank-note is more and more taking the place of the gold and silver money, which is consequently tending more and more to accumulate in the Bank of France. "We might even go so far," he adds, "as to infer that the stock of metallic money in France is on the decline rather than on the increase."

At Paris in 1897 the circulation was found to be as follows :—Notes, 89·86 per cent. ; gold, 7·61 per cent. ; silver five-franc pieces, 1·66 per cent.; subsidiary silver coins, 0·84 per cent.; copper, 0·03 per cent. There is 9½ per cent. more of notes in Paris than in the Provinces ; but this city stands 5 per cent. below the average in gold, 4 per cent. below in five-franc pieces, and 0·80 per cent. in small moneys. The Parisian does not care much for the "crown pieces"—the five-franc coins. If we may judge by the results of the examination of 1898 the circulation of foreign coins in France is on the decline. On the one hand the proportion of foreign gold coins to the entire monetary circulation of francs has been as follows at the successive dates given. The increase shown in the later years is chiefly attributable to an influx of Italian gold pieces, the proportion of which has risen from 3·95 per cent. to 4·54 per cent.

	Per Cent.		Per Cent.
1878	12·88	1891	11·36
1885	10·36	1897	12·57

On the other hand, foreign silver money (five-francs) shows the following percentages, at successive dates, to the entire silver circulation of the country :—

	National Pieces.	Foreign Pieces.
1878	67·99	32·01
1885	71·34	28·76
1891	68·48	31·52
1897	87·63	12·37

The decrease in this latter case is quite remarkable, and, in order to emphasise it, we place in juxtaposition the totals for 1878 and 1897 .—

	1878.	1897.
Italian five-franc pieces ...	959,560 ...	798,020
Belgian „ „ „ ...	933,029 ...	226,515
Greek „ „ „ ...	19,640 ...	41,730
Swiss „ „ „ ...	30,460 ...	15,180
	1,982,085	1,151,645

The explanation of this great diminution is to be found in the action of the Bank of France in withdrawing, as far as possible, all but French pieces from circulation. Here are the total of foreign five-franc pieces in the coffers of the Bank at the two dates given :

	1878.	1891.
Belgian, five-franc pieces	266,292,000	190,324,000
Italian „ „	184,806,000	132,805,000
Swiss „ „	4,548,000	2,933,000
Greek „ „	9,970,000	4,372,000
	465,616,000	330,394,000

As regards the coins of smaller denomination, the divisional moneys, the inquiry showed that French coins represented 84·54 per cent. ; Belgian, 7·88 per cent. ; Greek, 2·10 per cent. ; and Swiss, 4·48 per cent. Italy, we know, has withdrawn her coins of less denomination than five francs, which, in 1897, represented 28·78 of the total of such coins.

At the end of the report upon this monetary census a very curious table is given, showing the different kinds of money handled in the offices of the State and in banks and their branches. We reproduce it here in its entirety, by reason of its importance from the point of view of the movements of bank-notes and of specie :—

	Bank-notes. Fr.	Specie. Fr.	Totals. Fr.
Public Offices in France and Algeria	60,675,215	23,956,118	84,631,333
Bank of France :			
Paris	28,916,770	2,318,495	31,235,765
Branches (above reserves)	45,804,875	5,478,916	51,244,791
Comptoir d'Escompte :			
Paris	4,883,600	442,180	4,925,780
Branches	4,916,000	233,817	5,149,817
Crédit Lyonnais :			
Paris	3,494,600	4,494,610	3,980,210
Branches	6,042,880	1,121,496	7,164,376
Société Générale :			
Paris	3,904,750	378,058	4,282,808
Branches	11,824,340	1,203,026	13,117,366
Crédit Foncier de France	384,150	21,073	405,223
Crédit Industriel et Commercial	1,499,750	16,612	1,516,362
Banque de l'Algérie	1,411,000	9,130	1,421,330
Totals.....	173,358,020	35,733,536	209,081,556

M. Fournier considers that this table confirms his opinion that the stock of coined money in France must be diminishing rather than increasing, in consequence of the enormous circulation of Bank of France notes. The public, unconsciously in a sense, reject silver and even gold, finding paper more convenient. It would, therefore, appear that the accumulations of gold in the pockets of the public, or rather in the "old stockings" of the small hoarder, are on the decline. The people carry their savings more to the savings banks, or allow the ordinary banks to draw it away from them, keeping much less cash lying idle by them than was formerly their habit.

That Council of Foreign Bondholders Again.

Monarchs may die or get deposed, empires may blaze up and disappear, the fashion of my lady's gown change each week; but the Council of Foreign Bondholders is ever the same, its purpose unalterable as the laws of the Medes. And this purpose is expressed in the Bill of the venerable and excellent Sir John Lubbock, now to be laid before Parliament. We have already discussed this Bill, and need now only, as the tub orator said, "observe in abbrevious language" that it, if carried as drafted, would give to twenty-one men the property and right of 540 others, now possessed of a common title. There are other peculiarities, such as the complete elimination of the right of bondholders to protect their own interests by having seats on the Council; but in order to bring the monstrous character of this Bill into relief it is necessary to recall the history of this singularly perverted institution. The story is rather a long one, but it is also highly suggestive, and will repay careful perusal.

The Corporation of Foreign Bondholders was founded by holders of Foreign bonds for their own protection and for that of other holders who were to pay for services rendered. As all holders of Foreign bonds were not members of the Corporation, it was founded on a system providing for the earning and distribution of profits among those who subscribed the funds with which it began its operations. The Council only was declared to be composed of those who should and would render gratuitous services. As a Royal Charter—which had been set out in the prospectus as to be obtained—could not be had, and as this was becoming known, and led to the withdrawal of many who had subscribed, recourse was hurriedly had to the Board of Trade for a licence under the Limited Liability Act without the word "Limited." The plea under which the licence was obtained was that the Association was not for purposes of profit. In this respect the promoters sacrificed the subscribers in that the application was not made known to them; they had no option of withdrawal, but were only informed of the fact when the licence had been obtained. It was important to move before the project should be dangerously crippled by the further withdrawal of funds. Those who withdrew realised the absurdity of undertaking risk except with the prospect of profit. The haste used in registration under limited liability may have been to prevent further withdrawals, but it established conditions which did not bind the Council, depriving permanent members of any rights, privileges or powers except the right of voting at meetings of the Corporation.

On Mr. Gerstenberg's death, the gratuitous services of the Council came to an end. Several money votes were made by the Council to certain of its members, illegally, as they afterwards ascertained. Eventually resolutions were carried by which payments to the Council were authorised and have ever since been made. Whether those payments vitiate the licence of the Board of Trade and whether, in consequence of their having been made, the penalty of unlimited liability has or has not been incurred is still undetermined.

When the resolutions authorising payments to the Council were passed, a question since that time in discussion and never settled, cropped up. Permanent members asked why, if the gratuitous principle had broken down *quâ* the Council, they should be debarred from a participation in the profits which were used to pay the members of the Council and to build up a fund for people who had not contributed support for the Council supposed to be engaged in the protection of interests out of which no fund had been raised? The inquiry practically was why 580 men who had founded, with their own moneys, the association charged with the protection of the whole body holding foreign loans, should abandon their right to the assets of that association when the council in charge of the funds had themselves lapsed from their resolve to render "gratuitous services," the more so as the great body of bondholders abstained from making any contributions to the Support Fund.

Sir John Lubbock's own arguments on this point are very instructive. He in 1876—March 6—was emphatic on the subject of "gratuitous services" to be rendered by the Council. Subsequently to 1880, he has been equally emphatic in the opposite sense, when it had become a question of applying the doctrine adopted by the Council to the permanent members, by whom some interest, some privileges, some powers, were asked for. Tact and a high degree of art has since been manifested in the way of presenting the matter through the Press to the public.

So much for past history. We shall deal next week with the fruits brought forth by the anomalous and irresponsible body thus created. Meanwhile, independent certificate holders had better rally in support both of their own interests and of those of foreign bondholders at large.

The Resources of Canada.

In his search for fresh openings for his talents and other people's money, the company promoter has during the last year or two looked with an unusually favourable eye upon Canada. There was no particular reason why he should not have bestowed his attentions upon this country years ago in preference to some others of much less promise which he has exploited for all—and more than—they are worth; and, as it is, he comes into the field rather late in the day. 'Cute Yankees saw the potentialities of the Dominion while he was engaged elsewhere, and, with their customary energy, sailed right in and took full advantage of all the opportunities that offered. It is a fact, which the Canadians are the first to admit, that the progress made in the past decade or two in the development of the material resources of their country is attributable in large measure to the steady influx of American capital and the introduction of American appliances, agricultural and mineral. This has been more particularly the case, perhaps, in the matter of mining in British Columbia, though it applies also to the same industry in its varied forms in other provinces; and it is a consideration which should not be forgotten in connection with the present activity in the flotation of Canadian—and especially British Columbian—ventures. Now that he has come to recognise the Dominion as a likely field of operations, our friend the promoter is moving around with a feverish cheerfulness, which seems to indicate that he intends to make up for lost time. Herein lies further food for reflection, for hurry is inconsistent with caution, and the man who is

not cautious in the taking up of the mining properties offered to him is prone to make mistakes—for which, oftener than not, the investing public has to pay. We do not mean to imply that all the mines of any account in Canada are under the control of Americans, but at the same time it is undoubted that a large proportion of them are in American hands, and that much of what is now being offered to British investors ranks as sweepings, which can be readily placed in the United Kingdom because of our lax Company Laws, and because the English promoter (taken in the lump) is a notorious and unscrupulous scoundrel, and the English investor not a person of superlative wisdom.

This by way of precaution. At the same time, it is indubitable that the resources of Canada are immense, and the indications go to show that progress in the years immediately to come will be more considerable and more rapid than in any previous period. Population, production, and wealth are growing; the spread of railway and water communication is opening out for cultivation vast tracts of land which have hitherto remained idle, or have at most been worked for local requirements; and the investment of foreign capital is causing the mineral output to increase by leaps and bounds. A few figures will suffice to show how real has been the advance made in the past few years. The value of the import and export trade in the year 1896 was 239,025,000 dols., against 218,608,000 dols. in 1890 and 174,401,200 dols. in 1880. While the imports show a tendency to diminish, the exports are going up every year, and in 1896 accounted for 121,013,800 dols. of the whole, compared with 96,749,100 dols. in 1890, and 87,911,500 dols. in 1880. The value of the minerals produced in the calendar year 1896 was 22,610,000 dols., against 16,763,300 dols. in 1890, and 10,221,255 dols. in 1886; and of the animal and agricultural products exported in the fiscal year 1895-6, 48,791,300 dols., against 35,443,600 dols. in 1889-90 (a bad year), and 38,866,300 dols. in 1879-80. Fishery exports in 1880 were valued at 6,579,600 dols.; in 1890, at 8,461,900 dols.; and in 1896 at 11,077,700 dols. The railways in operation in 1880 measured 6,891 miles; by 1890 the length had increased to 13,256 miles; and by 1896 to 16,270 miles. The gross earnings, which in 1880 had reached 23,561,450 dols., stood in 1890 at 46,844,000 dols., and in 1896 at 50,545,600 dols. Clearing House transactions in 1896 represent an increase of 24 per cent. on the figures of 1890, and as showing the improvement in the condition of the people generally, it may be added that the aggregate of deposits with the various savings banks in 1896 reached 61,259,100 dols., against 51,921,500 dols. in 1890, and 17,734,000 dols. in 1880.

Having regard to the area and possibilities of the country, these several groups of figures cannot be regarded as remarkable, but on the basis of population —5,083,400, being at the rate of 1·4 inhabitant per square mile—they afford plenty of ground for satisfaction and plenty of hope for the early future; and, any way, whatever the causes which have conspired to retard the settlement and development of the country, they furnish indisputable evidence of solid progress, such as it is. It remains for the Dominion, with the aid of outsiders, to improve upon this record, and to remove the obstacles which still exist to curtail commercial intercourse.

Apart from the general indications of increased prosperity and stability which are apparent in the figures we have quoted above, the Dominion is chiefly interesting to the English investor for its minerals, and (if we leave out Klondike until we receive definite evidence of what that much-advertised district is going to do) there is no part of the country which has attracted so much notice and so much money as British Columbia. The bulk of the gold, silver, and lead annually mined comes from that province; the big rise in the output of copper is due to the development of the Kootenay mines; and, as soon as the Crow's Nest Pass Railroad is completed, coal in large quantities will be added to the list. At the same time, the provision of good fuel at 2 dols. per ton at the pit's mouth in the province cannot fail to give a great fillip to the gold-mining industry, which at present is compelled to draw most of its supplies from South Wales, and to pay for them as much as 15 dols. per ton. West Kootenay is about as liberally financed as its excellent prospects warrant; but East Kootenay remains to be exploited to the full. Moreover, the geological surveyors have shown that the province is scattered all over with valuable deposits, which have not yet been touched; and, even if the vocation of these gentlemen be not accepted as sufficient guarantee of their capacity, there is no doubting the proof afforded by recent discoveries at considerable distances from Kootenay. Among the metals now mined in Canada, gold leads with an output valued at 2,780,100 dols. in 1896, silver following with 2,149,500 dols., nickel with 1,189,000 dols., copper with 1,021,960 dols., lead with 721,160 dols. and iron with 191,560 dols. Among non-metals, coal accounts for 7,226,462 dols. out of 1896's total of 22,610,000 dols., and petroleum for 1,155,647 dols.

Under all these several heads, there has been unbroken progress since 1886, and the prospects for the immediate future are promising even for iron, the production of which has been retarded hitherto by the impossibility of competing with other ores in foreign markets, and by the limited number of furnaces at Home. Under the influence of a bounty of two dollars per ton, the furnaces have increased in number and in capacity, and in 1896 they turned out 53,900 tons, against 25,697 tons in 1890; while the proportion of Home to foreign iron consumed in Canada was 59·2 per cent., against 22·7 per cent. The country boasts very extensive deposits of iron ores—magnetic, hematite, chromic, &c.—in many localities from ocean to ocean, and those of Nova Scotia rank in quality with the best Swedish. The bulk of the present coal output is furnished by Nova Scotia, which yielded 2,503,700 tons in 1896, against 1,002,260 tons for British Columbia, and 237,300 tons for the other provinces. The Nova Scotian beds are exceptionally thick, running in some places to 70 ft.; and there are other valuable deposits awaiting development in the Rocky Mountains as well as in the Crow's Nest Pass and in other parts. It would be interesting to pursue this question of Canada's mineral wealth as part of the wide subject of Canada's resources in general; but space is lacking, and we must be content with having touched it briefly. We have probably said enough to show that, with proper management and steady aid from the British investor, the country is capable of much better things than it has heretofore

given us. But it must be understood that belief in a country is quite consistent with disbelief in some of the ventures designed ostensibly for the benefit of that country. This reiterated precaution is all the more necessary because it is extremely probable that the company-monger will shortly increase his activity with choice Canadian properties for his stock-in-trade.

American Life Insurance Offices.

II.

Englishmen are led to believe by the literature placed in their hands and by the *vivâ voce* statements of agents, that the profits of American life offices not only surpass those of English and Scottish offices, but stand so exceptionally above all things of the kind as to make their policies investments of the highest order. This is the language all these concerns hold, but by none of them is the art of puffing carried to heights quite so lofty as by the Mutual Life of New York, whose ten years' career on this side of the water has been as successful as that of the most popular of American "Revival" preachers. Indeed, the literature emitted by this concern has an unctuous perfervency about it which forcibly reminds its students of those meteoric "evangelists" from across the Atlantic who from time to time favour us with their presence, and enjoy "a high old time" at our expense. And it has been so highly successful that the company now probably enjoys a gross income of nearly £350,000 a year from its British policies.

We should be glad to see a separate statement of these policies drawn up on the same lines as the returns furnished to the State of New York, but unhappily our Board of Trade is as powerless to order the production of such a statement as to stop the tide at London Bridge. After the catastrophe we have no doubt at all that the powers conferred upon it by our sapient law-makers will be stupendous, but it has none now. Failing this help, we must be satisfied with what figures we can procure, and those published in our "Plain Advice," applicable to the entire business of these offices, are damning enough.

A few tiny facts, though, are available even in London, and we gave some of them a week ago—the actual results on two policies which had become entitled to a bonus distribution—and now invite the reader to put these results alongside a boast such as the following, which we extract from the *British Bulletin* for December, 1890, a paper issued by this concern :—

> The following are examples of bonuses actually declared and payable during 1889, in Five-Year Distribution Policies, issued in 1884.
>
> The actual results in every one of these policies, and on *every policy* whose distribution period has been reached in the Mutual Life of New York, are better than the company's estimates. No better reason or argument can be shown for preferring distribution policies of this company to those of all others. . . . . The *bonuses range* from £1 19s. 1d. to £3 12s. 7d. *per cent.* per annum according to age, on Whole-Life Policies of only *five years' standing.*

So enamoured was the office of this fine display, that in its prospectus for that same year its managers burst forth in this style :—

> ESTIMATES OF THE MUTUAL OF NEW YORK.
>
> On the ground that some of the American companies have failed to realise their estimates, objection has been made to the practice of quoting profits. This objection can have no possible application to the estimates of the Mutual of New York, which are not only based on entirely different data from those of the companies referred to, but have in every case been fully vindicated by results. The evidence of this is seen in the fact, that the distribution policies maturing in 1889 have, in every case, exceeded the estimates upon which they were issued five years ago. This is not only proof of the soundness of the data upon which the company's calculations are based, but indisputably points to the conclusion that, with the fuller operation of the survivorship principle, under the long term distribution, the more liberal results anticipated on these policies will be fully realised.

We have already given the results in the case of two policies taken out on the strength of this emphatic language. They were nearly 40 per cent. smaller than the "estimates" placed before the public in the prospectus just quoted, and our contention all along has been that this must be so. Only by grabbing an undue proportion of "lapses," and by shedding off in other objectionable ways liabilities contracted on extravagant terms, can these concerns maintain a monstrous rate of current expenditure and pay bonuses of any sort to the few policies which survive.

The excuse, by-the-bye, which these alien enterprises, with no roots but merely suckers, in British soil, always proffer for the ghastly extravagance of their expenses is "the volume of their new business." It is an excuse which has no relevancy except on the supposition, which is the truth, that the bulk of the policies issued by them never live to become old. The scale on which "new business" is introduced every year has been so nearly uniform for a long time back that, had the bulk secured in any one year survived even the short period necessary to entitle policy-holders to some sort of surrender value, the expenses ratio ought to have been nothing like 20 per cent. of the gross premium income, let alone 25 per cent. to 35 per cent. But, as a matter of fact, exceptional results, unexampled profits, and all the other unusual benefits alleged to flow towards the blessed holders of policies in these offices, can only be enjoyed by a small survival of the numbers who enter by the gilded doors. Were the remnant to actually get these excessive profits, there would be nothing very surprising in the fact in existing circumstances. If, notwithstanding all "lapses" and "surrenders," the benefits reaped by the few whose policies exist long enough to become entitled to them are not only smaller than those provided by many third-class British offices, and also tending rapidly to diminish, what other conclusion can we arrive at except that these American offices are moving steadily towards the day of deficits? They have great power, large accumulations of funds—which accumulations we hope to analyse some day—and if they decided, even at this late day, to reform and bring themselves into line with conservative life insurance business everywhere, they might recover public confidence. To go on as they are doing is to render a far-reaching catastrophe absolutely certain.

As we write the annual report of the New York Life Insurance Company for the year 1897 falls into our hands. It is a mere puff of the usual type. Never was such a business done, never such prosperity seen, no company could do as much, the oldest and best international company, and so on. Yes; but the expenses of the business last year were about 26·4 per cent. of the premium income as shown by the summary of business done which accompanies the report. When we get the official accounts from Albany we shall probably find the percentage higher—it was over 27 per cent.

1896—and we insist that no insurance company in the world can do fairly by its clients and live at this wasteful rate. And that the New York Life is not doing as a British company would is demonstrated by the fact that its percentage of lapses to new policies in 1896 was 43 per cent., as compared with 36·6 per cent. for the Equitable of the United States, and 45·7 per cent. for the Mutual. The hardship and loss to individuals these figures imply cannot be measured.

Critical Index to New Investments.

BRITISH GUIANA GOVERNMENT THREE PER CENT. INSCRIBED STOCK.

Tenders will to-day be opened at the offices of the Crown Agents for the Colonies for an issue of £150,000 stock, the minimum price being fixed at 96½ per cent. Loan is secured on the general revenue and assets of the Government of the Colony, and the principal is repayable at par February 1, 1945, by a sinking fund of 1 per cent. per annum, to be formed in this country under the management of the Crown Agents, but the Government has the option of redemption at par from February 1, 1923, on six months' notice being given. Interest is due February and August. In April, 1896, a similar amount of Three per Cent. stock was placed at an average price of £101 5s. 4d.

LEICESTER CORPORATION TWO AND A HALF PER CENT. STOCK.

This Corporation invites tenders for £450,000 of this stock, and the minimum price asked is 95 per cent. The stock is to be redeemed within 60 years, and the whole is to be paid up on June 21 next. Three months' interestion full allotments will be paid on July 1 next. Tenders must be delivered to Town Clerk, Town Hall, Leicester, before 12 noon on February 3 ; or at Pares's and Leicester Banks, Leicester ; or Smith Payne & Smith, or London and Westminster Banks, in London, before 4 p.m. on February 2. On December 31 the entire Municipal and Sanitary debt, exclusive of the capital of the gas and water undertakings and for electric lighting, was £1,115,562, while the Corporation estate is estimated to be worth at least that amount. The minimum of 95 per cent. is moderate as things go, and the whole issue should be placed without difficulty, recent fiascos notwithstanding.

WEST RIDING BONDS.

The County Council of the West Riding of Yorkshire is desirous of borrowing £102,500 at 2½ per cent. for General County purposes, in bonds of £100 each, consisting of 325 bonds, thirteen of which will be repaid on March 31 in each year during the period of twenty-five years ; and 700 bonds, twenty-five of which will be repaid on March 31 in each year during a period of twenty-eight years. Interest due March and September. The rateable value of the Administrative County is £7,157,022, while the outstanding debt is £318,000. It requires two people to arrange a loan, and at the price offered we should think that the lender may be some time in coming forward.

IRISH PROPRIETARY OIL FIELDS OF GASPE, CANADA, LIMITED.

The capital of this enterprise is £100,000 in £1 shares, of which 66,667 shares are offered for subscription, the remainder with £32,667 in cash being taken by the vendors, the London and Dublin Finance Corporation, Limited, who are the promoters and are selling at a profit. Company is formed to buy property in the oil belt at Gaspé, in the Province of Quebec, and especially with a view to supplying oils to the Irish market. Why the Irish market? The prospectus contains many general statements about millions of gallons of oil here and there, and millions sterling of profits, but we do not find anything tangible about the property to be acquired by this company. It is true that several extracts from reports of the officers of the Government Geological Survey of Canada accompany the prospectus, but these are upon the whole district of Gaspé, and it seems a little curious that the dates of these reports are not mentioned. Before recommending these shares we should like to know how many hundreds of miles the property is away from the nearest railway station, and if the nearest refinery is nearly a thousand miles away ; also if in the wells which have been drilled sufficient oil has been found to secure the success of the company, and why the vendors are trying to sell the property. In the absence of this knowledge the shares ought not to be touched.

PERTH (WESTERN AUSTRALIA) LAND CORPORATION, LIMITED.

Company is going to buy land in Perth which may be considered suitable for building purposes. We should imagine it is really formed to buy from the Perth Mining and Trading Syndicate of Western Australia, Limited, 533 acres of land in South Perth, and the vendors are to receive £50,000, two-thirds being in cash. The capital is £100,000, in £1 shares, of which 80,000 are offered for subscription Some very gassy statements are contained in the prospectus regarding the value of land out there which makes one think one is buying land in Park-lane, or Belgravia. The Syndicate guarantee 5 per cent. interest for the twelve months upon the amount paid up on the shares, which the purchase price should allow them to do very comfortably. But——

ARNOLD J. VAN DEN BERGH, LIMITED.

Company is formed to buy a steam cooperage and some wood factories in Rotterdam and Cleves. Share capital, £60,000 in £1 shares, which are taken by the vendor in payment of the whole of the purchase money. There is now offered an issue of £60,000 Five per Cent. Debenture stock at par, interest due January and July ; stock repayable in 1925, but can be redeemed after 1907 by annual drawings at 105 per cent, or by purchase in the market. The money is wanted to pay off mortgages and for completing further extension, and the security consists of freehold property and plant valued by Weatherall & Green, of Chancery-lane, at £81,444, stock-in-trade and book debts amounting to £31,626, and the new money after paying mortgage. "It is not considered prudent, for business purposes, to disclose the actual profits, but accountants certify profits for 1895 and 1896 to have been nearly double the amount necessary for the payment of interest on the present issue," so we may presume they were something under £6,000. But this is before charging depreciation, salaries of managing directors, and interest on capital borrowed or otherwise. The issue seems to us a poor sort of affair.

LONDON ELECTRICAL CAB COMPANY, LIMITED.

The public are offered the balance of 86,388 shares of the total share capital of £150,000. They are £1 shares and are issued at 22s. 6d. each. Company was formed in November, 1896, and it is quite true, as stated, that their cabs are now a familiar object in the streets of London. But as the shares already issued can be bought at par, or under, we fail to see where the pleasure of paying a premium comes in.

JOHN HAWLEY, LIMITED.

Company is formed to buy the watch and cycle manufacture business carried on under the style of John Hawley & Son, and the Hawley Cycle Manufacturing Company at Coventry and at Hatton-garden, London. A local valuer puts the value of the property to be acquired at £3,000, and the stock, plant, and machinery was of the estimated value of £10,423 at the date of the last stock-taking, whenever that was. But in addition to all this, the company will acquire the patents and the trade-mark, and will also take over book-debts amounting to £3,750. A Coventry accountant explains, or professes to do so, what he found on examining the books. Purchase price, £25,000. Capital, £40,000. Business appears to have been worked up for the express purpose of selling it.

HOULDER BROTHERS & CO., LIMITED.

This is the well-known steamship firm, of London, Liverpool Glasgow, and South America, who are willing to sell their business for £225,000, of which £100,000 will be in Ordinary shares, £33,330 in Preference, and the remainder in cash. Subscriptions are invited for £66,670 Five and a Half per Cent. Cumulative Preference shares of £5 each, and £125,000 Four and a Half per Cent. First Mortgage Debenture stock at par. The latter is redeemable, at the option of the company, from January 1, 1905, at 105 per cent., on six months' notice, and interest is payable January and July. Business was established in 1853, and its expansion and certain family settlements render the present a favourable opportunity for converting the concern into a limited liability company. Including £100,000 for goodwill, the assets at the end of last year amounted to £225,980, of which

£15,345 are book debts guaranteed; £15,023 general investments in connection with the business, and £25,000 shares in the Pacific Islands Company, guaranteed by vendors. Profits for four years are given, those for 1893 being £22,055, for 1894, £26,735; for 1895, £20,347; and for 1896, £31,018; while the vendors are able to say that the profits for last year, which will not be ready before April, will exceed those for 1896. While not at all enamoured with investments in shipping companies, owing to the risks run, there seems to be in this case a large margin—£13,914—after meeting interest on the Debenture stock. We hope it will turn out so.

Company Reports and Balance-Sheets.

South-Eastern Railway Company.—The gross revenue for the six months ended December 31 last was £1,436,786, being £76,084 more than in the second half of 1896, and the expenditure was £745,546, or £63,336 more, or nearly 86 per cent. of the increase in receipts. Such a heavy proportion is attributed to the larger number of trains run, higher wages in the traffic departments, and the afternoon service between London and Boulogne. It follows that the net revenue was greater by £12,748 only, at £691,240. Adding the balance brought forward, £4,527, the amount left for dividend, after paying all fixed charges, was £336,730, out of which a dividend at the rate of 6⅝ per cent. per annum has been declared. This gives the Preferred Ordinary stock its full 6 per cent., and leaves 3¾ per cent. for the Deferred Ordinary for the year 1897. The dividends are payable this day week. All classes of passenger traffic show increases, which are, of course, largest in the third class. By still greater liberality in the higher fares no doubt the expansion in first and second class coaching traffic will be more rapid. In the half-year just closed the capital expenditure was £480,360, as the board is at last widening the line between Charing Cross and London Bridge. In the current half-year it is put down at £250,000. No less than £7,206 was paid in law and Parliamentary charges last half-year, and the accounts are full of the usual trivial items which we never have been able to recognise as prudently chargeable to capital at all. But while dividends go up shareholders will always be happy.

East London Railway Company.—In the past half-year this company earned £26,066 gross, being £1,115 more than in the corresponding half of 1896. The company's net income is the rent of £14,500 paid to it by the lessee companies, and out of this the interest on the Whitechapel extension (2½ per cent.) debt and on the First and Second-class "A" Debenture stocks, together with 5s. per cent. on the Class "B" Debenture stock, has been paid. At last the Great Eastern Company has decided to build the hoist at Spitalfields for the goods and mineral traffic there. Sir Charles Scotter has been re-elected standing arbitrator for the current year.

Prescott, Dimsdale, Cave, Tugwell & Co., Limited.—Although a limited company Messrs. Prescott still issue no report or profit and loss account; and they are quite right from their point of view, because the shareholders are still presumably the old partners in the various private firms out of whose amalgamation the company arose. At the same time, we cannot see what harm the issue of a profit and loss account can possibly do to a bank, whose position towards the public is altogether different from that of an ordinary manufacturing or industrial business, conducted, it may be, under the Limited Liability Act by its private owners. However, we get a balance-sheet, and it is, in some ways, a decidedly strong one. The total to which it amounts is £5,281,000, and of this nearly £600,000 is cash in hand and at the Bank of England, while nearly a million more is invested in securities, mostly of the highest class. Including money at call and notice and bills discounted the cash and other liquid assets amount to over £2,000,000, which is a very good proportion indeed.

Daniell & Sons' Breweries, Limited.—All branches of revenue showed an improvement in the year ended November 30 last, and expenses were only a trifle higher, so that the net revenue of £25,032 was £4,361 above that of the preceding twelve months. After meeting Debenture and Preference interest, the balance permitted of a dividend of 3 per cent. on the Ordinary shares, the placing of £1,000 to reserve for depreciation, the writing off £1,239 from expenses of "B" Debenture issue, and the adding of £1,912 to the balance forward. Apparently there is improvement all round, but it should be remembered that the reserve is not an ordinary reserve, but one against depreciation, and this company will have to add to the amount yearly set aside very much if it is going to place itself in line with average brewery companies. There ought to be room to do something more, as Debenture interest should be less this year, and the Debenture issue expense item ought to be wiped out by next November.

Royal Aquarium, &c., Limited.—After a long struggle this company has worked itself into the comfortable position of being able to declare a bonus of 1 per cent., in addition to a dividend of 5 per cent. for the year 1897. Such prosperity would not have been dreamed of a few years back, and from what we have seen of the reports it is in a fair measure due to the prudent husbanding of resources. In this way a balance forward or reserve of £18,577 has been accumulated, of which £13,449 has been invested in securities. Many alterations and improvements have been written off in past years out of revenue, and the credit of the company has so improved that the interest on the mortgage of £80,000 was reduced last year from 4½ per cent. to 3¾ per cent. It therefore stands with a fixed charge of £5,250 for preference and debenture interest, upon gross profits which amount to about £20,000. There is thus a fair margin for those contingencies that sometimes arise in a pleasure-catering business.

Mortgage Company of the River Plate.—The profit for last year amounted to £33,706, and compares very favourably with previous years. Accordingly the Board is able to declare dividends amounting to 10 per cent. on the shares and place £15,000 to reserve. The reserve will then amount to £100,000, and is practically held in Consols and cash. A very good sign is the realisation of £30,873 from properties held, that is foreclosed upon, and as no properties had to be taken over in the year, the amount of such holding has been reduced to £43,300 as against £114,738 two years ago. The Company appears to have increased its loans very much.

Buenos Ayres Northern Railway Company.—It is a wise proceeding for this company to merge itself into the capital of the company that guarantees its revenue. At present the stocks of the Buenos Ayres Northern Railway are difficult to deal in and unwieldy in price, but the proposed conversion of the Ordinary and Preference stocks into Three and a Half per Cent. Debenture stock of the Central Argentine Railway Company will remove these disadvantages. In order to carry the project through, the latter railway will have to issue about £1,000,000 of the Three and a Half per Cent. Debenture stock, so that the amount will be large enough to give the stock a fair market. No doubt, for the Central Argentine, the lease of this company was not arranged on the best terms, being settled just at the "boomy" time of 1888, and as a result it has to give £357 of new Debenture stock for each £100 of Preference, and £280 of new Debenture stock for each £100 of Ordinary. The leasing of the line rendered the entrance of the Central Argentine Railway into Buenos Ayres secure, and the charge of £35,000 that it implied is not probably a severe burden now, considering that it saved the lessee the cost of a new line built through that populous city. So the Central Argentine may not have lost much or anything by the arrangement, great as the advantage has been to the shareholders of the Buenos Ayres Northern. The £275,000 of Four per Cent. and Five per Cent. Debenture stock will be undisturbed, but both are redeemable on January 1, 1900, the former at par and the latter at 110, when the Central Argentine Railway Company will be able to effect a little saving on its rent-charge.

Metropolitan Railway Company.—In the half-year ended December 31 last, this railway earned £412,825, at a cost of £180,103, so that the net income was £232,723. The receipts were thus £20,658 larger, and expenses rose £12,446. The extra money was consequently earned at a cost of 60 per cent., whereas the proportion of expenses to gross income in the entire earnings was about 43½ per cent. Still the net income was £191,000 in round figures, and admitted the payment of a dividend at the rate of 3¾ per cent. per annum on the ordinary stock, leaving £17,133 to be carried forward, as against £13,214 a year ago. There is nothing to say about the traffic of this line and not much about its prospects beyond what everybody knows. From the fact that the Board has deposited a Bill in Parliament to obtain powers to work the line by electricity, it is inferred that this important reform will be made at an early date; and everyone knows that great things are expected when the new railway into London, the Great Central, is open for traffic, as it is expected to be by the end of this year. Besides its ordinary railway stock, this company has a Lands stock, the revenue from which increases but slowly. There was, however, £36,510 available for dividends on this stock at the end of the half-year, and a dividend at the rate of 2¾ per cent. has been declared upon it. The Company's capital outlay was about £630,000 last half-year, and is estimated at rather over a quarter of a million in the current half-year, the increase arising chiefly from the necessity of providing for the Central Company's traffic.

Gas Light and Coke Company.—The Board of this company is still struggling against that inevitable reduction in dividend. Revenue from sale of gas increased in the past half-year by about £30,000, but this was swallowed up in increased expenses, and residuals brought in £7,290 less. Worst of all, the company had no balance in hand to fall back upon, and so, after meeting prior charges, the net balance of £302,483 was insufficient by £74,519 to meet the statutory dividend at the rate of 12¾ per cent. per annum. This sum was taken from reserve, and thus the fund will be reduced to £48,483, in order that the statutory dividend might be distributed. It is a sorry performance, for the Board first dissipated a balance forward amounting to the huge sum of £256,000, and has now reduced its reserve from £132,357 to £48,483 in its idolatry of its fetish—the statutory dividend; and, meanwhile, its neighbour in South London goes on steadily paying dividends below its minimum and yet flourishes. The current year may be a bit better for the Gas Light and Coke Company, as the price of coal may easily be lower, while residuals appear at last to have taken a turn for the better. But we are doubtful whether that £74,519 will be made up.

River Plate and General Investment Trust Company.—The turn in the value of many South American securities has not brought increased revenue to this company, as its income of £20,641 for last year was £1,244 below that of 1896. It was, however, sufficient to permit of the 4½ per cent. interest being paid upon the Preferred stock, the distribution of 3 per cent. on the Deferred stock, and the addition of £165 to the balance forward. A glance through the investments discloses the fact that the Trust holds large blocks of securities that have improved in value considerably of late, and the time must be approaching when it may be able to shake itself free of some of its old "lock-ups." In spite of steady writing off of losses, the reserve stands at £24,022, while the only prior charge is a £20,000 loan from bankers, so that fair improvement may be expected. But if realisations are effected

upon favourable terms, the question is, what will be done with the proceeds? For some of the new investments do not seem very hopeful.

Governments Stock and Other Securities Investment Company.—With £1,274,863 invested in securities and advances on stocks, the total income of this company last year amounted to £41,668, or nearly 3½ per cent. As three-fourths of the share and debenture capital bears interest at 4 or 4½ per cent., principally the latter, the Deferred stock came off badly, and only 1 per cent. could be squeezed out for its dividend for the year. A profit of £4,525, derived from profit upon securities realised, was more than counterbalanced by a loss of £5,972, so that the reserve declined to £42,961. The securities held by the company are a poor lot, and it has about £27,000 in American Water and Irrigation bonds, which are a source of some trouble, being very much akin to the securities of Messrs. Coffin & Stanton, of ill-favoured memory. The worst sign, perhaps, as to the capacity of the board is the continued tendency to go heavily into small concerns. Thus in the last few years there has appeared amongst its investments £7,000 of Grand Hotel Monte Carlo debentures, £19,100 of Grierson, Oldham, & Co. debentures, £9,500 of J. B. Cramer & Co. Debentures, and £3,900 of New Trinidad Lake Asphalt Company debentures. These do not seem to our mind hopeful investments, and it looks as if this Trust will go from bad to worse.

Harrod's Stores, Limited.—The happy proprietors of this business seem to have no cause to growl at the increase in the capital to £421,400 during the past year by the issue of 100,000 £1 Ordinary shares, part of 140,000 authorised. These shares were sold at £2 10s. premium; so that the Company got, as it were, a quarter of a million for nothing. No wonder, then, other things being favourable, that the net profit of the year was £89,313. At least, it should have been that, but wasn't, really, because £17,935 was lost on the "Jubilee sites" speculation. Also, interest had to be paid on money spent on land and buildings under construction; and so, with one thing and another, including £3,380 taken to equalise dividends, the reserve fund, first augmented by the quarter of a million received in share premiums, had to be depleted by £30,000 odd in order to leave the above-mentioned profit intact. This is modern finance, and all very good while it lasts; so good, that it enables the Board to bring the dividend on the Ordinary shares up to 20 per cent. for 1897, leaving still £28,400, which goes to the Founders' shares, par value £1,400. These founders, therefore, receive a dividend of over £2,000 per cent., which is not so bad in these times. And no less than £15,300 has been written off property valued in the books at about £650,000.

Friends' Provident Institution.—For the year closed "on the 20th of the eleventh month," 1897, this mutual office of the Society of Friends did a modestly progressive insurance business, which resulted in a new premium income of £8,006, but the annuity business was a trifle smaller. The mortality involving claims, although higher than in the previous year, was still well within "expectation" as measured by the Institution's mortality-table. By the quinquennial valuation just completed, and the report of which has yet to be issued, £290,000 was found to be available for division among policy-holders. Loss and depreciation on securities held have been provided for at a cost of £20,366, and £5,000 has been added to the investments reserve fund, making it £10,891. The expenses of conducting the business last year were less than 9½ per cent. of the premium income, the average rate earned on investments was £4 0s. 5d. per cent., and the accumulated funds now stand at £2,646,391.

United Lankat Plantations Company, Limited.—No less than £60,580 in net profit was made by this prosperous Company in the year ended October 31 last, out of which its directors have been able to pay two dividends of 5 per cent. each and a bonus of 5 per cent., making 15 per cent. in all, on the Ordinary shares, and to carry £25,000 to reserve, still leaving £2,845 to be carried forward, as against £125 brought in. The general reserve now stands at £60,000, and the fund for depreciation on leases at £7,918. At the date of the balance-sheet the Company had £85,000 on deposit. Truly a most satisfactory exhibit.

Martin's Bank, Limited.—The fourteenth report of this bank discloses a net profit of £23,918 for the half-year to December 31 last, inclusive, of £4,858 brought forward. Of this, £15,000 is appropriated to a dividend at the rate of 6 per cent. per annum. £2,500 is added to the reserve, and £6,418 left to carry forward. The bank owes £2,521,000 on current and other accounts, and has £1,320,000 of this in hand either in cash, money on the short loan market, or approved securities. It holds bills to the amount of £556,000, and had loans outstanding aggregating £999,000.

Rhymney Railway.—The gross income for the December half-year was £124,311, being £1,336 more than in the corresponding period. Of this £54,437 was net, and after meeting preferential charges a dividend at the rate of 10 per cent. per annum is given to the Ordinary stock. This leaves £2,237 to be carried forward, against £1,642 brought in. Expenses were 50·11 per cent. of gross receipts, compared with 51·29 per cent. a year ago. Only £9,000 was spent on capital account in the half-year. The directors state that both the Cardiff Railway Company and the Barry Railway Company are promoting extensions inimical to the Rhymney property, and appear to consider the action of the Cardiff Company in particular something very like a breach of faith. Both Bills are to be opposed.

Rylands & Sons, Limited, have had a comparatively poor half-year, like many other Manchester firms. The profits for the second of 1897 came to only £82,875; against £117,866 in the corresponding half, and £110,888 in 1895. The usual dividend at the rate or 12½ per cent. is to be paid, but to do this £10,874 is taken from the reserve, so that the directors apparently consider the falling-off in profits only temporary. This will reduce the rererve to £489,125, while the insurance fund remains at £106,245. Sundry liabilities stand in the balance-sheet at £803,400, while the properties figure for £1,021,456, and stock, investments, and cash for £3,295,434; but these weighty items tell nothing about the business. In place of Mr. John Edmonson, retired, Mr. John E. Sunderland, who has for thirty years purchased the raw cotton required at the company's factories, has been elected a director. He might suggest a few more details being given in the balance-sheet.

London & India Docks Joint Committee.—The two undertakings which form this combination have not done so well in the second half of last year as was anticipated. As regards tonnage they make a good show, as the amount which entered their docks during the past half-year was larger by 147,182 tons than in the corresponding six months, whereas the increase in the entire tonnage entering the docks of London was only 98,194 tons, so that they have secured what some one else had lost. But the increase in the total revenue of the Joint Committee was only £671, while there was a net saving in expenses of £1,720, wages being down £12,000, and expenses in the engineer's department up £7,000. The dividends of both companies we gave last week, and the only further point to notice is a satisfactory increase in the stock of goods warehoused. The East and West India Company's share of the profits only just sufficed—the margin being £301—to meet the interest on the Deferred Debenture stock, but the company will be in a much easier position when the court sanctions the scheme of arrangement, in anticipation of which the Four per Cent. Debenture stock has been rising almost daily.

Liverpool Union Bank, Limited.—A gross profit of £106,492 resulted from the business of 1897, after rebating bills on hand at 5 per cent. Expenses took £27,874, leaving £78,618 as net gain. To this the balance of £14,552 brought forward has to be added, making the sum available for distribution £93,170. Ten per cent. dividend (half in July, half now), and a bonus of 2½ per cent., absorbs £75,000, and £2,316 goes to pay income-tax and a balance of £15,854 left to go to the new year. The balance-sheet shows a total of £4,549,390, of which £2,590,000 is due to depositors, &c. The bank holds £1,024,000 in bills, and is strong otherwise. Its contingent loan liability in acceptances is rather heavy.

Messrs. Barcay & Co's balance-sheet, dated December 31, shows that the amount due on deposit, current, and other accounts is no less than £28,290,000, showing the substantial increase, compared with a year ago, of £2,750,000, but of this probably £2,000,000 is due to the absorption of the business of Messrs. Wood & Co., of Newcastle-on-Tyne last August. The addition to advances and bills discounted is £1,3000,000. Of course there is no balance-sheet.

Messrs. Coutts & Co.'s balance sheet, dated January 18, 1898, shows an aggregate of £8,396,707 of which £7,369,707 represent amount of current and deposit accounts. Nearly £5,000,000 of this is represented by cash, money lent in the Market, and British Government and other high-class investments. Bills discounted and loans are put in one item.

The Produce Markets.

GRAIN.

There has been very little fluctuation in wheat, but the tone throughout has been firm, and the tendency is upward. The demand has been good, and the supply not over-abundant. At Mark Lane, however, the attendance has not been very large, and the market for English wheat has been rather indifferent, though prices have been maintained at the following quotations:—English white, 34s. 6d. to 39s. 6d.; red, 34s. to 37s. Foreign descriptions, on the other hand, remain very firm, and rather stiffer rates are demanded, but not obtained. Californian nominal. Manitoba, 41s. asked, landed. Walla Walla, 38s. 6d. to 39s. Russian nominal, 3d. to 6d. more being asked; and of red winter, none offering. Flour, although steady in tone, meets a dull trade. Town household, 31s.; whites, 34s.; American first patents, 32s. 6d. ex store; and bakers, 27s. 6d. to 28s.; with Hungarian at 39s. to 40s. Maize on spot is fairly firm, although prices are not quotably dearer. Flat, 17s., landed; Odessa, 18s. Oats continue in short supply, and the tone remains firm, while occasionally higher rates are asked, and the cargo market for wheat maintains a steady tone, with a quiet demand. Californians, for shipment, are not offered. The Muskoka, 15,913 qr. Californian, arrived at Queenstown, is offered at 38s. 3d.; and for December, b.l., 37s. 3d. is asked. For Walla Walla, November, buyers, 36s. 3d.; January, sellers, 35s. 3d. No. 1 hard Manitoba, February, 39s. 3d.; and No. 2 red winter, afloat, 37s. 6d. La Plata sorts are more freely offered. Steamers, January-February, 35s.; and February-March, 34s. 6d. Sailers, 34s. 6d. to 34s. Parcels quiet. White Karachi, March-April, sold at 34s. 6d. for Hull.

Maize is rather dearer. At Liverpool wheat futures opened ⅛ dearer, and after moderate fluctuations, became steady at ⅛d. to ¼d. advance. Maize steady, ¼d dearer.

Wheat options were irregular, with March 1d. higher. Maize is partially ¼d. better, with sales for June and November.

Barley, oats, and beans, steady with fair business, and prices unchanged.

Spot trade on the whole good, and parcels firmly held.

Official Closing Values (100lb. deliveries—January 20).

	March.	May.	July.	Sept.
Red American Wheat	7·7½	7·4½	7·1⅜	6·7½

New York wheat has been firm throughout, and towards the end of the week prices advanced, and the advance was maintained on

Wednesday. A selling movement by local operators caused a reaction before noon, after which the market slowly improved in the absence of any selling pressure. Towards the close the recovery was more rapid, "bears" covering freely, followed by general speculative buying, induced by war rumours cabled from Europe and considerable export demand for forward shipment. The market closed strong, with current month ¼c. lower, but other positions ⅜c. to 1c. higher.

COTTON.

Spot market has been quiet during the week, with more doing on Wednesday, and a firmer tone. American have met a fair inquiry, resulting in a moderate business, and quotations were raised $\frac{1}{32}$d. (middling $3\frac{7}{32}$d.). Brazilian continued quiet, unchanged. Egyptian were in better demand, but prices continue to favour buyers. Surats remain quite neglected. Futures opened ½ to 1 point dearer in sympathy with better American cables, and further improved slightly on "bears" covering, but with realisations reacted fractionally. The afternoon brought no further developments, and after a moderate business the market closed steady, with quotations generally 1 point higher. Prices fluctuated considerably on Wednesday, but closed steady, 2 to 4 points up. Spot quiet, $\frac{1}{10}$d. dearer.

WOOL.

There has been great animation in wools throughout the week, and keen competition at the sales. Regarding these Messrs. Jacomb, Son Company state in their circular: "The attendance of buyers continues to be a very full one, and competition from all quarters is more keen and even in its distribution than has lately been the case. America is not allowed to monopolise all the good wools, and this m re widespread demand is no doubt accentuated by the justifiable anticipations that the Clip of the year will not by any means be large enough to go round, especially as regards merino growths. At the present time shipments of wool from all Australasian Colonies show a reduction of some 200,000 bales, as compared with the corresponding period last year. Doubtless some of this reduction is due to a later season, but the most recent estimates put the deficiency of the output at upwards of 160,000 bales. This deficiency, following that of 1896, is serious enough, but the effects of it are still further increased by the greater shrinkage in the yield of much of the wools of this year. Improved advices of the woollen industries in general, coupled with the above, have contributed to a firm strengthening in the tone of the market, and the average general appreciation in values for all sorts of merino wools is now 10 per cent. above December last, and cross-breds have also advanced fully 5 per cent. Cape and Natal greasies of the better sorts sold quite 10 per cent. dearer, some choice lots realising 8½d., while scoureds again reached 1s. 5½d. The latter with Natal grease were taken for Germany, while Cape grease went chiefly to the home trade.

METALS AND COAL.

Metal markets fairly firm. The close of the engineers' strike having been discounted, it has made little difference to business yet. Copper has been easy, with rather a downward tendency. On Tuesday prices went down 3s. 9d., but recovered somewhat on Wednesday, though closing 1s. 3d. less. For mid-February, £49 was registered; three months passing at £49 5s.; and later, £49 3s. 9d. Business was almost wholly confined to the morning session, the only later transactions noted being in cash on Monday at £48 16s. 3d.; and near the end £48 17s. 6d. for one week.

SETTLEMENT PRICES.

Hematite ..	47 0	48 10½	48 9	48 4½	48 4½	48 4½

There is little to report of the coal market, in which there has been a total absence of animation, and unless a spell of colder weather comes the outlook for dealers will be somewhat discouraging. Best West Yorks are quoted 10s. to 10s. 3d.; Barnsley selected, 8s. 6d.; soft nuts, 7s.; Sheffield silkstone, 7s. 6d. to 8s.; best Derby blackshale, 9s. to 9s. 3d.; North Derby Tupton, 7s. to 7s. 3d.; Erewash brights and nuts, 7s. 6d. and 8s. 3d. respectively.

SUGAR.

Cane sorts have been quiet all the week, and beet futures dull until Wednesday, when there was more steadiness. January, 9s. 1d. sellers, 9s. buyers; February sold at 9s. 0¾d.; March, 9s. 2d.; April, 9s. 3d. sellers, 9s. 2d. buyers; May sold at 9s. 3¾d., 9s. 3½d., 9s. 3¼d.; June at 9s. 4¼d., 9s. 4½d.; July, 9s. 5¼d. sellers, 9s. 5d. buyers: August sold at 9s. 6¼d.; September, 9s. 5¾d. sellers, 9s. 5d. buyers; October-December, 9s. 4¾d. sellers, 9s. 4½d. buyers; London Produce Clearing-house prices for 88 per cent.: January, 9s. 0½d.; February, 9s. 1d.; March, 9s. 1¾d.; April, 9s. 2¾d.; May, 9s. 3¼d.; June, 9s. 4¼d.; July, 9s. 5¼d.; August, 9s. 6¼d.; September, 9s. 5½d.; October-December, 9s. 4¾d. Spot quotations. Refined.—British cubes fairly active at full rates; pieces quiet but steady; and crystals in better demand at late quotations. Foreign.—Granulated opened dull, but shortly after a steady tone prevailed, especially for ready. The close, however, is barely steady and business only moderate. Immediate O F sold at 10s. 9d. and 10s. 8¾d. combined; ready E C H, 10s. 9d. and 10s. 8¾d. combined; Groningen, 10s. 9d; January, first marks, 10s. 9d. and 10s. 8¾d. combined, sellers; February, eight best first marks, sold at 10s. 9d.; March-April, first marks, 10s. 9d., sellers!; May-August, 11s. paid and sellers, f.o.b. Hamburg. Cubes.—Hansa, prompt, 12s. 1½d., sellars,; F M S, 12s.; Meyer, 12s. 7½d., f.o.b. Hamburg; W S R, prompt, 12s 10½d.; S and T, 12s 9d.; A S R, and cut loaf, 12s. 9d., f.o.b. Amsterdam. Crushed.—Dutch A S R, prompt, sold at 11s. 10½d., f.o.b. Amsterdam; Austrian, T T D and V, prompt, 11s. 9d., f.o.b. Hamburg. The demand in New York was slow.

In his current circular, Mr. Czernikow says:—"For the time being legitimate trading seems to be at a standstill, but the fact remains that the consumption of the world is proceeding on a satisfactory scale, and the general position of the article is quite unchanged, and in fact perfectly sound. According to statistics so far to hand, the supplies before us during the next six or seven months will hardly prove excessive, and in view of increased consumption during the summer months, the present wave of depression may be expected to speedily give way to a more encouraging tone."

TEA AND COFFEE.

Coffee has been for the most part dull, except in the finer sorts. Wednesdays auctions comprised 2,603 bags, and all good qualities sold readily at very full rates, while common descriptions still continue dull of sale. East India bold common dull green to fine blue, 91s. 6d. to 108s.; low to good middling, 71s. to 95s.; small, 57s. to 63s.; peaberry, 98s. 6d. to 110s. Costa Rica fine to very fine bold deep blue, 107s. 6d. to 112s. 6d.; good to fine bold smooth greenish coloury, 94s. 6d. to 105s. 6d.; middling to fine middling, 77s. 6d. to 96s. 6d.; fine ordinary to low middling dark green mixed, 62s. to 69s.; small common mixed to very fine blue, 46s. to 92s. 6d.; peaberry common mixed to fine, 64s. 6d. to 108s. 6d. Futures irregular, and prices barely steady. Sales, 3,000 bags Santos. Santos: January, 29s. 9d.; March, 29s. 9d.; May, 30s. 3d.; July, 30s. 6d.; September, 30s. 9d.; December, 31s. 3d. Tea has generally been steady, with moderate sales. At auction on Wednesday 8,500 packages Indian sold at fairly steady prices for good quality medium to fine grades; while common leaf again tended in favour of buyers. Terminals dull and unaltered.

HEMP AND JUTE.

Hemp rather quiet in early part of week, but prices steady. There was more strength on Tuesday, which was maintained on Wednesday, when higher prices were demanded. This rather checked business. 500 bales fair current Manila, May-July sailer, sold at £19 and buyers. February-April, £18 15s., value. Jute steady, but quiet. London on Wednesday:—500 bales equal to R. F. C., near steamer, sold at £13 2s. 6d. 1,000 red H B, February-March steamer, £10. 1,000 Parliament excluding Dutt M, March-April, £9 17s. 6d., and sellers. To Hamburg, 1,000 red C S and Sikdar, near steamer, £10 2s. 6d. 2,000 J M N in heart Nos. 1-3, January-March, Cape, £11 15s.

THE PROPERTY MARKET.

More activity is being shown at the Mart, and on Monday the day's sales showed a total of £29,135. For the most part, however, it consisted of small properties. The Gorridge estate in Streatham-lane, Mitcham, comprising rather over 69 acres, was, however, an exception, and for it Messrs. Weatherell & Green obtained £21,000, or over £300 an acre. There seems to be a steady rise in the value of building land near London. Messrs. Elliott, Son, & Boyton and W. A. Blakemore met with considerable success with a number of metropolitan and suburban properties, for which there was a ready demand. Mr. Alfred Richards announces for next Wednesday sales of several freehold properties in northern suburbs.

There was still more activity at the Mart on Tuesday, when the total of the day's sales amounted to £61,205. The greater part of this was contributed by Mr. Alfred Richards, who disposed of a number of stocks and shares at good prices. £1,000 Lowestoft Water and Gas £10 Additional Ordinary shares went at £15,158; £1,000 Taunton Gas Ordinary stock brought £1,748; Ascot Gas £3,900 Four per Cent. Perpetual Debenture stock fetched £4,105; £5,000 Guildford Gas Ordinary stock, £6,257; and £5,300 Ordinary "C" Capital stock Tottenham and Edmonton Gas realised £11,867. Mr. Prichard's total was £47,000. A great variety of house property was also disposed of at good prices, Messrs. J. & R. Kemp & Co. and A. Phillips being the principal dealers.

At Masons' Hall Tavern on Tuesday the lease for about thirty-six and a half years at a rental of £120 per annum of the Devonshire Arms in Denman-street, Piccadilly, together with the goodwill, was disposed of by Mr. S. H. Baker for £11,000. Messrs. Belton & Sons sold a freehold rental of £100 per annum on the Middleton Arms in Mansfield-street, Kingsland-road, for £3,000; an improved rental of £65 a year on the King's Head, Westmoreland-street, Marylebone, with a reversion for eight years, for £1,910; and a freehold public-house known as The Ship, in Bacon-street, Bethnal Green-road, for £2,000. The lease and goodwill of the Globe Tavern, at the corner of Charles-street and Hatton-garden, Holborn, was withdrawn by Mr. Matthew Miles at £30,000.

Messrs. Thos. Carter & Company, of Blackpool, have issued a detailed list of the property sales effected during the past year, and estimate that the gross auction sales throughout the Fylde district produced a total of £583,000, out of which sum they claim that £414,000 passed through their hands.

St. George's Hall, Langham-place, with an unexpired lease of five years, at ground rents amounting to £796 per annum, and having an estimated rental value of £2,431, was withdrawn at Messrs. Elliott, Son, & Boyton's sale, on Tuesday, at £2,900.

Messrs. Jones, Lang, & Company have sold by private contract the newly-erected building known as Bush-lane House, Bush-lane, Cannon-street, E.C. The property produces a yearly rental of about £5,000.

The best sale at the Mart on Wednesday was effected by Messrs. Physick & Lowe, who obtained £3,900 for a leasehold residence, No. 35, Upper Hamilton-terrace, St. John's Wood.

THE CHINESE EMPEROR'S ADVISERS.

Now that China is so much to the fore, it may not be amiss to take a glance at the sort of men on whom the Emperor has to rely for advice in his present sore straits. A correspondent of the *North China Herald* seems to have had exceptional opportunities of tudying these gentlemen, and he has not been highly impressed by a single one of them. Prince Kung takes the lead in the Cabinet, or Grand Council, consisting of five members. At one time he had a great reputation, directed China's foreign affairs successfully for twenty years, but was driven into retirement by the anti-foreign party, and was only recalled by the Empress-Dowager when she saw the ship of state was on the rocks. He is now old, in bad health, and deeply disgusted with the treatment he has received. Such advice as he gives the Emperor can hardly be regarded as enlightened. Prince Li is another member of the Grand Council, and Chancellor of the Board of Astronomy. What time he may devote to the study of the stars is not known, but he apparently gives no time to the consideration of mundane affairs outside Pekin. He is a nonentity. Weng-Tung-ho, the Emperor's private tutor, was violently anti-foreign until surprised by the victory of the Japanese over China. He seems then to have given some study to the subject, and when Prince Kung is absent, the Emperor consults him, though to no great purpose. Tung-ho is ignorant of statecraft, and has no advice worth listening to. Kang-Li is also of the antediluvian order. On the outbreak of the war with Japan he presented arms and ammunition to the Pekin field force and a large sum of money to the Emperor, and straightway was promoted to high office. It was he who ordered the soldiers to practise drill with bows and arrows, while insisting that those who did use foreign guns should use clay bullets, and not waste money on lead. Chien Ying-pu has, we are informed, no prejudice against foreigners, but he knows nothing about them or their affairs, and has no experience of anything outside Pekin.

Such are the "advisers" who may speak direct to the Emperor A select lot, apparently useful in leading a young ruler in the wrong path if so disposed. Two of these hold office also at the Ministry of War, which consists of four members. Prince Ching is the third of this squad, has never been out of Pekin, knows nothing of the world, and though "fair-minded" is very narrow. Jung Lu is probably the moving spirit of the War Office. He has spent most of his life in military posts at Pekin, and prefers remaining there to taking part in campaigns. But he is bold though unenlightened, and urges his Majesty to repel the foreigner, and throw himself upon the patriotism of the people, not reflecting, apparently, that this is asking the Emperor to lean on a broken reed. There remains the Tsung-li-Yamen, or Office of Foreign Affairs. Here the Emperor has our friends Princes Kung and Ching, Jung Lu, and Weng-Tung-ho to advise him. Chinese Mandarins ought to be many-sided, they have to give advice on so many and diverse subjects. At the Foreign Office we also find Li-Hung-Chang, our old and far-travelled friend, whom somebody has described as "gifted with no mean intelligence, and with a double dose of Chinese cunning; . . . too much of a sceptic to allow prejudices or principles of any kind to stand in his way." He is ever ready with his advice—readier than the Emperor, unfortunately, is to take it. The other members of the Tsung-li-Yamen—four or five of them—are not worth mentioning. They seem to have been promoted to the Foreign Office because they knew nothing of foreigners or foreign affairs. They have hardly ever been out of Pekin. One was in this country for the Jubilee, but experience has not taught him anything. He is an accomplished weathercock, without any policy of his own. Another—Wu Ting-fen—entered the office with hopes as a reformer, but found that the wrong tack, and retired disgusted in September last to "repair his ancestral tombs." It is possible that he may be so employed for the remainder of his life. With such advisers, it is a matter of astonishment that China should be so far from ruin as it is. One word as to the Dowager-Empress, a much more important personage, in many ways, than the Emperor himself. She revises the advice given by "Ministers," and if she finds or thinks it wrong, comes down upon the advisers like a whirlwind, and "boxes their ears all round until they kneel before her with their foreheads on the ground, in genuine awe, to receive her gracious commands." A vigorous woman, evidently; but then she enjoys supreme command. The Emperor would not think of disputing the orders of his mother. Prince Kung, himself of Royal lineage, has frequent rows with the Dowager, but he has generally to yield with his head on the ground.

Dividends Announced.

BANKS.

Commercial of Sydney.—Dividend declared at the rate of 8 per cent. per annum, and £15,407 carried forward. Reserve fund remains at £1,010,000.

Bank of Egypt.—9 per cent. for the year ended December 31 (of which an interim dividend of 3 per cent. was paid in July last), and also a bonus of 5s. per share.

Bank of Victoria.—Dividend proposed on Preference shares at the rate of 5 per cent. per annum. £58,689 to be carried forward.

Derby & Derbyshire Banking Company.—14 per cent. per annum for half-year, with a bonus of 1s. 3d. per share.

London Trading.—5 per cent. per annum for the last half-year.

Knaresborough & Clare.—Payment of dividend of 10s. per share for the half-year ended December 31, making, with the interim dividend paid in last July, 17½ per cent. for the year.

Lancaster.—In addition to the interim dividend of 12s. per share already paid, a further dividend of 14s. per share has been declared, free of income-tax, and £4,900 carried forward.

Martin's Bank, Limited.—Dividend at the rate of 6 per cent. per annum, £2,500 to be placed to reserve fund, and £6,418 carried forward.

Commercial of Australia, Limited.—At the half-yearly meeting to be held at Melbourne on February 3, a dividend at the rate of 2 per cent. per annum, will be declared on the Preference shares, £30,000 carried to assets trust special reserve account, and £6,350 carried forward.

Liverpool Union.—Dividend declared at the rate of 10 per cent. per annum, and bonus of 2½ per cent.; balance forward, £15,854.

Union Credit, Limited.—Dividend at the rate of 4 per cent. per annum upon the Preference share capital.

Cumberland Union.—Dividend of 4 per cent., making, with that already paid, 8 per cent. for the year. £1,150 carried forward.

London and Hanseatic Bank.—Dividend 9s. per share for half-year, which includes 5s. interim, paid July 1; £8,593 carried forward.

Merchant Banking Company.—Dividend for last half-year at the rate of 6 per cent. per annum, making, with the dividend paid in July, 5 per cent. for the year.

MISCELLANEOUS.

Brighton Grand Hotel.—3½ per cent. for the year 1897. The dividend in 1896 was 2½ per cent.

Harrod's Stores.—15 per cent. dividend on the Ordinary shares for half-year ended December 31, which, together with interim dividend of 5 per cent. paid in August last, will make 20 per cent. for year.

Harrod's Stores Founders' Shares.—20 per cent. dividend for year.

Eley Brothers.—25s. per share in addition to the interim dividend of 5 per cent. paid in July.

London & St. Katharine Dock.—Dividend on the capital stock at the rate of 1¼ per cent. for the past half-year, making 2½ per cent. for 1897, with £7,972 carried forward, as against 2¼ per cent. for 1896, with £3,116 carried forward.

North Borneo Cigar Syndicate.—Dividend proposed at the rate of 12½ per cent. for the past year.

Walker & Homfrays, Limited.—Dividend at the rate of 8 per cent. per annum on the Ordinary shares, and a balance of £275 carried forward.

United Lankat Plantation.—5 per cent., together with bonus of 5 per cent., making, with interim dividend paid last July, 15 per cent. for year ended October 31. Previous year, 10 per cent.

Mortgage Company of the River Plate.—After paying dividend of 10 per cent. per year, and adding £15,000 to reserve, balance is left of £6,364.

Royal Aquarium, Limited.—Five shillings per share dividend, and 1s. per share bonus, equal to 6 per cent. per annum, are proposed, with £3,998 added to balance forward. Previous year, 6 per cent.

Linotype Company.—Dividend at the rate of 10 per cent. per annum on the Deferred Ordinary shares, and of 6 per cent. per annum on the Preferred Ordinary for half-year ended December 31. Corresponding period of 1896, dividend on Deferred at the rate of 7½ per cent., and on Preferred of 6 per cent.

Patent Nut and Bolt.—Usual dividend of 10 per cent. and a bonus of 5s. per share.

London Pavilion, Limited.—Directors recommend dividend at the rate of 14 per cent. per annum for half-year ended December 31, and a bonus of 1s. per share.

Cambridge Music Hall, Limited.—Dividend warrants at the rate of 7 per cent. per annum to all shareholders have been posted.

Australian Agricultural Company will recommend an interim dividend of 26s. per share at the half-yearly meeting, which will be held on February 24.

Hunters, the Teamen, Limited.—Interim dividend at the rate of 10 per cent. per annum for the half-year ended December 31.

Alex. Ferguson & Co.—Interim dividend at the rate of 6 per cent. per annum on the Preference shares, and at the rate of 10 per cent. on the Ordinary.

Colonial Estates and Investments.—Interim dividend at the rate of 10 per cent. per annum for the year ended December 31 upon the Ten per Cent. Cumulative Preference shares.

Anglo-American Telegraph, Limited.—Balance dividends recommended of 19s. 6d. per cent. on the Ordinary Consolidated stock, and £1 19s. per cent. on the Preferred for 1897; making with

dividends already paid £3 per cent. on the Ordinary Consolidated and £6 per cent on the Preferred stock.

LLANDUDNO PIER.—Dividend recommended of 12½ per cent.; £1,500 added to reserve; £1,000 placed to alterations and extensions account, and £1,113 carried forward.

GLASGOW TRAMWAY AND OMNIBUS.—Dividend for the past six months at the rate of 1s. per share, £1,000 added to reserve, and £499 carried forward.

MERCANTILE STEAMSHIP.—10 per cent. for past year as against 7½ per cent. in 1896.

WELFORD'S SURREY DAIRIES.—Balance dividend proposed at the rate of 10 per cent. per annum, making 8·4 per cent. for the year ended December 31.

THRELFALL'S BREWERY.—Interim dividend at the rate of 6 per cent. per annum on the Preference shares, and 15 per cent. per annum on the Ordinary shares.

HOLBORN AND FRASCATI.—Balance dividend recommended by directors on the Ordinary shares at the rate of 8 per cent. per annum, and a bonus of 2 per cent. for the year, subject to income-tax.

SOUTH AFRICAN GOLD TRUST.—Five shillings per share dividend on the Ordinary shares, being at the rate of 25 per cent. per annum. Balance forward, £369,437.

A. M. PEEBLES & SON, LIMITED.—Interim dividend on Ordinary shares, 8½ per cent. per annum, against 8 per cent. a year ago.

NEW SHARLSTON COLLIERIES COMPANY recommend a dividend for the year ended December 31 of 5s. per share.

NATIONAL TELEPHONE COMPANY.—The following dividends for past half-year are declared: At the rate of 6 per cent. per annum on the First and Second Preferences; at the rate of 5 per cent. on the Third Preferences; and at the rate of 6 per cent. on the Ordinary shares; carrying forward £40,000 to reserve and £9,000 to next account.

INSURANCE.

LONDON & PROVINCIAL MARINE.—10 per cent. per annum for the half-year.

LION FIRE.—3 per cent. for the past year.

LIVERPOOL MORTGAGE.—5 per cent. per annum.

THAMES & MERSEY MARINE.—Payment of 6s. per share, being 2s. per share dividend and 4s. bonus; making with interim dividend paid in July last 10s. per share for the year ended December 31, 1897.

UNION MARINE.—Payment of 4s. per share, making, with the interim dividend of 3s. 6d. per share paid in July last, a distribution for the year of 7s. 6d. per share.

RAILWAYS.

BARRY.—Dividend for past half-year at the rate of 10 per cent per annum. £2,707 carried forward. Last half of 1896 dividend at same rate, and £1,900 carried forward.

LONDON TILBURY & SOUTHEND.—Dividend on the Ordinary stock for the past half-year of £6 5s. per cent. per annum, carrying forward about £4,600. For corresponding period of 1896 the dividend was at the rate of £6 per cent. per annum with a balance of £820 carried forward.

LONDON CHATHAM & DOVER.—£2 5s. per cent. for the past half-year in the Arbitration Preference stock.

GREAT NORTHERN OF IRELAND.—Dividend for past half-year at the rate of 6¾ per cent. per annum, with balance of £38,776 carried forward, as against 6¾ per cent. and £38,101 carried forward in second half of 1896.

RHYMNEY.—Dividend at the rate of 10 per cent. per annum to be paid on the Ordinary stock for the last half-year, leaving a balance of £2,237. Last half of 1896, 10 per cent. dividend and balance of £482.

MIDLAND GREAT WESTERN OF IRELAND.—4½ per cent per annum on the Consolidated Stock for the half-year ended December 31. Balance forward, £11,200.

GREAT SOUTHERN & WESTERN.—Dividend for past half-year at the rate of 5½ per cent. per annum, with £30,339 carried forward, as against 5¼ per cent. per annum and £28,575 forward in corresponding half of 1896.

LANCASHIRE & YORKSHIRE.—Distribution for past half-year at the rate of 5¼ per cent. per annum, carrying forward about £21,000. A year ago the dividend was 5¾ and £29,190 carried forward.

LONDON AND SOUTH-WESTERN RAILWAY.—The directors recommend a dividend for the half-year ended December 31, 1897, at the rate of 8½ per cent. per annum on the original Ordinary stock, the full dividend at the rate of 4 per cent. per annum for the half-year on the Preferred Converted Ordinary stock, and 3 per cent. for the whole year on the Deferred Converted Ordinary stock. The dividends of 8½ per cent. on the undivided Ordinary stock, and 3 per cent. on the Deferred Ordinary stock, compare with 8¼ per cent. and 2⅝ per cent. respectively for the corresponding periods of 1896, and the balance of net revenue carried forward is £23,038, as against £24,805 at this time last year.

NORTH LONDON RAILWAY COMPANY.—The accounts for the half-year show, after placing £7,000 to reserve (as compared with £3,500 in 1896), a balance sufficient to admit of the declaration of a dividend on the Ordinary stock at the rate of 7½ per cent. per annum. About £7,000 is carried forward against £4,714 in the corresponding period of the previous year.

BLACKWALL RAILWAY COMPANY.—Dividend for past half-year at the usual rate of 4½ per cent. per annum.

METROPOLITAN DISTRICT RAILWAY COMPANY.—2¾ per cent. per annum on Five per Cent. Preference stock against 2¼ per cent. at the corresponding period.

NORTH EASTERN RAILWAY COMPANY.—Dividend for past half-year 7 per cent. against 7¼ per cent. for corresponding period.

SATURDAY, FEBRUARY 5.

Harrow and Uxbridge Railway	12, Victoria-street, Westminster, 10 a.m.
Whitechapel and Bow Railway	12, Victoria-street, Westminster, 10.15 a.m.

Answers to Correspondents.

Questions about public securities, and on all points in company law, will be answered week by week, in the REVIEW, on the following terms and conditions:—

A fee of FIVE shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of FIVE shillings must be sent to cover the cost of such letter, the fee then being TEN shillings for one query only, and FIVE shillings for every subsequent one in the same letter. While making this concession the EDITOR will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Correspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus:—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway?"

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The EDITOR has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market munipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The EDITOR further respectfully requests that merely speculative questions should as far as possible be avoided. He by no means sets himself up as a market prophet, and can only undertake to provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the INVESTORS' REVIEW, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

R. K.—Sorry cannot assist you. Please read notes above. Will return your P.O.

IRON.—No reliable information is obtainable; the shares are placed on the market by means of newspaper puffs, and the quoted price is maintained by the clique interested in the company. I think you will be happier without any shares.

ALLIANCE ASSURANCE COMPANY.

ESTABLISHED IN 1824.

Proposal Forms, Prospectuses, and Statements of Accounts may be had on application to the Head Office of the Company, or to any of the Branch Offices.

Head Office—BARTHOLOMEW LANE, E.C. ROBERT LEWIS, *Chief Secretary.*

ABRIDGED PROSPECTUS.

BOROUGH OF LEICESTER.

ISSUE of £450,000 LEICESTER CORPORATION 2½ PER CENT. REDEEMABLE STOCK, under "The Leicester Corporation Act, 1884," and a Provisional Order (1896) amending the same.

THE CORPORATION of LEICESTER are prepared to receive Tenders for £450,000 Leicester Corporation Two-and-a-half Per Cent. Redeemable Stock, to be issued free of all official charges. Minimum price of issue, £95 per cent.

The Stock will be redeemable at par, either on the 1st July, 1958, or at the option of the Corporation, on or after the 1st July, 1928, unless previously cancelled by purchase.

The Stock is to be issued for the purpose of paying off Debentures, and for raising money for Gas Works, Electric Lighting Works, Public Park, Street, Sewerage, and Paving Works, and for other purposes.

Security for the Stock thus to be issued is—The Borough Fund and District Fund and General District Rate of the Borough of Leicester, Rents and other Revenues of the Corporation, including Gas, Water, and Electric Lighting Revenues.

Three months' interest at 2½ per cent. per annum, calculated on the amount of stock allotted, will be paid on the 1st July, 1898.

Trustees are authorised by the Trustee Act, 1893, to invest in this Stock, unless expressly forbidden by the instrument creating the Trust.

A quotation of the stock on the London Stock Exchange will be applied for in due course.

Tenders on the form accompanying prospectus must be delivered before 12 o'clock at noon, on Thursday, the 3rd February, 1898, to the Town Clerk, Town Hall, Leicester, when and where they will be opened in the presence of such of the applicants who may attend. Tenders can be lodged with Pares's Leicestershire Banking Company, Limited, St. Martin's, Leicester, and Branches, or with their London Agents, Messrs. Smith, Payne, and Smiths, Bankers, 1, Lombard Street, London, E.C.; also with the Leicestershire Banking Company, Limited, Leicester, and Branches, or their London Agents, the London and Westminster Bank, 41, Lothbury, London, E.C., up to four p.m. on Wednesday, the 2nd February, for transmission to the Leicester Corporation.

Tenders, which must be for not less than £100, must be enclosed, together with a deposit of £5 per cent. of the nominal amount of Stock tendered for, in a sealed envelope, marked "Tender for Leicester Corporation Stock."

The dates at which the further payments will be required are as follows:—On Monday, the 21st of February next, so much as when added to the deposit will leave £70 to be paid for each £100 of stock allotted. On Thursday, the 21st of April next, £30 per cent. On Tuesday, the 21st of June next, £40 per cent. After allotment, payment may be made in full at any time under discount at the rate of 2 per cent. per annum.

Letters of Allotment, with forms of renunciation annexed, will be issued to the Allottees, and these must be presented for exchange for Stock Certificates on the 1st day of July next. The Stock will be inscribed in the books of the Corporation on or after the 21st June next.

Prospectuses and forms of tender can be obtained at the Town Clerk's Office, Town Hall, Leicester, or at any of the above-named Banks.

JAMES BELL,
Town Clerk.

Town Hall, Leicester,
25th January, 1898.

THE STOCK EXCHANGE.—NOTICE.

NO MEMBER OF THE STOCK EXCHANGE is ALLOWED to ADVERTISE for business purposes, or to issue circulars to persons other than his own principals.

Persons who advertise as Brokers or Share Dealers are not Members of The Stock Exchange, or under the control of the Committee.

A List of Members of The Stock Exchange who are Stock and Share Brokers may be seen at the Bartholomew-lane entrance of the Bank of England, or obtained on application to

EDWARD SATTERTHWAITE,
Secretary to the Committee of the Stock Exchange.

Committee Room, The Stock Exchange, London, E.C.

PRACTICAL HINTS TO INVESTORS.

NOW READY. NEW EDITION, ENTIRELY REWRITTEN.

PLAIN ADVICE ABOUT LIFE INSURANCE.

CLEMENT WILSON, Norfolk House, Norfolk Street, W.C.

Notice to Subscribers.

Complaints are continually reaching us that the INVESTORS' REVIEW cannot be obtained at this and the other railway bookstall, that it does not reach Scotch and Irish cities till Monday, and that it is not delivered in the City till Saturday morning.

We publish on Friday in time for the REVIEW to be at all Metropolitan bookstalls by at latest 4 p.m., and we believe that it is there then, having no doubt that Messrs. W. H. Smith & Son do their best, but they have such a mass of papers to handle every day that a fresh one may well look almost like a personal enemy and be kept in short supply unless the reading public shows unmistakably that it is wanted. A little perseverance, therefore, in asking for the INVESTORS' REVIEW is all that should be required to remedy this defect.

All London newsagents can be in a position to distribute the paper on Friday afternoon if they please, and here also the only remedy is for subscribers to insist upon having it as soon as published. Arrangements have been made that all our direct City subscribers shall have their copies before 4 p.m. on Friday. As for the provinces, we can only say that the paper is delivered to the forwarding agents in ample time to be in every English and Scotch town, and in Dublin and Belfast, likewise, early on Saturday morning. Those despatched by post from this office can be delivered by the first London mail on Saturday in every part of the United Kingdom.

Cheques and Postal Orders should be made payable to CLEMENT WILSON.

The INVESTORS' REVIEW can be obtained in Paris of Messrs. BOYVEAU ET CHEVILLET, 22, Rue de la Banque.

To Correspondents.

The EDITOR cannot undertake to return rejected communications. Letters from correspondents must, in every case, be authenticated by the name and address of the writer.

The Investors' Review.

The Week's Money Market.

The inevitable turn in the Money Market has proved more decisive than the conditions of affairs a week ago would have led many to expect. Heavy payments on account of the revenue, and the fact that the maturing India Bills were chiefly held by the Government Departments, or by the Bank, materially reduced floating supplies of cash, and of course the Bank of England is steadily drawing money in as the bills held by it run off. The effect of these influences was accentuated by the Stock Exchange settlement, and the rate for day to day money has steadily advanced, until it is now quoted 2 to 2½ per cent. as against 1 per cent. a week ago. "Fixtures" for a week or more also command 2 to 2½ per cent., as compared with 1¼ per cent. yesterday week. So sudden a swing round, occasioned, as it apparently has been, by the shifting of a mere million or two of floating credits, emphasises the mistake the market made in allowing rates to slip away so quickly and so far; but the market is always apt to reason from its most recent experience. "What happened last year will happen this," it says, and is often quite wrong.

Discount rates have also naturally hardened, and 2⅝ to 2¾ per cent. is quoted for three months' choice bills, with 2¾ per cent. for sixty-day paper, and 2⅝ per cent. for six months' bills. This means an advance of about ½ per cent. in the week, and yet general conditions cannot be said to have altered much. Foreign exchanges have moved rather in our favour for the German Exchange is 1½ to 2 pfge. up, and the Russian rate is ·10 copecs higher at 97·85. The demand for gold on Russian account, therefore, promises to diminish, and already the quotation for the metal in the open market is lower at 77s. 10⅜d., but we have yet to deal with the Austrian demand, as the Vienna exchange has been steadily falling for months, and is now only 11·99. Austria, however, is not the strong buyer that Russia proved to be last year, and so conditions are more favourable in this respect. The hardening in rates must, therefore, be ascribed entirely to internal needs, and as these are likely to be pressing for a time, the only surprise is that the previous ease should have been so pronounced.

The Stock Exchange settlement disclosed a relatively light account, but the reduction of cash supplies in the market caused bankers to charge 3¼ to 3½ per cent. for loans to the "House" as against 3 to 3½ per cent. on the previous occasion. A rush was made for the £1,250,000 of Cape Three per Cent. stock, and the average price obtained was £102 18s. 9d. per cent. as against £100 1s. per cent. netted for the previous issue. But grumbling goes on because almost the whole issue was absorbed by a syndicate. We rather wish the syndicate joy of it, for the turn upward in the value of money will render its speculation less profitable than was expected. A different fate befell the other issues of the week. Of the £1,500,000 of Liverpool Three and a Half per Cent. stock only £508,400 was subscribed last Friday, and although the lists were kept open until Wednesday not more than an additional £100,000 was applied for, and the balance had to be withdrawn. The East Indian Rail. way with its issue of £600,000 Two and a Half per Cent. Eight Year debentures fared even worse, for only £92,400 was subscribed at 1s. 3d. above the minimum of 97 per cent. A syndicate will, it is believed, be got together to take over the balance. The ill-success of both issues is partly the result of the rapid change in market conditions, for a week earlier might have seen both readily subscribed. But the Indian debentures are very dear.

This week's Bank returns lets us see that the process of draining the market of its balances continues. Again there is an increase in the banking reserve amounting to £863,000, so that its total is now up to £22,753,000. But the open market gets no good of this money whatever, because it has had to meet bills falling due at the Bank to the extent of £645,000, as is shown by the decrease of that amount in the "other" securities, now down to £13,896,000. Also the tax-gatherer has been busy, and the "public" deposits, which contain the Government balances have risen on the week £1,646,000, making their total now £13,093,000. In consequence of these two demands upon its means the market is, actually, and in spite of the increase in the reserve, poorer by £1,406,000 than it was seven days ago and the total of the "other" deposits is now only £37,479,000. The gold withdrawn for export this week was £262,000, all supplied from the internal circulation, which has contracted no less than £1,124,000. Notes have come back to the amount of £415,000, and gold to the amount of £709,000, including the above-mentioned sum in sovereigns sent abroad.

SILVER.

As the end of the month is near, and silver cannot therefore be arranged to be brought over from America, and other distant quarters, before the usual settling time, the price of "spot" silver has hardened to a moderate extent, and the quotation is firm at 26 3/16d. per oz. For delivery two months hence the quotation is also higher at 25 13/16d., but the demand is not so keen as for prompt delivery. India continues to be the best market for the metal, much of the proceeds having gone into the Bombay Mint to be coined into dollars for the Straits. According to the official reports of the Russian Government, the market is likely to lose at an early date the support it has received at times from purchases of the metal from that quarter.

The Russian currency scheme is about complete, and this means that the minting of subsidiary silver coins will slacken. The Indian banks have seen a further improvement in their balances, and the consequent ease has lessened the demand for Council Drafts, so that only eleven lacs were applied for last Wednesday, nothing above 1s. 3 3/4d. for bills and 1s. 3 13/16d. for transfers being offered. The Council did not allot, and only 19 lacs of specials have since been sold. Its position, therefore, is getting a weak one, for it has sold only £5,736,000 up to date, which implies that it ought to dispose of nearly £4,500,000 in the next two months, an amount quite beyond the power of the market to absorb.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7 and 8 Vict., cap. 32, for the Week ending on Wednesday, January 26, 1898.

Stock Market Notes and Comments.

Markets are still without much character. We have had a settlement this week, and its features are similar to those which have gone before it these many months past. The account never seems to alter much. The same people carry over about the same amount of stock fortnight after fortnight, sometimes paying a little more for the money, sometimes a little less. Speculation, in other words, is not exactly dead, but half suffocated, or else hid away in banks, and not seen on account days at all. Prices have been run up to such heights that there is now no inducement offered to the general public to engage in extensive operations. In many departments, also, the market itself is overburdened by the loads of unmarketable stuff carried partly by it, but still more by the finance establishments outside. A large amount of general business in small investments keeps going on, but it is increasingly difficult to transact, and a kind of feeling pervades markets that a clearance of some sort is required to give room and fresh opportunities.

Under such conditions it is waste of time to enter into details about the position in Home Railway stocks, the more so as we shall presently have to discuss their accounts for the half-year just closed; and there is not much more scope in regard to Foreign Government bonds which are tossed between market and market it may be, but which are dealt in only to a very modest extent by the British public. The only centres of interest just now are the American Railway Market and the "Kaffir Circus," or South African Mining Market; and as regards United States and Canadian Railways, what can we say more than was said last week? Did we hold any of these securities we should be in no haste to sell, and, equally, if we did not possess any we should be slow to buy. At the same time it is safe to say that both United States and Canadian Railway securities promise considerable advances in prices between now and next May. The promise might be treated almost as a certainty but for the position of the Money Market, which is not quite so comfortable as it might be. Still, and that notwithstanding, markets look like going up, but speculators are of the "jump in and jump out" class, which gives movements no stability.

Before passing on to speak of South African shares, a word of caution may be given in regard to the securities of Electric Lighting Companies because these are the popular fancy of the moment. Unquestionably the bulk of these securities are excellent investments, and it is quite possible that those amongst them not now receiving any dividend may, in a few years time, prove remunerative. We have no word to say against their prospects, but what we do wish to insist upon is that the very best security in the world may be bought too dear, and we think electric light shares are getting to be that. There can be no profit in the long run in buying, at a high premium, a share now yielding nothing at all, and not much in buying those that give the purchaser less than 4 per cent. That is, at least, the view we hold, and, holding it, think investors should be very careful not to commit themselves too deeply at current figures.

Now, as regards the South African Market, what is its position? Prices are high for almost all the shares embraced in it, and some of the most conspicuous among them keep moving up, or rather get frequent jerks up, and then slip back again. Who stand behind the movement? Not the public, readers may be very sure. It is entirely a manipulated market, and ought to offer no temptation to anybody with money to lose, least of all to speculators who have no money, but who buy hoping to make some. The man who invests in any, even the best shares in this department, takes upon himself a great risk for a small chance of return. The man who merely speculates falls into the position of a tributary to the large firms who control the market. Each fortnight as Contango Day comes round these firms graciously lend the money to the speculative buyer at from 6 per cent. to 10 per cent. or more. It is an excellent business for them, they have sold him shares in their possession which the speculative buyer is unable to pay for, shares that may have cost them nothing at all, and they get 6 per cent. or more on the price he has agreed to give. In addition, the buyer has to pay his broker at every account some small commission for the trouble of carrying over his shares, and the only chance of his escaping from this position without loss rests in a sharp advance in prices. There is no public, however, rushing into the market to produce this advance; shares are merely screwed up and up by the finance houses to try and attract the public. But prices will not be driven far up by these houses for two good reasons. One is that there are hundreds of thousands of people throughout the three kingdoms who are sitting upon shares, bought by them in the folly of 1895, who would immediately sell were a favourable opportunity provided; the other is that it becomes expensive to the financier to have to hand over differences every account to the speculators in his grasp whom he now bleeds slowly to death. Hence the inert and sluggish condition of this market, which is so entirely in the hands of a few firms and companies that there can be little or no free dealing in it. A man buys and cannot sell again. Directly any number of people attempt to sell, prices are lowered and there is "no market."

Such is the general position, and it ought to keep every sane man from coming near the alluring traps artfully baited for his undoing. Next week, we shall commence the publication of some papers dealing fully and impartially with the prospects of the "deep level" companies on the Rand, and, therefore, abstain from saying more now, except this: it is these deep level shares which the financiers are most anxious to sell, and in order to sell them at great profit to themselves they have got almost the entire financial Press of London into their control. Either they have started gutter rags of their own, or bought up prepondering interests in journals of more or less repute, or they have subsidised papers by advertisements, or they have bribed individual writers, or intimidation has been practiced to reduce the straightforward writer to silence. No stone has been left unturned to prevent the truth from reaching the ears of the public, and delusive estimates of future profit have appeared in quarters where they were least to be expected. There is no infamy, one may say, which the South African group of market controllers have stuck at, or will stick at, in order to attain their end. This being so, the public will do well to be doubtful of what they see about Rand "deep levels," even in places esteemed the most incorruptible and respectable.

Talking about South African Markets naturally leads one to think of Western Australia, but really it is difficult to say much about the market for shares of companies working, or supposed to be working, in that

territory. Elsewhere, however, in this number we deal with them, and give a table showing the results thus far attained by some of the companies. It is not particularly encouraging. The number which either give or promise profit to shareholders is infinitesimal compared with the multitude of worthless companies which have been wholly or partially traded off upon the simple public as frauds pure and simple. If the South African Market is doctored and controlled by a few great potentates of finance this Western Australian one may be said to be manipulated by a few financial skallywags. Therefore it resembles a quagmire rather than a balloon, and those who venture into it stand a good chance of being smothered. There is not a gold mine share in it worth buying to-day by any sensible man, as far as we can discover.

As regards the future, generally, it seems probable that prices will continue strong. There is nothing in sight calculated to seriously depress them apart from the turmoil in France which has not yet come to its height, and the formidable body of banking credit brought to bear upon the maintenance of quotations is so powerful that there is almost no limit to the extent to which the present inflation may be carried. Consequently we still look for hard markets, advancing rather than recoiling, but the more they bound up the more difficult it is becoming for the investor to thread his way and find a safe spot in which to plank down his money.

The Week's Stock Markets.

There was an almost general decline in prices on the Stock Exchange towards the close of last week, owing chiefly to realisations in view of the settlement which commenced on Monday last; but part of the fall is of course, due to the unsettled political outlook. Although there has been very little increase in the volume of business, the tone became firmer when the account had been finally adjusted. Consols have fallen slightly owing to the hardening tendency of the discount market, and the Indian sterling loans are also rather easier. Home Corporation stocks show moderate declines in several instances, due to the failure of the last Liverpool Corporation issue.

The Home Railway Market was under a cloud for several days, the half-yearly reports of the South-Eastern and Great Eastern Companies being viewed unfavourably, owing to the large increase shown in working expenses, coupled with the proposed issue of new capital by the latter company. Then the announcement of a dividend of only 5¼ per cent. by the Lancashire & Yorkshire Company (which is worse by ½ per cent. than for the corresponding period, and with £8,000 less carried forward), also helped to depress the market. The Chatham dividend was up to expectations, the First Preference receiving in full, and the carry forward shows an increase of about £8,000. Prices became firmer when it was found that stock was, as a rule, scarce for delivery, and the finer weather and good traffics also helped to raise quotations. Continuation rates ruled lower than a fortnight since, with the exception of Brighton Deferred, on which the rate rose from ¼ to ¾ per cent. On North-Western the contango was ⅜ per cent. (easing off to ¼ per cent.), on North-Eastern ⅛ per cent., on Great Western ¼ to ⅜ per cent, and on Midland ⅛ to ¼ per cent. Great Central and Great Eastern were carried over "even," and in the latter case a slight backwardation was reported quite at the last. South-Western Deferred has had a sharp set-back, and the dividend of 8½ per cent. (giving 3 per cent. on the Deferred for the year, against 2⅝ per cent. for 1896) caused a further decline. Central London shares have attracted some attention on the publication of the report. Most of the traffic returns show good increases, but the Midland again lags behind.

United States R.R. shares exhibited a weak tendency for the greater part of the week, under the influence of New York selling, but when London turned round and bought on Tuesday a recovery set in. Wall Street has since bought rather freely, principally New York Central, Lake Shore, and Ontario shares. Actual consolidation between the New York Central and Lake Shore roads is now talked of, but no official statement has yet been published. The Vanderbilt group has engaged most of the time and attention of "insiders," and the announcement of the election of Mr. Chauncey Depew to a seat on the Board of the New York-Ontario Company has also helped to raise the price of their shares. All the roads again publish good traffic returns.

Large dealings have again taken place in Canadian Pacific and Grand Trunk stocks, and prices have fluctuated rather wildly. Canadian Pacific shares fell sharply, selling orders coming from Montreal, when it was announced that the Northern Pacific Company had succeeded in outbidding them, and so securing the control of the Seattle, Lake Shore, & Eastern Road; but a very satisfactory traffic return helped to pull the price up again. Grand Trunk stocks were adversely affected early in the week by a certain amount of profit taking, but the upward movement has apparently not yet spent itself.

The Foreign Market has been steady to firm. Despite the rather unsettled aspect of affairs in the far East;

and the disturbances in the French Chamber attracted little or no attention. The Reuter's telegram published on Saturday concerning the relations between Argentina and Chile caused a decline in the bonds of these Republics, but later news regarding the boundary dispute was of a less alarming description, and the President has officially denied the rumours lately current in reference to international difficulties. The steady fall in the gold premium at Buenos Ayres has tended to strengthen prices, but business continues on a very small scale. Continuation rates were ½ to 1 per cent. lower at the settlement, Russian bonds being continued at from 1 to 2 per cent., Greek and Spanish at 2 to 4 per cent., Italian Rentes at about 4 per cent., and Argentine and Turkish groups at about 4½ per cent. Turkish issues were pressed for sale from Paris, a rumour going the round there that a note had been forwarded to the Sultan from France and Russia regarding the state of affairs in Crete. Ottoman Bank shares weakened on the reported resignation of Sir R. H. Lang, but the rumour turned out to be pure fiction. Italian and Spanish both show some recovery from the lowest points of the week, and Greek bonds are firm on the publication of the report of the International Commission of Control over Greek finances.

Among Foreign Railway stocks a feature was the rise of 12½ and 10 in the Ordinary and Preference stocks respectively, of the Buenos Ayres Northern Company, the report stating that a proposal had been received from the Central Argentine Company for taking over their line. Prices of other Central and South American companies have moved up and the tendency is firm. Continuation rates ruled at from 5 to 5½ per cent. Mexican railway stocks were neglected all the week, but rose sharply on Wednesday, when the traffic return appeared.

In the Miscellaneous Market the shares of the various electric lighting companies have again attracted most attention, and a large amount of business has been transacted at considerably higher prices than those ruling last week. The directors of the New English Sewing Cotton Company are apparently quite indifferent to outside criticisms, and go on slowly doling out letters of regret, but allotments are still vainly looked for. Among Brewery stocks, Allsopp has fallen sharply, and recovered, on various dividend rumours, an increase of 1 per cent. being now generally expected. City of London Ordinary stock has risen considerably, but there is a set-back of 10 points in Guinness. Linotype shares were offered at one time, but on the announcement of a dividend at the rate of 10 per cent. on the Deferred, there was a recovery. Colonial Bank shares again advanced, London General Omnibus Debenture is 4 higher, and Aerated Bread shares have also shown great strength; but Salt Union issues close weak, and among Telegraph companies Anglo-American stocks are slightly lower, the dividend not being quite up to what the more sanguine operators had looked for.

MINING AND FINANCE COMPANIES.

There has been little or nothing doing in South African ventures, apart from the arranging of the accounts, and prices have been marked down day after day, helped in that direction by sales from Paris and the Cape. Towards the close a very slight improvement is apparent, but the little buying that took place was professional. The "carry over" was easily arranged, rates ruling rather higher than last time, at about 5 to 7 per cent. East Rands were continued at about those rates, De Beers at 9d. to 1s. 3d., and Chartered at about 2½d. to 3½d. Western Australian companies have also shared in the general dulness, a little buying from Adelaide giving a slightly firmer tone before the close. The general rate for continuing West Australian shares was slightly stiffer at from 8 to 10 per cent. Among Miscellaneous Mines, Indians were dull, in sympathy with a sharp drop in Nundydroog, which was due to the announcement by that company of a flood in the mine. Wassau (Gold Coast) shares continue in request. Copper securities advanced at one time, when sales on Paris account ceased, but there has been a slight reaction, on a resumption of selling orders.

The principal features noticeable at the close of the week are a sharp fall in Canadian Pacific and Grand Trunk stocks, and a further considerable advance in Mexican Railway stocks. United States Railroad shares close with a very firm tendency, Lake Shore again leading the way. Home Railway issues were rather dull, with the exception of South-Western Deferred, Great Northern Preferred, and South-Eastern Deferred, which close firm. Among Foreign Government bonds there was a sharp rally in Spanish Fours and Turkish Groups, Italian Rentes, and Argentina Cedulas all finish strong. Rupee paper suddenly rose ¾, and Bank of England stock marks a further rise.

ENGLISH RAILWAY TRAFFIC RETURNS

Cleator and Workington.—Gross receipts for the week ending January 22 amounted to £959, a decrease of £60. Total receipts from January 1, £3,068, a decrease of £219.

Cockermouth, Keswick, and Penrith.—Gross receipts for the week ending January 22 amounted to £820, an increase of £89. Total receipts for three weeks £2,658, an increase of £305.

East and West Yorkshire Union.—Gross receipts for the week ending January 14 amounted to £280, an increase of £78. Total receipts for two weeks £548, an increase of £105.

TRAMWAY AND OMNIBUS RECEIPTS.

Increases for past week:—Belfast, £391; Croydon, £123; Glasgow, £51; Lea Bridge, £217; London, £1,693; London & Deptford, £121; London Southern, £159; London General Omnibus, £4,096; London Road Car, £1,331; Metropolitan, £2,261; North Staffordshire, 31; Provincial, £560; Southampton, £68; South London, £309; Sunderland, £97; Swansea, £27; Wolverhampton, £50; Woolwich & S. E. London, £82; Bordeaux, £118; Calais, £28; Calcutta, £217.

Decreases for past week:—

Anglo-Argentine, week ending December 27, £37 increase. Vienna Omnibus, week ending January 15, £131 increase.

The National Sound Money Conference at Indianapolis have approved the plan of monetary reform adopted by the committee at the former conference.

WEST AUSTRALIAN MINES.

From the returns issued by the West Australian Chamber of Mines it appears that the gold exports from the colony during the past year amounted to 674,993 oz., compared with 281,265 oz. in the previous year; 231,413 oz. in 1895; 207,131 oz. in 1894; 110,891 oz. in 1893, and only 59,548 oz. in 1892. Since the early days of gold returns in 1886 down to the close of last year Western Australia has exported 1,641,500 oz., representing in value £4,500,000 so that the colony's claim to be one of the great goldfields of the world has some justification. Shareholders, however, who have put enormous sums of money into West Australian mining ventures, and more particularly into the pockets of promoters, have so far received back but an extremely small modicum in dividends, and the important question of the permanency of the reefs has yet to be settled. What is now termed the Kalgoorlie field, upon which are the Great Boulder, Lake View, Ivanhoe, and Hannan's Brownhill, has turned out decidedly rich, but beyond the Great Boulder, and to a smaller extent the Ivanhoe, none even of these Kalgoorlie mines have up to the present returned much in the shape of dividends to their shareholders, while, on the other hand, many undertakings have had to go through the process of reconstruction, mainly owing to the inadequacy of the original working capital because of the greed of the promoters. Amongst the reconstructions during the past eighteen months are many well-known companies, including the Arrow Brownhill, the Big Blow, Blackett's Gold Mines, the Black Flag Proprietary, the Black Flag Consolidated, the Champion Reef (Nanninel), the Consolidated Gold Mines of West Australia, the Consolidated Murchison, the Consuello, the Cue Victory, the Empress of Coolgardie, the Gem of Cue, the Gladiators, the Gleeson's Success, the Golconda, the Golden Arrow, the Hannan's North, the Hicks' Gold, the Hit or Miss, the Kalgoorlie Mint and Iron King, the Lady Loch, the McCulloch Coolgardie, the Menzies Gold Estates, the Menzies Pioneers, the Mount Burgess Gold, the Mount Jackson, the Mount Magnet; the New Arrow Proprietary, the Water Trust, Mining, and Public Crushing; the Murchison Goldfields, the Polar Star Proprietary (formerly Murchison Gift), the Abbott's Gold, the Sam's Wealth of Nations, the Waldon's Find, the West Australian Gold Concessions, and the White Feather Main Reef. Surprise will probably be expressed at this number of reconstructions, but, as a matter of fact, the cases mentioned refer only to companies who have, mostly during the past two years, had to undergo this process after having started crushing, and there are many others which had to reconstruct before this period—English companies, of course.

From what can be judged, there are many more to go through the process. Even from the Great Boulder Proprietary Company itself, the yield of gold per ton crushed during the last eight months

has steadily diminished from 3 oz. 4 dwt. in May, to 2 oz. 9 dwt. at the end of December, though we are not, of course, suggesting any reconstruction in this case—at least, not at present—only calling attention to the decline in the richness of the ore dealt with. But there are numerous instances where the fall in the yield is a serious matter, such as the Black Flag Proprietary, Burbank's Birthday Gift, Champion Reef, East Murchison, Emerald Reward, Emperor Gold, Hannan's Reward, Mount Magnet, North Boulder, Robinson, and White Feather Reward, and Main Reef Companies. Unless things improve soon, most of these look like coming round with the hat before long, while the West Australian Proprietary Cement Leases Company is abandoning its present property and is to have a fresh one provided by the Venture Corporation, Limited, the promoting syndicate. It would be a good thing if vendors kept new properties in stock to hand over in the event of failure. Fortunately the public on this side has not risked a heavy stake in the game, and the present elevated level of many of the better-known shares is due to operations by the Adelaide market and the finance jugglers over here. This has not been a difficult matter, far easier than getting the British public to relieve them of their holding at the outrageous prices quoted. When the Government of Western Australia has squandered a few millions in providing the mining district with water, and when railways and other modern appliances have further reduced the cost of working, it will be time enough to take a hand in the speculation.

MINING RETURNS.

BRILLIANT BLOCK GOLD MINING.—Crushed during the month 1,343 tons of quartz for 461 oz. gold.

HIGHLAND CHIEF.—Crushed 161 tons, yield 46 oz. retorted gold.

OTTOS KOPJE.—During week ended 20th inst. 6,122 loads crushed, 166 carats produced, including one stone of 11 carats.

WESTRALIA AND EAST EXTENSION.—Twenty stamps running 439 hours crushed 1,306 tons, yielding 856 oz. gold.

LAKE GEORGE MINES.—5,174 tons crude ore treated, yielding 350 tons of matte and bullion, containing 703 oz. gold, 28,860 oz. silver, and 114·64 tons copper.

PEHANG CORPORATION.—December return as follows: Jeram Lumping Mill, 1,140 tons of stone crushed, producing 70 tons of block tin. Jeram Batang Mill, 1,050 tons crushed, producing 12 tons of tin.

BELLVUE PROPRIETARY.—140 tons crushed for yield of 300 oz.

LINDSAY CONSOLIDATED.—Crushed 260 tons, yield 60 oz. gold, exclusive of tailings.

ROSE DEEP.—For December, tons crushed, 14,728; yield from mill, 5,694 oz. gold; 11,577 tons of sand and concentrates treated by cyanide, yield, 2,797 oz.

IVANHOE GOLD CORPORATION.—Clean up for two weeks: 790 tons crushed, yielding 1,426 oz. gold.

ALADDIN'S LAMP.—340 tons crushed, yielding 575 oz.

DAY DAWN P.O.—Crushing for fortnight ended January 22: No. 3 Shaft, 380 tons, 672 oz.

ORO PRETO GOLD MINES OF BRAZIL.—5,116 tons of ore produced 1,511 oz. of gold. Lower tonnage on account of the holidays. Ore delivered at mill this month showing some improvement.

MENZIES CONSOLIDATED.—Crushed 455 tons, each of 2,240 lb. of ore. The total yield is 601 oz. of smelted gold.

ALASKA TREADWELL.—Bullion shipment, $50,782; ore milled, 18,010 tons. Sulphurets treated, 280 tons; bullion from same, $14,176.

CROWN DEEP.—For December: Tons crushed, 21,000; yield in smelted gold from mill, 7,006 oz. Tons of sand and concentrates treated by cyanide, 17,030; yield in gold from same, 7,038 oz.

DAY DAWN BLOCK.—Tons crushed, 1,780; yield 2,362 oz. gold, including tailings.

THE MOUNT LYELL MINING AND RAILWAY COMPANY, LIMITED.—From December 16 to January 12, inclusive, a total quantity of 7,617 tons of ore has been treated, 6,792 tons from open cuts, assaying before treatment—copper 3·95 per cent., silver 3·08 oz., gold ·161 oz. per ton. 825 tons from No. 4 tunnel assaying before treatment—copper 8·42 per cent., silver 7·33 oz. per ton, gold ·037 oz. per ton. The converters have produced during the same period 318 tons blister copper, containing—copper 314 tons, silver 24,255 oz., gold 1,374 oz. London office note:—The decreased results in the above returns are explained as being owing to a partial interruption in the operations in consequence of great bush fires, with excessive drought.

CROWN DEEP.—Results for December:—Tons crushed by 160 stamps working 28 days, 21,000, yield in smelted gold from mill, 7,006 oz.; tons of sand and concentrates treated by cyanide works, 17,030, yield in smelted gold, 7,028 oz. Profits for month, £20,882.

VICTORIA (Charters Towers).—Crushed 105 tons for 418 oz. Approximate value, £1,421. Profit, £671.

PEAK HILL.—432 tons of ore crushed for a return of 1,863 oz. of smelted gold.

BURBANK'S BIRTHDAY GIFT.—After 344 tons were crushed, the clean-up gave 550 oz. free gold, exclusive of tailings.

WEALTH OF NATIONS.—Crushed 520 tons, yielding 310 oz. of gold.

LEICESTER CONSOLIDATED DIAMOND MINES.—Washed 197 loads from the mine, 3,725 loads, lumps, and hopperings, producing 126 carats.

HYDERABAD (DECCAN) COMPANY.—The output of coal for the last two years from the Lingareni Coalfield is reported as follows:—1896, 262,660 tons; 1897, 365,550 tons; increase, 102,870 tons. The output during December, 1897, was 34,903 tons, being the largest quantity yet attained in any one month.

THE BROKEN HILL PROPRIETARY, BLOCK 10, COMPANY, LIMITED.—Dividend No. 56, of 2s. per share, payable February 16. The result of working to date has been under estimated returns. We consider it prudent to reduce dividend for the present.

NEW ROAD TO KLONDIKE.

A Toronto correspondent of the *Times* states that the Dominion Government has signed a contract with a large firm of railway contractors for the construction of a railway 150 miles long from Glenora, on the Stickeen River, to Teslin Lake, from which there is continuous navigation for river steamboats to Klondike and all points in the Yukon district. The contractors have undertaken to complete the line by next September. This will secure a practically all-Canadian route direct to the goldfields, and it has been obtained without any cost in money to the country, the company receiving a large grant of mineral lands by way of assistance to the enterprise.

Prices of Mine and Mining Finance Companies' Shares.

THE POSITION OF THE IMPERIAL CONTINENTAL GAS COMPANY.

After running all over Europe Dr. Lueger, the Burgomaster of Vienna, has at last induced the Deutsche Bank to arrange a loan of thirty million florins, which will bear 4 per cent. interest, and be issued at 98 per cent. The anti-Semitic Burgomaster denies that he has entered into any engagement in regard to the tramways, in which the Deutsche Bank and its colleagues in the Syndicate are deeply interested, but no credence is given to this denial, as it was precisely on this point that the negotiations with the same group fell through some months ago. It is, however, a very moot point whether this large sum will be handed over to Dr. Lueger simply for the purpose of fighting the Imperial Continental Gas Association. The worthy Burgomaster is a little bit *tête montée* about capitalists, and Jewish capitalists in particular, and because the late Sir Julian Goldsmid was the prime mover in the Imperial Continental Gas Association, he has steadily opposed the renewal of the concession for lighting Vienna by gas at present held by the Association, and which expires in 1899. But this concession only applies to old Vienna and its million of inhabitants, and the Association has contracts with no less than twenty-seven of its suburbs, which run up to dates between 1903 and 1917. As many of these suburbs have since been incorporated in the Vienna Municipality, the Doctor endeavoured in the Law Courts to prove that the contracts were thereby broken, and that these agreements fall in in 1899.

His first appeal to the Courts has led to a thorough defeat. But, of course, he has power to make two appeals yet, although his prospects of reversing the decision are not very promising. It is, therefore, quite possible that the Deutsche Bank has only agreed to a loan upon Dr. Lueger undertaking to come to terms with the Association. Like every demagogue, the worthy Doctor is a poor Minister of Finance, and he must by this time be at his wit's end to know how to carry on the financial part of his operations. The gas works so far erected by him will only serve as a necessary adjunct to the existing plant of the English company; and now that he has lost the suburbs, representing one-third of the population, the prospects of an entirely new undertaking are not very bright. A compromise on these lines is, therefore, by no means out of the question. Meantime the Association is in a very strong position to meet any loss of business at Vienna, although its business in that city is important. Thus, in spite of carrying on gas undertakings at no less than twenty-eight places on the Continent, the profits of the Vienna business represent one-third of the total. The Association, however, has taken time by the forelock and reduced its dividend from 12 to 10 per cent., utilising the money thus saved in adding to its reserves. Taking the accounts for the year ended September 30 last, we find the profits came to £497,403, and the 10 per cent. dividend took £380,000. There was added to a contingency fund no less than £154,000 in that time, and £87,800 was written off for depreciation, while the reserve fund increased by £10,441. Now, the reserve increases automatically, as its total of £392,441 is invested in Consols, and the interest received from these is added each half-year. The depreciation fund now amounts to £999,099, and is held in English, Indian, Colonial, and foreign securities, the interest upon which must represent at least £40,000 per annum. The contingency fund stands now at £761,342, and is not specially invested, but is practically held in a liquid form, as the Association has large amounts in cash, bills, and a trifle of £250,000 in London and North-Western Railway stock at its command. The effect of a loss of the Vienna business may therefore be said to have been discounted, and anything short of that result must be looked upon as gain.

An agreement has been concluded with Natal and Cape Colony for a reduced railway tariff to the Transvaal for over-sea goods equivalent to a reduction of 20s. per ton. The arrangement comes into force on March 1.

Rodriques must be a queer little island to live on. It boasts of 2,635 inhabitants, including, besides natives, settlers from Mauritius, Madagascar, India, China, Europe, Leychelles, and Réunion traders, agriculturists. The character of these "samples" seem doubtful, for last year there were forty-six criminal convictions, or one for every fifty-seven nhabitants. The revenue for 1896 was Rs.8,310—a decrease of Rs.2,062—while the expenditure rose to no less than Rs.24,479, an increase of Rs.1,378. If this goes on, Rodriques must quickly accumulate a national debt of very respectable dimensions.

WAR OFFICE ECONOMIES.

Who says the War Office is not economically conducted—that its officials are not thriftily parsimonious of the nation's money? Mr. St. John Brodrick denies the impeachment, and, being Under-Secretary for War, he ought to know the facts. Here is one of the facts, as related by himself:—Eleven years ago, as we all know, was an anxious time in the Soudan. General Gordon had been murdered, Khartoum had fallen, and there was no saying what the redoubtable Mahdi might not do, or attempt to do. Soon after the disaster at Khartoum, General Sir Redvers Buller entered Lord Wolseley's apartments at Korti, very sleepy, and told him he could not write his War Office report as he had not been in bed for three days. His Lordship suggested that a bottle of champagne might assist him. Sir Redvers tried it, and the report was written. Sir Wilfrid Lawson may be sceptical about the effects of the champagne, but even he must admire the economic vigilance of the storekeeper or steward, who, while sending the bottle to the wearied General, carefully noted its price and the cost of "transport" to Sir Redvers' lodgings, and kept his mind and glittering eye on the account until it was safely landed at the London War Office. Here it lay for eight months, awaiting the return of Sir Redvers Buller to his staff duties. Then it was presented and, no doubt, paid. This official was—is still, let us hope—a jewel. How many seven and sixpences may he not have saved to the nation, even in the very midst of "war's alarms"? Of course, there are cynics who grimly smile at this, and who suggest there are officials who, while strictly watchful of champagne bottles, will let thousands of pounds slip through their fingers unnoted. But then cynical people will say anything.

NOTICES.

To holders of our Certificates of Deposit for Union Pacific First Mortgage Six per Cent. bonds, Union Pacific Extended Sinking Fund Eight per Cent. bonds, and to holders of Union Pacific Six per Cent. Purchase Money Certificates.—The Union Pacific Reorganisation Committee having acquired the main line of the Union Pacific Railroad at foreclosure sales, announces that it is preparing to deliver at an early date to the holders of its above-named certificates, in exchange for such certificates, the new securities applicable thereto respectively. Such holders of our Certificates of Deposit, and of the Committee's Six per Cent. Purchase Money Certificates who desire to have the new securities delivered to them in London, are requested to deposit their certificates with the Bank of Montreal on or before February 1, 1898, and receive in exchange therefor a temporary receipt entitling the holder to such new securities, which will be delivered, when received by us, free of charge against the surrender of such temporary receipts.—For the Bank of Montreal (Signed), A Lang, manager, 22, Abchurch-lane, E.C., January 24, 1898.

The English Association of American Bond and Shareholders, Limited, notifies that it is prepared to receive for payment the following coupons of its certificates:—Coupon No. 24 for half-yearly dividend of 5 per cent. on Bald Eagle Valley R.R. shares; Coupon No. 23 for half-yearly dividend of 3 per cent. on Lake Shore and Michigan Southern R.R. shares; Coupon No. 19 for quarterly dividend of 1¼ per cent. on Central Railroad of New Jersey shares; and Coupon No. 21 for quarterly dividend of 1¼ per cent. on St. Paul, Minneapolis, and Manitoba R.R. shares.

VARIOUS TRAFFIC RETURNS, &c.

UNITED STATES AND CANADIAN RAILWAYS.

Baltimore and Ohio South-Western.—Second week of January, $122,012; increase, $9,951. Aggregate from July 1, $3,716,191; increase, $378,556.

Mobile and Birmingham.—Fourth week of December, $17,357; increase, $7,180. Aggregate from July 1, 177,253: decrease, $30,499. Net earnings for November were $14,301, an increase of $2,245; total for five months, $11,152, a decrease of $43,201. Ratio working expenses, 64·24 per cent. compared with 66·66 per cent.

Quebec Central.—Fourth week of December, $10,459; increase, $507. Aggregate from January 1, $457,543; increase, $60,437.

INDIAN AND FOREIGN RAILWAYS.

Nizam's State Railways.—Receipts for six months ending December 31 show an increase of Rs. 2,53,502.

Mexican National Railway.—1,217 miles open. Approximate earnings for third week in January, $M. 106,271; increase, $6,249.

Chicago Great Western Railway.—Third week of January, $86,520; increase, $13,321. Aggregate from July 1, $3,065,493; increase, $491,486.

A Russo-Belgian company is in course of formation for the development of commercial relations between European Russia and Siberia. The chief object will be the export of Siberian raw products and the import of manufactured goods from Moscow and elsewhere.

The Greek Army.—The first part of the Crown Prince's report on the Greek campaign in Thessaly has been presented to the Minister of War at Athens. It is a remarkable document; but it is unnecessary to quote from it, as it is but a long and detailed conformation of what has been said before—this namely, that the Greek Government entered upon the war without plan of operations or preparations; that there were no reserves to fall back upon in case of defeat, and no attempt made by the fleet to create a diversion. Such an army was doomed to disaster from the first. The wonder is not that it did so little, but that it did anything at all.

The wheat harvest in Uruguay is estimated to yield about 280,000 metric tons, of which about 170,000 tons will probably be available for export.

THE MENZIES GOLDEN RHINE GOLD MINES, LIMITED.

On Wednesday, January 20, before Mr. Justice Wright, there came on for hearing the petition which was recently presented by one of the shareholders for the winding-up of the Menzies Golden Rhine Gold Mines (W.A.), Limited. From the statements of counsel, it appears that the Company was incorporated on February 18, 1896, with a nominal capital of £130,000 in shares of £1 each, the object for which the Company was formed being, according to the prospectus, the acquisition of certain alleged gold mines, called the Menzies Golden Rhine Gold Mines, which said "mines" have since turned out to be worthless. The nominal vendor to the Company was Mr. Charles Christopher Braithwaite, but it was alleged by the petitioner, and practically admitted by the respondent, that the Company was, in fact, promoted by Mr. John Waddington, and that he was the real vendor of the said properties to the Company; the name of the said C. C. Braithwaite (who is a brother-in-law of Mr. Waddington) being used for the purpose of concealing the fact that he, the said John Waddington, was the vendor.

For this wonderful property the consideration paid to the said John Waddington was the sum of £105,000, partly in cash and partly in shares. No definite particulars were forthcoming as to the actual price given by the said John Waddington for the properties, but it appeared that the sum realised by the original vendors (Messrs. Jersoe & Gregory), who transferred direct to the Company, was £4,000 only. In these circumstances, the petitioner desired that a winding-up order should be made with a view of subsequent proceedings being taken against the said John Waddington to set aside the sale to the Company, and to obtain the return of the consideration paid to him. His Lordship was of opinion that the petitioner had made out a *prima facie* case for the winding-up, but, in view of a suggestion which had been made by Mr. Waddington that he should have an opportunity of offering to the shareholders, free of expense, another property in substitution for that originally transferred by him to the Company, his Lordship directed the petition to stand over until March 9 next, so as to afford Mr. Waddington an opportunity of laying a scheme before the shareholders. He, however, intimated that, unless before that date the shareholders were satisfied with Mr. Waddington's proposal, a winding-up order would be made.

In our opinion the Judge acted with great forbearance.

Prices Quoted on the London Stock Exchange.

Throughout the INVESTORS' REVIEW middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the INVESTMENT INDEX published quarterly—January, April, July, and October—in connection with this REVIEW, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the REVIEW almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the INVESTORS' REVIEW any subscriber can follow for himself the movements of securities from week to week, and the INVESTMENT INDEX will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S.F. Snk.Fd. *sinking fund*; Certs., *certificates*; Debs. or Dbs., *debentures*; Db. or D.Stk., *debenture stock*; Pf., Prf., or Pref., *preference*; Prefd. or Pfd., *preferred*; Dfd., *deferred*; L. or Ltd., *limited*; Sh., *share*; Ans., *annuities*; Cu. or Cm., *cumulative*; Gu or Guar., *guaranteed*; Bds., *bonds*; S., Sr., or Ser., *series*; In., Ins., Insc., *inscribed*; Dr., Drgs., Drwgs., *drawings*; Stg., Strlg., *sterling*; Lia., *liable to*; Sp., Surp., *surplus*; Per., Perp., *perpetual*; Ln. *lien*; Lo. *loan*.

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.

The Investors' Review

Vol. I.—No. 5. New Series. FRIDAY, FEBRUARY 4, 1898. [Registered as a Newspaper.] Price 6d. By post, 6½d

The Investment Index.

A Quarterly Supplement to the "Investors' Review."

Price 2s. net. 8s. 6d. per annum, post free.

THE INVESTMENT INDEX is an indispensable supplement to the Investors' Review. A file of it enables investors to follow the ups and downs of markets, and each number gives the return obtainable on all classes of securities at recent prices, arranged in a most convenient form for reference. Appended to its tables of figures are criticisms on company balance sheets, State Budgets, &c., similar to those in the Investors' Review.

Regarding it, the *Speaker* says: "The Quarterly 'Investment Index' is probably the handiest and fullest, as it is certainly the safest, of guides to the investor."

"The compilation of securities is particularly valuable."—*Pall Mall Gazette.*

"Its carefully classified list of securities will be found very valuable."—*Globe.*

"At no time has such a list of securities been more valuable than at the present."—*Star.*

"The invaluable 'Investors' Index.'"—*Sketch.*

"A most valuable compilation."—*Glasgow Herald.*

Subscription to the "Investors' Review" and "Investment Index," 36s. per annum, post free.

The Investors' Review.

Economic and Financial Notes and Correspondence.

The Meeting of Parliament.

On Tuesday next the Parliamentary Session of 1898 begins. Is there anything to hope for from it? Will the men of tongue now assembling guard the nation's interests, watch jealously over the spending of its money, insist upon knowing the real and not merely the official truth about India, about the Soudan campaign, about Uganda, about China, about the "Chartered" Company; pry into affairs all round, and exhibit an enlightened Imperial spirit? We may safely predict that it will do none of these things. Party fights there will be, hot and noisy, and about as real as the pillow-fights of school boys; and party votes without end. But competence in affairs, disinterested patriotism, earnest application to the nation's business—these are qualities the thinking portion of the electorate has almost ceased to look for in the rank and file, or in most leaders also for that matter, of any party in the political arena.

Which one among all the 670 gentlemen of the House of Commons, who may be presumed to be at the post of duty next Tuesday, could take up either the Army or Navy estimates and go through them with an intelligent perception of their import? Not one. We do not blame them; the accounts, as now presented, are unfathomable by mortal man, and in all likelihood intended so to be. Chaotic heaps of figures revealing nothing, under which the truth is buried—truth about wastes and peculations and downright robberies

beyond number, are flung on the table of the House and at sight of them most men flee. They are not to be blamed for that, but they are worthy of the deepest censure, because they have none of them the backbone to insist upon having the accounts presented in a form as clear as the balance-sheet, say, of a respectable company when laid before its board of directors.

Our members of Parliament are in a very real sense directors of some of the biggest businesses in the world—dockyards, ordnance factories, powder factories, clothing establishments, food and fodder depôts, horse-coping businesses, and so on, and they positively know nothing whatever about the industries and commerce they are popularly supposed to control. Knowing nothing, they allow every imaginable abuse to grow and flourish under their very eyes. All they can do is to vote away the nation's money as the wasters in the permanent departments demand it, gabbling over votes involving millions as a formalist gabbles his prayers, and caring less apparently about the misery the waste of these millions may lay upon millions of their constituents than about the management of the House Kitchens. When debates do arise over estimates they are always trivial debates, often ludicrously so; and the intelligent voter looks on and wonders how it will all end. Will King Demos grow weary one day of sending amiable philanthropists, shrewd pushing lawyers, unscrupulous or light-headed demagogues, retired merchants, worthy but fat, mingled with a trooping array of guinea-pig directors, fraudulent company promoters, and gamblers of every shade and degree to be his representative in Parliament and look after his affairs?

China and the Powers.

So far as we can make out, the British position in China is not necessarily weakened by the withdrawal of our demand that Ta-lien-wan should be opened as a treaty port. It must always be remembered that the strength of this position lies in our limiting our demands to "equal rights with every other Power." While Germany contemplated erecting Kiau-Chow into an exclusively German *entrepôt*, we had the right to regard this aggression as an infringement of existing treaties; but when Germany gave way and announced that Kiau-Chow would be an open port we had, and could have, nothing further to say. In like manner the pretensions of Russia to exclusive possession of Port Arthur, and to exclusive privileges over Manchuria, were offensive to us, contrary to treaty, and inimical to the interests of every European Power. But Russia, it is declared, has followed the example of Germany in announcing that Port Arthur will be free, and, as we gather, under the control of the Chinese Maritime Customs Service. If this be the case there remains no necessity whatever for our insisting upon the opening of Ta-lien-wan, and all that is doubtful is whether we should have given way without securing more substantial concessions in other directions. Possibly, however, this may have been done. We have only very imperfect information about what is going on at Pekin, and must guard against hasty judgments, however much we may dread that our Government is being jockeyed out of its supreme position in the country.

There still remains the question of the loan, over which, as was expected, the haggling is immense. Here also it appears to us no harm can come by admitting Germany, Russia, and France to participate in the guarantee if they are so minded. We have joined on other occasions with Continental Powers to guarantee loans, notably loans to Holland, Turkey, and Egypt, and no harm has come of the co-partnery. In like manner, it follows almost as a matter of course that if all the Powers are to have "equal rights" in China, all may claim to have equal share in the responsibilities assumed. If it gratifies the vanity, pride, or whatever you like to call it, of the Powers now worrying around the proposed loan to China to be admitted as participants in its guarantee, there is no reason why their wishes should not be met. We still retain the master position because the bulk of the money must be found here. On Wednesday we were told that the Disconto Bank, Deutsche Bank, together with several firms in Berlin and Petersburg, have joined in providing a loan of a hundred million roubles to China; and we say let them do so by all means, but they have got to find that money outside England, and it will take them all their time to do it, unless it be raised by bills discounted on the London market. Supposing that loan floated, Germany and Russia are really no better off in China than they are now, providing always that we hold fast by our "treaty rights." In this our strength lies quite as much as in our fleet, although a strong fleet must be kept in Chinese waters to secure respect for them. And the more strength we show, the more determined we appear to let no one get before us either with ports opened, concessions, or anything else, the safer will peace be. To talk about war is folly. There ought to be no war, and if war does break out it will be due to gross mismanagement either in Pekin or in Downing-street.

President McKinley and Silver.

Too much must not be made here of the ambiguity of Mr. McKinley's language at the National Banquet a week ago in New York. In saying that it is the duty of the National Government "to regulate the value of its money by the highest standards of commercial honesty and national honour," he probably went as far as his position allowed him. To say right off, that the standard money in the United States shall be gold money, would have caused such a division among his supporters as no party man could encounter. Readers know very well our opinion regarding the position of the United States in the matter of its currency. Nothing could be weaker or more unsatisfactory. It is a position calculated to bring a great disaster upon the country. At the same time, it is not an immediate disaster, and were the country to be governed economically and wisely in other respects, there is no particular reason why the disaster should ever come. The root of the weakness is in extravagance.

Suppose the worst, however, and that, after a brief spell of prosperity created by last year's good harvest, the United States should fall back into a condition of semi-insolvency—a condition forcing its Government to suspend the redemption of its paper money in gold altogether—it does not follow that the railway and other corporate securities of the Union should also dishonour their definite obligation to pay in gold. Great hardship there would be, and also here and there default, but we believe the country to be great enough and intrinsically wealthy enough to insure payment of the interest upon every well-secured obligation created within it. Also,

we believe that there is a spirit of righteousness among the people of the United States which would assert itself were they once face to face with a great national danger. It must never be forgotten that the best side of the American people is not usually visible to us. To an extraordinary degree they are a patient, law-abiding, and industrious people. If they go astray on false economic by-paths and inflict injury upon themselves, or allow it to be inflicted, by cruelly devised tariffs, by monstrous steals like the Pensions Fund and the universal malversations of a corrupt political class, it is not because they are themselves in sympathy with dishonesty in high places, but because they are not yet fully aroused from their indifference. Let a crisis of a dangerous kind stir them up, and we should lose all faith in the future of democratic communities if we did not believe that the American people would rise to the occasion and set the wrong right.

The Railway Share Debenture and Trusts.

Mr. C. C. Macrae is to be congratulated on the manner in which he has piloted the twin trusts—the Railway Share Trust and Agency and the Railway Debenture Trust—past the shoals and quicksands of the past. To be able now to say that both these Trusts have a surplus value in their assets over liabilities, or very nearly so in the one case, is proof of considerable tact and foresight. There is, however, one matter which we cannot refrain from alluding to, and that is the manner in which the revenue of the Railway Share Trust and Agency is reported. This is simply stated as "gross profits, £66,078." Now, the total investments and loans of the Trust come to £832,073, and such a profit represents a little over 8 per cent. upon this total. It is impossible to imagine that such a return is obtained in these days from interest upon investments alone, and the revenue must be assisted from other sources. Would it not, therefore, be as well to divide up the revenue, so as to distinguish the sources, or the main sources? If profit on realisations or commissions upon new issues constitute a fair proportion of the amount, such a matter is of vital importance to shareholders, or intending shareholders, because such profits only assume importance at times like the present, and cannot be looked upon as stable revenue. To grant such information is very usual, and now that the Railway Share Trust has been lifted clear of its old disrepute, the reform might well be instituted.

United States Pension Scandal.

We are glad to see the New York *Commercial Chronicle* is at last taking this subject seriously in hand. In a very interesting article published by it on the 15th ult. it gives the history of the growth of this fraud upon the American people. According to this, in 1866, the first full year after the close of hostilities, the pension expenditure was only $15,000,000, and at the beginning of 1872 General James A. Garfield declared "that we may reasonably expect that the expenses for pensions will hereafter steadily decrease, unless our legislation should be unwarrantably extravagant." Yet in 1878 the pension expenditure had risen to $61,000,000, in 1882 to a hundred millions, and so it continued to mount up until in the fiscal year 1893 the monstrous total of $159,357,000 was attained. The money obtained by dishonest taxation, and dissipated in this way, was at this last date, therefore, nearly five times the amount which General Garfield, twenty-one years before, had declared to be the maximum under honest and economic administration. What can we say of a democracy which allows an infamy of this kind to be perpetrated upon it without serious protest, without shock, apparently, to its moral sense? We can only think that a people content to endure a thing of this kind deserves a master and not liberty; a master like John Rockefeller.

But it will not endure for long masters of this type. Of this we may feel sure. All we dread is that the infamy might last long enough to renew the smouldering antagonism between North and South. The treatment the conquering North has bestowed all through upon the South since the close of the Civil War has been brutally selfish in the extreme. One may almost say that all progress has been denied to the South by the fiscal policy of the Republican Party—the victorious party. Southern ports have been left to languish for want of trade—only in recent years have railway systems been formed and extended in a way calculated to develop those ports. But high tariffs have forced, and still force, the bulk of the foreign trade of the Republic to pass through Northern ports, and, above all, through the dominant port of New York. The handicap this means to the South is of a weight unmeasurable, and therefore progress in the South—the fairest, and naturally fattest, portion of the Union—has been slow. Its maltreatment at the hands of the "machine" politicians of the North has only to be continued long enough to raise a new rebellion.

The Indian Frontier Shambles.

Sir William Lockhart, Commander-in-Chief Designate of India, holds the opinion that "the campaign against the Afridis must be renewed in the spring." Of course. Our heroic and "patriotic" native army of India must have further lessons in the chivalrous act of waiting until the miserable wives and children of the hillmen have crept back to their huts in order that they may be mercifully and safely shot down in their sleep from a distance. British "honour" is in this way so nobly vindicated. The Afridis will not submit this winter, Sir William thinks, but his generous spirit is much comforted by the thought that "severe loss of life has already been inflicted on them, and their country terribly devastated." How noble and generous a profession is that of the warrior! How he steels his heart against the wail of the hungry and the dying, and gloats over the thought that the weak and defenceless shall be left shelterless among the mountains!

What good comes to us, to any one in India, in the border lands beyond the frontier, through the exercise of all this cruelty? Good? Who spoke of good? It is necessary to "punish" these "rebels" for daring to defend their homes against the British invaders; or if not, no matter. Soldiers are made to fight, and as well fight the mountain tribes as anybody else. It keeps the hand in, and enables a few survivors to wear the Victoria Cross. "Only, confound it, we never supposed these beggars could fight so well." Having surprised us in this respect, "British pluck" demands that we should now go in and win, although the winning should cost us India. Beautiful all this, is it not? And we now wait for Parliament to ecstacise itself over these "heroes." Hip, hip!

The Lehigh Valley Railway.

We are much given in this country to plume ourselves upon the excellent management of our railway companies. There are no others like them in the world, we assert, and the assertion may be partly true; but we are by no means perfect; and if other United States railroad corporations take the same course as the *Commercial Chronicle* points out that this Lehigh Valley Company is now taking, the time is not far distant when we shall have to hide our diminished heads, and confess that, compared to them, we have managed our iron highways with reckless extravagance, often amounting almost to open dishonesty. A new management, it appears, has taken hold of the Lehigh Valley Company, and has been putting its accounts in order—and one thing it has done has been to revalue its rolling stock. This revaluation disclosed the fact that the book value of the stock was nearly $6,000,000 above its true value, engine and passenger cars alone exceeding their book value by rather more than half a million dollars. Deducting this from the ascertained loss the company has written off more than $5,000,000 from its capital account on that head alone. Not only so, but $1,500,000 charged to capital on improvements has also been written off, and a sinking fund has been instituted to provide against the exhaustion of the coal mines owned by the company. Nor is this all. The costs of all improvements made on the collieries during the year have been charged to working expenses and the interest on the Lehigh Valley Coal Company's bonds has now been made a direct charge on the income of the railroad, instead of merely on its profit and loss account. Interest and rents accrued but not due are now entered in the balance-sheet, and liabilities of a floating kind are classed as "current," "deferred," or "contingent," according to their character. If this system of clear book-keeping is maintained, as we have no doubt it will be, and spreads to other railroads in the Union, as it must in time, there cannot be the slightest doubt that the position of these great Corporations will soon be decidedly superior to our own so far as their capital account is concerned, Who ever heard of an English railway company revaluing its working stock and writing it down? We go on here in the happy-go-lucky style of charging everything to capital that can be charged, and write off nothing from capital spent in the past, however necessary it might be; and the consequence is that the dead weight of capital upon our railroads, as we have preached for many years, is steadily piling up until it must one day cause even the very best among them to fall into a doubtful position. We commend this American example to British boards of directors.

France and the Sugar Bounties.

It would seem as if Mr. Chamberlain were right in his anticipation that the forthcoming International Conference at Brussels would lead to the abolition of the sugar bounties. Germany has already pretty plainly shown her readiness—her anxiety, indeed—to give up these vexatious imposts. The French Chamber of Deputies is now to have an opportunity of formulating its opinion on the subject if so inclined, M. Castelin having given notice of his intention to introduce a Bill for the suppression of the bounties in France at any date that may be fixed by the Brussels Conference. It is not improbable that he may have given this notice with a view to the coming elections, but even so it indicates his opinion, as at least a political expert, that the proposed abolition would be popular with French constituencies; and of that, we believe, there need be little doubt. Frenchmen are getting to understand the sugar bounties. They are tiring of taxing themselves for the supply of cheap sugar to England. Even manufacturers, for whose benefit the bounties were imposed, have discovered that they are not the unmixed blessing they expected. M. Paul Leroy-Beaulieu estimates that for France alone the cost of these bounties for the current year will probably exceed £4,500,000. The only wonder is that French taxpayers have been content to bear this burden so long; that they have not long ago insisted on the passage of a much more drastic law than that to be proposed by M. Castelin, careless of what other nations might do.

By the way, the British Consul at Odessa, in his recently issued report on the agriculture of that district—in which, we may note, he tells us that there will be a severe wheat famine in Southern Russia this year—gives a valuable hint to the West Indian sugar growers as to how they may help themselves in spite of the sugar bounties. The West India Commission showed us that by the crude methods of manufacturing sugar practised in the West Indies, the growers lost about a fourth of their yearly produce—about 2,000 lbs. of sugar per acre being left in the canes after crushing. Now in Russia this enormous waste is avoided by having the presence and advice of a practical chemist while the sugar is being manufactured. In Russia, again, the utmost care is taken to grow only the best varieties of beets reared from selected seed. In Barbados and British Guiana they are trying to improve their canes by growing better varieties from seed; but the West Indian planters go on in the old ruts—losing 25 per cent. of the sugar by bad crushing, and depending on their old canes as if they were inexhaustible and not to be improved upon. Here is a hint, also, for Mr. Chamberlain in the application of his grant-in-aid. Let it be utilised so far, at least, in instructing the planters in the most modern methods of crushing, and in providing seed for the growth of better canes. He will thus be rendering the Island a signal service of permanent value. The planters might have thought of it themselves had they been as alert, intelligent, and energetic as they ought to have been. The present misery of their position is, in fact, little owing to foreign bounties.

Since writing the foregoing we have received from Mr. E. K. Muspratt, President of the Financial Reform Association, a letter containing a trenchant criticism of the whole system of grants-in-aid. We regret that we have not space to give the letter, though we entirely agree in its general drift and tenor. As a rule these grants are bad in themselves, and ought not to be encouraged. We had considerable searchings of heart before coming to the conclusion that, in the case of the West Indies, some financial assistance, applied in ways suggested by the majority of the Sugar Commission, might be desirable, if not necessary. But our support was given on strictly conditional terms. A mere dole to the planters, without a careful supervision of its expenditure, would be wholly pernicious—worse than waste. Better for the colony that it were thrown into the sea. We have no great sympathy with

the sugar-growers. It is certainly not the bo that have injured their business; it is mainly their own lack of energy and intelligence in facing the competition which other cane-growing colonies have been forcing upon them. But a little temporary assistance at the right moment may help in the reformation of even our prodigal sons, and so set them on their feet again. This the grant-in-aid may be made to do. It may also be used—nay, ought to be chiefly used—in the encouragement of peasant proprietorships and in the fostering of new industries. In this way only can the grant be made of use to the colony at large, and it ought to be given for the benefit of the colony, not for the private advantage of certain individuals. If Mr. Chamberlain arranges to administer the grant on some such lines, we still think it may be of signal service to the islands; but if doled out to individuals, without a thought as to how it is spent, it would be money wasted. Thus administered it would assist in hastening the ruin of our West Indian colonies.

After the Struggle.

The engineers' strike is over, and the men are presenting themselves for work faster than the employers can find it for them. So many of the vacancies have been filled up by non-union men—some establishments having no vacancies left at all—that it is probable many of the men must remain unemployed for some time yet. But we are glad to see that employers are showing not the slightest trace of vindictive feeling, and we have no doubt that every man who has gone through this prolonged struggle, fighting his hardest for the side he believed in, will find employment without undue delay, either in his old workshop or in some new one, where no grudge will be borne him for the part he may have taken in the long-contested battle. The hatchet seems to be buried on both sides—certainly on that of the employers; for one of them at least has written to the *Daily News* suggesting practical help for the workmen who may have had to run in debt owing to the length of the struggle and the meagreness of the assistance rendered by the union to the strikers. The employer backs up his suggestion by a cheque for £100. We mention the circumstance only as emphasising the fact that the employers are putting ill-feeling from them, as men prepared to work cordially with their workmen. And this cordial spirit of co-operation is now needed more than ever, and on both sides, too. Both have lost heavily, but the workmen more seriously than the masters; the loss to the workers we have seen estimated at three millions sterling. It is probably more rather than less. To make up that loss alone should be inducement enough to make them work in cordial goodwill with their employers; but if the necessity of coping with the rivalry of foreign nations is taken into account, how tremendous is the inducement to work closely together in aiming at the same end—the securing of England's lead in the trade and commerce of the world.

In this connection it may be of use to call the attention of British manufacturers, as well as workmen, to some interesting bits of news retailed in a recent number of a journal called *American Trade*, the organ of the National Association of Manufacturers of the United States. There is something, for example, of novelty in the announcement that a Pittsburg company has an order in hand for 24 tons of malleable iron for a Sheffield firm, and that "the company's business from London, Birmingham, and Sheffield has increased rapidly for the past eighteen months." American cotton manufactures, although higher in price than British goods, are said to be cutting these out in the Chinese markets. Large Russian contracts for hydraulic machinery have been secured by a Cincinnati firm; the Czar is getting an electric launch built in New York; South Africa is taking quantities of valves, machine fittings, and leather belting; tools in large number are being shipped to France; considerable shipments of aluminium have lately been made to Japan, Germany, Italy, Austria, and Sweden; 5,000 tons of Alabama pig-iron were recently despatched for Kobe and Yokohama. These are only a few of the samples boasted of in the American trade journal. Of course the best is made of them, and it may be that English firms are doing business with the extent of which they are perfectly satisfied. Still, it is interesting to know what our cousins are doing; and if the knowledge teaches nothing else, it seems to suggest that this is not a time for our own producers to be quarrelling among themselves, but rather to be working in cordial co-operation for their own benefit and the improvement of the trade of the country.

The State of the Army.

Sir Charles Dilke is writing a series of papers in the *Daily Mail* which should be read by every tax-payer. His object, of course, is to emphasise the necessity for more men, more horses, more artillery, and so on, and possibly he is right. Before, however, sanctioning any further outlay, the nation has a right to know what becomes of the money already devoted to these purposes. Year by year, the cost of the Army grows until it threatens to become an intolerable burden to us. Yet, if we may believe Sir Charles, the machine provided by the money grows more and more imperfect. The first question, therefore, which has to be answered is who steals the money? That millions are stolen and squandered by corrupt and incompetent management every day of our lives is a fact about which there can be no doubt whatever. Will the reader ponder this matter and stir up his M.P. about it; and meanwhile try to grasp the significance of the following passage from Sir Charles Dilke's article in yesterday's *Daily Mail*:—

> This condition of the Royal Artillery constitutes the most absolutely disgraceful charge which can easily be proved, and it deserves, therefore, some further attention. In other countries horses are not counted as fit for war under six years of age. We count them at five. We have only in the whole of our British establishment of cavalry and artillery and mounted infantry together, 10,000 horses between five and thirteen years of age: and the number of such horses, and the total number of horses in the artillery, taken by itself, have greatly decreased in recent years. In the last twenty years, for example (but the decrease has been steady, and has lasted more than twenty years), the horses of our artillery of all ages have declined from 6,000 to very little over 4,000 in number; and in the meantime the Army has increased; while it must be remembered that for the militia and volunteers there has never been any horse or field artillery at all. The horses required for the artillery at home are nearly 8,000, or double the total number of all ages, fit or not fit for war, which are maintained The deficiency of cavalry horses is even more startling than the deficiency in artillery. The cavalry at home would require, for war, between 9,000 and 10,000 horses, and they possess about 3,600 horses between six and fourteen years of age.
>
> The deficiency in the regular Army as regards artillery and cavalry, of course, cannot be supplied from militia or volunteers. As regards infantry, it is admitted by the Government that the defi-

ciency of the militia in men is great, and in officers great and increasing—having grown from a deficiency of 591 officers in 1896 to a deficiency of 641 officers in 1897. The militia, indeed, though an excellent, is very much—as far as numbers go—a paper force. There are over 17,000 men required to complete the establishment. There are 14,000 men absent. There are over 31,000 men who are liable to Army service, and they are the best men in the militia, and the result is there are, according to Sir A. Haliburton's figures, 68,000, and according to mine only 58,000, men left for the militia, who are very short of officers, and who include a certain number of men who have fradulently enlisted in more than one regiment, and who are counted twice.

"Sea Interests of the German Empire."

We know how the German Emperor hankers after a great Navy; how at Kiel he assumed, not without some success, the character of Bombastes Furioso, in order to rouse German enthusiasm on the subject; how the occupation of Kiao-Chau was used as a naval object lesson with the same aim, though this squib has since been somewhat damped; and now we know, with the help of an excellent summary from the British Commercial Attaché at Berlin, how the German Government, in its sober moments, regards the subject of the "Sea Interests of the German Empire." The story is interesting though it must be remembered that the figures are those of the German Government, and are misleading in some important respects. From 1872 to 1897 the German population increased by 30 per cent., while the foreign trade improved by 60 per cent. The improvements in over-sea trade from 1873 to 1895, were for North America, 128 per cent.; for Mexico, Central and South America, 480 per cent.; and for Australasia and West Indies 480 per cent., and for Australasia East per cent. In 1896 the tonnage of German shipping a 475 Hamburg exceeded that of the English for the first time, the German tonnage being 2,914,913, and the English 2,734,528. Since 1871 the German Mercantile Marine has more than tripled its capabilities, and since 1880 has more than doubled them. German shipbuilding has kept pace with the increase of the Mercantile Marine. There has, at the same time, been a considerable consolidation of internal affairs; and while foreign luxuries have increased, Germany depends less upon foreign capital than ever before. Her high sea fisheries have greatly increased; there is more regular employment for the home population, and emigration has greatly diminished. These statistics, as we have said, are so far misleading. The fact that the Hanseatic towns were added to the German Customs Union is ignored, and this vitiates the figures while greatly reducing the 60 per cent. increase claimed in German foreign trade. In fact, the increase is only something like 9 per cent. The increase, however, is still fair. It is for the protection of this expanding foreign trade that the Government declare an increase in the Navy necessary. If the Germans could be sure that the chief object was the peaceful development of trade and commerce, we dare say they would cordially sympathise with the Government aspirations; but is it so?

The Copper Statistics.

Up to the end of January these show the remarkable decrease of 2,209 tons in the stocks, and their total now stands at 29,746 tons. This is by far the lowest total recorded in the past eight years, and the decline is a little puzzling to those who hear so much of increased production by the mines. The "bulls" of the metal and of copper shares ascribe the decline to the general expansion of consumption, especially in regard to electrical enterprises, but if this is the case it is astonishing that the metal market is not stronger, for the present price of £49 7s. 6d. per ton for copper compares with £51 2s. 6d. a year ago when the stock stood at 32,307 tons. Whatever the reason may be, the decline in the visible supplies has been pronounced, and in the following table we set forth the leading figures for the last few years:—

Jan. 31.	Total Supplies. tons.	Total Deliveries. tons.	Stock. tons.	Price per ton. £.
1892	7,898	6,480	57,462	44⅝
1893	11,773	9,011	58,507	45⅝
1894	11,947	12,090	47,152	41¼
1895	12,840	12,056	54,848	40¼
1896	15,639	15,328	46,128	43⅞
1897	15,087	18,307	32,307	51⅛
1898	15,158	17,367	29,746	49

The most striking feature in this table is the growth of deliveries which have kept ahead, almost continuously, of the increase in production. Taking the figures by themselves one would imagine that the demand for the time being is in excess of supply, but we must not forget that we are dealing with a market which at times developes great speculative activity, and so the statistics must be treated with caution. In any case, the opening out of new mines and the extension of operations by the older concerns are going on apace, so that the moderation with which the market pitches the price of the metal may be well advised, hidden stocks or none.

A Well-drawn Report.

A word of praise is due to the East-End Dwellings Company for the manner in which the Board draws up its report. The company works a number of blocks of industrial dwellings, and the report not only states the gross receipts and expenses of each block in detail, but it together also full particulars of the cost of the properties, hold prices with the length of the leases upon the lease-in each property, and the amount of depreciation allowed the company case. In spite of this wealth of information, other company seems to prosper, and it would be well if The stringent ...ies of a like class would follow its example. Act compelling ...egulations of the last Building Societies' the amount of ...uch societies to give schedules showing produced, have ...roperty in hand and the revenue it the good societies, ...lly had a beneficial influence upon increase of informati...nd it by no means follows that an of a company. Yet ...on is harmful to the market value harbour this notion. ... the majority of boards seems to

Disapp... ...earing China Teas.

British growers of ... teas are congratulating themselves upon the fact that, al... though the consumption of tea in the United Kingdom ... last year was the largest ever known, the proportion ... of Chinese growth in the amount consumed was the ... smallest ever known. Thus with 231,399,778 lb. of tea ... used in this country in 1897, only 17,242,247 lb. came f... om the Chinese producer, and no less than 210,000,000 ... lb. were supplied by the British-owned plantations ... India and Ceylon. This brings out a percentage of ... 91 per cent. of British grown tea to 7 per cent. of C... hinese growth, the balance being made up of Java ... and Japanese teas. In 1896 the Chinese percentag... e was 9 per cent., and in 1895 it was 12 per cent., wh... ile if we only go back ten years, we find its percentag... e no less than 49 per cent., and in 1866 it represented ... 5 per cent. of our consumption. The

largest consumption of Chinese teas in this Kingdom in one year was, we believe, in 1876, when 123,364,000 lb. were used. Last year, as we have stated, little more than one-eighth of this amount was taken by the British consumers. Glad as we are to see India and Ceylon coming to the front in the way here shown, we yet cannot help regretting that China should have been driven so rapidly to the wall. Her people have not yet had time to find a new industry to take the place of the one they have lost, and must suffer much in consequence.

A Brewery Rara Avis.

The report of the Bristol Brewery, Georges & Co., Limited, dealt with in the usual column, is like no other brewery company. Instead of swelling out its debenture issues, these have been kept stationary for years past, and their total only amounts to £162,000, as against £280,000 of preference, and £320,000 of ordinary share capital. Fresh money needed for extending the business has been found out of revenue, and consequently the balance-sheet is one of the strongest we have seen. The truth is this Board was wise in its generation, and acquired control of an enormous number of public-houses a long time back, obtaining the money by issues of share capital at good premiums, which were put to reserve. Since then the money for development upon a moderate scale has been found by deductions for depreciation, which in the last three years have led to a reduction in the balance-sheet value of the brewery premises, plant, &c., by £40,000, and enabled the properties to be increased by about £67,000.

Mr. Blake and the "Chartered."

We hope the shareholders in the British South Africa Company, as well as the public in general, have made due note of Mr. J. Y. F. Blake's charges against it on many counts, and about all in regard to its treatment of the natives now under its sway. There was a letter of this gentleman's in yesterday's *Times* reiterating these charges in reply to Mr. Selous, and he winds up with the suggestion that the committee of last session should be re-appointed to investigate them. Will the public take up this demand and insist upon knowing the truth, or is everybody so bewitched by the tawdry "Imperialism" under which the company's misdeeds have been hidden, as to be willing that lapse of time alone may bring the truth to light? Before deciding the electorate should remember that the official report of Sir Richard Martin substantially bears Mr. Blake's testimony out, and that however ready men may be to lose their money, as they have irretrievably lost it to a few noble and other marauders, the nation at large cannot afford to rest under the stigma of accusations that would have made the spadassins of Cortez blush with shame.

More Gold Discoveries.

The dark and dreary places of the earth—sterile in everything else—are all, apparently, being lighted up by gold. Let us hope that the avaricious and the sanguine will not be too eager to rush upon disappointment. Recent letters from Dawson City—written in December last—speak in anything but an enthusiastic way of the prospects there; but the preparations for the spring rush to Klondike are on a gigantic scale. It will, apparently, be greater than anything seen before, throwing the Californian scramble and the Ballarat rush completely into the shade. But the curiosity of the gold-seeker has been further pricked by a comparatively modest discovery in Siberia. If this should prove well-founded, and the search show fruitful results, the rush thither will be chastened by the paternal admonitions of the Czar and his Government. But here, again, we have Labrador. A Canadian Company went there to establish a saw-mill, and they are said to have found gold in such quantities that it is presumed the saw-mill was forgotten. At all events, an expedition is to be fitted out for purposes of exploration and exploitation. It is not impossible that gold may yet lurk in Labrador; for it is on record that, in 1565, Admiral Frobisher, when in search of the North-West passage, discovered gold in such quantities that in three years he brought to England seventeen shiploads of the precious metal. If gold is still to be found in any quantity there, it is not a little surprising that it should not have attracted attention long ago. Then, again, on the Liard River, near its confluence with the Mackenzie River, we are told of a rich find of placer gold. The news comes from the Hudson's Bay Company's factor at Fort Simpson, and may, therefore, be trustworthy. We may hear of gold in Greenland next.

The Lake George Mines.

The latest aspirant to fame of the Exploration Company's group of mines—the Lake George Mines—is proposing to issue more capital. "In order to repay advances made by the agents of the company in Melbourne," 30,000 shares will be issued *pro rata* to the shareholders at 30s. apiece. By the side of the market quotation of $2\frac{3}{8}$ for the shares, the offer looks a generous one, but it must be remembered that this quotation is probably about as unreal as most others created in the approved manner of the Exploration Company. It is quite the most modern way of paying a dividend to issue shares at a substantial reduction upon the market quotation, but the champion of this new policy—the British South Africa Company—has a sorry record, despite the fustian patriotism in which it is arrayed. It would be interesting to learn what working capital has been assigned to the Lake George Mines at the start, and also the terms upon which the "advances" were made by the agents. We presume the agents are Gibbs Bright, & Co., but of this we cannot be certain owing to the mystery that veils the inception of this new wonder. If Gibbs, Bright, & Co. are the agents, we may be sure that the terms were not light. The new issue is 'guaranteed" in case it is not taken up by the shareholders, and we should like to know what the terms of this guarantee are. It is usual nowadays to publish this information, but "Lake George" is not meant, it would appear, to be usual in anything.

Baron Cigarettes.

The active manner in which the Exchange Telegraph Company quotes the shares of the Baron Cigarette Company upon its tape, is now explained by the appearance of the report. This document is likely to give an outsider such an unduly favourable opinion of the shares that he might easily buy them in a fit of generous enthusiasm. Not only does the concern declare a dividend of $7\frac{1}{2}$ per cent., but it writes £10,000 off its patents, and carries £11,336 forward. But the profit and loss account runs for sixteen and a half months, while the dividend is apparently only paid for a year,

so that the return on the period involved is only a little over 5 per cent. Then of the £29,673 net profit, no less than £19,022 is produced by the sale of the South American and Cuban patent rights, and the company has taken £7,245 in shares of the company that bought these rights. After writing £10,000 off the "Patents," their value in the balance-sheet still stands at £91,679, and they constitute the only important assets, outside debtors and stock, the company has to set against the £115,000 of share capital.

The San Paulo Railway.

Some time back we went carefully into the position of the San Paulo Railway, and showed that while its monopoly is rather arbitrary its legal position was unquestioned. Much of the opposition to its paramount position, however, should have died away since then, for the fall in the Brazilian exchange has led to a serious drop in its charges, and it is now busily engaged in doubling its line, which will mean that traffic can be handled more freely. Those behind the Mogyana Railway Company, virtually, we believe the Paulista Railway Company, are still endeavouring to make use of the authorisation to build lines whereby San Paulo and Santos would be connected by a circuitous route. It must be circuitous because the monopoly of the San Paulo states that no company can build a line running in the same direction as its own for about twenty miles on either side of its line. The new project evidently proposes a line that will run at some distinct angle to the San Paulo, whilst within its monopoly area, and then parallel to this company's road when once outside this area. Such a scheme was peddled all round Europe some years back by the Paulista Railway Company without success, and the doubtful undertaking, one would have thought, should receive little support here now, where the whole of the capital of the San Paulo company is held. Too often, however, in ignorance one group of British capitalists is induced to enter into contest with another, just to satisfy the desire of bankers and brokers to pocket a smart commission.

Advertisements.

The subjoined letter raises a question of too much importance to be dealt with in a note. Therefore, what we have to say upon the subject will be found in the leader, headed "Concerning Advertisements," on another page. Unquestionably a moral responsibility is involved in the character of the advertisements newspapers insert. We define elsewhere how we have attempted to recognise this responsibility:—

Sir,—As a small investor who looks to your review for counsel and warning, may I be allowed to question the advisability of admitting such an advertisement as appeared on the back of the cover of your last number? The "Mount Lyell field" is an interesting subject, but information conveyed in such a manner is open to suspicion, and careless readers are apt to overlook the boundary that separates the advertisement pages from the editorial columns —Yours, Robert Cornish.

Sir J. Gordon Sprigg met the demand of the Dutch farmers for protection for their cattle by declaring it useless, as there is no marketable stock to protect. He was willing, if the Orange Free State would concur, that the meat duty should be suspended for three months until Parliament could deal with this question.

Queensland seems prospering agriculturally. The total number of acres under cultivation last year was 364,000, against 323,000 in 1896. 93,700 acres of sugar-cane were planted, and the produce of 83,500 acres was crushed, yielding 105,000 tons of sugar. There were 54,000 acres under wheat, producing 313,000 bushels, as compared with 36,000 acres in 1896, and 801,000 bushels.

Rand Deep Level Mines: An Investigation.—I.

The "Kaffir" Market has recently excited a certain amount of attention owing to the commencement of gold production by a number of the deep level mines, and the near approach of others to the same stage. During the past two years, in spite of the economical and political troubles in the Transvaal, considerable progress has been made in developing and equipping these properties; the money in the majority of cases having been found by the South African financiers controlling the companies. Six deep levels are now crushing, the Geldenhuis Deep, Rose Deep, Village Main Reef, Nourse Deep, Bonanza, and Crown Deep; while five others, the Jumpers Deep, Langlaagte Deep, Durban Deep, Glen Deep, and Robinson Deep, are expected to start during the next three or four months. The Simmer and Jack Proprietary, which is partly an outcrop and partly a deep level, has also commenced work with an increased reduction plant. Viewed from a mining standpoint, the returns from the deep levels now producing appear to be fairly satisfactory; but if examined in relation to the high prices ruling for the shares, there is nothing to warrant an excess of enthusiasm. On the other hand, it is difficult to understand on what grounds the present high level of valuations can be maintained, unless, indeed, purchasers are satisfied with a prospective return of only 4 or 5 per cent. on their money. Prices are again nearing the point which they reached during the insane "boom" of 1895, when the most absurd predictions were indulged in as to the richness of the mines, followed, it will be remembered, by the disastrous collapse which commenced three months before the Jameson raid, and compassed the ruin of many thousands of speculators. The lowest water-mark in the "Kaffir" Market was touched in April of last year, when, owing to the persistent shrinkage of values brought about partly by alarm at the political situation in the Transvaal, and partly, no doubt, by interested operators, a semi-panic occurred. Rand Mines, which in 1895 went as high as 44, and at the Jameson raid stood at 21¼, fell to 16⅛. Since that time a steady but gradual appreciation has taken place in all Kaffir mining shares, in which deep levels have taken a prominent place. Rand Mines are now quoted at about 3½.

In April, 1897, the seventeen deep level mines dealt in on the London Stock Exchange bore a market valuation of fourteen and a-half millions sterling; to-day these same shares are appraised at £29,000,000, a rise of 100 per cent. The appreciation in the shares of South African Trust Companies, whose principal holdings consist of deep levels, is even more pronounced. Six of these concerns, in April, 1897, were valued at £13,500,000; to-day they are standing in at approximately £29,750,000; a rise of 120 per cent.

Is this large increase in values warranted by the prospective dividend capacities and lives of the companies? One thing we know, the movement has not been a natural one arising from a public demand for such securities, it has been created by fictitious buying and other manœuvres directed by the South African financial houses which control the "Kaffir Circus." For if there is one thing certain about the deep level market, it is that so far the public have withstood all temptations and refrained from joining in the gamble. If it is

wise it will continue to do so. The prices now reached are fanciful and unhealthy, and although the mines may be temporarily manipulated to give some semblance of stability to the structure, sooner or later the inevitable collapse will occur, and things again find their natural level. That there can be no two opinions as to the prices of deep level shares being unduly inflated a merely cursory examination will serve to show.

The seventeen deep level mines dealt in on the London Stock Exchange bear a market valuation of, roughly, £29,000,000. These companies are in debt to the tune of £2,000,000, and will require at least an additional £3,000,000 to prepare them for the producing stage, bringing up their total valuation to £34,000,000. Now it is only reasonable to expect a prospective annual return of at least 12 per cent. on this sum. Out of this, be it remembered, amortisation against the exhaustion of the mines has to be provided for, which, if the average life be twenty years, will leave only about 8 per cent. as actual interest. So that, not taking into account the item of deferred interest while the mines are in the preliminary stage of preparation, there should, within a reasonable period, be a probability of these seventeen companies being able to earn annual dividends aggregating £4,080,000, to justify the present level of prices. Can they possibly do this? In 1896, the twenty-two outcrop mines of the Central, or richest part of the Rand, distributed 11s. 6d. for every ton of ore crushed. The average for the whole of the fields for the same year was only 7s. In 1897, the dividends declared work out at 12s. 6d. per ton, including such rich mines as the Robinson, Ferreira, Crown Reef, and City and Suburban on the one hand, and poor mines which made no distribution on the other. The seventeen deep level mines are distributed more or less along the whole length of the fields; and, therefore, even allowing for improved economic conditions, it is improbable that they will be capable of earning an average distributable profit of more than 15s. per ton; while, as a matter of fact, the actual results are likely to be much lower. To earn £4,080,000, at the rate of 15s. for every ton of ore, will necessitate the treatment of 6,500,000 tons annually, and to do this 3,700 stamps will have to be employed. If the profit should only amount to 12s. 6d. per ton—which is far more probable—4,300 stamps will be required. When it is stated that fifty Witwatersrand outcrop mines, the majority of which have been in existence for nine or ten years, and occupy the whole length of the fields, are to-day only utilising 3,500 stamps, it will be recognised that there is not the remotest chance of the seventeen deep levels being able to carry out this condition—at any rate for a good many years to come. It is not estimated by their most sanguine advocates that they will have more than 2,200 stamps working even after the lapse of three or four years, and, as with the outcrop properties, many of the deep levels are pretty sure to prove failures, 1,800 stamps will probably prove to be nearer the actual number. The average return on the present valuations of the shares is, therefore, necessarily limited, and with 1,800 or 2,000 stamps can only be extremely small. This alone should demonstrate that ruling prices for deep levels are artificial and absurdly inflated.

There is an old saying, "Convince a woman against her will and she will hold the same opinion still," and this is also very true of the speculator in mining shares. He will tell you, "I do not care a brass farthing what interest I am likely to get on any varied assortment of shares during the next two or three years; show me that a rise is justified, or, rather, probable, in any particular share, and I am game for a gamble." It is in deference to such arguments that we now propose to descend to a little more detail and examine the prospects and positions of a few typical deep level mines. One of the most insidious, although certainly one of the most fallacious, of all the decoys which are being utilised to induce the public to buy deep level shares at inflated values, is the so-called comparison of the "selling price per claim" of deep levels and outcrops. The *modus operandi* is somewhat as follows: First of all, the selling price per claim of an outcrop mine is ascertained by taking the total market valuation of the company and dividing into it the number of claims owned, the result being the "selling price per claim." (A Transvaal mining claim, it must be explained, is equal to about one and a hal English acres, and the dimensions of all Transvaa mines are expressed in so many claims.) Thus, the Geldenhuis Estate Company possesses about forty unworked claims, its capital is £200,000, and the current price of the shares is 4⅜. The market valuation of the mine is, consequently, £875,000, and the "selling price per claim" is roughly £22,000. The market value of a certain unit, in which the size of the capital and area of the productive part of the property are both taken into account, being found, it is then apparently an easy matter to draw comparisons with other mines, including deep levels. So the deep level advocate proceeds to point out that, with Geldenhuis Deep shares standing at 6⅞, the mine is only selling at £10,000 per claim (vide map issued with Consolidated Gold Fields 1897 report), and as the claims of the deep level contain as much gold as the claims of the adjacent outcrop company—the Geldenhuis Estate—the former is greatly under-valued. He then leaves it to be assumed, *q.e.d.*, that Geldenhuis Deep shares are worth exactly double their market price, *i.e.*, £13¾. What surprises us most of all in connection with this ingenious method of calculation is not so much its fallaciousness, which we shall deal with by-and-by, but that the engineers of some of the deep level Trust Companies, who are supposed to be solely concerned in looking after the engineering and mechanical wants of the mines, should make it part of their business to disseminate statements of this description in order to influence the share market. In fact, it almost comes to this, that a South African mining engineer is not judged so much by his engineering ability as by his skill in advertising the wares of his employers.

Let us see where the conclusion at which we are invited to arrive leads to. The Geldenhuis mine in 1897 paid dividends of 15 and 30 per cent.—in all 45 per cent.—and is stated to have another ten years' supply of reef remaining. Presupposing, that the rate of the last half-yearly dividend is maintained during 1898, a purchaser, after allowing for amortisation, by setting aside a portion of each year's dividend and investing it at 2½ per cent. compound interest, would receive 5 per cent. on his money. Treating Geldenhuis deep shares in the same way, it will be found that last year one dividend of 30 per cent. was paid; but we are told that

more stamps are shortly to be started, and that working full power (200 stamps), in 1898, 65 per cent. will be earned, and that on this basis the mine will last twenty years. Accepting this prediction—for, of course, we cannot substantiate it—a purchaser of the shares at 13¾, after providing for the amortisation of his capital as before, would receive rather under 1 per cent. on the investment. The fallacy lies in the explanation that, whereas in one case the whole of the profit will be won in ten years, in the other it will take twenty years to recover; and that deep level claims contain considerably less gold-bearing ore than those on or near the outcrop. This last reason is an important factor which is generally overlooked. In order that the reader may understand how it arises, it will be necessary to enter into technical detail. The Rand reefs, as some people know, do not go down into the earth perpendicularly, but are inclined at varying angles. Near the surface the incline is fairly steep, but lower down the reef flattens out, thus rendering deep level mining possible. As the mining limits of a claim go down horizontally, it follows that when the dip of the reef is steep there is a greater inclined surface of reef within its boundaries than where the reef is flatter. In the outcrops the reefs incline at from 45 deg. up to 80 deg.; while in the deep levels the average is about 30 deg. The ore contents of a claim in which the reef inclines at 65 deg. are double those of a claim with a reef dipping 30 deg. As a rough-and-ready rule, it may be taken that four deep level claims contain about the same quantity of reef as three outcrop claims. Sometimes, however, the proportion is three to one, as the Henry Nourse and Nourse Deep. The fallacy of comparing the market valuations of outcrop and deep level claims will thus be at once grasped.

Geldenhuis Deep shares, even at 6⅞—taking for granted all the conditions mentioned—would only give an anticipated yield of 5½ per cent. We have purposely taken a very moderate example of this method of calculation for illustration. The deep level advocate goes a great deal further than this. He compares the "selling price per claim" of a mine undeveloped and unequipped, and which will probably require the application of £500,000 hard cash, and three or four years' work, before it can even hope to produce gold, much less earn a profit, with that of a dividend-paying outcrop company, and then gravely propounds his theory that the deep level shares are "comparatively cheap speculations." Loss of interest on capital during the three or four years the mine is being prepared, the extra expense of equipment, the large cost of exposing big bodies of reef, and the difference in the ore contents of the claims, are all conveniently ignored. In fact, this advertising dodge—for it is nothing better—is as shallow as many of the preposterous puffs setting forth the claims of certain medical nostrums which daily meet the eye.

It is as hopeless a task to endeavour to judge the value of a Rand mining share from its declared profits, or even by its dividends. The Rand formation is not much different to other gold reefs in one respect; it varies greatly in its gold contents, good and poor zones being alternately met with in the same mine. It has frequently happened that when a mine has apparently settled down to a calm dividend-paying career, a poor zone is met with, and down fall the profits and away disappear the dividends, the public invariably finding itself loaded up with the shares. A good zone is found again, and the mine returns to its previous respectable pinnacle. Examples may be mentioned in such mines as the New Primrose, Glencairn, Meyer and Charlton, Geldenhuis Estate, Jumpers, and Roodepoort United.

Sometimes other factors also intervene, but the fact remains that to rely upon even a "good" Witwatersrand mine to return regular dividends is an extremely rash thing, while to base future profits on a single year's good returns would be the height of folly. Speculators who in 1895 bought Primrose shares at £8 on the strength of the dividend of 50 per cent. declared in that year, and on the expectations of a larger one the following year, must have been disagreeably surprised when 1896 came round and not a single penny was distributed. Early in 1897 fresh capital had to be raised, and immediately afterwards 20 per cent. was paid out of the profits "thus released." The Jumpers Mine paid 55 per cent. both in 1894 and 1895, and the shares went as high as 8⅝. In 1896 no dividend was forthcoming, and the price gradually fell to 2¾. True, last year 60 per cent. was distributed, but who is to know how long it will last? It would be possible to multiply these examples and proceed through the whole list of Rand mining shares; for out of about thirty-five outcrop mines which have at different times paid dividends, only eleven have made declarations during each of the last four successive years, while of these eleven, only three mines can boast of never having had a set-back in the amount distributed. In some cases these vagaries are due to fluctuations in the values of the ore bodies, in others to bad management, to neglect of development, and last, but not least, to the picking of the mines to produce good returns when the markets were booming. We shall deal at length with this "eye-picking" part of the subject next week.

Concerning Advertisements.

A letter to be found among our "Economic Notes and Correspondence" raises a question which has been often debated in the office of this Review, and on which, therefore, some definition of the views and policy finally adopted may seem desirable. If readers will pardon us, we promise to bore them on the subject only this once.

The ideal financial newspaper would, perhaps, be one which contained no advertisements of any kind, but that ideal is unattainable while those who write and produce such papers have to earn bread and salt by their labour. Advertisements being, then, an essential part of a newspaper, without which no really useful journal could be published under existing conditions, the question at once arises, how far is a newspaper proprietor justified in having the advertisements sent to him for insertion edited? That there is a moral responsibility attached to the publication of advertisements is undeniable. We have ourselves recognised it in refusing to insert those of American life insurance offices and all forms of "bucket-shop" advertisements, usurers' advertisements, and the puff paragraph, thereby voluntarily surrendering a considerable revenue which other advertisements may be slow in making good. And this step helps towards a definition of the extent of the responsibility, by acknowledging that a newspaper proprietor has not the freedom to insert any advertise-

ment which, from his previous knowledge of the facts, he has reason to believe is calculated to do an injury to his readers.

The proprietor must have this previous knowledge though, it seems to us. To go further and demand that he shall subject every advertisement collected by his advertisement manager to a strict analysis and censorship before inserting it is not only not fair but wholly impracticable. Moreover, such a course would lay upon the proprietor a moral responsibility of another kind quite too formidable to be endorsed: the responsibility of guaranteeing the statements contained in every advertisement he published to be genuine and in accordance with fact; this and nothing less. Surely neither our correspondent nor the public would have us go so far as that. We shall decline to take this responsibility, anyway. To merely suggest that it should be taken is to confound advertising and editorial functions in a manner which could not fail to delight, as it might very well serve to justify, all those owners and conductors of papers who habitually sell their editorial pages to the liar for so much cash.

In laying down the lines on which the Investors' Review is to be conducted, the utmost care has been taken to keep separate the editorial department from the advertising. So far has this separation been carried that no paragraph paid for, either directly or indirectly, as an advertisement can possibly get into those parts of the paper for which the Editor is responsible. A practice, for instance, has grown up and become quite a matter of course, under which paragraphs, generally of a more, rather than less, laudatory character, are drawn up about prospectuses sent to papers to be advertised, and these paragraphs are expected to be placed in the editorial columns as expressions of independent editorial opinion. Often the advertisement is not ordered for insertion except on the understanding that the paragraph shall also appear. Words need not be wasted upon this unwholesome custom. It should be sufficient for us to state that nothing of the kind can occur in the Investors' Review under any circumstances. The very finest security, in common with those of meaner sorts, will be treated there strictly on its merits, and without any reference whatever to whether an advertisement has been ordered or not.

Still further. While declining to be fettered in criticism of new ventures, we have also taken reasonable care that things really bad, but of whose quality we have no previous knowledge, shall not even be advertised. This has been done by instructing the advertisement manager to enter into relations with the more respectable class of advertising agents alone; with firms, that is, who have themselves reputations at stake. And, even in regard to these, his efforts are rather to be directed to the securing of those business advertisements of the highest repute, which benefit paper and advertiser alike by their presence, than to picking up prospectuses. If, in spite of these orders and precautions, things that are unworthy sometimes slip through, we really must decline to be held responsible, unless the unworthy things are endorsed and commended by us. Then, indeed, we shall deserve to lose the confidence of the investing public.

May we be allowed to add in regard to this Crotty advertisement, that it came to us from a respectable source, that it was not even read by the editor until after he saw it on the back page of the cover of this paper, and that now, when he has glanced through it, he does not see that it was a thing to be off-hand refused by his agent on his own responsibility. It is, no doubt, an extravagantly worded puff of the Mount Lyell mineral region and the Mount Lyell Mine, and Mr. Crotty is obviously interested in making the most of the wealth supposed to lie there; but is the average reader such a fool as not to know the value of the language the advertiser uses? We hope not, and whether or not, it was none of our business to say this Mr. Crotty is, or is not, to be trusted. For all we can tell at present, he may be quite justified in what he says. We know nothing about him yet in short; but, acting simply on the rule of conduct stated above, consigned to the waste-paper basket the editorial paragraph sent with the advertisement for insertion. If the public asks more than this at our hands, then it must raise the circulation of the Investors' Review to at least 50,000 copies a week. When this is done, perhaps we can—although that is doubtful—adopt a course impossible now, when all we can do is to make our subscribers and readers perfectly safe on one point: no advertisement inserted in the Review shall ever be viewed in the light of a bribe either to secure silence or influence speech, nor will any advertisement be inserted if we have a reasonable foreknowledge that it is in furtherance of an imposture or a fraud. To take even this stand costs more than the casual newspaper reader has any idea of. Happily we already have a tolerably distinct assurance that he appreciates our position and the sacrifice it implies. And should he have a doubt about the quality of any wares displayed before him in the advertisement section of the paper, he can always rely upon us to solve those doubts to the best of our power, undeterred by any selfish consideration whatever. Have we said enough now to make our position clear?

American Life Insurance Offices.

III.

In this article we propose to put to the test of actual experience the modern American art of prophesy as illustrated in the literature of the Mutual Life Office of New York. We select it because the facts concerning it happen to be in our hands, and from no special hostility to it more than the others. To our thinking they are all alike guilty of a cultivation of methods of business repulsive to the most indiscriminating sense of equity and fair dealing as between man and man. At best they carry on the life-insuring traffic as if it were a form of pitch and toss, a gaming table for which they hold the bank. And it is an ignoble play they arrange, a play altogether unworthy of upright and honourable men. The best class of Americans would themselves be the first to condemn it if they knew what went on; and in all that has to be said, readers we hope will never forget that there is a better America than that represented by the agents of the United States Life Offices which have "boomed" and bribed their way into the pockets of so many of the Queen's subjects. Individual Americans we know and have known who are, and alas, have been, among the select of the earth; but, men of this stamp are not a numerous class, and are rarely to be met with in the ranks of those citizens of the great Republic of the West who come here intent to do business with us. The average pushing American is not usually endowed with a keen moral

sense on his own account ; as an agent of a corporation he has, as often as not, no apparent moral sense of any sort. Provided he succeeds, all is well. Now suffer us to proceed with our story.

In 1896, the Mutual of New York put into the hands of its agents a leaflet for circulation amongst intending insurers setting forth the results of twenty policies, taken out under different tables, and at different ages in 1886, the distribution periods of which had been reached in 1896. The leaflet is not marked "private" or for "agents' use only" and is therefore intended to have the widest possible circulation. These examples of policies are prefaced by the following commentary :—

"It has been frequently alleged by the agents of rival companies that the "Former Results" made use of in the Illustration Books of this Company would probably not be again realised.

As a conclusive answer to such allegations, we submit to you with great satisfaction the following statement of results now declared on Ten Year Distribution Policies issued in 1886, none for longer periods (fifteen or twenty years) having yet matured.

In view of these results we reaffirm the statement that the deferred distribution system of dividends is the most profitable and equitable for the policy holders."

Then follows a schedule of policies with their results called "Cash dividend" and a column added called "Former results," these "former results" being *considerably less*, as will be seen by comparison, than the "cash dividends" distributed.

* Converted from dollars at the rate of £1 equalling $5.

Any intelligent man reading these examples will naturally assume—and that he should do so is clearly the intention of the company—that the profits distributed on these policies were larger than was expected by the assured, that, in fact, they exceeded the "estimates" put before the assured in 1886—in those days, readers must note, the company rejoiced in the free use of the word "estimates"—by as much as the amount shown in the column marked "Cash dividend" exceeds that in the one marked "Former results."

Let us look, then, at the "estimates" taken from the agent's rate-book in use at that time—1886—and append them to each age, as given in each class of policy, and leave the reader to judge what would be thought of any first-class, or *fourth*-class for that matter, English Office which indulged in such jokes at its clients' expense.

In 1886 the word "surplus" was the equivalent for the "cash dividend" of 1896, and this juicy-looking phrase has since been supplanted by "Former results." The necessity for this legerdemain in nomenclature—a "sliding scale" in phrases—serves to reveal to what straits the company has been driven to in order to hide its shrinking bonus from prospective clients.

By leaps and bounds and year after year has the profligate expenditure of this company encroached on its profits, until it has left them depleted and almost imponderable. So rapid, indeed, have been the ravages that the company has found it necessary to recall and revise its agents' rate-book no less than *three times* since 1890. These "estimates," alias "illustrations," alias "adaptations," alias "former results," have gone through three distinct periods of pruning to bring them where they stand to-day—the last of these being effected in January, 1898. Some idea may be formed of the merciless manner in which the Yankee whittler's knife has been plied by taking the first half-dozen examples furnished in the leaflet of 1896 mentioned above, and placing side by side the "surpluses" displayed by the Mutual in its agents' rate-books at various dates.

This sort of thing reminds one of the White Queen's promise of jam in "Alice in Wonderland": "Jam yesterday, and jam to-morrow, but never jam to-day." Or it is as in "Through the Looking Glass," everything wrong way round. Thanks to us, the public and the not too grateful British life offices may now acquire some knowledge of the truth by looking at things backwards. And in course of time holders of these foreign life policies may, at their own expense, accumulate a valuable mass of evidence calculated to elucidate the

difference between individual and corporate standards of morality. In England, let us hasten to assure the American gentlemen who "run" these alien life insurance "shows," we have not yet in a general way attained to that excellence in the art of duping here disclosed, although we have, it must be frankly admitted, a few native productions which could "give them points and beat them easy." The great majority of British life offices, however, are still short-sighted enough to strive to make their performances surpass their promises, and even when they succeed seldom indulge in extravagant boasts about it. To the American belongs the peculiar glory of not only failing but vaunting his failure more loudly than other folk boast of success.

Mr. Herbert Spencer and other observing philosophers maintain that the physiognomies of native-born white-skinned citizens of the American Republic, as generations pass, assume more and more the contour of those of the Red Indians whom they have supplanted. But the Red Indian with all his fine qualities—*vide* Hiawatha and other romances—never attained to the elevation in corporate emancipation from moral considerations revealed to us in the successive stages of this "Mutual" of New York Life Office's progress. Well may we stand in doubt where the mutuality comes in. Officers, agents, and Press engaged in this tragic business remind us of Jack Spratt and his wife. They among them consume the fat and the lean, and the policy-holder will soon probably have nothing left for his share but the clean platter.

The Mutual is evidently preparing the minds of its agents for a still further reduction of "surplus." This, at least, is the view suggested by a circular issued from the head office in Cornhill, dated November 27, 1897, in which the following passages occur :—

"It is not expected that this change in rates"—meaning the advance in rates from January, 1898, on young and middle-aged lives—"will produce any unfavourable effect upon the cash surrender values available at end of the distribution periods, ... the only difference being that of such total surrender value the 1898 policy would have a larger portion labelled 'reserve' than the 1897 policy, the *balance* in each case being labelled 'surplus.'"

In order to appreciate this curious reserved generosity, the public must bear in mind that it is this "balance" labelled "surplus," which has been steadily shrinking since 1890, until now there is well-nigh nothing but a skeleton left. Simultaneously with this American vanishing process the "balance" labelled "surplus" in the British offices has been steadily rising, in the face of diminishing returns from interest ; a result in their case due, no doubt, to economy of management which, so far as her life offices known to us are concerned, in America is a lost art.

At an early date we hope to present our readers with an analysis of the investments of these American offices by way of "round-off" to the story. All we need add at present, therefore, is that a preliminary examination appears to indicate that the bulk of the money is well enough invested in United States securities. But why cannot policy-holders here take steps to find out the truth for themselves? If they combined and brought pressure to bear on these alien organisations, insisting on an actuarial investigation by men of their own selection, and on the investment of British policy-money in the names of British trustees, they might possibly still be in time to avert the disaster with which they are threatened, and that not distantly threatened either.

Critical Index to New Investments.

HOVIS-BREAD FLOUR COMPANY, LIMITED.

For £223,410, including £173,910 in cash, the vendors offer their business to the public, but we fear it cannot be looked upon as a generous action. The title sufficiently explains the business which has been carried on by S. Fitton & Son since 1893. The capital is fixed at £225,000 in £5 shares, of which 17,050 ordinary and £18,050 Six per Cent. Cumulative preference shares are offered for subscription. Chatteris, Nichols & Company certify net profits for three years ended September 30, 1897, at £15,370, £18,864, and £22,798 respectively, or an average of £19,010. This is before charging rent of freehold property, interest on capital, management, or income tax. The two last years' profits show 10 per cent. on the ordinary shares, but what would they show after deducting management expenses, &c. ? The undertaking seems to us much over-capitalised.

BENSKIN'S WATFORD BREWERY, LIMITED.

This is a considerable enlargement of the old company of the same name, which was formed in 1894, and had a share and debenture capital amounting to £300,007, all the shares being held by the vendors. The new company now comes forward with a share capital of £620,000, of which half consists of £1 Ordinary shares, and half of £5 of Four per Cent. Cumulative Preference shares. There is also created £600,000 First Mortgage Irredeemable stock, interest on the latter being payable January 1 and July 1, and on the preference shares, March 31 and September 30. The new company takes over the old one, and acquires the businesses known as the Kings Langley Brewery, the Kingsbury (St. Albans) Brewery, Healey's King-street Brewery, Watford, and an agency at Woburn Sands, by which absorption 130 licensed houses are added to the houses already possessed by the old company. The latter, which is the promoter, has fixed the purchase price at £1,220,000, of which £310,000 will be taken in the whole of the ordinary shares, £150,000 in preference shares, £427,000 in debenture stock, and £333,000 in cash. All that the public are asked to subscribe for is 32,000 preference shares at 5s. premium, and £173,000 debenture stock at par. Of the present Debenture issue £339,000 goes in paying off the "A" and "B" debentures in the old company, £80,000 in paying off existing mortgages, and £181,000 in providing the purchase money of the additional businesses. Security consists of specific mortgage on properties in Benskin's, as per balance-sheet September 30, £521,043 ; and on properties included in recent purchases, costing about £300,000 ; also floating charge on general assets of Benskin's £146,897, and of the new businesses £40,000, representing a total security of £1,007,940. Benskin's profits for year ended September 30, were £43,821 ; rents from new properties acquired will be over £4,000, and profits from additional trade from the 130 new houses are estimated at £18,000. This gives a total of £66,000, of which debenture interest will want £24,000, and preference dividend £15,500. So far as earnings to meet interest go they seem ample, but we should have preferred a separate valuation and statement of profits made by the companies taken over. To buy licensed houses now must mean buying at very high prices, and nothing is known about these businesses outside their own immediate circle. The Old Benskin was, we think, a much better brewery investment than the new one.

CHICAGO, ROCK ISLAND, & PACIFIC RAILWAY COMPANY.

Speyer Brothers, of New York, having bought from the company $52,000,000 New General Mortgage Four per Cent. Ninety-year Gold bonds, interest payable January 1 and July, issued for the purpose of retiring various Five per Cent. and Seven per Cent. bonds, the London, New York and Frankfort firms offer until February 17, $25,000,000 of them to holders of the Five per Cent. First Mortgage, Extension, and Collateral bonds, and the Five per Cent. Debenture bonds in exchange for their existing holding at the price of 103⅛ per cent. and accrued interest, New York terms. Holders will no doubt willingly accept the new bonds on the terms offered, as ninety years is a good long period, and it is provided in the new mortgage that none of the existing bonds shall be extended at maturity, so that after their retirement the new bonds will be a first mortgage on all the railroad property and real estate of the company. The capital stock on March 31 was $46,156,000, and bonded debt $62,712,000 ; the net income for the year ended on that date $4,765,121 and the bond interest $2,321,525. The annual saving in interest will be $496,621.

KENILWORTH SUGAR ESTATES, LIMITED.

Under the auspices of the Gas, Water and General Investment Trust, this undertaking is brought out to buy 10,000 acres of freehold land situated on the Mississippi, believed to comprise some of the best sugar land in the State of Louisiana, and to erect thereon a sugar factory. Of the share capital of £160,000, in £5 shares, the vendor takes all the £80,000 of ordinary, with £45,000 in cash and subscriptions are now asked at par for £80,000 of Six per Cent. Cumulative Preference capital, and for an issue of £60,000, part of £80,000, Five per Cent. First Mortgage Debenture stock. Interest due January and July. The debenture stock, which is a specific first mortgage on the freehold property, plant, &c., is redeemable on six months' notice at 110 after January 1, 1900. A net profit of £18,620 is spoken of, or £10,820 above the amount required for debenture and preference interest. For all that, we are not drawn to the issue, and it is quite customary for American investments offered over here not to live up to their promise of their early youth. Suppose the sugar tariff abolished, what then?

GROSVENOR MANSIONS COMPANY, LIMITED.

Issue at par of £50,000 Four and a quarter per Cent. First Mortgage debentures, interest due January and July; share capital £120,000, of which £62,500 remains unissued. Debentures are redeemable at par, January 1, 1960, and are a first and only mortgage on properties, valued at £91,000, in Victoria-street, Westminster. Lease expires June 24, 1961, but redemption of debentures is secured by a sinking fund policy with Sun Life Society. Deducting ground rent from rental of £11,300—apparently if everything is let—there will remain £7,300 per annum, or three times the amount required for interest and sinking fund. As this class of business in the West End usually does well, the debentures should form a safe investment.

ANGLO-MEXICAN COLONIZATION AND TRADING COMPANY, LIMITED.

The capital of £150,000 in £1 shares is divided into 70,000 "A" and 80,000 "B" shares, ranking equally for dividend. Subscriptions are invited for 100,000 shares. Company buys from vendor 43,000 acres of freehold land and 60,000 acres freehold from the Mexican Government, and, of course, intends to promote subsidiary companies. Purchase price £80,000, including 50,000 "A" shares and the rest cash. It is estimated that the profits from developing only 2,000 acres will be sufficient to pay at least 25 per cent. on the capital, in addition to profits to be derived from subsidiary companies. If 2,000 acres will yield 25 per cent. on the capital, the yield on 103,000 acre. on the same basis works out at £1,931,250. Such a dazzling prospect doubtless induces the vendors to sell.

BRANDRAM BROTHERS & CO., LIMITED.

Here is an opportunity to take an interest in a firm of saltpetre and brimstone refiners and white lead manufacturers. Out of a capital of £150,000 in £10 shares, half ordinary and half Five per Cent. Cumulative Preference, investors can apply for the latter, all the ordinary, along with £75,000 in cash, going to the vendors. Preference interest due March and September. Total assets are valued at £102,169, of which lease, machinery, and plant represent £43,226, and stock-in-trade £45,000, which seems a little heavy. Profits appear a little funny. For 1894 they were £10,232; for 1895, £10,748; and for 1896, £8,408. Why this drop, and why are no figures given for 1897? Business is old-established — over 100 years—but no reason is given why the vendors want to withdraw their money. Can it be that the business is getting less profitable?

HENRY HEATH, LIMITED.

This is a firm of hatters of Oxford-street, which is formed with a share capital of £50,000, wholly taken by the vendor, along with £50,000 in cash. The public are invited to subscribe at par for an issue of £45,000 Four and a Half per Cent. First Mortgage Debenture stock. It is redeemable after January 1, 1918, on six months' notice, at 105, and interest is payable January and July. The security is the buildings on land held on lease having seventy years unexpired to run; and these premises, with plant, &c., seem very fully valued by Harry Higgs & Company at £47,856. Then there is stock-in-trade, probably including some old-fashioned "toppers," taken at manufacturer's cost price, £15,000, and book debts guaranteed, £4,568. Net profits per annum for three years ended December, 1897, are certified to have been considerably in excess of amount required for interest on the debentures. Even assuming properties are not over-valued, they very little exceed the proposed debenture issue, and the absence of any profit figures makes lending these hatters the money they ask for risky.

BOURNEMOUTH THREE PER CENT. REDEEMABLE STOCK.

An issue of £33,382 of this stock, bringing the total debt of the Borough up to about £266,000, is offered for tender at a minimum price of 101 by Messrs. Glyn, Mills & Co., acting for the Wilts and Dorset Banking Co. Bournemouth is a growing place, but also an overbuilt one and poor. Still, it had a revenue of £74,382 in the year ended March 31, 1897.

Company Reports and Balance-Sheets.

Baring Bros. & Co.—For 1897 accounts show a net profit of £99,503 or including balance brought forward, £110,149. Dividends on the preference shares, absorb £55,000; on the ordinary shares, £45,000, a very handsome return on their capital value of £25,000. Balance carried forward, £10,149, the reserve fund remaining at £100,000. No profit and loss account is published.

New Imperial Investment Company.—After replacing £600 taken in the previous year from reserve, the revenue of this company was insufficient by the amount of £1,327 to meet the full interest upon the Preferred Stock. As income improved after the accounts were made upon December 31, the directors recommended the payment of the full interest of 4½ per cent., carrying forward the excess payment as a kind of suspense charge upon the current year. It is a mean-looking result after years of uphill work, and yet we might have imagined that the company had surmounted its worst troubles were it not for the manner in which the new investments of the concern are being made. A perusal of the list of holdings, although it shows many securities that are permanently depreciated, also exhibits a fair number upon which there has been considerable improvement of late, both in respect of income and market valuation. The company, indeed, gained £5,964 from sales of securities in the past year, which it added to reserve, less £3,000 written off a hopeless investment. But we note amongst the new investments £7,200 of New Trinidad Lake Asphalt debentures, £4,000 of North-Eastern Breweries debentures, £6,670 of Hans Crescent Hotel Preference shares, and £2,500 of Hood & Moore's Preference shares. Now these blocks look very much like the outcome of underwriting operations, and if the reformed corporation is going largely in for this kind of business, the outcome can only be another reorganisation on a worse plane than the last.

City of London Brewery Company.—In the last five years this well-managed concern swelled its balance-sheet by £891,000, or about 50 per cent., chiefly by purchases of public-houses and granting loans on mortgage. Net profit in the same time rose from £114,932 to £153,641, or an increase of about 35 per cent., so that, despite the great reduction in interest, which has helped brewers so much of late years, net profits do not keep up to the level of the old days. The board, however, make the best use of the profits thus earned, placing £16,594 to leaseholds depreciation, £15,000 to reserve, and £5,000 to brewery improvements, before declaring dividends amounting to 10½ per cent. on the ordinary capital. After all this, it is possible to increase the balance forward a little to £4,528. The reserve will now amount to £204,045, of which £94,045 is represented by premiums upon new capital recently issued. Only £50,000 of the amount is invested in high-class securities, and the rest is employed in the business, and yet, as we have shown, net profits have relatively diminished, which shows how keen competition in this line of business has become.

The Railway Debenture Trust Company.—The exhibit of this company was hardly so good as that of its sister Trust, but steady improvement was shown in its case. Profits for the year came to £110,989, being the highest for the last five years at least, and this enabled the dividend to be raised from 4 per cent. to 4½ per cent. Better still, the amount put to reserve was increased to £12,500, and its total now stands at £117,500, as against an ascertained depreciation upon the value of the investments of £110,345. The assets of the company would, therefore, have been comfortably in equilibrium with the liabilities, were it not for the fact that it has to carry as an asset the curious item of £77,028 for "difference between par and issue price of debentures and Four per Cent. Debenture stock." This item is being written down steadily, but at the rate the wiping out is going on all the present shareholders will be dead and buried before it disappears. It would therefore be a wise policy to tackle this item before increasing the dividend much, for this year the company promises to do better than last. The large debenture debt and liability upon the shares must act as a drag upon the price of these latter.

Railway Share Trust and Agency.—The profits of this concern in the past year amounted to £66,078, being the best reported for a number of years. After payment of preference interest and administrative charges, the sum of £9,832 was put to reserve, the dividend on the "A," or ordinary shares was increased by 1 per cent. to 5 per cent., and the amount carried forward was raised £2,558 to £18,000. The valuation of the company's securities brought out a surplus of £20,167, which, added to the amount placed from revenue, makes a reserve of £30,000. Including the balance forward, the reserves therefore come to £48,000 upon a sum of £777,000 invested, but shareholders must not expect too much from the board, for it was only in 1894 that £194,260 had to be written off the capital by an order of the Court, so as to meet depreciation in the investments. Reserves ought, therefore, to be studiously attended to, so that the company may not be caught in a weak position on the rebound.

Hyam, Wholesale Clothing Company, Limited.—We do not like the first report of this company, for while the profits of the whole year were taken into the revenue account, dividends were only paid for a trifle over six months. Certainly interest was paid to the vendor for the rest of the year, but this was at a low rate, and so the company had an unnaturally good showing. For the year the profit on trading was returned as £14,615, and after deducting £3,490, being interest paid to vendor, and directors' remuneration at the high figure of £1,412, the available balance of £9,720 remained. This allowed £750 to be set aside for leasehold redemption, £583 for depreciation and machinery, or about 10 per cent., £2,031 to reserves, and the remainder was employed in paying the preference interest at the rate of 5 per cent., and a dividend for the half-year on the ordinary shares at the rate of 10 per cent. per annum, the small sum of £295 being carried forward. Now, by the device of only paying interest to vendor for the first half-year the company gained £2,151, which virtually represents the allocation to reserve. As the allowances for leasehold redemption and depreciation were, we presume, absolute necessities, if the company had not gained this "finance" profit, either the 10 per cent. dividend on the ordinary shares could not have been declared, or nothing could have been placed to reserve. We wonder which course this board would have taken.

Anglo-American Telegraph Company.—The revenue of the past half-year showed the satisfactory increase of £6,540, and expenses were only £371 higher. The increased receipts follow upon a steady advance in the last few years as the traffic of last half-year came to £176,102, as against £142,975 in the second half of 1894. The company was able to declare dividends which brought up the distribution for the year to 3 per cent. on the ordinary stock and 6 per cent. on the preferred stock. The preferred stock thus received its full interest, but the over-sanguine folk who looked for a distribution on the deferred stock were disappointed, for the balance left over after doing this was only £209. Indeed, if the balance had been large, we doubt if the board would have acted wisely in dividing upon the deferred stock. The renewal or reserve fund has to bear the cost of cable used in repairs, and owing to this circumstance, although it nominally receives £12,000 each half-year from revenue plus the interest upon the securities held, amounting to £10,127 last half-year, the net addition in the six months was only £11,073. This is slow progress towards the £1,000,000 to which the board desire to build up the Renewal Fund, for its present total is £706,086.

Mobile and Birmingham Railroad Company.—This United States railroad tells a satisfactory tale of its second year of working as a reorganised concern. In the twelve months ended June 30 last gross earnings increased $64,097, working expenses took only $30,898 more, and so the net revenue was $33,199 higher. The total of the latter came to $69,350, and after meeting the interest on the Prior Lien bonds, 2 per cent. was distributed on the First Mortgage bonds, and $13,350, or $9,452 more than was brought in, was carried forward. All classes of traffic showed increases, and a good deal of the expenditure was claimed to be really in the nature of improvements, which may well be the case, as working expenditure came to 80·72 of the receipts. A good deal, however, remains to be done in this respect, for, in spite of the attention devoted to it, the rolling stock seems to require considerable renovation. Car Trust notes are being redeemed, and only a small amount remain out. The effect of the good report thus shown has been quite upset by the outbreak of yellow fever in the second half of last year, during a good part of which traffic was thoroughly disorganised. The board, therefore, does not dare to pay more than the interest upon Prior Lien bonds, although at the same time it expresses the hope that the loss of traffic may not prove so severe as imagined. This may be so if the yellow fever does not reappear in the current year.

East End Dwellings Company.—With £210,386 sunk in industrial dwellings, this company earned a profit of £10,305, after paying mortgage interest, and all other charges. A dividend of 5 per cent. was declared upon the ordinary shares, and £3,396 was added to reserve. In the profit, however, was £620 received in premiums upon new shares, but, of course, the large assignment to reserve more than covered this amount. The reserve would then have stood at £10,396, but the company having lost certain actions that arose out of the erection of its buildings, the expenses thus incurred amounting to £396, were written off this item. Mortgage debt stands at £57,636, only representing 25 per cent of the capital, and the reserve constitutes 5 per cent. of the amount. Altogether the record is a good one.

Baron Cigarette Machine Company.—The report of this concern for the sixteen and a half months ended December 31 last reads very much like a neat circular to help the selling of shares. Out of £45,769 put down as receipts in that time, no less than £19,022 was ascribed as from sale of patent rights in South America and Cuba. Expenses came to £16,101, and the net profit of £29,673 was reported, out of which £10,000 was written off the cost of patents. A dividend of 7½ per cent. on the share capital absorbed £8,337, and £11,336 was left to be carried forward. As the capital amounts to £115,000, we presume the dividend was only for a year, although sixteen and a half months' receipts were taken into the profit and loss account. The balance brought forward must not be considered liquid, as £7,265 in shares of the company which bought the South American and Cuban patents were taken as part payment.

Reversion Investment Corporation, Limited.—A very modest affair and modestly conducted. In its two years of life it has written off preliminary expenses, commenced a reserve fund with £500, and paid 6 per cent. for 1897 on its share capital of £14,000. As long as it does not rely too much on deposits, and it has only £5,330 of them now, it should go on and prosper.

London, Chatham, and Dover Railway.—This always wonderful company can boast of an increase in its receipts for the past half-year of about £21,000, obtained at a cost of rather less than £11,000 in its working expenses. The additional business, in fact, was secured at very little more than the average cost of working its entire traffic, which was 50·64 per cent., as compared with 50·61 per cent. in the second half of 1896. The gross receipts were £882,168, and the working expenses £446,790. After meeting debenture interest, rents, and so on, the company was able to pay 2¼ per cent. for the half-year, being the full dividend on the arbitration preference stock, and had £72,295 left to carry forward, as against £64,543 the year before. This company's year ends on June 30, so that this balance would seem to promise full protection for the arbitration preference stock at that date. When we look into the accounts, however, matters are not quite so satisfactory. The company spent nearly £84,000 on capital account last half-year, and it still makes no provision whatever for writing down its excessive expenditure on docks, steamboats, &c., an expenditure now standing in the books at £1,061,000. One very urgent reason why something should be done in this direction is found in the fact that the steamboat traffic really does not pay. It is worked at a cost of nearly 74½ per cent. of the gross receipts, and the net revenue amounts to only 1½ per cent. on the capital spent. But all through the accounts this company shows pinching, and there can be no doubt at all that at least another 5 per cent. of the gross income ought to be spent in meeting current working charges and in keeping the line in decent repair, in order to bring it up to anything like the standard of neighbouring lines.

North Staffordshire Railway Company.—The peculiarity of this company's accounts for the half-year ending December 31 is that the increase and working expenses exceed by £2,000 the increase in gross receipts, so that the company would apparently have been rather better off if it had had no increase in its traffic at all. Of course, this is not exactly the way to judge, because the added expenditure is really chargeable to the entire traffic of the half-year and not alone to the increase in that traffic. Wages, locomotive-power, rolling-stock repairs, traffic expenses, rates and taxes, compensation, everything, in fact, shows an increase compared with the second half of 1896, and the consequence is a reduction in the dividend of ¼ per cent. per annum, the rate being 4¾ per cent., as against 5 per cent. a year ago. In most other respects the position of the company appears to be eminently satisfactory. It spent very little on capital account, less than £19,000 in fact last half-year. It has engaged in no new enterprises and has a clean-looking balance-sheet. The figures in the report, however, more and more indicate the general tendency in railway business for working expenses to expand. Dividends are payable on and after February 19.

Belfast and County Down Railway Company.—This small but good company also discloses in its report for the December half of the year that the increase in working expenses exceeds the increase in gross receipts, being £3,282 against £2,764. The net revenue of £27,303 was therefore slightly smaller than that for the second half of 1896. The company spent £31,478 on capital account last half year, nearly £1,300 of which is on working stock and the rest on lines opened for traffic. It has started a new hotel at Newcastle, but we do not find the cost of it stated in the accounts. The dividend at the rate of 6½ per cent. on the ordinary stock is payable on the 28th inst.

London, Tilbury, and Southend Railway.—No railway has done better than this little company last half-year. Its gross receipts rose by £17,412 to £186,267, and its expenses £8,215 to £97,930, with the result that the net profit was nearly £9,000 larger than in the second half of 1896. The increase in the traffic was obtained at a cost of about 47 per cent. in expenses. To put the matter roughly, after meeting all prior charges, the directors are able to pay a dividend at the rate of 6¼ per cent. per annum as against a 6 per cent. rate a year ago, and have £14,592 to carry forward compared with £820 in December, 1896. Only £28,487 was spent on capital account last half-year and the company appears to have no ambitious schemes on hand. As it is obtaining a closer connection with the Midland and is in other ways extending its hold over traffic in a district where it has no rival, we see no reason why its future should not be still more prosperous. Dividend payable to-day.

Taff Vale Railway Company.—In the December half of 1897 this company's gross receipts amounted to £394,945, being £9,750 more than in the corresponding half-year. Working expenses, however, increased £8,014, so that the company is affected very little by the larger income. In fact, the total working expenses for the half-year were 55·9 per cent., as against 54·2 per cent. for the December half of 1896. Capital expenditure last half-year was nearly £63,000, included in which is the curious item, £282, representing an increased value in third-class coaching stock. It looks finiking bookkeeping to put a tiny amount like this, which it must be very difficult to ascertain, into the capital account. The dividend payable on the ordinary stock is at the rate of 3¼ per cent. per annum, equivalent to 8⅛ per cent. per annum on the old ordinary stock, and is at the same rate as twelve months ago. A slightly larger balance, £2,315 against £1,816, is carried forward. The dividend is payable on the 12th inst.

The Sheffield Banking Company, Limited, does not give a profit and loss account, so we cannot say much about its doings for 1897. The report itself is as slender as it well can be. It tells us that the profit was £45,430, out of which a dividend of 12½ per cent. is paid on the share capital of £33,425; 5 per cent. of it last July. The income-tax is also paid, £1,500 written off the value of bank premises, and £1,428 added to the surplus fund, which is now raised to £166,427. The total in the balance-sheet comes to £3,351,721, and of this amount £1,908,143 is absorbed in advances on current accounts and loans on securities. Bills of exchange stand

for over £402,816. Cash in hand and money lent for short periods are all in one item, but the bank appears to be quite strong enough to warrant its directors in giving shareholders fuller information.

The Bradford Manufacturing Company, Limited, paid 10 per cent. for the year 1897, and had a balance of £274 to carry forward. It is a small company, but seems to be well managed. Only £16,277, the value of trade marks and goodwill, had better be written down. It represents nearly half the capital of the company.

Bristol Brewery (Georges & Co.), Limited.—The prosperity of this remarkable undertaking continues, and the net profit of £80,451 for last year compares with £73,927 in 1896. The dividend is therefore increased by 1½ per cent. to 19 per cent.; £14,000 is written off the brewery premises, and £1,600 is put to dividend equalisation fund, which will then stand at £13,960. In addition there is a general reserve of £158,319, and a special reserve of £20,665 to meet the premium of 15 per cent. payable upon the £140,000 of Five per Cent. Debenture stock which matures next year. Furthermore there is a hidden reserve of over £80,000 in the reduced valuation of premises and general plant. If any brewing company should maintain its dividend this one ought, for its total debenture debt is only £162,000, as against £600,000 of share capital, and after the debentures are converted the charges in regard to them will not be more than £6,000, against a gross profit of over £105,000 a year.

Lion Brewery Company.—After placing £3,445 to reserve, the disposable balance of this company allows of a dividend and bonus of 14 per cent. for the past year on the ordinary shares. The reserve also benefited by £4,555 received in premiums upon the "B" Debenture stock recently issued, and its total now stands at £153,200. Depreciation was allowed for to the extent of £27,215, and repairs came to £8,779. By recent additions, the total of the debenture debt and deposits amount to £558,000, as against only £383,000 of share capital, whereas two years ago the debentures and deposits only totalled £203,000, with the same amount of share capital.

Lancashire and Yorkshire Railway Company.—Earnings for half-year to December 31 last, was £2,573,000 or £28,568 up, and working expenses were £52,704 to £1,459,000. Here likewise the gross gain was much more than swallowed up in the fresh expenses, and the net revenue fell off £24,000 to £1,114,000. At the same time fixed and general interest charges rose £8,700 and helped to bring down the amount available for dividends, &c. to £865,000. Out of this the dividend at the rate of 5¼ per cent. per annum will be paid to the ordinary stockholders on the 10th inst. Capital expenditure amounted to nearly £210,000 for the half year which was less than authorised, but this is exclusive of £126,000 spent on lines under construction, and of the Thre per Cent. Debenture stock issued against the cancelled securities of absorbed lines. All these together make the nominal addition to the capital for the half-year about £698,000

Metropolitan District Railway Company.—Last six months saw an addition of £5,884 to the gross receipts of this company, making them £217,000. Working expenses rose only £2,761 to £105,860, so that the profit was actually £3,122 up at £111,472. Debenture stock interest, rent charges, &c., all paid, left but £48,907, out of which the guaranteed stock gets £24,276, leaving enough to give the preference stock a dividend at the rate of 2¾ per cent. per annum, and still £4,000 remains for the new half-year. The dividend is payable on the 19th inst. Extensions are projected to Harrow, Uxbridge, and Bow, so the board does not lack enterprise. Shareholders, unfortunately, never benefit much by this enterprise. Capital expenditure last half-year was only to £14,227, but there is a good time coming.

Midland Great Western Railway of Ireland Company.—Gross receipts came to £288,115 last half-year and working expenses to £144,375; when debenture interest and rent charge stocks were met, £90,000 odd was left for dividends, including £4,085 brought forward. The ordinary stock gets 2½ per cent. for the half-year, a rise of ½ per cent. per annum in the rate, and £11,372 is left to carry to the current half-year. Traffic income rose £8,466. all from merchandise and cattle. Capital expenditure was only £6,753 in the six months.

Lloyds Bank, Limited, has grown into great figures, the total of its balance-sheet having risen now to a total of £40,760,000, and its debt on deposits to £37,112,000. Of this, £4,642,000 is held in cash, £4,095,000 in bills of exchange, and £18,962,000 is wrapped up in advances. The investments are £3,870,000 only and are all in one item. For the year closed 31st December, the net profit is put at £464,361 out of which 17½ per cent. has been paid on the share capital, £50,000 added to reserve, £25,000 written off bank premises, and £32,686 carried forward. Income-tax was paid in addition. Comparison with previous figures is impossible, because the bank is amalgamating at such a rate. Last year it absorbed the County of Gloucester Bank and Williams & Co. of Chester. The reserve fund is now £1,200,000, thanks principally to premiums on new shares issued in consequence of the amalgamation.

The London and County Banking Company can look back on the half-year's working with considerable satisfaction. It is the biggest bill-buying bank in the kingdom, but on this occasion the bill case is much lighter than it was a year ago, so only £33,000 has to be set aside for rebate against £51,000 at the end of 1896. Thanks partly to this the improvement in the half-year's profits is as much, £61,726. The usual £25,000 is transferred to premises account, but the addition of £10,000 to the Provident Fund is not repeated this half-year. What is more satisfactory is that £80,000 is added to the reserve, raising it to £1,080,000, and this is the first addition made to it out of profits for some years past. Even now, it stands at only 54 per cent. of the paid-up capital, and will well bear further strengthening out of profits, not premiums on new shares. Shareholders receive the same dividend of 10 per cent. for the half-year, but this time a bonus of 1 per cent. is added, which makes the distribution for the year 22 per cent.—the best since 1891. As to the main items in the balance-sheet deposits are up only £376,000 and acceptances still over £2,000,000, are rather less, while investments show a similar increase to the deposits. Bills discounted, at £10,705,000, are down £1,734,000, but advances have swollen by £1,850,000 to the fine round total of £14,634,000.

The Union Bank of Australia accounts, made up to August 31 last, show considerable shrinkage in business and profits. The note circulation is smaller, while the deposits have diminished as much as £1,822,000 and bills payable are down nearly £400,000. Amongst the assets, specie on hand and cash balances have dropped £450,000, and money at call and notice £965,000. Investments against the reserve remain intact, but the bank's other investments in stocks have been reduced by £363,000. Bills receivable are £210,000 less, and bills discounted and advances show a reduction of £247,000. This is a truly melancholy tale. Although the half-year's gross profits declined from £168,268 to £54,889, expenses, strangely enough, show an increase under all heads, even including income-tax, and amounted to £117,453 against £109,431, so that the half-year's net profits come out at only £37,436 as compared with £58,837. The dividend is kept at the rate of 5 per cent. per annum, but a year ago £10,000 was applied in reduction of bank premises account, and there is nothing of this on the present occasion. Unless a speedy change for the better sets in, shareholders should be prepared for a reduction in dividend, and possibly something besides—the reverse of a "bonus."

Bank of British Columbia.—This institution is making a little progress in the recovery of lost ground. Profits for the second half of last year were only £738 better than in the corresponding half of 1896, and £459 less was brought forward, but by curtailing expenses a balance of £18,351 is obtained, compared with £14,922, so the directors are able to raise their dividend from 4 to 5 per cent. per and annum,to carry forward £4,000 more. The note circulation has grown a little, deposits are virtuallyunaltered, and bills payable are up £200,000, while bills discounted and advances show the moderate increase of £77,000. With the development of the mining industry the bank should do better still before long, but it ought to be one of the first duties of the directors to rebuild the reserve fund, which, in order to meet losses, was recently reduced from £285,000 to £100,000.

Bank of Egypt.—All Anglo-Egyptian banks last year, it seems, did not do well. This one made a profit of only £29,971, or £5,000 less than during 1896. Dividend is 9 per cent. for the year, with a bonus of 5s. per share, and £5,000 is added to reserve, as in 1896, but the balance forward is reduced from £7,263 to £4,734. This will make the reserve £120,000, which is still slightly less than half the paid-up capital. Deposits show a welcome increase of nearly 29 per cent. to £547,000.

The Bank of Calcutta continues to grow steadily. Net profits for the second half of last year were Rs. 129,123, or Rs. 10,000 more than in the corresponding period. Only Rs. 12,500 is used in paying a dividend at the rate of 5 per cent. of ordinary shares, but as much as Rs. 100,000 is added to reserve, which in the three years of the bank's existence has been built up to Rs. 475,000, or nearly half the paid-up capital. Deposits are up Rs. 700,000, at nearly 63½ lacs, of which over 61 lacs is employed in loans, &c., bills discounted amounting to only Rs. 110,930.

London and South Western Railway Company.—None of our larger railway corporations are doing better, one year with another, than the South Western. It did well last half-year although an increase of £100,000 in its gross receipts resulted in a net gain of only about £17,000. Working expenses increased about £84,000, and debenture interest, &c., by about £5,500, so the company shows the same results as its neighbours, working expenses expanding at a more rapid ratio than gross income. Notwithstanding this it was able to work its traffic in the past half-year for less than 52 per cent. of the gross receipts. This is really better than it appears, because the steamboat traffic of the company is conducted at very little profit, less than £3,000 in fact last year on a gross income of about £102,000. Dock receipts also are not so fat as they might be, and come only to about 1¾ per cent. on the capital expenditure. It follows that the railway by itself is worked with great economy, and this economy enabled the company to pay 7 per cent. for the whole year 1896, or ⅜ per cent. more than in the previous year on its common stock. Gross receipts came to £2,331,000, including steamboat and dock receipts, and gross expenditure to £1,306,000. The company we see has obtained sanction from its shareholders to issue £600,000 new stock with its attendant borrowing power of £200,000, and last half year the capital expenditure came to £376,000 of which about £62,000 was for new plant, quays, &c. at the Southampton Docks and £107,000 on new working stock. Steamboats stand in the capital account of the company for £650,000, and the Southampton Docks up to the present have cost £2,055,000. Renewal and insurance on the steamboats seem to be fairly well provided for, but is not the capital item for steamers one to write down, if not by degrees to wipe out altogether? The New Waterloo and City Railway is expected to be opened early for traffic, and will lead to a general exodus from the South-Eastern Company's Charing Cross and Cannon-street line, perhaps one of the most miserable bits of road in the three kingdoms. The dividend will be payable on the 22nd inst.

Hull and Barnsley Railway and Dock Company.—Gross receipts fell off on this line £267 last half-year, and working expenses increased £5,165, so the net revenue was naturally poorer

by £4,000. Adding the balance brought from June the divisible amount was £53,000 odd, out of which an additional ½ per cent. is paid to the Three per Cent. Second Debenture stock, and a dividend at the rate of 1¾ per cent. on the ordinary stock. The usual regrets are expressed in the report that the half-year was not better, and the blame is laid on the decreased imports of grain into Hull, and on the engineers dispute. With all its adversities, however, the company was able to spend £54,226 on capital account last half-year. Dividends will be paid on the 17th inst.

The Australian Joint-Stock Bank Company, Limited.—With nearly £9,000,000 nominal at their command the directors of this bank contrived in the half-year ended December 31 to make a net profit of £1,725, after deducting £783 for rebate. We do not think that anything more need be said.

Stuckey's Banking Company.—Balance-sheet for 1897 shows similar changes to what is seen in many other banker's accounts, the directors having apparently taken advantage of high prices to sell securities and lend the money to bill-brokers. Investments have been reduced by £133,000, while loans at call and short notice have increased from £200,000 to £435,000. Deposits have risen £103,000 and now exceed £6,000,000, but bills discounted and advances are a trifle less.

The Devon and Cornwall Banking Company made a profit last year of £43,166, or a trifle more than in 1896, and having only a small capital of £200,000 is able to pay its shareholders a dividend and bonus of £4 per share, or 20 per cent. They are, however, £100 shares, with only £20 paid up, and the directors have apparently given up the idea of adding anything to the guaranteed fund, which stands at £200,000, or equal to the paid-up capital. Balance-sheet figures show no remarkable change compared with a year ago, but bank premises have been written up by £6,900 to £82,972, and only £3,000 is allowed out of profits in reduction of the estate. The directors are resolved not to let the grass grow under them, and have taken advantage of the lessened banking accommodation in the county of Dorset through the failure of a local private bank and the amalgamation of another, to open three new branches besides some new agencies, so competition is not likely to be reduced.

The Northamptonshire Union Bank has a paid-up capital of £300,000, and a guarantee fund of £236,000, and the latter is to be steadily built up to the level of the former. Profits for 1897 were £46,416, against £41,815, but the dividend is kept at the substantial figure of 12 per cent. for the year. Although issuing annual reports the directors at the end of each half-year make appropriations to the guaranteed fund and to bank premises account. The amount added to the former fund is £6,000 in the year compared with only £2,977 in 1896, while premises are reduced by £1,000 to the moderate figure of £28,193. Deposits show a fair improvement, and now amount to over 2½ millions, but the bank has been selling some of its securities, the present total of £750,000 being nearly £100,000 less than a year ago. Cash and bills are slightly higher, but the extra money has gone in advances, &c., which at £1,862,000 show an increase of over £200,000.

Mercantile Steamship Company.—Like most other steamship undertakings this company did very well last year, the profits on voyages completed being £48,820 against £37,127 in the previous year, and £29,859 in 1895. Home expenses are never a heavy item, and after providing for them the directors are in a position to raise the dividend from 7s. 6d. per share, which has been paid for several years, to 10s., or 10 per cent., and to carry forward the larger balance of £1,915. The improvement is mainly due to the large export business from the United States, for during the greater part of the year Indian, China and Pacific freights were exceptionally low, and it was not until the last three months that any considerable improvement took place. In 1895 only £10,000 was added to the depreciation fund, and in 1896 £20,000, but this time £25,000 is added. Taking advantage of the low prices the directors have had several new boats built and consequently the book value of the fleet has been rising until it now figures at £242,900, while the gross tonnage is 38,054 tons, and the depreciation and insurance funds stand at £53,525, which is not at all a bad position. It is a feature of this company to reward its captains if they navigate without accident for two consecutive years, and this time the increased number of seven have earned the extra gratuity. Captains, we should have thought, needed no such inducement.

Mr. Walter Beverley, sitting as arbitrator between the Brighouse Corporation and Mr. David Walshaw, regarding the purchase of a small bit of property, ordered the Corporation to pay £96 11s. and full costs. The full costs, it is stated, will amount to over £300. If arbitration is peaceful it seems it can be expensive.

In the United States there are 14,000 miles of electric tramway; in the United Kingdom, 80!

At Tuesday's sitting of the Royal Commission on the London water supply, Mr. H. E. Haward, Comptroller of the London County Council, contended that the water companies' shareholders have received premiums in addition to their dividends, and that the reduction of the water rates of some of them has been unduly postponed in consequence of the creation of unnecessary capital.

A Bill to increase the subvention to the North German Lloyd from £220,000 to £295,000 per annum, has been submitted to the German Reichsrath. In consideration of this increased subvention the company undertakes to open a regular fortnightly service of steamers to Eastern Asia.

The Produce Markets.

GRAIN.

Mark-lane has been poorly attended recently, and the business also has been poor. Prices, however, have shown no essential variation. English white wheat was quoted on Wednesday at 35s. to 40s., and red 34s. to 38s. Dulness has prevailed in foreign, and on Monday there was a drop of 6d. in some cases, though as a rule previous rates were maintained. Walla Walla quoted 39s. to 39s. 6d., and hard Manitoba 41s. to 41s. 6d. per qr. Flour moved with a slow tone, but values lately current were upheld. Town whites 34s., and households 31s. Country makes, 26s. to 31s. American patents 30s. to 32s. per sack. Barley was in limited request at previous rates. Grinding quoted 17s. ex quay. Oats were slow of sale, and American mixed clipped were quoted 15s. 9d. to 16s. ex ship. Maize was steadily held, but slow. At Liverpool spot parcels were firm with a fair inquiry. Red American futures opened unchanged to ¼d. per cental lower on disappointing cables, weakened on free offers, but subsequently sellers diminished, and fair buying brought about a reaction. The market closed quiet and unchanged to ¼d. per cental lower. There has been a dull tone in the London cargo market, with a tendency in buyers' favour. No sales were reported on Wednesday, but a La Plata sailer of 800 tons, prompt shipment, sold on Tuesday at 35s. 3d., and the Marion Chilcott, 11,400 qrs. Walla Walla, November 10, changed hands on the Continent at about 36s. 7½d. For a cargo of blue Stem, January, 36s. 6d. is said to be obtainable. Californian, September, is offered at 38s. 3d., and December-January at 37s. 6d. Wheat options irregular and ¼d. down to ¼d. up. Maize unchanged at ⅛ down. Contracts registered—96,000 centals wheat and 24,000 centals maize.

Barley quiet. Odessa-Nikolaieff-Crimean. February-March, is offered at 16s. 6d. Danubian, prompt, at 16s., and four options, March-May, at 15s. 6d. Parcels slow. Odessa-Nikolaieff, prompt, sellers, 16s. to 16s. 3d. Oats 1¼d. to 3d. lower. Mixed American clipped, January-February, sold at 15s.; March, sellers, 14s. 9d. to 14s. 10½d. Beans quiet. Saide, prompt, quoted 29s. to 30s.

Official Closing Values (100 lb. deliveries—February 2).

	March.	May.	July.	Sept.
Red American Wheat	7'9½	7'4⅜	7'1½	6'5⅜

New York wheat has shown considerable fluctuation, with a tendency downwards. On Wednesday it opened steadily ⅛ c. up, and for a time advanced on foreign buying and better cables, but went down later, and closed weak, ½ c. to 1⅜ c. lower; spot weak. Spring, 108⅜ c.; winter 103⅜ c. Sales, futures, 4,100,000 bushels. Spot, 40,000 bales. Receipts, Atlantic, 117,000 bushels; same day, last year, 20,000 bushels. Corn also declined. Chicago unsteady, and closed easy, with September and December unchanged, nearer deliveries, ⅜ c. to 2 c. down.

COTTON.

Spot market firm throughout the week, but without change in values, though on Wednesday, with a more active business in American cotton, sellers grew firmer. Egyptians were in fair demand, with values steadily maintained. There is still no demand for Surats. Futures opened ½ point lower, and varied but little until late in the afternoon, when increased offerings on disappointing American cables induced further concessions, the close being quiet at a fall of ½ to 1 point. The sales were estimated at 12,000 bales, including 500 on speculation and for export. In New York there was more fluctuation, and prices, which went upward in the early part of the week, declined later, and on Wednesday closed 1 to 2 points lower. Spot quiet. Manchester lacked buoyancy, but there was a fair inquiry, though at lower prices than sellers would accept. Yarn quotations little changed.

New York Closing Values.

	Spot.	Feb.	Mar.	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.
Feb. 2 ..	5⅜	5'69	5'72	5'75	5'79	5'82	5'85	5'89	5'89	5'91	5'92

WOOL.

The first series of sales of colonial wool for the current year ended on Wednesday. At these sales, Messrs. Jacomb, Son & Co. state in their circular, "157,361 bales out of the available total have been catalogued, and only a very small proportion bought in. Of the quantity sold 70,000 bales have been taken for foreign account, including about 10,000 for the U.S.A. Some 19,500 bales are held over for future sale. Since our last report there has been no cessation of the keenness of demand from all sides, and the only variation in price has been in the case of some of the lower and coarser cross-breds, either greasy or scoured, which do not quite maintain the best prices of the series. The average quotation as compared with the closing rates of last Series is for—Merino wools, 10 per cent. advance; cross-breds, fine, 5 per cent. advance; cross-breds, medium and coarse, par. The improvement in Cape and Natal wools is not so marked as in the case of Australasian. The general tendency of demand having been towards fine wools, the appreciation in values in many of such is not limited to 10 per cent. and exceptionally high prices have been realised for some of the best scoured and greasy clothings. In comparison with prices of last season's wool present rates show marked improvement, and the sales close with very firm tone." The second series of sales will commence on March 15. The general tone of the wool markets has been firm, with an increasing demand.

METALS AND COAL.

There has been some fluctuation in copper during the week, with a tendency upward, though the close on Wednesday was easier, with the tendency rather downward. Sales for cash were effected

at £49 3s. 9d.; one month sold at £49 5s., and three months' at £49 8s. 9. At the close there were further sellers at these rates.

Settlement Prices.

	Feb. 2.	Jan. 26	Jan. 19.	Jan. 12	Jan. 5.	Dec. 29.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
Copper ..	49 2 6	48 17 6	49 5 0	48 17 6	48 10 0	48 5 0

The dulness in pig-iron continues, though on Wednesday there was rather more doing. The bulk of the business, however, was of a jobbing character, being confined to members of the ring, and those who bought at opening in the hope of an upward turn, sold out in the afternoon at a loss. Sales amounted to 30,000 tons, and Scotch fell 1d., and hematite 2d., while Cleveland gained ½d. per ton.

Hematite ..	48 6	47 0	48 10½	48 9	48 4½	48 4½

There is as yet no real improvement in the coal trade, though dealers are looking forward to a considerable demand following the close of the engineers' strike. This increased demand has not, however, begun. The attendance at the London Coal Exchange on Wednesday was small, and business was limited. The seaborne department was very inactive, and a cargo of Yorkshire coal which was on offer did not find a buyer. The gale, however, is delaying the movements of the boats, and there is a prospect of lighter deliveries. The official quotations stand at 17s. and 16s., usual terms in the Pool for Hetton Wallsend and Lyons respectively. Since Monday 12 cargoes have come to hand.

SUGAR.

No improvement is noticeable in the tone of the sugar market, which continues disappointingly dull. In their monthly circular, Messrs. W. Connal & Co. say:—"The advance of 6d. per cwt., which took place during the last days of December, and which then gave promise, not only of being maintained, but also of being enhanced with the opening of the year, has since been lost, and first products Beet, which on December 31 commanded 9s. 7½d., are to-day quoted at 9s. 1½d., f.o.b., Hamburg, basis 88 per cent. analysis. The abnormally mild season has left the navigation of Continental rivers free, and has permitted uninterrupted arrivals, in Hamburg and other shipping ports, of both raw and refined sugars, a great part of which would not, under ordinary circumstances, have been available for export until March or April, and as buyers have thus had ample supplies from which to select, they have been successful in gradually reducing prices. The decline which has taken place in the American markets has likewise had an unfavourable influence in European centres." Sales at Mincing-lane on Wednesday were small. German 88 per cent. sold—May at 9s. 3¾d., and August at 9s. 6¼d. f.o.b. Hamburg. Cane sorts continue very quiet and business unimportant. The market for home refined remains slow and business limited. Tate's cubes sold at 14s. 9d.; second quality, 13s. 10½d.; No. 1 crushed, 13s.; No. 2 ditto, 12s. 6d.; granulated, 13s. 3d.; yellow crystallised, 12s.; No. 1 crystals (in Liverpool), 13s. 1½d.; No. 2 ditto, 12s. 9d.; Standard Liverpool granulated, 12s. 6d.; Lyle's No. 1 granulated, 12s. 9d.; No. 2 ditto, 12s.; No. 1 crystals, 12s. 9d.; No. 3 ditto, 12s.; A white, 12s. 6d.; B, 11s. 9d.; O and P Crystals, 11s. 9d. Pieces and crystals remain dull—yellow crystals at 11s. 6d. to 11s. 10½d.; Fowler's golden syrup, 11s. 6d.; German granulated continues slow, ready at easy prices, forward steady.

TEA AND COFFEE.

There is some tendency to improvement in tea, though not as yet very decided. Messrs. Gow, Wilson, and Stanton give us the movements of tea in London during the first eight months of the season. Although the deliveries during January are a trifle under those of last year, the clearance from the commencement of the season show an increase. Only 35,861 packages of Indian were brought forward; this resulted in a steady market for all descriptions. A few closing invoices have already been catalogued. The official telegram from the Indian Tea Association, Calcutta, gives the total exports to the United Kingdom from April 1 to date as 130,450,000 against 127,640,000 for the same period last season. The week's auction of Ceylon was heavy, comprising 33,095 packages, and although meeting with good attention from buyers, some slight reduction was noticeable in values, especially in medium teas, which were distinctly weaker. Only 875 packages of Java were brought to auction, comprising selections from three different estates; the teas were mostly sold with fair competition at rates current last week. 1,913 packages are advertised for sale next week.

The demand for coffee has been poor during the week, but at some of the auction sales there was good competition. At the auction on Wednesday, however, the uninteresting supply of 1,901 packages, chiefly consisting of common sorts, met with scarcely any demand, and only a small part sold at prices again lower, excepting a small parcel of Ceylon, which brought full rates. Ceylon—good middling to good bold dull green, 106s. 6d. to 113s.; small, 96s.; peaberry, 141s.; Guatemala—low middling to middling dull gray mixed pales, 68s. to 70s.; Salvador—middling dull coloury, 72s.; small mixed, 33s. 6d.; peaberry, 95s.; Ecuador—fine ordinary pale greenish, 40s. 6d. to 42s.

HEMP AND JUTE.

Hemp throughout has been quiet but firm, sellers of F. C. Manila near at hand, at £18; March-May, sailer, £19; and May-July, £19 2s. 6d. At auction 100 bales sold—good current, £18 to £18 10s.; and choice, £23 5s.; while 250 fair seconds were bought in.

Jute still quiet, but steadily held. Good group first marks, £9 17s. 6d., with buyers at £9 15s.

Dividends Announced.

BANKS.

London and County Bank.—10 per cent. for the last half-year and a bonus of 1 per cent., balance forward £49,966. The current and deposit accounts now stand at £41,527,000, against £41,151,000 a year ago.

London and Hanseatic Bank.—Final dividend for second half of 1897 of 9s. per share, making with interim dividend 14s. per share or 7 per cent. for the year. £8,594 to be carried forward.

Pare's Leicestershire.—6½ per cent. dividends on the two classes of shares, making 12½ per cent. for the year. £7,308 carried forward.

Merchant Banking Company.—Directors recommend the payment of a further dividend of 3 per cent., making a distribution of 5 per cent. for the year. Balance of £6,630 to be carried forward.

Manx Bank.—Payment of dividend of 6 per cent. per annum. £750 to be placed to reserve, £400 to depreciation, and balance of £26 to be carried forward.

Leicestershire Banking.—Two dividends of 10s. each are paid, being 10 per cent. for 1897. £8,000 is added to reserve fund, and £5,000 applied in reduction of bank premises, and £3,658 carried forward.

RAILWAYS.

North-Eastern.—Dividend at the rate of 7 per cent. per annum for the past half year, as against 7½ a year ago.

Metropolitan District.—Dividend for past half-year at the rate of 2¼ per cent. per annum on the preference. Second half of 1896, 2¼ per cent.

North Staffordshire.—Dividend for the half-year ended December 31 at the rate of 4¾ per cent. per annum. £4,765 carried forward. For the corresponding half of 1896 the distribution was at the rate of 5 per cent., and £3,098 was carried forward.

Hull and Barnsley.—Payment of additional interest for the whole year at the rate of ½ per cent. per annum to the Second debenture stock holders. Full dividend of 4 per cent. recommended on preference stock, together with a dividend for the half year on the ordinary stock at the rate of 1¾ per cent., carrying forward a balance of £8,052. For the corresponding period of 1896 the distribution on the Ordinary stock was at the rate of 2 per cent. per annum, with £10,285 forward.

Taff Valley.—Dividend for half-year ended December 31 at the rate of 3¼ per cent. per annum. £4,000 placed to reserve, and £2,315 carried forward. For the corresponding half of 1896 the dividend was the same, £3,000 was placed to reserve, and £1,816 carried forward.

London and Blackwall.—Dividend for last half of 1897 at the usual rate of 4½ per cent. per annum.

Isle of Wight.—Interest at the rate of 4 per cent. per annum on the preferred ordinary stock for half-year ended December 31, and a distribution at the rate of 5 per cent. per annum on the deferred ordinary stock. £1,800 to be carried forward.

Great Northern Railway.—Dividend may be declared at the rate of £5 per cent. per annum on the ordinary capital of the company, giving for the half-year £2 per cent. to the preferred converted ordinary stock, £2 per cent. to the deferred converted ordinary stock, £3 per cent. to the "B" stock, and £2 per cent. to the "A" stock. These rates will make the dividend for the whole year as follows, viz.:—£4 per cent. to the preferred converted Ordinary stock, £2. 5s. per cent. to the deferred converted ordinary stock, £6 per cent. to the "B" stock, and £2 5s. per cent. to the "A" stock, carrying forward £15,094.

MISCELLANEOUS.

A. M. Peebles & Son, Limited.—8½ per cent. per annum interim on the ordinary shares, against 8 per cent. per annum a year ago.

Baron Cigarette Machine Company.—Dividend of 7½ per cent. per annum; £11,336 carried forward.

Machinery Trust, Limited.—20 per cent. per annum for the past half-year, with £7,891 carried forward, against £5,257 last year.

M. Hyam Wholesale Clothing Company.—10 per cent. per annum on the ordinary shares for the past half year.

Charing Cross and Strand Electricity Supply Corporation, Limited.—Dividend for the half-year ended December 31, 1897, at the rate of 8 per cent. per annum, making, with the interim dividend distributed for the half-year ended June 30, 1897, at the rate of 6 per cent. per annum, a dividend payable for the year 1897 of 7 per cent. on the ordinary share capital. This compares with a dividend of 6 per cent. for the year 1896.

Mount Morgan Gold Mining.—Dividend declared of £25,000, being 6d. a share for the month of January.

Brewery and Commercial Investment Trust.—Dividend on the ordinary shares at the rate of 6 per cent. per annum for the half-year ended December 31. Payable on the 15th inst.

Gordon Hotels, Limited.—Warrants will be posted on the 12th for an interim dividend at the rate of 8 per cent. per annum on the ordinary shares and of 5¼ per cent. on the preference.

Robert Roberts & Co.—Dividend for 1897 at the rate of 5 per cent. on the Preference shares and 6 per cent. on the Ordinary shares.

Sanitas Company, Limited.—Payment of a final dividend of 1s. and a bonus of 9d. per share bringing up the total distribution for the year to 13¾ per cent. on the fully-paid shares numbered from 1 to 50,000, and a final dividend and bonus of 1s. 2½d. on the shares numbered from 50,001 to 60,000.

National Telephone Company.—Dividend for the past half-year at the rate of 6 per cent. per annum on the amounts paid up on the

ordinary shares; £40,000 placed to reserve and about £9,000 carried forward.

LONDON GENERAL OMNIBUS COMPANY.—Directors propose dividend at the rate of 8 per cent. per annum for the past half-year and a bonus of £1 5s. per cent. (equal to 10½ per cent. per annum), to add £10,000 to general reserve fund, and to carry forward about £15,000.

J. W. BENSON, LIMITED.—5 per cent. on the ordinary shares of the company.

HOME AND COLONIAL STORES, LIMITED.—Dividend at the rate of 5s. per share, making, with interim dividend already paid on the ordinary shares, 12½ per cent. for the year 1897.

PORTSEA ISLAND BUILDING SOCIETY.—A final dividend of 1s. 1½d. in the £, making a total dividend of 10s. 1½d. in the £, is being paid by direction of Lord Macnaghten, the arbitrator appointed under the Portsea Island Building Society (Arbitration) Act, 1893. The return thus being made will bring the total distribution up to about £412,000.

LIBERTY & COMPANY.—Dividend declared at the rate of 6 per cent. per annum on the six per cent. cumulative preference shares for the six months ended January 31.

BIRMINGHAM RAILWAY CARRIAGE AND WAGON, LIMITED.—12½ per cent. per annum on the ordinary capital for the half-year ended December 31, making a dividend of 10 per cent. for the year 1897.

FREEHOLD AND LEASEHOLD INVESTMENT COMPANY.—Interim dividend at the rate of 5 per cent. per annum on the share capital.

BOND'S (BRISTOL) BREWERY, LIMITED.—5 per cent. for the twelve months ended November 30 last.

JAMES W. COOK & COMPANY, LIMITED.—3s. 6d. per share for the half-year ended December 31, making, with interim dividend paid in July last, a total dividend for the year of 7s. per share on the ordinary share capital.

ANGELO GOLD MINES, LIMITED.—25 per cent., less tax, declared.

BULLOCK, LADE, & COMPANY, LIMITED.—Interim dividend on the ordinary shares for the half-year ended 31st ult., at the rate of 10 per cent. per annum.

BEACON GOLD MINES, LIMITED.—A third interim dividend of 6d. per share, free of income tax.

SWEETMEAT AUTOMATIC DELIVERY COMPANY, LIMITED.—Interim dividend for the quarter ended December 31 last at the rate of 20 per cent. per annum, as compared with 15 per cent. for corresponding period of 1896.

HARRISON, BARBER, & COMPANY.—Dividend recommended at the rate of 4 per cent. per annum for 1897, £1,000 to be placed to general reserve, £1,000 to reserve for depreciation, and £550 carried forward.

CUBA SUBMARINE TELEGRAPH, LIMITED.—Dividend on the ordinary shares at the rate of 6 per cent. per annum, tax free, for the half-year ended December 31.

J. B. BROOKS & COMPANY, LIMITED.—Interim dividends at the rate of 5 per cent. per annum to be declared on the preference and ordinary shares (the latter free of income tax) for the half-year ended 28th inst.

W. LEVY & SONS.—Dividend declared on the ordinary shares, which, including the interim paid in July last, makes in all 7 per cent. for the year.

MOSER MACHINE.—15s. per share for 1897, and £2,500 placed to a reserve fund account, leaving a balance of £664 to be carried forward.

GREAT WESTERN RAILWAY.—Dividend is announced for the past half-year at the rate of 7¼ per cent. per annum, carrying forward £31,300. For the corresponding period the dividend was at the same rate with £42,800 carried forward.

OTTOMAN RAILWAY (Smyrna to Aidin).—Dividend of 22s. per share for half-year ended December 31, carrying forward £11,000.

GREAT WESTERN OF BRAZIL RAILWAY.—Week ending De-25, cember, $36,532; increase $11,240, aggregate to date $1,360,577; decrease $298.574.

It may be interesting to know that, in the opinion of the United States Board of General Appraisers, a trade mark is not a decoration. The Collector of Customs had given his opinion that it was.

The London School Board estimate that the total amount they will require on loan from the London County Council for the eighteen months up to September 30, 1899, will be £900,000.

Basing their estimates for this year on the basis of last year's revenue, the Transvaal Government believe that, after providing for the necessary expenditure, there should be a credit balance at the end of the year of about £400,000. Provision for projected railways and public works is to be made by a State loan.

A workmen's conference has solemnly resolved that the proposed Victoria Embankment tramway must be opposed, because it would "seriously interfere" with the marshalling of working-class processions. If that is the worst that can be said against the proposed new tram line, people may come to think it not so perverse a project after all.

Parcels left at railway stations "till called for" may be regarded as left at the owner's risk. In a case heard at the Windsor County Court, a parcel that had been left at the railway-station booking office for three days had been carried off by thieves, who broke into the place. The Judge dismissed the claim for payment against the railway company on the ground that, as a reasonable time had elapsed for the delivery of the parcel after its reception at the station, the company simply held the position of warehousers, and were not liable for its loss.

A receiving order has been made in the London Bankruptcy Court against Henry Beckwith, described as of Finsbury Circus-buildings, Finsbury-circus, secretary to a public company. The amount of the liabilities not announced.

Answers to Correspondents.

Questions about public securities, and on all points in company law, will be answered week by week, in the REVIEW, on the following terms and conditions :—

A fee of FIVE shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of FIVE shillings must be sent to cover the cost of such letter, the fee then being TEN shillings for one query only, and FIVE shillings for every subsequent one in the same letter. While making this concession the EDITOR will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Correspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus :—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway?"

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The EDITOR has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market munipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The EDITOR further respectfully requests that merely speculative questions should as far as possible be avoided. He by no means sets himself up as a market prophet, and can only undertake to provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the INVESTORS' REVIEW, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

COL.—Seem likely to hold their price for the present, as there has recently been a fair demand for shares, and the underwriters who had to take up, I understand, about 75 per cent. must be nearly sold out. The contracting company was formed the year before, and is fairly strong financially. Their terms were more favourable to themselves perhaps than they might have been, but they have had a lot of difficult work to carry through. It is impossible to say how the earnings will turn out, but in the long run they ought to be good, and yield a fair return, though difficulties may arise at the start, in which case the price will probably recede.

CAROLUS.—Ordinary are quoted 1½-⅝, and seem to me dear at the price. Your quotation from the chairman's speech I do not understand, as certainly the figures you mention are in the balance-sheet as an asset. Gross profits are below those of 1896, about £1,600, not quite so much as you say. Preference are quoted 1-⅞-1-⅛. In the criticism you refer to you will find these described as a fair investment, and they ought to be so still, though probably there is not much chance of any further increase in the capital value. Shareholders should, I think, insist on more detail in the balance-sheet. Stocks and Sundry Debtors should be separate items. Another improvement would be the appearance of a liquid asset representing the reserve.

OLICANA AND J.P.—Cannot reply to your questions in these columns. See Rule II. I will write you in a day or two.

A. Z. B.—Can you send me copy of balance sheet and accounts? Company does not publish them.

R. K.—I must apologise for overlooking your first question last week. If you can get in under your selling price you might do so, but there is no haste to re-purchase at the moment; intrinsically the value is very small, but speculatively another upward turn is quite probable.

B. M. C. Joss.—I am sorry, but I must ask you to read above rules

---

The revenue of Western Australia during January was £226,747 against £202,580 for January, 1897.

The *Standard's* New York Correspondent, quoting from the Treasury figures, shows that the January deficit amounts to $7,901,484, the largest for this generation. This makes the year's deficit $51,901,823; or 8,000,000 above that of the previous year. The correspondent adds that the popular response to the Teller incident is such that Congress will take another forward step rather than make a campaign upon Mr. Dingley's surplus as the issue.

The shareholders of the Salt Union recently adopted at a private meeting a resolution appointing a committee of seven, with power to add to their number, to approach the directors in a friendly spirit, and to take such other steps as they might deem advisable for "improving the management and prospects of the company's business." The following gentlemen were elected to serve on the committee: Messrs. J. W. Brett, Edward Edmondson, James Head, J. B. Hunter, William S. McDowell, Thomas R. Royden, and Frederick Walker.

Notice to Subscribers.

Complaints are continually reaching us that the Investors' Review cannot be obtained at this and the other railway bookstall, that it does not reach Scotch and Irish cities till Monday, and that it is not delivered in the City till Saturday morning.

We publish on Friday in time for the Review to be at all Metropolitan bookstalls by at latest 4 p.m., and we believe that it is there then, having no doubt that Messrs. W. H. Smith & Son do their best, but they have such a mass of papers to handle every day that a fresh one may well look almost like a personal enemy and be kept in short supply unless the reading public shows unmistakably that it is wanted. A little perseverance, therefore, in asking for the Investors' Review is all that should be required to remedy this defect.

All London newsagents can be in a position to distribute the paper on Friday afternoon if they please, and here also the only remedy is for subscribers to insist upon having it as soon as published. Arrangements have been made that all our direct City subscribers shall have their copies before 4 p.m. on Friday. As for the provinces, we can only say that the paper is delivered to the forwarding agents in ample time to be in every English and Scotch town, and in Dublin and Belfast, likewise, early on Saturday morning. Those despatched by post from this office can be delivered by the first London mail on Saturday in every part of the United Kingdom.

Cheques and Postal Orders should be made payable to Clement Wilson.

The Investors' Review can be obtained in Paris of Messrs. Boyveau et Chevillet, 22, Rue de la Banque.

ADVERTISEMENTS.

All Advertisements are received subject to approval, and should be sent in not later than 5 p.m. on Thursdays.

For tariff and particulars of positions open apply to the Advertisement Manager, Norfolk House, Norfolk-street, W.C.

THE STOCK EXCHANGE.—NOTICE.

NO MEMBER OF THE STOCK EXCHANGE is ALLOWED to ADVERTISE for business purposes, or to issue circulars to persons other than his own principals.

Persons who advertise as Brokers or Share Dealers are not Members of The Stock Exchange, or under the control of the Committee.

A List of Members of The Stock Exchange who are Stock and Share Brokers may be seen at the Bartholomew-lane entrance of the Bank of England, or obtained on application to

EDWARD SATTERTHWAITE,
Secretary to the Committee of the Stock Exchange.

The Investors' Review.

The Week's Money Market.

A little slackening in the pressure was the distinguishing feature of the Money Market in the past seven days. Directly the Stock Exchange Settlement was over, short loans were in less request, and at one time no more than 2 to 2½ per cent. was bid for day-to-day money; but payment to the bank of maturing bills and a few "calls" in the Industrial share market caused an inquiry last Monday and Tuesday, which compelled the market to re-borrow all the money it had repaid the Bank, and sent up the rate outside to 2½ to 2⅝ per cent, since when it has slipped back to 2 to 2¼ per cent. A little Japanese money is said to have been released during the time, while on Wednesday it is understood that the Government settled for stock that it had purchased, the latter reason being the chief cause of the ease then ensuing. The discount houses raised their allowances on Friday last by ½ per cent. to 2 per cent. for money at "call," and 2¼ per cent. for "notice" money.

This reduction in the demand for money has caused discount rates to weaken to a moderate extent, and three months' bank bills are quoted 2⅝ per cent., as against 2¾ to 2⅞ per cent a week ago. The market, however, is working upon a narrow margin, and it is felt that the slightest demand above the ordinary would cause it to tend upwards. In all probability the Chinese Loan will be issued shortly, for the payment of the £12,000,000 to Japan is due in the first week in May, so that the amount ought to be in hand before that time. When this payment is made a fair proportion is likely to remain for an indefinite period under the control of the Japanese Government, and will, therefore, be lost to the market. With revenue collections growing in importance, and bills maturing at the Bank of England steadily throughout the month, the ease is not likely to go much further. Although both the Russian and German exchanges have moved further in our favour, and the Indian exchange has dropped to a point that removes the chances of exports to that quarter as a pure exchange operation, the demand for gold has been well maintained. At 77s. 10⅞d. the Cape arrival of over £500,000 in raw gold was disposed of to Austria; and since then the price has risen to 77s. 11d.

East Indian Railway Two and a Half per Cent. debentures were taken up this week by a syndicate, but the terms were altered, their duration being fixed at three years instead of eight years, and, consequently, they gained a better price—rumour says 98¾ per cent.

Consols "Pay Day" had the effect of stiffening money rates a little on Wednesday morning, but the release of Government money through its operation more than effaced its effect. One public issue of the week was £150,000 in British Guiana Three per Cent. Inscribed stock, which received a lukewarm welcome, applications not amounting to twice the sum required. Allotments were made at £96 13s. per cent., or only 3s. per cent. above the minimum, and the average rate did not rise above £96 16s. 4d. per cent. In April, 1896, a similar amount yielded an average of £101 5s. 4d. per cent.

Yesterday's Bank return discloses a continuance of the process which has been going on now since the new year. The Bank is taking in money from the market as its loans thereto and bills held fall due, and accordingly the "other" securities fell off £440,000 within the week to £31,456,000. At the same time the Government is piling in the revenue and "public" deposits therefore rose £1,305,000 to £14,398,000, notwithstanding the Treasury disbursements at the end of January. Thanks to these two influences the "other" deposits have declined £1,800,000, and are now only £35,678,000, a total by no means comfortably large to encounter the spring and summer with. The return of coin from circulation has been almost balanced by the efflux of notes, so that the reserve of the banking department has been altered only £21,000. It has increased that amount to £22,774,000. Altogether the drift of these figures is in the direction of dearer money, but the dearness need not be prolonged nor yet amount to much. Its principal source is the heaping up of money in the hands of the Government, whose balances are now £3,732,000 larger than they were a year ago at the same date, larger, in fact, than they usually are towards the end of March. This pile must be dispersed soon; and as it is, the market will be placed in funds. Probably the delay in the delivery of armour-plates and machinery for the new war vessels in course of construction accounts for much of the accumulation. The engineering dispute, however, is now a thing of the past and work kept back so long will now be pressed forward.

SILVER.

Just as the end of the month came the price of bars was pushed up to 26 1/16d. per oz., but directly the speculative engagements at that point were undone, the quotation weakened, and has fallen to 26d. per oz. At this price the tendency is in favour of sellers, while the gradual working off of the speculative "bear" position takes away a great support from the market. The Indian price of the metal has remained practically stationary throughout the week although the exchanges have dropped from 16d. to 15 13/16d. in the time, so that there is less inclination than ever on the part of our great dependency to take the metal. Chinese rates have also dropped 1/8d. to 3/8d. on the week. Apparently the India Council is becoming nervous as to its ability to dispose of its drafts, and on Wednesday broke down its price for bills to 1s. 3 13/16d., although the bulk of the applications were at 1s. 3 7/8d. Its policy is bound to lead to a further decline, as the market now knows that it has to deal with an eager seller. Late last week much amusement was created in the Rupee paper market—a market distinctly peculiar to itself—by some foolish bidding from outsiders. Evidently led away by Lord George Hamilton's speech to believe that something magical would be done in aid of Indian currency, buyers demanded the paper with such vehemence that in a very short space of time the quotation run up from 63 1/4 to 65 Needless to say, Lord George meant nothing, and with a weak exchange the price for the delusive paper has dropped back to 63 1/4 to 63 3/4. Arbitrage dealers netted a nice profit, and the India Council sold a number of "specials" to cover the operations, and the market is left with the knowledge that the paper is in weak hands.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7 and 8 Vict., cap. 32, for the Week ending on Wednesday, February 2, 1898.

Stock Market Notes and Comments.

There is still nothing to say about the large divisions of the Stock Market, apart from the one devoted to the United States "rails." It continues to display much activity, and prices have been advancing during the past week in a feverish manner. Each advance, that is to say, has been followed by that kind of reaction which indicates sales effected by timid speculators for the rise, or by old holders of securities, who sell out thankful to escape with part of their money. For all that, the volume of business done in this department is becoming larger, and more and more of the speculatively inclined are joining in the play. We are in fact setting back to quite old-fashioned times in these securities. The finance houses who manage the market have arranged everything with a view to a fine outburst during the coming spring which will enable them to unload great masses of bonds and shares upon the British speculator and speculative investor, and, perhaps, 10 per cent. of what we acquire may turn out a bargain; but experience has painfully taught us that the remainder will be purchased at prices involving ultimately more or less considerable loss.

Even the securities of the Vanderbilt companies may not be quite worth buying for investment. Just now they are all the fashion, especially in Wall-street, and unquestionably the purchase of the Lake Shore Line by the New York Central, combined with the reorganization of the New York Central Company's bonded debt, gives a solid ground for the advance in the prices of these stocks on the market. Amalgamations also are very likely to be the fashion among United States railroad corporations in the future, just as they once were in England, and, within limits, ought to have an excellent effect upon the intrinsic qualities of the resulting new securities. Quite true as this is, and true also as it may be that American railroad management is gradually attaining to a higher moral standard in the United States, caution is none the less advisable in touching any of these securities at present prices for investment. Of a speculation in them we can say little, the speculator knows his chances, and if he thinks that there is a prospect within the next six months, as is probable enough, of a much further general advance in quotations, he must take the risk of buying on the probabilities with his eyes open. But there is one class of these securities that we think decidedly dangerous; in fact we may say two classes First, the Grainger roads of the North-West, which are now being lauded to the skies in the most extravagant language by railway officials, offer, in our opinion, only dangerous pit-falls to the buyer. Their present prosperity, such as it is, depends upon a condition of circumstances which might not recur again for another ten years. There has not only been a large harvest in the North-West, but it is possible to market this harvest, or part of it, at excellent prices. Traffic has consequently been stimulated all over these roads, and upon the top of the prosperity thus created has come the madness about the gold discoveries in the far North-West and in British Columbia. Throughout the first

half of this year, therefore, it is highly probable that the earnings of all roads situated in the line of the rush to Klondike, Kootenay, and other uninhabitable regions in the bleak north-west, will be much in excess of those in any recent year. Advantage will be taken of the prosperity to shower predictions upon the British public of splendid dividends to come and everlasting prosperity, aye, and thumping dividends will be paid. Prices also will be manipulated to great heights all in the old style, and then, when the people who manage this kind of thing have sold out, the usual collapse will ensue. No sensible man should be drawn into buying any of these securities, except as a passing speculation offering him a chance of conveying some of his neighbours' money into his own pocket. To buy for investment on the faith of a continuance of the present exceptional conditions is to court loss.

Another class of American railroad securities to be fought shy of, we must repeat, consists of the new bonds and shares manufactured in the course of the reorganisation of such properties as the Atchison, Topeka Santa Fé, Norfolk and Western, Louisville and Nashville, the Union Pacific, and, later on, the Baltimore and Ohio. These roads, to begin with, are all in the middle States, the south-west or south—in that portion of the Union which still lies crushed in the grasp of the north. Prosperity, therefore, comes to the railroads of that region at best but slowly, and some of them, it is to be feared, are still in the hands of individuals unscrupulous enough to be classed with common thieves. That great efforts will be made, and are being made, to elevate the prices of the new securities created in the reorganisation process now being applied to these properties, goes without saying; but we are really not able to recommend the public to join even in the speculation for the rise which is now being artificially manufactured in the new issues of some of these properties. The worst of all such speculation is that those who begin it seldem know where to stop.

Elsewhere, in the Stock Exchange, large markets are singularly dead, some of them, like that for Home Railways, have got into a condition where further advances can scarcely be engineered, and where a fall is to be dreaded and averted by every means known to the market. How would our magnificent banking deposits look were all Home Railroad ordinary and preference stocks, or for that matter all extravagantly priced industrial stocks, to be sheared down by but a mere 10 to 15 per cent.? A relapse of that kind is too horrible to contemplate, and, therefore, at all hazards prices must be sustained. The dealers, however, in such markets remind one of the old joke about the sailor in the Crimean War who shouted to a comrade in the neighbourhood of the trenches before Sebastopol, "Bill I have caught a Tartar." "Bring him along then," Bill answered. "I can't," replied Jack, "he wont let me." They can neither work prices up nor let them down. There is no large amount of stock passing from hand to hand because the market is swept bare by investors, by the multitudes of people who are ekeing out their incomes with the margins between what they get in dividends on the stocks they hold and what they pay their bankers in interest. The market is thus caught in a vice, and will probably be more or less dull and uninteresting until something comes to send prices back to reasonable limits.

It is quite unnecessary to enlarge upon the subject of mines this week, for they are also a kind of desert, and such speculation as there is outside the United States railroad market, spends its energies in rushes upon individal securities not in the mining market at all, but in the miscellaneous or industrial market. No doubt considerable activity has been displayed during the past week in Rio Tinto copper mine shares and in De Beers diamond mine shares, but this has been quite factitious. The public have not been handling these shares. They are tossed backwards and forwards between finance houses in London and Paris, and this week Paris has been the buyer. Why it should take De Beers shares by the thousand at £30 a piece it passes our understanding to guess, and its avidity for Rio Tinto's is not much more explicable. We know, of course, that the stock of copper is low, and that the Rothchilds and their associates are still busy in the endeavour to get control of the entire copper production of the world, that supplies from the United States have fallen off, and that consumption is steadily expanding. All this, however, and much more, does not justify prices for Rio Tinto new ordinary and preference shares equivalent to about, together, £34 for the old £10 share. We shall probably have another "copper smash" some day, and the public is wise in standing by and looking on with its hands in its pockets. Nothing is more pleasant at times to the cool observer than the sight of expert finance houses scalping each other.

Amongst miscellaneous issues there are only two calling for notice this week. The shares of the Hudson Bay Company and the "stock" of the Welsbach Incandescent Gas Company. As regards the former, which have been run up to £27 a share, there is not much to be said. Gold is at the bottom of it, and as a matter, of course, gold in Klondike, gold on the Mackenzie River, gold, for all we can tell, at the bottom of every bush and tussock in the wilderness. Given gold, whether in the actuality or in the imagination, and there is no limit to the price which a share touched by the glint of it is capable of attaining. Speculators say these shares will go to £30, £40, £50, according to the heat their minds have got into. The maddest of them may be justified for all we can tell, and a few years hence these very shares might be looked upon as dear at £10.

About "Welsbach's" we are in doubt; that is, we cannot be sure that the public is playing with them to any extent at all. As some readers may know the "stock" now quoted at 24 to 25 premium is the product of amalgamations upon which we have several times sharply commented. Presumably, therefore, it is still very largely in the hands of the men or groups who carried the operation to a conclusion. The price can be put where these people please by a judicious use of the usual machinery the Stock Exchange for the purpose. Intrinsically, however, and so far as the volume of its capital is concerned, this company has to be regarded in the light of a bubble, and all the tales about contracts with the South Metropolitan Company, contracts with Vienna, and such like, ought to be disbelieved except on proof furnished. We quite admit that the mantle this company furnishes is capable of raising the illuminated power of gas and also of saving its consumption. It is not, however, the only device of the kind in the world; it is shockingly dear, and fragile to a degree, which causes many people to abandon its use after a trial because of the trouble it gives. So imperfect is the article supplied that we may be quite sure it will at no distant date be superseded by something better; and even if the company should acquire all the new important inventions of this sort it does not follow that it can continue able to pay excessive dividends. Something will have to be paid for whatever invention threatens competition, and the price of the mantle, as every article supplied by the company, must presently come down. Patents, the public should never forget, do not last for ever, nor can inventions of any description be long kept secret. Taking all things into account, and remembering that the capital to begin with is mostly represented by nothing but patents, this stock is not the thing for people with money to touch. Buyers now stand an excellent chance of contemplating their purchase a little later on with lighter pockets.

The Week's Stock Markets.

Business on the Stock Exchange remains restricted, the only really active market being the one for United States Railroad shares. Home Railway stocks have attracted very little attention, and the Foreign market has been quite idle.

Consols were steady until the "carry over" on Monday, when the price gave way, the continuation rate

which opened at 1½-2 per cent. rising to 2¼-⅜ per cent. The Indian sterling loans have been neglected, but one of the features of the week has been the sudden inquiry for Rupee Paper. This was attributed to the speech made by Lord Geo. Hamilton on Thursday last. Bank of England stock has again advanced, and several of the leading Home Corporation stocks are quoted higher.

Towards the end of last week Home Railway issues were depressed by disappointing dividend announcements made by the Great Northern and North Eastern companies, but the tone has hardened up since under the influence of a fair amount of investment business. Traffic returns were again good, and a recovery set in, lead by the "heavy" stocks, when it was found that the engineers were going back to work in double quick time. The North Eastern dividend is at the rate of 7 per cent., or ¼ per cent. lower than last time, while the distribution made by the Great Northern Company, is at the rate of 5 per cent. on the ordinary, as compared with 5¼ per cent. The stocks of both these companies fell sharply when the dividends were made known, and Midland and North-Western were also weaker in anticipation of a reduction in their dividends. Holders of Metropolitan stock were disappointed at the statement made by the chairman of the company at the meeting held last Friday, he not being able to hold out any hope of the immediate adoption of electric traction. The Hull and Barnsley dividend at the rate of 1¾ per cent., or only ¼ per cent. worse than last year, was well received, and caused a recovery in the price. There has been considerable activity in Central London shares, and Chatham issues have also been largely bought on the satisfactory increase week by week in the traffic receipts.

United States Railroad shares have shown more life and activity than for months past. Wall-street operators for the rise were apparently satisfied by Mr. McKinley's utterances, but as a set-off there came Mr. Teller's resolution to the Senate. The New York Central Company's proposal to issue $100,000,000 Three and a Half per Cent. debentures, and to take over the whole of the Lake Shore capital, and work the two systems under one management, caused a big rise in both companies' shares. The New York Central Company offers $200 in Three and a Half per Cent. bonds for each $100 Lake Shore share, and it is ultimately intended to include all the Vanderbilt lines under one system.

Louisville and Nashville shares have been in good demand on the statement that a scheme for refunding the bonded debt was on the *tapis* and nearing completion. Northern Pacific advanced on the publication of a 1 per cent. dividend on the preferred, and Chesapeake and Ohio were inquired for, on the possibility of the line being included in the New York Central combination. The usual tabular statement of the *Financial Chronicle* shows an increase of 14.13 per cent. in the gross earnings of sixty-seven roads for the third week in January. The Denver and Rio Grande Company has made arrangements for refunding over $6,000,000 of Seven per Cent. bonds due in 1900, into Four and a Half Consolidated bonds, and this has caused an advance in the company's issues. The rise in Ontario shares was traced to a rumour to the effect that this road was also eventually going to be absorbed by the Vanderbilt combination, and Reading Fours advanced sharply on the purchase by a London Syndicate of $6,000,000 of the bonds.

Canadian Pacific Railway shares have had many ups and downs during the week, and the December statement showing a net increase of $129,000 did not do much more than steady the price for a time. Grand Trunk stocks have also fluctuated rather wildly, but the net result was to leave quotations until yesterday in very much the same position as at the end of last week.

Among foreign railways there has been a steady rise in Uruguayan issues, but other South American descriptions have been dull although the traffic returns were good. The Mexican company's stocks advanced sharply early in the week, chiefly on the extreme narrowness of the market, and it was thought at one time that the clique which has been handling Grand Trunk Stocks had turned its attention to the old Mexican Railway. They used to trot in one team. The rise was, however, quite ephemeral, and prices soon slipped back.

Foreign Government securities have not been actively dealt in, and prices show slight irregular movements. Argentine bonds have exhibited a weak tendency in spite of the steady fall in the gold premium at Buenos Ayres. Brazilian issues also weakened on the announcement that martial law has been extended until the 23rd inst., and the Government has also stated that it is determined not to lease the Central Railway. Venezuela bonds fell 2, as the agents have not received the instalment due on the 26th inst. As regards "Internationals," the little business that has been transacted has been on account of Paris. Spanish Fours mark an advance on the receipt of more satisfactory news from Cuba, but Italian Rente declined on German sales. The settlement on the Paris Bourse was carried out without difficulty, and rates of continuation were light.

In the Miscellaneous section business has been on a very small scale, quite half the transactions taking place in the shares of a few of the leading favourites for the time being. Hudson's Bay shares have been one of the most prominent, on the news of a rich find of "placer" gold on the Mackenzie River, but whether in their own territory or not, is still unknown. The rise in Welsbach Gas stocks has also been a failure, one report being that the company has obtained a contract to light the city of Vienna, but the buying, apart from a few orders from Vienna, has been professional. Anglo-American telegraph stocks have moved up a little, and tramway companies shares have been active at higher prices. The buying of electric lighting issues has nearly ceased for the present, but the recent sharp rise does not seem to have been followed by any appreciable amount of profit taking. Owing to rumours of a fresh issue of capital, British Electric Traction Ordinary again advanced, it being expected that holders will get a prior allotment on advantageous terms of any new capital offered. Gas Light "A" stock has slipped back day by day, holders evidently not liking the large reduction in the reserve disclosed in the half-yearly report. Among brewery companies City of London is £5 higher, the dividend just announced being quite up to expectations.

Mines and Mine Finance Companies.

South African ventures have presented an inanimate appearance for the greater part of the week, and apart from a steady rise which has taken place in De Beers Diamond shares, there is hardly any change of importance to chronicle. Ferreira was about the one solitary exception, a sharp rise being marked, due to dividend auticipations. The Paris Bourse gave a little support on Wednesday, but it met with hardly any response on this side. Western Australian companies had received very little better treatment, the most prominent feature being a moderate rise in Lady Shenton. Among Indian shares Nundydroog has further declined on some fresh particulars coming to hand concerning the flood in the mine, and other Indians have been dull in sympathy. Copper shares, on the other hand, have shown great strength, owing to the further reduction in the visible supply of the metal, and the Mount Lyell group and Rio Tintos mark a substantial rise on the week.

Except for a foolish rise in Chatham stocks, markets closed flat. Grand Trunk and Canadian Pacific Railway shares fell heavily just at the last. United States Railroad shares were also generally easier, although there were one or two exceptions, notably Baltimore and Ohio, Denver and Norfolk, and Western issues. Home Railway stocks closed dull led by a fall in Great Western which was due to the dividend declaration. Among Foreign Government bonds, apart from a further rise in Spanish and a slight recovery in Argentine and Mexican descriptions, the tone was weak. Hudson's Bay shares reacted sharply before the finish. The settlement begins on Monday for mines and on Tuesday for all other securities, and people are realising in time.

THE PROPERTY MARKET.

The market has continued fairly active, but sales at the Mart have for the most part been confined to bricks and mortar. Outside, we had, at Mr. Stevens' rooms, a novelty in the shape of a sale of Egyptian mummies — royal ones, two kings and a queen — a King of Egypt, a King of Syria, and a Queen of Babylon. But the demand was small and the bidding slow. Mummies are not things exactly suitable for household decoration. The lot was in the end knocked down to Mr. Cross, of Liverpool, the animal dealer, for seventy-five guineas. The travelling showman will now be able to utilise the mummies. The next two lots, consisting of rolled Egyptian mummies in coffins, were bought for Horniman's Museum. A Peruvian mummy, curled up in a glass case, with her plaited hair in an excellent state of preservation, will also adorn the same museum. She cost twenty-seven guineas. Lot 237, consisting of an antique Egyptian mummy, said to be 4,000 years old, was bought by a dealer for thirty-four guineas.

Debenham, Tewson, & Company sold at the Mart the freehold premises, 43, Borough High-street, for £5,950. Mr. Stonehewer disposed of some properties at Tottenham, the total for the day being about £8,700.

At the Mason's Hall Tavern Messrs. Tabernacle & Son sold a rebuilding lease for eighty-one years, with possession at Midsummer 1904, of the Dundee Arms, Artillery-street, Horsleydown, subject to a ground rent of £150 per annum, and an expenditure of £5,000, for £9,525. Messrs. J. J. Orgill, Marks, & Orgill, also sold the "Morning Star," a freehold off-licensed house in St. James's-road, Forest Gate, with possession in 1903, £2,100; five freehold houses, Nos. 88 to 96 even, St. James's-road, let on weekly tenancies amounting to £132 12s. per annum, £1,420; the "Estcourt Arms," Dawes-road, Fulham, freehold, to which is attached an off-licence for the sale of beer, with reversion at Christmas, 1899, £3,260.

The chief sale at the Mart on Wednesday was that of the Hoop and Grapes public-house in the Broadway, Westminster, for which Messrs. Rushworth and Stevens obtained £8,560. Messrs. Furber Price and Furber sold some leasehold houses in Sinclair-road, Kensington, and two small leaseholds in Battersea were disposed of by Mr. Harold Griffin, the day's transactions amounting to a little over £10,800.

Messrs. Edwin Fox and Bousfield had a rather important sale of stocks and shares at the Mart on Wednesday, at which the following prices were realised:—Sandown Park, Limited, £10 shares, fully-paid, £12; Folkestone Racecourse Company, Limited, £1 shares, fully-paid, 20s. and 21s.; Langham Hotel Company, Limited, £10 shares, £6 paid, £13 to £13 10s.; B. C. Bushell, Watkins & Co. Limited, Westerham Brewery, £10 ordinary shares fully-paid, £21; £10 Six per Cent. Cumulative Preference shares, fully-paid in the same company, £15; Gillman & Spencer, Limited, £5 Six per Cent. Preference shares, fully-paid, £4 10s.; New River Three per Cent. Debenture stock "C," £110 to £111 10s. per cent.; Australasian Automatic Weighing Machine Company, Limited, £1 shares, fully-paid, 6s. and 6s. 6d.

A Tax on Titles.—King James I. of England, as we know, drove a thriving trade in the sale of knighthoods. Some Italian deputies, looking to the woeful straits the Government are in for money, have apparently seriously suggested the imposition of a tax on titles. The Government have not yet said that they will even consider the subject; but, in the present hunger-driven condition of Italy, who knows how soon the question may be pressed within the sphere of practical politics by the clamour of the starving crowd, to whom bread seems becoming an almost unpurchasable luxury, so heavily burdened are they by the taxation deemed necessary by her rulers to maintain Italy in her precarious international position?

According to a despatch from Louisville, a Liverpool syndicate is about to build an immense tobacco manufactory in that city. Work upon it will be begun in the early spring. It is said that about 1,700 men will be employed in the factory.

The latest news from the Soudan is that the Dervishes are evacuating Metemmeh and retiring on Omdurman, where the Khalifa is throwing up entrenchments.

M. Dubois de l'Estang, the French Financial Commissioner, has consented to open negotiations with the French capitalists in Paris in connection with the indemnity loan.

ANOTHER REVOLUTION IN TELEGRAPHY.

A further revolution in telegraphy seems near at hand. The "Telescriptor" may supersede the telephone. It is also a type-printing machine. The merchant may have it at his elbow in his office, and can easily read the message it conveys, and, without rising from his seat, reply to it at once. If he is out, the message awaits his return, and can then be attended to. Another advantage of the "telescriptor" is that it prints at both ends, so that the sender can see whether his message is being correctly sent, and has the copy before him for reference when the reply is forthcoming. It is automatic in its action, and trouble both to sender and receiver will thus be reduced to a minimum. Another invention is the zerograph, different in its method of working, but practically achieving the same results as the telescriptor, though more fitted for long-distance working. The zerograph is being tested at the Post Office; and, if found as good as their inventors represent them, no doubt both machines will be acquired by our great postal and telegraphic monopoly. If so, it is to be hoped the authorities will show more enlightenment than they usually do in placing the advantages of the new machines at the disposal of the mercantile community.

MINING RETURNS.

DAY DAWN P.C.—Crushings for fortnight ended January 26. No. 1 shaft, 163 tons for 475 oz.

HIGHLAND CHIEF.—Crushed 277 tons yield retorted gold 91 oz.

ST. JOHN DEL REY.—January 12 to 22. Gold produced, £3,970. Yield per ton, 48 of an oz. troy.

OTTO KOPJE.—For week ended January 27, 5,725 loads washed, 184 carats.

EASTLEIGH.—For December. Crushed 4,540 tons, yielding 522 oz.; tailings, 3,495 tons, yielding 1,172 oz. Slimes, 750 tons, 170 oz.

BAYLEY'S UNITED GOLD MINES have forwarded 1 ton 4 cwt. arsenical pyrites, worth altogether 460 oz. gold.

BONNIE DUNDEE GOLD.—A trial crushing of 25 tons has yielded 30 oz. gold.

LONDONDERRY.—Cleaned up after crushing 330 tons for a yield of 652 oz.

PESTARENA UNITED.—Return for January: 463 tons of ore produced 575 oz. gold.

HAURAKI ASSOCIATED.—Crushed 90 tons for return of 290 oz., value £800.

FRANK SMITH DIAMOND.—1,980 loads washed, producing 69 carats.

GREAT BOULDER PROPRIETARY.—Return for fortnight ended January 31:—Crushed 1,416 tons of ore, producing 3,366 oz. of gold.

MYSORE REEFS (Kangundy).—956 tons of ore crushed, yielding 603 oz. retorted gold.

MYSORE WEST AND WYNAAD.—For January, 1,500 tons produced 516 oz.

MIKADO.—Result of last clean-up: 462 oz. of gold from 509 tons, exclusive of tailings.

GLENROCK PREMIER MINE.—410 tons crushed, producing 372 oz. gold.

PRINCESS ROYAL (Cue).—Clean-up from 150 tons gave 114 oz.

IVANHOE.—Clean-up for two weeks, 1,333 oz. of gold; 766 tons crushed. Total clean-up for month, 2,760 oz. of gold; 1,555 tons crushed. Tailings assay 11 dwt. of gold per ton.

BRITISH BROKEN HILL PROPRIETARY.—Returns for fortnight ended January 27: 3,173 tons crude ore produced 566 tons concentrates, containing 344 tons lead and 4,513 oz. silver.

ASSOCIATED GOLD MINES OF W.A.—Wallaroo, to January 28, 315 tons yielded 1,050 oz. gold. Dry Creek, to January 21, 951 tons yielded 3,583 oz. gold. Net proceeds amounting to £13,203.

CHAMPION REEF (Nannim, W.A.).—560 tons crushed; yield, 101 oz. retorted gold.

CHAMPION EXTENDED AND HOME RULE.—Clean up from 425 tons gave 283 oz. of gold.

GREAT EASTERN COLLIERIES.—Output for January, 23,800 tons.

LEICESTER CONSOLIDATED DIAMOND.—From the mine, 1,685, and from floors, 5,550 loads washed, producing 237 carats.

STANHOPE GOLD.—Last month's crushings yielded 1,058 oz.

CHAMPION REEF GOLD MINING COMPANY OF INDIA.—7,108 tons of stone produced 9,104 oz. of gold, 2,430 tons of tailings produced 607 oz., and 4,785 tons of tailings (cyanide process) produced 1,245 oz. of gold.

GOLDFIELDS OF MYSORE.—During month of January 700 tons and treated by cyanide produced 50 oz. of gold; 209 oz. of gold were obtained from amalgamation.

OOREGUM GOLD MINING COMPANY OF INDIA.—Return for month of January is as follows:—5,761 tons of quartz produced 3,632 oz. of gold: 4,780 tons of tailings produced 488 oz. of gold.

NOTICES.

Letters of allotment in Arnold J. Van den Bergh, Limited, have been posted.

The board of John Barker & Company, Limited, have resolved to increase the Ordinary share capital by £40,000 by the issue of 40,000 of the unissued shares of £1 each. They will be offered at £2 10s. each to ordinary shareholders on the register on February 10 at the rate of one new share for every complete four old shares held.

LONDON AND SOUTH WESTERN BANK, LIMITED.—In consequence of the retirement of Mr. G. T. Goodinge from the general managership of the London and South Western Bank—he having been elected to a seat on the board—the directors have appointed Mr. John Williams, the present assistant manager, and Mr. Robert Woodhams, the manager of the Fleet-street Branch, to be joint general managers of the bank.

Izzet Bey, sometime a favourite of the Sultan, has fallen from his high estate; he has been arrested for high treason. The crime, however, seems really to have been committed by his son, who was accused of complicity with the Young Turkey party, but escaped across the frontier, carrying with him considerable sums of money and important documents containing secrets of State.

The Belgian Government have decided to reduce to 15 fr. the excise dues on refined sugar from October 1, 1899.

The Brazilian Government announce their firm determination not to lease the Central Railway.

Jamaica and the West Indies have been brought into communication with Great Britain by cables independent of foreign control. The new route is by way of Halifax, Nova Scotia; thence by submarine cable to Bermuda and Jamaica.

The Liverpool Cotton Association have adopted the new arbitration scheme on American docket cotton, and the system is thus assimilated with that of New York and Bremen.

Prices of Mine and Mining Finance Companies' Shares.

Shares £1 each, except where otherwise stated.

THE GREAT EASTERN AND THEIR WORKMEN.

Lord Claud Hamilton, presiding at the half-yearly meeting of the Great Eastern Railway Company, entered into an explanation and defence of their dealings with their workmen. The company were about to commence the erection of cottages for their workmen at two centres in their district, as well as in the suburbs of London. Many of the men also rented allotments on the unused land of the company. They had an invaluable boon in the privilege tickets and in the free passes they had on their annual holiday, for which they received wages. They had at Stratford a mechanics' institute, erected nearly 50 years ago at the cost of the company, which the company had maintained ever since, and which they were about to extend. This institute had been the means of sending out into many parts of the world men trained in the company's workshops; and in their locomotive and carriage and wagon shops their superintendent, when engaging new hands, always gave the preference to sons of Great Eastern men. Their savings bank was open to all their men, their wives, and children, and had an invested sum of £250,000, on which the company allowed 4 per cent. interest. There were also their superannuation, pension supplemental, and pension funds, their provident society, and their accident fund. The latter was about to be abolished on account of the new Government Workmen's Compensation Act. So valuable had their accident fund been to the men during the past seventeen years that he hoped, with the proprietors' sanction, to be able to start a new fund outside of the Act, the practical result of which would be to combine all the benefits offered by their existing fund and those contained in the Government Act into one scheme, entailing only a very small weekly contribution on the part of the men. His lordship also referred to their Pension Bill, for which they were to apply for the sanction of Parliament. This Bill would place the pension fund upon the basis of the guarantee of the company instead of upon the actuarial basis. The public, added his lordship, had to consider a good deal more than what they heard and read in regard to wages and hours.

RAILWAY TRAFFIC RETURNS.

Mobile and Birmingham Railway Company.—Gross earnings for second week of January, $9,920; increase, $3,341.

Algeciras (Gibraltar) Railway Company.—Receipts for the week ended January 22, 18,430 pesetas; increase, 1,020 pesetas. Aggregate for twenty-nine weeks to January 22, 601,519 pesetas; increase, 8,393 pesetas.

Alabama Great Southern Railway Company.—Traffic receipts for month of December, $177,000; increase, $12,000.

Cincinnati Southern Railway Company.—Traffic return for month of December, $340,000; increase, $36,000.

Quebec Central.—Second of January, $4,446; decrease, $463. Aggregate from January 1, $8,581; decrease, $443.

Bahia and San Francisco Railway Company (Timbo Branch).—Traffic receipts for week ended January 8, £377; increase £86.

Central Uruguay Eastern Extension Railway.—Traffic for week ended January 30, £2,240; increase £1,069.

Central Uruguay Northern Extension Railway.—Week ending January 30, £562; decrease £206.

Western Railway of Havana.—Week ended January 29, £1,960; increase £427. Aggregate from July 1, £53,405; increase £5,633.

Western of Sante Fe Railway.—Traffic receipts for week ending January 29, $40,000; increase $3,000.

Villa Maria and Ruffins Railway.—Receipts for week ended January 29, $3,571; increase $96. Aggregate from January 1, $14,943; increase, $678.

Bengal Dooars Railway Company.—Traffic receipts for six months to December 31, Rs. 174,209, against Rs. 166,709 for the same period last year.

Bengal Central Railway Company.—Traffic receipts for eight days ended January 8, Rs.18,802; decrease, Rs.4,005

West of India Portuguese Railway.—Return for eight days to January 8, Rs.4,805; increase, Rs.231.

Southern Mahratta Railway.—Traffic for first eight days in January, Rs.1,11,487; decrease Rs.17,110.

H. H. The Nizam's Guaranteed State Railways Company.—Traffic for eight days to January 8, Rs.83,231; increase, Rs.1,532.

Delhi Umballa Kalka Railway Company.—Traffic return for week ended January 22, Rs.71,500; increase, Rs.50,700. Total from commencement of half-year, Rs.124,900; increase, Rs.55,400.

Cleator and Workington.—Gross receipts for the week ending January 9 amounted to £1,037, a decrease of £24. Total receipts from January 1, £4,105, a decrease of £243.

Cockermouth, Keswick, and Penrith.—Gross receipts for the week ending January 29 amounted to £825, an increase of £126. Total receipts for four weeks £3,483, an increase of £432.

East and West Yorkshire Union.—Gross receipts for the week ending January 14 amounted to £280, an increase of £78. Total receipts for two weeks £548, an increase of £105.

Mr. E. G. Thorpe Goodinge has just resigned the general managership of the London and South-Western Bank, with which he has been connected for thirty-five years.

Between the first of April and the 29th ult. the total receipts into the Exchequer amounted to £82,091,020, compared with £80,378,514 in the corresponding period of the last financial year; and the expenditure to £83,381,881, as against £82,687,599.

Next Week's Meetings.

Saturday, February 5.

Harrow and Uxbridge Railway ...	12, Victoria-street, Westminster, 10 a.m.
Whitechapel and Bow Railway ...	12, Victoria-street, Westminster, 10.15 a.m.

Monday, February 7.

Ocean Marine Insurance ...	2 and 3, Old Broad-street, noon.
Reversion Investment Corporation	3, Chancery-lane, 4 p.m.
Southend Gas	Winchester House, 2 p.m.

Tuesday, February 8.

Belfast and County Down Railway..	Belfast, noon.
Dublin United Tramways	Dublin, 2 p.m.
Hull, Barnsley and West Riding, &c., Railways	Winchester House, noon.
London Necropolis	2, Lancaster-place, 2.30 p.m.
Railway Debenture Trust	Cannon-street Hotel, noon.
Railway Share Trust and Agency ...	Cannon-street Hotel, 11.30 a.m.
Taff Vale Railway	Bristol, 2 p.m.
Texas Land and Cattle	Dundee, 1 p.m.

Wednesday, February 9.

Cork, Bandon, and South-Coast Railway	Cork, noon.
Kent Waterworks	Cannon-street Hotel, noon.
Lake George Mines	11, Cornhill, 2 p.m.
Lancashire and Yorkshire Railway .	Manchester, noon.
Leicester Banking	Leicester, noon.
National Mutual Life Assurance ...	39, King-street, 2 p.m.
Newhaven Harbour	London Bridge Station, 1 p.m.
New Imperial Investment	Winchester House, 2.30 p.m.

Thursday, February 10.

Bank of Egypt	26, Old Broad-street, noon.
East Lincolnshire Railway	King's Cross Station, 12.30.
Great Western Railway	Paddington.
London and Hanseatic Bank ...	38, Lombard-street, noon.
London and Provincial Marine Insurance	Winchester House, 2 p.m.
London and South Western Railway	Waterloo Station, noon.
Merchant Banking	112, Cannon-street, 12.30 p.m.
Midland Great Western of Ireland Railway	Dublin, 1 p.m.
Natal Land and Colonization Company	41, Threadneedle-street, 1 p.m.
South Eastern Railway	Cannon-street Hotel, noon.
Waterloo and City Railway... ...	Waterloo Station, 2 p.m.

Friday, February 11.

Belfast Street Tramways	7, Poultry, noon.
Brentford Gas...	Charing Cross Hotel, 2 p.m.
Cardiff Railway (Spec.)	Queen Anne's Gate.
Great Northern Railway (Spec.) ...	King's Cross, noon.
North Eastern Railway	York, noon.

Saturday, February 12.

Great Southern and Western Railway Company	Dublin, noon.

TRAMWAY AND OMNIBUS RECEIPTS.

Increases for past week:—Belfast, £389; Bristol, £606; Croydon, £107; Glasgow, £64; Lea Bridge, £165; London, £1,448; London & Deptford, £95; London Southern, £133; London General Omnibus, £3,270; London Road Car, £1,249; Metropolitan, £1,762; North Staffordshire, 32; Provincial, £323; Southampton, £39; South London, £254; South Staffordshire, £73; Sunderland, £163; Swansea, £32; Wolverhampton, £25; Woolwich & S. E. London, £60; Bordeaux, £13; Calais, £3; Calcutta, £178.

Decreases for past week:—

Anglo-Argentine, week ending January 3, £285 increase; Buenos Ayres Grand National, week ending January 1, $5,756 incease; Vienna Omnibus, week ending January 15, £131 increase; Buenos Ayres & Belgranof month of December, £4,858 gross, an increase of £513.

Food is again becoming seriously dear in Bulawayo. Mealies, which two months ago were sold at 30s. a bag, now cost 70s. The rains have been heavy, and transport consequently extremely difficult.

About 300 architects, surveyors, civil engineers, professors, and theatre managers have, it seems, formed themselves into what is called a British Fire Protection Committee. A laudable object, but how are the committee to proceed in attaining it? The reading and discussion of papers may be excellent entertainment, but it is hardly business.

Yet another gold discovery. This time it is in the Hay, Buffalo, and other rivers which run into the Great Slave Lake, in the district of Prince Albert in Canada. The discovery, it seems, was made by a party going into the direction of the Yukon river. Of course, prospectors are now preparing to start for the district.

A Winnipeg telegram states that the clearings of the Winnipeg banks had increased by $20,000,000 last year to a total of 82,000,000.

LONDON AND NORTH-WESTERN RAILWAY PENSION SCHEME.

This is good of the company—the right line to take. Mr. E. Garrity, financial secretary to the Amalgamated Society of Railway Servants, in an interview with a Press representative, made a statement in regard to the extinction of the London and North-Western Insurance Fund and the Workmen's Compensation Act. He said that Mr. L. H. Viner, the secretary to the London and North-Western Insurance Society, has issued a circular to the employés of his company reminding them that the arrangements entered into between the members of the insurance society and the company which have been in operation under the Employers' Liability Act since January 1, 1881, will cease and the agreements become null and void from and after July 8, 1898, which will render the winding-up and reconstruction of the present insurance society a legal necessity. Mr. Viner, therefore, invites the members to lose no time if they are desirous of continuing the existence of the insurance society in arranging with their employers for establishing a new system of mutual insurance. Mr. Garrity, on behalf of the amalgamated society, had no hesitation in recommending the men to have nothing whatever to do with the proposals of the company. He believed the scheme would be on a profit-sharing system which might be based on the following lines:—1. The rates of pay which are now in force to be considered the standard rate of pay, and to remain unchanged unless and until the annual amount of net profit earned exceeds 4 per cent. upon the amount of capital expended in the construction of the line, and in the provision of rolling stock and appliances necessary to equip the railway as a going concern, when the profit-sharing scheme will come into operation. 2. The profit fund to be the balance of the revenue account which would remain after providing a sum sufficient to pay 4 per cent. upon the total capital expenditure. 3. A bonus of 1s. 8d. in the pound of their standard wages to be paid to all railway employés included in the scheme in respect of every 1 per cent. of additional net profit equal to 1d. in the pound o standard wages for every 1s. of additional net profits over and above 4 per cent.

Lord Palmerston once declared that dirt was only matter in the wrong place. A certain Mr. W. Higgins Jacob seems to think dirt is in its right place in the streets. He objects to the constant watering. It "creates fog, dirt, influenza, and diphtheria." Who would have ht it?

ENGLISH RAILWAYS.

Prices Quoted on the London Stock Exchange.

Throughout the INVESTORS' REVIEW middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the INVESTMENT INDEX published quarterly—January, April, July, and October—in connection with this REVIEW, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the REVIEW almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the INVESTORS' REVIEW any subscriber can follow for himself the movements of securities from week to week, and the INVESTMENT INDEX will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S.F. Snk.Fd. *sinking fund*; Certs., *certificates*; Debs. or Dbs., *debentures*; Db. or D.Stk., *debenture stock*; Pf., Prf., or Pref., *preference*; Prefd. or Pfd., *preferred*; Dfd., *deferred*; L. or Ltd., *limited*; Sh., *share*; Ans., *annuities*; Cu. or Cm., *cumulative*; Gu or Guar., *guaranteed*; Bds., *bonds*; S., Sr., or Ser., *series*; In., Ins., Insc., *inscribed*; Dr., Drgs., Drwgs., *drawings*; Stg., Strlg., *sterling*; Lia., *liable to*; Sp., Surp., *surplus*; Per., Perp., *perpetual*; Ln. *lien*; Lo. *loan*.

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.

The Investors' Review

Vol. I.—No. 6. New Series. FRIDAY, FEBRUARY 11, 1898. [Registered as a Newspaper.] Price 6d. By post, 6½d

The Investment Index.

A Quarterly Supplement to the "Investors' Review."

Price 2s. net. 8s. 6d. per annum, post free.

THE INVESTMENT INDEX is an indispensable supplement to the Investors' Review. A file of it enables investors to follow the ups and downs of markets, and each number gives the return obtainable on all classes of securities at recent prices, arranged in a most convenient form for reference. Appended to its tables of figures are criticisms on company balance sheets, State Budgets, &c., similar to those in the Investors' Review.

Regarding it, the *Speaker* says: "The Quarterly 'Investment Index' is probably the handiest and fullest, as it is certainly the safest, of guides to the investor."

"The compilation of securities is particularly valuable."—*Pall Mall Gazette.*

"Its carefully classified list of securities will be found very valuable."—*Globe.*

"At no time has such a list of securities been more valuable than at the present."—*Star.*

"The invaluable 'Investors' Index.'"—*Sketch.*

"A most valuable compilation."—*Glasgow Herald.*

Subscription to the "Investors' Review" and "Investment Index," 36s. per annum, post free.

CLEMENT WILSON,
NORFOLK HOUSE, NORFOLK STREET, LONDON, W.C.

"INVESTORS' REVIEW."

NOTICES.

BACK NUMBERS.

Less than a dozen complete sets now remain of the first four Quarterly Numbers of the "INVESTORS' REVIEW," so that the first Number of all can only be supplied in volume form, price **21s.** net. The Volume for 1893 is also composed of Quarterly Parts, and its price is the same. The seven Quarterly Parts from Number II. onwards can still be had separately, price 5s. net. For the succeeding four years down to December, 1897, the "REVIEW" is in Monthly Numbers.

All Monthly Numbers more than six months old will now be charged 1s. 6d. net, and all Half-yearly Volumes, 10s. 6d. net (by post, 2d. and 10d. extra for the Number or Volume).

Cloth Cases for binding the "REVIEW" and the "INDEX" are charged for as follows:—For Annual Volumes of the "REVIEW," 1s. 6d.; for Semi-annual Volumes, 1s. 3d.; and for Yearly Volumes of the "INDEX," also 1s. 3d. Postage, in all instances, 2d. extra.

Volume I. (July, 1895—April, 1896) and Volume II. (July, 1896—April, 1897) of the "INVESTMENT INDEX" now ready, price 9s. 6d. each, net (post free, 10s.).

Economic and Financial Notes and Correspondence.

STALEMATE IN CHINA.

Lord Salisbury's statement in the House of Lords on Tuesday night may appear satisfactory to all except those who know anything about the affairs in the Far East. He made it clear enough that the port of Ta-lien-wan, over which so much fuss has been made, was used merely as an engine of diplomacy for the purpose of clearing up an ambiguous position. But is this position cleared up? We doubt it much. Both Russia and Germany had seized the places on the Chinese coast, with the apparent intention of converting them into exclusive depôts for their own ships of war and commerce. It was quite on the cards that France would follow their example, and therefore the British Government was under the necessity of taking steps to oblige these Powers to declare themselves. Our Ambassador at Pekin put forward our treaty rights in opposition to the exclusive attitude of Germany and Russia, and suggested the opening of Ta-lien-wan as a treaty port. The move was excellent, and it has resulted in "Stalemate." "We shall make our ports free," quoth the Powers, and Lord Salisbury thankfully accepts. "A free port is better than a treaty port," he told the House of Lords. That doctrine, with all respect to him, is mischievous nonsense. A treaty port means a port whose commerce is regulated by the European maritime customs service of China, a service which guarantees equal rights to all comers. A "free port" means whatsoever Germany or Russia pleases—free while we watch and grumble, closed when our atten-

tion is elsewhere. At other points in the game we also seem to have come off second best. Our treaty rights have been recognised in form and undermined in reality. The equality of all the Powers before the Chinese is broken, and the patch-up now come to might very easily be the prelude to a fight. Well may the *Standard* speak out against such an exhibition of "fustian and funk."

The fuss about the loan to China, on the other hand, appears a little misplaced, and it is quite conceivable that China may not require a loan so soon as was expected; and, when she does want it, we can, if we like, prevent her from getting it if she does not take it of us. Of course, the attempt of the Pekin Government to raise an internal loan will only have laughable results, because John Chinaman has no reason to trust the officials of the Empire. But suppose it fail, and suppose China obtain no money from anywhere, may not this be exactly what Japan just now wants? We have left Japan too much out of sight in all our recent splutterings about our "rights," our capacities to "enforce" them, and the rest of the stage gag in the Far East. It has been almost forgotten that Japanese interests have been more vitally touched by the great Continental Powers even than ours, and that Japan has the strongest ground for resenting the presence of Russia and Germany as naval powers in Chinese waters. By that presence the position has been completely altered since the Treaty of Shimonosaki was signed, and it is now more than probable that Japan would not surrender Wei-hai-wei, even were the entire indemnity due to her paid. Her Government might say, and say with very good reason, "we cannot give up this place while Powers who have shown themselves at a critical period in our history enemies to us remain in possession of Port Arthur and Kiau-Chau."

What were the terms of the treaty of peace in regard to the indemnity? Japan was to hold Wei-hai-wei until all the money was paid, and the ultimate date of payment was 1902. Between May, 1898, when the last instalment of the second portion of the indemnity, amounting to about £2,500,000, falls due, and May, 1902, China has to pay Japan nearly £17,000,000, including interest. Power, however, was reserved to her to escape the interest charges, and to release the occupied port by paying up the final instalment in full next May. Hence the desirability of obtaining a loan of £12,000,000 between now and then. The money for the instalment due in May being already provided, it would just take China about £12,000,000 to pay out Japan in advance, and release Wei-hai-wei. If, however, Japan will not surrender this port, there can be no urgent necessity for China to pay the money, and it is quite on the cards that the two Powers may so arrange matters that China will be released from part of her money obligations under the treaty of peace, in exchange for the continued occupancy of Wei-hai-hei by Japan. Certainly, this is an arrangement which would suit us admirably, for our one friend, at present, in the distant East is, undoubtedly, Japan.

The Army and National Expenditure.

We give the following pregnant sentences, which formed the concluding portion of Sir William Harcourt's speech in the opening debate on the Address in reply to the Queen's Speech. The right hon. gentleman was discussing the proposals for increased expenditure on the Army; and his denunciation of this constant addition to the national expenditure is a weighty warning which ought to be profoundly considered by every reasonable and responsible person in this country. "You have had great and cumulative surpluses without any relief to the taxpayer," said Sir William. This is true; and there is no sign that the Government is yet giving a thought to the relief of the taxpayer, or, indeed, of doing anything whatever to check this steadily increasing drain on the vital resources of the nation. If some step in this direction is not taken soon, it may come too late :—

I have felt it my duty before to raise a note of warning as to the expenditure of this country. The Government, or at least some of them, enter upon these estimates with imperfect information. One of them says that there has been no addition to the Army for thirty years, whereas, as a matter of fact, there has been an addition of over 100,000 men, 30,000 to the colours and 80,000 reserve. There has been, moreover, an increase in the expenditure on the Army of 50 per cent., for the estimates have risen from £12,000,000 to £18,000,000; and if you add to that the military defences of the Empire and the increase in the Indian Army, the addition to the expenditure on the Army has been enormous. (Hear, hear.) The additions to naval and military expenditure together since 1870 have been £19,000,000 a year. I would ask the House and the Chancellor of the Exchequer to bear in mind these figures. The additions in a time of nominal peace to the naval and military expenditure of this country are greater than the charge on the national debt for the accumulated wars of two centuries. (Hear, hear.) I have always warned the House of the growth in expenditure. It is growing, not in arithmetical but in geometrical progression. The growth in the expenditure of this country has been in the last thirty years £27,000,000, and if you choose to add to it, as you ought, the money you take out of the Exchequer to give in local subsidies, the amount is £35,000,000. The resources of this country are vast, but they are not inexhaustible. You have a great revenue founded on a sound commercial and monetary basis. The yield is abundant, and I am glad to know that the Chancellor of the Exchequer will have a large surplus (hear, hear); and you have this remarkable fact, that in the third year of cumulative surpluses you are told you are going to have unprecedented estimates. You have, for the first time in the financial history of this country, this phenomenon, that you have had great and cumulative surpluses without any relief to the taxpayer. (Hear, hear.) You will have a great revenue, but you will have great demands upon it, demands for the Army, demands for the Navy, for Ireland, for the West Indies, and I know not what besides. When the Chancellor of the Exchequer comes to satisfy these demands I think he will regret those £2,000,000 which he threw away on the Agricultural Rates Bill ("Oh, oh," and cheers), a dole given out of the Exchequer upon the false pretence now known to everybody to be false, that the land of England was going out of cultivation. We now find Minister after Minister getting up and saying that there never was such a delusion, and that that was not what they meant. They were perfectly shocked, and the chairman of the Commission said that the profession of agriculture was a more agreeable and, on the whole, a more profitable calling than any other trade. Well, sir, you have a splendid revenue if you administer it wisely and well, but if you abuse it by squandering your resources, by giving doles to favoured industries, by unnecessary frontier wars and Soudan expeditions, it is my firm belief that you will exhaust the springs on which the life of your Empire depends. (Cheers.)

The Vanishing Concert.

There is at present rather a lull in the excitement which Russian diplomacy had caused in connection with the candidature of Prince George of Greece for the governorship of Crete. There were ominous prophecies about the break up of the European Concert—which could hardly be regarded as an irreparable calamity—and there were very real indications that the "understanding" between Austria and Russia was no longer binding, if it has not already come to an untimely end. It has become tolerably clear that the two

countries cannot agree in their policy in the Balkans. Both want the same thing—dominating influence in that particular part of the world, and, of course, only one can be successful in achieving her purpose. For the present, however, the battle is over the governorship of Crete. Austria has adopted a *non-possumus* attitude; Russia, until the other day, was vigorously active in forcing forward the candidature of Prince George; but during the last day or two she has slackened her energy in that direction, and has, indeed, postponed further action for the present. Russia's immediate purpose, it would seem, is first to get the Turks out of Thessaly. With this view apparently she has joined with England and France in guaranteeing the Greek indemnity loan; and, having paid out Turkey, will insist on the evacuation of Thessaly. This accomplished, the candidature of Prince George will be revived, and, no doubt, insisted upon. Meanwhile Lord Salisbury informs us that, though the Turkish troops will not be called upon to withdraw from Crete, no reinforcements shall be allowed to land, and he hopes to see those remaining take their departure in no very long time. But as all this action is being taken by only three out of the six members of the Concert, it may, we presume, be taken for granted that the famous—or notorious—European Areopagus is already practically at an end. Indeed, the Russian official communication, published yesterday, looks very much like a determination to withdraw from it altogether, unless she can have her way about the new Governor-General of Crete.

The "Chartered" Company and its Vanishing Board.

In view of last Monday's announcement that the Duke of Fife and Lord Farquhar have retired from the board of the British South African Company, it is desirable that the Government should be pressed to give fuller information in regard to the dealings of the members of this board on the Stock Exchange. In June, 1896, we drew attention to the shareholdings of the Duke of Fife, the Duke of Abercorn, Mr. Rhodes, and some other directors of the company at different dates, and it may be of interest to quote part of what we then said here :—

> So far as we have got names, a comparison of the later list with the list of 1893 seems to indicate pretty clearly that the leading spirits of the company have been unloading. The 1893 list appears to have shown that Cecil Rhodes held about 772,000 shares at that date, including those received by him for his large slice of the United Concessions Company's capital. According to the figures given in the *Chronicle*, his holding last July was reduced to less than 52,000 shares. What has become of the 700,000 odd, we have no means of knowing; but a series of lists might enable us to trace them to some extent. Perhaps they have gone abroad as "bearer" certificates. Sir Horace Farquhar, one of the directors of the company, appeared to possess about 16,000 shares in 1893, and in July, 1895, this, on the testimony of the *Chronicle*, was reduced to 6,358. The Duke of Fife, another director, is exhibited as holding 16,850 at the first date, and only 3,855 at the later date. If these gentlemen realised on the "boom" of last summer and autumn, their fortunes must have been substantially increased by the operation. The chairman of the company, however,—the Duke of Abercorn—appears to have held steadily to his investment almost with the tenacity of an enthusiast; for he realised between the two dates only about 3,200 of his shares, *i.e.*, he held 8,600 shares in 1893 and 5,419 in July, 1895, if we can believe the copyists.—Investors' Review, vol. vii., pp. 355, 356.

These figures indicated that the members of the board had been selling heavily to the public, trading upon the legend that the company was doing a great work in extending the borders of the Empire. Now that the board is falling to pieces it is not fair that transactions like these should be quietly hushed up. Lord Farquhar (then Sir Horace) has told a *Daily Mail* interviewer that he has too much to do now to be able to attend to the Chartered Company's affairs, which moreover—and this seems contradictory—do not now require any looking after. "The time of trouble has passed," quoth he, "and the company is now free from cares"—*vide* Mr. Cecil Rhodes on this point as quoted below. And is Lord Farquhar free from shares? Why cannot the House of Commons order the share lists of various dates to be published in parallel columns, so that all may see how money has been passing from the pockets of the public to those inside the magic circle? It may, of course, be that these gentlemen have not really parted with all the shares they seem to have sold; they may have turned their shares into bearer certificates and stuck to them. We are willing to give them the benefit of the doubt, but the matter must be cleared up.

This is the more necessary because the great master conjurer of them all, Mr. Cecil Rhodes, has now adopted the tone regarding the territory of the "Chartered" Company which cannot fail to have a most disastrous influence on the price of "Chartered" shares and the shares of the host of companies created under its patronage. There is something pathetic in the story told by Mr. Gambier Bolton in last Saturday's *Daily News*. The great conjurer of empires by share emissions, wielder of millions, is afraid to trot on horseback lest the motion should cause his heart to stop; the triumphant conqueror of the Stock Exchange, of the British Government, and of Mr. Chamberlain, is now grey and white haired with anxiety, all the buoyancy gone out of him, and gloomy forebodings taking the place of the boastful language indulged in not so many months before. A week later, though, the same paper shows us the man in his old character—boisterously confident, and, having got his million safe, full of mockery at British philantrophy plus 5 per cent. But his candour to Mr. Bolton interests us most. Just read the pith of that melancholy tale :—

> He didn't scruple to admit that Rhodesia at present is practically worthless from the agricultural point of view, what with horse and mule sickness of two kinds, tsetse fly, and rinderpest or cattle-plague, scab, locusts, drought, and above all the scarcity of native labour. And, even from a mining point of view, owing to the want of labour. It was almost pathetic to hear him hurl anathemas against Exeter Hall and the Aborigines' Protection Society. Those bodies, and Sir Richard Martin's report on the subject, have stopped forced labour. As for the ordinary emigrant—he is the last person they want in Rhodesia. So long as food for man and grain for animals have to be brought into the country the cost of living *must* be enormous—far higher than any wages would provide for. No—the only sort of emigrant Mr. Rhodes wants is the capitalist—capital, capital. Capital — to develop the mines — to buy the crushing machinery—the extraction of more gold from the earth. Now that he has got his railroad to Buluwayo, Mr. Rhodes's fear is of a rush of poor people from the old country, to find no work, no food, only cold, heat, fever, and plagues of all sorts. It is for its gold, upon whose presence Mr. Rhodes stakes his reputation, and upon its usefulness as land over which his Cairo cable can run. Then, if he hadn't annexed it, some one else would, and that would never have done.
>
> And, meanwhile, what is to happen?
>
> Well, Mr. Rhodes said that when the two railways are open they would be able to get up the heavy machinery from the coast necessary to crush the quartz, and then, supposing they could get the natives to work, they might be able to pay dividends—in time.

The natives won't work unless they're made. They say they don't want the white man's money. They lived without it *before* he came to their country, they can do so now. They are mostly warriors, and fighting and hunting are all they care for. "Look at them!" exclaimed Mr. Rhodes, raging; "there they sit—great, able-bodied men, squatting round their huts week after week, plotting and scheming, loafing, eating, and sleeping; and the country going to rack and ruin for want of the labour which they alone can give us, if we are to work our mines and farms profitably. Exeter Hall and the Aborigines' Protection Society have dealt us—and me personally—the worst blow that has ever fallen on this country, and if things go wrong from this cause on their heads must be the blame." These are almost Mr. Rhodes's own words.

With all his faults Mr. Cecil Rhodes has the merit of being frank to brutality. He never minces matters and only in the Jameson raid episode could he be said ever to have been guilty of ambiguities of speech. The statements here reported are therefore in the highest degree interesting. They admit that slave labour was part of the means by which Rhodesian mines were to be developed, and they admit the practical worthlessness of the country for anything except minerals. To do him justice still further, Mr. Rhodes never said that it was anything else. And he may plead that forced, or slave, labour is no worse in Rhodesia than in the Transvaal and Kimberley, where it exists as a practical institution, with Exeter Hall silent. But what a contrast the master's blunt outspokenness is to the "all trouble over" optimism of Lord Farquhar. Have his Lordship and the Duke of Fife sold out in despair? What is the truth about this "Chartered" Company with its globular capital, its absence of accounts, the complete silence in which its affairs have been wrapped since we turned its balance-sheets inside out in April, 1896? No accounts of any kind have been published of a later date than March, 1895. Is Parliament going to allow this sort of thing to continue, while one by one or two by two the rats slink off and leave the nation to face unknown responsibilities, perhaps enormous debts?

The Managers of the Stock Exchange and Sir Henry Burdett, K.C.B.

We are rather sorry for Sir Henry Burdett; he has given himself away so very badly in the correspondence with the trustees and managers of the Stock Exchange which he has just published. His object in instituting this correspondence was to get these gentlemen to give him a pension, and in his argument in support of his petition he cites the settled custom in the City of London in the case of highly-placed officials of the Bank of England, the Corporation, and other wealthy bodies. But surely this is nothing to the purpose. The real question is, What was Sir Henry's contract? Recognising, perhaps, the weakness of this argument, he proceeded in a long memorandum to set forth his services, and to furnish medical certificates intended to prove that his resignation was forced upon him by ill-health, the result of over-work in the service of the Stock Exchange. He claims to have conceived and produced the book now known as "Burdett's Official Intelligence," the capital value of which, he says, at a moderate computation, "cannot be less than £30,000." We should be sorry to give £3,000 for it. As a result of his labours, he further claims to have added £3,800 per annum to the resources of the managers, and in return for seventeen years devoted to these arduous labours he thinks he should have a pension.

When Sir Henry's resignation was first made public, this pension question was considerably agitated at his own instance. We made inquiries then among members of the "House" of the highest standing, and the result was to force upon us the conclusion that the voluntarily-retiring secretary to the Share and Loan Department was not entitled to any pension. For many years, we were told, if not for the whole period of his service, his income was four thousand guineas per annum, enough, surely, to enable him to provide a retiring competency for himself? And, as regards his over-work, what many of the members pointed out to us was that Sir Henry had not obtained his K.C.B.-ship by serving the Committee of General Purpose and editing its "Official Intelligence." If he was over-worked, they said, it must be because so much of his time and energy were absorbed by philanthropic labours in connection with hospitals, the editing of his periodical named *The Hospital*, the writing of letters of great length to the newspapers on benevolent objects, and in the compilation of a fearful and wonderful "Life of the Prince of Wales," or because he laboured so hard in whipping up subscriptions for his Nurses Benevolent Fund—a curious "blend" of philanthropy and hard-hearted business.

In short, instead of finding Sir Henry popular with the majority of the members of the House, as he seems himself to imagine he was, we discovered a considerable feeling of resentment to be widely prevalent at the way in which he had used his position as the servant of the Committee to push himself forward socially. This being so, he ought not to be surprised at the cold reception given by the managers to his request for a retiring allowance. Even had they been disposed at one time to grant his request they would have probably changed their minds when they found Sir Henry becoming a director of such a company as the Welsbach Incandescent Gas Company.

In the light of this correspondence one can understand now why the managers decided to give Sir Henry's successor a fixed salary of only £1,500 per annum. Our view is that they made a mistake in cutting down the pay after this fashion, and we have spoken somewhat sharply about it. Our remarks were directed against the policy, by no means against the man selected, whom we do not know but of whom we hear nothing but good. It seemed to us that to give so small a salary was to belittle an office the highest in importance in connection with the Stock Exchange so far as the public is concerned, the occupant of which is subject at times to great temptations; and this view seems still the right one to take. At the same time we are disposed to fully forgive the trustees and managers after reading this correspondence. Their plain intention is to have a servant, henceforth, and not a would-be dictator.

Brewing Profits.

The brewing business is a wonderful one, and its powers to produce profits seem at times almost unfathomable. The Holt Brewery Company, for instance, was started as a modest concern in 1887, and did remarkably well. About 1894 its board dissipated the reserve of £45,000 by transforming it into sixty-two preference shares, which were distributed amongst the shareholders. Then, in 1896, a scheme was proposed whereby the £195,000 of preference and debenture capital was converted into a debenture issue of £250,000, the

difference between the two amounts merely representing bonuses of capital. For the ordinary shares a still greater watering was proposed, for each £10 share received three Five per Cent. Preference shares of £10 each, and two £10 ordinary shares. In this way, £285,000 of share and debenture capital was swollen out into £700,000 without the proprietors subscribing another penny. One would have thought that such a pronounced expansion would have paralysed the concern, and yet in the two last years the company has met its fixed charges, paid 8 per cent. dividends upon the bloated ordinary capital, and set aside £25,000 to reserve. Of course, the company has been exceedingly well managed all through, but it is only in a monopoly industry such as brewing has become that such a result is possible.

Germany's Imperial Debt.

In his report to the Foreign Office on the estimates of the German Empire for 1898-99, Mr. Spring Rice, Second Secretary of the British Embassy at Berlin, lets us see that Germany, the youngest daughter of Imperialism, is showing singular vigour in qualifying herself for a position of Imperial "respectability" among the nations by steadily accumulating a big debt. Your only pattern for ambitious States is the spendthrift rake, who does not "feel his feet" in the world until he has got through his limit of ordinary expenditure, entered on the glories of "extraordinary expenditure," and has tapped the beautiful system of loans, on which he manages for a long time to subsist in comfort and even luxury. In 1870 the Germanic Confederation had a paltry debt of £13,000,000, but that has been practically paid off. In 1877 the Imperial debt was only £800,000—a wretched pittance for an Empire that would be great. But so vigorously did her rulers set to remedying this defect in a well-regulated Empire, that in 1887 the amount had risen to £24,000,000, and in the present year the Germanic debt stands at the handsome figure of £107,500,000. Not bad for twenty years. Though it will doubtless yet be improved, Germany's position as a borrower is already tolerably secure; and where she formerly borrowed at 4 per cent. she now pays on the larger portion of her debt only 3½, while new loans are issued at 3 per cent. There could not be a better testimonial to her rising respectability. But Prussia is yet far ahead of the Empire with a thumping debt of £300,000,000; only much of that was borrowed for railway construction, and her railways yield Prussia about £25,000,000 a year. The other German States have all debts of a fairly respectable amount, Baden standing at the bottom of the list with a poor £16,000,000. But in every State the railways yield enough profit, at least, to pay the interest on its debt. On the Imperial debt, however, the interest has to be paid out of the taxes, and patriotic Germans seem proud to bear this rapidly-growing burden. Still, German revenue steadily increases; it has doubled since 1886, but if accumulation of debt goes on at the rate it has been doing, it must become a serious burden for the Empire.

Storm in a Tea-pot.

There is not to be war—even a war of tariffs—between Germany and the United States. Prominent men in both countries seem, however, to have had the San Jose plant-bug fever very badly for a day, or perhaps two. But steam was promptly worked off in words, and sanity and mental sobriety have resumed their sway. Mr. Dingley was especially fierce in denouncing the conduct of Germany in prohibiting the importation of some Californian fresh fruit. He ridiculed the suggestion that the prohibition was enforced because of dread of the plant-bug scourge. It was an evasion of commercial treaties—at least, a straining of their legal provisions. But the Washington Minister of Agriculture kept his head cool. Fruit diseases, he explained to the Cabinet, could be carried by fruit, and become operative at great distances. At any rate, Prussia was within her rights in enforcing the prohibition. On the other hand, Germany has issued an official explanation of the reasons which induced her to act as she did. That San Jose bug is clearly an abominable pest. In itself an insignificant little sinner, it has such a tremendous power of reproduction that, from spring to autumn in a single year, one individual may multiply the species to the extent of 3,000 millions. We are all interested in keeping such a vigorously fruitful little monster at bay. Its depredations, says the German *Imperial Gazette*, have now to be combated from Chile to British Columbia. It must be kept out of Europe at all cost—even the cost of Mr. Dingley's indignation. It is worse than the grape phylloxera, whose ravages in European vineyards are now estimated at several milliards of marks—a trifle of £100,000,000 sterling or so. The San Jose plant-bug may not have got a working lodgment—a perceptible hold—in California or other fruit districts in America; but, after the phylloxera, poor old Europe had much better be over-cautious than remiss in keeping a watchful eye and powerful microscopes on the movements of a possible visitor, so minute yet so energetic. And the United States, so nicely "protected" from all adverse competitive trade-winds, need not grumble at Germany taking drastic measures against the importation of so lively a pest. Consider the precautions America has taken against pelagic seal fishing—altogether without reason, as now appears!

Mr. Kruger's Re-election.

It never was really in doubt for a moment. Mr. Schalk Burger, his strongest-looking opponent, is a man of comparatively poor presence, and totally without the prestige of the aged statesman, whom we shall be wise if we treat still with reasonable respect. That his policy is reactionary is true enough, and it is also tone that there is an element of corruption in the service of the State which his defeat might, perhaps have done something to remove. For all that, constitutional means of obtaining reforms ought not to be abandoned, and it is only to do mischief, to indulge in threats, as some of the Outlanders' organs in the Press of South Africa are already doing. The tiny numbers of the poll, 18,457 all told, giving a majority of 9,048 to Krüger over Burger, and of 7,105 over Burger and Joubert combined, constitutes the most powerful and convincing of all arguments for an enlargement of the franchise. It is impossible that all the powers of the State can long remain in the hands of such a small and isolated group in the community. The figures bid the aliens agitate and persevere.

British and Foreign Competition.

There were several points worth consideration in Mr. Henry Birchenough's lecture at the Royal Colonial Institute on Tuesday evening, though there was, perhaps, a little too much of Jingo spread-eagleism

about it. "Empire-building" is no doubt a pretty phrase, but a more modest coinage would have suited quite as well. Mr. Birchenough, on the whole, treated his subject with quiet moderation. In reference to our foreign trade rivals, he reminds us that in twelve years the German Empire had increased six-fold, and the French Empire four-fold. An increase in trade competition was therefore inevitable. We fear, however, that English traders were at first surprised by it, and for a time, at least, partly paralysed by it. In some measure they seem now recovering, and taking steps to regain some of their lost ground. A complete recovery in this respect is impossible; no exertion can replace us in the position our traders occupied until ten or twenty years ago. The virtual monopoly we then possessed is gone for ever; but we still retain a predominant position. If we can maintain this predominant position it is all we can look for, and to do that will require steady push and vigorous persistence. Germany, Mr. Birchenough regards as our great rival of the present; the United States of the future. In this he is probably not far wrong; for it may be that Germany places too much reliance on the "cheap and showy goods," which take the eye for a time, but can scarcely be relied upon in themselves to build up a great and enduring trade. Doubtless, Germany's exports are just now increasing by leaps and bounds; but as to this, Mr. Clavell Tripp pertinently remarks, in this month's *Nineteenth Century*, that "it would be interesting to know if the profits of German trade are increasing in the same ratio." Our traders should be ready to supply the "cheap and showy goods" where they are wanted; but it would be suicidal to neglect for these the more substantial wares which have given English traders name and fame, and which must still be a prime element in consolidating them in that "predominant position" which has replaced their whilom monopoly.

The English Sewing Cotton Company, Limited.

An intimation has been sent round by a newsagent that the Press, making known the fact that the well-known firm of R. F. & J. Alexander, Limited, thread manufacturers, of Glasgow and Barcelona, have been absorbed by the new English Sewing Cotton Company, Limited, lately formed with the sanction, we may say, of the all-powerful J. & P. Coates, Limited. The Alexander Company's capital is about £600,000 in debentures and preference and ordinary shares, and control has been obtained by the purchase of the ordinary shares so that the combination of all English and Scotch makers of sewing cotton articles the Coates' Company is now complete. We regret it, and the public will in turn, we fear, regret it, but there is no stopping these things. We shall now see whether a domestic monopoly is able to keep out competition from abroad without the help of a tariff on imported threads.

Gas Light and Coke Company.

After exhausting their enormous balance forward, and the best part of their reserve, the directors of this concern make a further confession of incompetence, by stating that they will raise the price of gas. Now, the 2s. 10d. per 1,000 ft., at present charged throughout the greater portion of the company's district, is 7d. per 1,000 ft. above that of the South Metropolitan Gas Company; or, say, 6d. per 1,000 ft. more than the natural difference as settled by the price of gas which rules the statutory dividends of the two companies. If the South Metropolitan charges 2s. 3d., the Gas Light and Coke ought to charge 2s. 6d., and 4d. upon this price, taking into account the enormous business, is a very serious matter. Yet, rather than submit to a little further reduction in dividend, the board intends to make this difference all the greater, and so encourage the natural enemy, the electric light. With vestries opening electric lighting undertakings in various parts of its district, this is the only thing the board feels able to do to rise to the situation! Of course, it will be answered that electric lighting does not hurt the gas companies, but we beg to differ on this point. Otherwise, how is it that the South Metropolitan Company in these seven years ended June 30 last increased its sale by 33 per cent., while the Gas Light and Coke only increased its sale by 7¾ per cent. Last half-year, too, the increase of the South Metropolitan was 6 per cent. as against 2 per cent. by the Gas Light and Coke. Every 1d. per 1,000 feet in the price of gas is a serious consideration in the struggle, and yet Colonel Makins and his board go on blindly worshipping at the shrine of that statutory dividend.

A Prosperous Electric Undertaking.

The progress of the electric lighting companies supplying the London districts must have exceeded the anticipations of their promoters. For instance, the Westminster Electric Supply Corporation was only formed in 1888, and, of course, had to lay the very foundations of its business, so that it was not until 1892 that a dividend—and this at the moderate rate of 3½ per cent.—could be declared. Since then progress has been by "leaps and bounds," culminating in the 12 per cent. dividend for last year, set forth in our reports. In the last three years the amount of electric current sold has doubled, and still the growth of new connections remains important. It should be remembered, too, that these electric light companies do not have a whole district to themselves like the gas companies, while there is always the old-established gas consumption to contend with. But then the electric lighting companies north of the Thames have been inconceivably blessed by having the Gas Light and Coke Company managed by its present board.

Before leaving the Westminster Electric Supply Corporation, we might mention that the conversion of the founders' shares, which was carried out last year, has proved a great success. At the time, we spoke hopefully of the operation, but never imagined that one short year would actually prove its efficacy. The £500 of founders' shares had the right to claim one quarter of the profits after the ordinary had received 7 per cent. To get rid of this irritating charge, the founders were allowed last year to subscribe £60,000 of share capital at par, which, as the shares stood at double their nominal price, gave them a bonus of £60,000, and for this they extinguished their founders' rights. The new shares meant an addition of 20 per cent. to the share capital, so that the increased burden was very considerable. Yet we find the ordinary shareholders actually gained last year by this arrangement. Thus the divisible balance was £49,461, and 7 per cent. on the old capital would have taken £23,765. Then, allowing £2,400 as interest upon the £60,000 subscribed by the founders, we have a net balance of £23,296, of which one quarter

would have represented £5,824. Now to pay the 12 per cent. upon the £60,000 of new share capital required £7,200, but £2,400 must be deducted as interest upon the new money provided, and so the actual founders' charge only came to £3,800, as against £5,824, which would have been demanded under the old system.

The Massacre of the Innocents.

We are glad to note that the meetings of the subsidiary companies of the London and Globe Corporation are not passing off without discussion. It is a neat device of the Corporation, having sucked out the blood of these victims, to propose that they obliterate themselves in a new corporation with a capital upon a gorgeous scale. Indeed, we have every reason to believe that the arrangement, if carried through as originally suggested, might lead to the London and Globe netting a handsome profit on the operation, but we cannot be certain on this point as we have not been amongst the unfortunate receivers of the proposals. At three of the meetings the consideration of the resolutions was adjourned for a fortnight, so that there is plenty of time to thrash out the matter yet before coming to a decision.

A Change for the Better.

We must say that the London and Middlesex Freehold Estate Company is a great improvement on its predecessor, the London Financial Association. The latter, almost throughout its career, was an object of mingled pity and contempt. Formed in 1863, when a good deal of bad financial business was being done, it only paid one dividend—1¼ per cent. in 1873—on its huge paid-up capital of £1,443,375. Badly financed, the affair was for a long time loaded down with debt, and in 1880 it had £210,000 of debentures, and a mortgage of £246,929 upon its property. In 1885, the paid-up capital was written down to £658,692, but this did not lead to much improvement, although the debt was much reduced, and finally, in 1896, a rigid reconstruction took place, which brought down the paid-up capital to its present total of £121,122. All debt has been repaid, and so the estates are the absolute property of the shareholders. Realisations have proceeded upon a fair scale, and the last balance-sheet showed liquid assets amounting to about £20,000, after paying the dividend of 5 per cent. The knife had to be ruthlessly applied, but the result is a company much healthier in every respect.

The Imperial Continental Waterworks, Limited.

The following letter has been "left to our impartiality" by the board of this company, and we insert it with pleasure, only hoping that the discussion will not be prolonged, or run either to lengthy letters or a personal wrangle :—

To the Editor.

London, February 9, 1898.

Sir,—My directors did not trouble you last week with any comments on Mr. Brown's (the director of the Gorzente Works) "effective" rejoinder, which you published on 28th ultimo, because Mr. Deacon (to whose letter to my board it purported to reply) has been away from London, and will not return till next week ; and also because it scarcely seemed to them to require much notice.

While Mr. Brown evades all the important points with which he was confronted, he, with charming candour, makes two astounding confessions, viz., 1st. That his company violates their concession by taking much more water than it is legally entitled to, for does not the "barren hill side" to which he refers, form part of the hydrographic basin from which it is entitled to draw 250 litres per second, and uses the curious argument that "as they take it, they have the right to do so." 2nd. That his company also violates or has violated the prohibition of the authorities by filling their dam to above five metres of the sill, and thus endangering the lives of those who live below it.

Mr. Brown states that the two companies which, as he says, serve an area inhabited by 367,000 persons, encash £28,000 per annum from water sold for domestic purposes, which amounts to 1s. 6d. per head.

The inference which he clearly wishes to be drawn is that the whole 367,000 persons are supplied with water.

Now we, of course, possess and have studied the documents connected with these two companies, including balance-sheets and tariffs, and these last clearly show that, calculated on the basis of even their minimum charges, an enormous number of inhabitants cannot possibly receive water from them. Other people besides Mr Brown know Genoa and its requirements, and irrespective of the letter signed, in three days, by fifty-two of the leading citizens, on being shown his first letter, we assert that it is a matter of general knowledge that the water supply of the City and its environs is insufficient in quantity and inferior in quality.

In reply to Mr. Brown I may say that possibly the reason why his company went to its present source of supply may be found in the fact that its choice was limited. They only applied for their Concession in 1871 (see page 11 of their book), while the best areas, viz., those possessed by this company were bespoken in 1869.

In conclusion, I may point out that discussion and argument is somewhat difficult with a gentleman who appears to attach no importance to laws, authorities, or the validity of concession.

It has been I think, however, shown that Mr. Brown's statements are refuted by the facts, by the laws, by his own company's Engineer-in-Chief, and by himself ; and we leave it, with confidence, to the common sense of your readers to decide whether it was not a legitimate inference that he is (as he himself puts it) "opposed to the scheme from interested motives."

I am, Sir,

Your obedient servant,

For the Imperial Continental Waterworks, Limited.

Ernest J. R. Dodd,

Secretary.

P.S.—Mr. Deacon on his return to London will have Mr. Brown's letter laid before him by my board, when probably he may answer Mr. Brown's letter, so far as he himself is concerned. E. J. R. D.

London and Globe Corporation.

We hope shareholders in the various mining companies which this corporation proposes to amalgamate, will not, at the meeting to-day, accept the scheme too hastily. No information is given them about their properties, and they should certainly demand good reasons before their consent is given. It is not so long ago since Mainland Consols were over £4 for the £1 share, on reports sanctioned by the directors, that the mine was extraordinarily valuable. Some of the shares, in others of the companies, were also at high prices in those glorious days. We know "want of water" was the excuse for their non-success, but that is not sufficient to explain why such high prices were given in cash and shares to the vendors, or why all the working capital has disappeared. The whole scheme, now being driven through, looks like an attempt to hide away some very bad bargains for which those who bought the shares have to suffer. We notice also, two or three companies which are not quoted on the market, are to be included in the new Exploration Company. Who hold the shares in these? Directors should explain. If they do not—well, we shall think a lot.

London Merchants and the Sugar Bounties.

It was right that the London Chamber of Commerce should have its say on the subject of the sugar bounties ; but little was said at the recent meeting of the Chamber either for the enlightenment of the public or to

influence Parliament on the question. The resolution passed properly denounced the bounties and formally demanded their abolition—a beautifully academic sentiment, to which everybody could assent, and everybody at the meeting referred to did assent, with the exception of one solitary individual, whose name has unfortunately been lost to the world through the remissness of the reporters. But what better are we for the formal repetition, even by London merchants, of a demand which has been so often made during the last dozen years or so? It should have been made, not "at large" at public meetings, or to the English Parliament, but to the Governments that, foolishly for themselves, insist on supplying us with cheap sugar at the cost of their own taxpayers. It is worthy of note, however, that the speakers who supported the resolution were all more or less openly in favour of meeting the foreign bounties by countervailing duties at home—that is, by filching money from the English taxpayers for the benefit of a few sugar-refiners, in order that they may be saved the trouble of exercising their ingenuity or putting forth their energy in coping with a difficulty experienced by almost every trade in this country. It never seems to occur to these Protectionist orators that their favourite countervailing duties are but taxes on the general community for the benefit of a comparatively small number of lazy and unenterprising traders. We can quite understand the annoyance felt by the Protectionists at the London Chamber of Commerce when reminded by one speaker that sugar-refining was of much less importance to England than the confectionery and jam business, which, in 1894, gave employment to 54,000 persons, while sugar-refining in the same year only afforded work for 4,500. Mr. Henry Coke denounced this as "frivolous," supported in his denunciations by those inarticulate but stentorian cheers which seem about the only "arguments" which Sir Howard Vincent can command. But we cannot see where the frivolity comes in. This frivolousness seems shown rather by those who wish to cripple the confectionery industry, built up by men of energy and business aptitude, for the benefit of sugar-refiners suffering mainly from the lack of those qualities which are at the foundation of success in business. The demand for countervailing duties against sugar bounties is about as rational as would be an agitation for the re-enactment of the Corn Laws.

The Insurances Corporation *v.* Bird.

Last week the action brought by the Insurances Corporation, Limited, and its directors, against Messrs. Bird, a firm of solicitors, and also against one of its shareholders, for libel and conspiracy, terminated by the plaintiffs consenting to judgment being entered for the defendants with costs, without a shot being fired. The learned counsel who appeared for the Corporation and its directorate said that this decision was arrived at owing to the technical difficulties which might arise, but he was met with an assurance on the part of the defendants that, while accepting judgment on the legal aspect of the case, they were prepared with a full answer on the facts. We wonder if this is the last we shall hear of this concern; but it may not be out of place to recall a few facts relating to it. It was one of twins given birth to by the Contract Agency, its brother being the Merchants' Fire Office, Limited. In February last year, that company entered upon a voluntary liquidation. The Insurances Corporation was started with the modest capital of £1,000,000, but an unappreciative public only came forward with £100,000 in response to the £250,000 offered for subscription by the directors. At the beginning of last year a meeting was held to consider the report of an Investigation Committee, which had been appointed at the instigation of some shareholders.

By the articles of association all directors, except the original ones, had to hold £2,000 in shares. At that meeting it was admitted that the joint board held the magnificent number of 310 shares between them. It was also stated that the balance at the bank was the huge sum of £2,525 on deposit at 2 per cent., that the Corporation had issued policies to the amount of £82,170, and that the premiums earned had reached £675. What the property insured could have been surpasses understanding, as this premium works out at the average of about 16s. 6d. per £100! If this was the condition of this Corporation at the beginning of 1897, we can well imagine that an investigation at the commencement of 1898, unless an extraordinary change had taken place, would hardly be welcome. Another fact with regard to the history of this insurance scheme is curious. The Corporation was promoted, as we have stated, by the Contract Agency, the acting member of which was a Mr. T. Fenwick, who was a member of the board of the corporation and also of the Merchants' Fire Office. The Agency had a call for a certain period of the balance of the first issue of the shares. Messrs. T. Fenwick & Co. have during the last year issued broadcast prospectuses offering these shares at anything from £2 to 5s. premium, though it is only fair to say that this action has been repudiated by the directors of the Corporation, and Mr. T. Fenwick has since retired from the board. We should have been much interested in a thorough investigation of the affairs of this Corporation, and we trust there may be one before very long.

The American Seal Fishing Folly.

From the report and joint statement of conclusions signed by the British, Canadian, and United States delegates respecting the fur seal fishery in the Behring Sea, it would appear that the alarm raised as to the extermination of the fur-seal was entirely groundless. There has undoubtedly been a diminution in the herd on Pribyloff Island, but it is far from involving or threatening the extermination of the species; it has not been caused by the pelagic fishing, an industry which is declared to have been conducted in an orderly manner, and in a spirit of acquiescence in the limitations imposed by law. Indeed, the decrease in the pelagic industry is greater than in the herd on the island, while the chief cause of the heavy mortality among the seal pups is a parasitic worm only just discovered. But there are other causes. They may starve by straying from their mothers; and they are often "squelched" by their fighting fathers. To all appearance, however, the pelagic fishing is not in the slightest degree responsible for the decrease. The sudden zeal of the United States lawmakers against this orderly industry was not only excessive, but premature, as well as unreasonable. They ought to have waited for the report of the investigating Commission, whose conclusions are endorsed by the delegates of the United States, as well as by the

delegates for Canada and Great Britain. Now that it has been shown that the law as to pelagic fishing was passed under the influence of groundless panic and mistaken inferences, the only reasonable course for the Washington Congress is to repeal the obnoxious Act, and to return the numberless sealskin garments of which the United States Customs officers have been despoiling foreign ladies who ventured to cross the American border without the indispensable "certificate," that the seals from which their cloaks were made were not caught in the open sea. It is not a dignified position for a legislative to have placed itself in; but there would be still less dignity in hesitating about promptly undoing the mischief they have worked by legislating hurriedly under the influence of inexcusable panic and false impressions.

The New York Life Insurance Company.

In the flaming advertisements setting forth the wonderful things accomplished by this Life Office last year, it is stated that the company "has set aside a special reserve of £3,332,495 in order to place the whole of its reserve on a 3 per cent. basis, but after carrying into effect this most important operation—an operation by which its reserves are enormously strengthened—it is still able to show a net surplus over all liabilities of no less than £3,534,178." We should just like to ask one question about this statement. Has the valuation on a 3 per cent. basis been made upon the gross premiums of the company or upon the net? It used to be the fashion in the bad old times for British companies to value future increment upon their gross premiums, oblivious of the fact that a more or less large percentage of them went in working expenses. Does the New York Life continue that bad custom? Perhaps its controllers will allow a British actuary of repute to examine their books and report upon the point. It is of the highest importance in measuring such statements as we have quoted, especially in the case of a concern like this, one-quarter at least of whose premium income never enters its treasury at all, except to come out again in payment of working expenditure.

The Curtin Davis Mine.

The subjoined letter comes to us with the Liverpool post-mark. Its writer, we are glad to think, has been too much ashamed of it to send name or address. But it is too pretty an appreciation to be kept in the dark, aud so we print it here, its insinuations in no way affecting us. Let it serve as a warning to readers to elevate no frail and fallible human being into an 'idol":—

To the Editor.

Dear Sir,—In this week's issue of The Investors' Review you say speaking of "The Curtin Davis Proprietary Company"; "In September last we spoke well of the manner in which this adventure had been handled and placed before the public. From our language many seem to have inferred that we spoke in terms of praise about the mine itself. That was not the case, we are happy to say," &c.

Permit me to remark that it was the case, and as you seem to have forgotten your words, and may not have a copy of your Review for September conveniently to hand, I shall, with all respect, take the liberty of quoting them to you.

After dexterously opening your article on "The Curtin Davis Proprietary Company" by a paragraph of praise about the Mount Lyell Mine, you continue in the following style:—"But the Mount Lyell is not the only mine of *great potentialities* in that region of Tasmania. We have before us the report of a meeting of shareholders in a neighbouring property, the Curtin Davis, held in Melbourne on May 31 last, Mr. William Knox in the chair; and at this meeting *a number of statements were made calculated to inspire a strong belief in the possibilities of this copper mine likewise.*"

That these statements were worthy of credence you yourself vouch for by speaking of them as "calculated to inspire *a strong belief.*" The whole tenor of the article is to the same effect, that what was said by the chairman could be relied on, as your main point is the responsible character and caution of the directors.

You go on to say:—"Whatever there is of a speculative sort about the venture, other than the risks inherent in all mining undertakings, is to be found in the arrangements the directors have made to gain control of another mine in the same range of mountains, some three and a half miles further on; but even this has been gone about with caution, and in a way which does not involve the Curtin Davis Company in any large expenditure. If the same caution is displayed here in joining these Colonial adventures, a great industry may spring up in Tasmania which will prove of immense benefit, not only to the Colony, but to the whole range of industries dependent upon copper."

I think I have quoted sufficiently from your article to show from your own words that you did speak "in terms of praise about the mine itself."

From the remainder of the article, too lengthy to quote, it may be clearly inferred, for your remarks will bear no other interpretation that you were of opinion that the Curtin Davis mine was to be a means of depriving the Rothschilds of their monopoly in copper.

But now, unfortunately, comes the worst part, which can hardly be written without a blush. At the meeting of shareholders to which you refer, no authoritative statements were made to "inspire a strong belief in the possibilities of this copper mine likewise." On the contrary, the chairman informed the meeting that at his recent visit to the mine he was not at all pleased with it, and had *countermanded his orders for expensive machinery.*

The report was disappointing in the extreme, and the chairman to give him his due, held out no false hopes.

The acquisition of the Colebrook mine, to which you took exception with such alluring *naiveté*, is the only thing that has saved the shareholders from absolute disaster.

For the future, resume your character of a canny Scot, and never deny what you have written. It can do no good. Your reasons for praising the Curtin Davis, and your allusions to statements that were never made, can only be guessed.—I remain, my dear Shattered Idol, yours faithfully, Very Sad.

The Dunlop Dispute.

An interesting phase of the dispute between the cycle trade and the Dunlop Tyre Company has been reached. It is well known that the company, in its efforts to attain a paramount position somewhat upon the lines of the Standard Oil Company of the United States, has been trying to induce makers to pledge themselves to sell tyres only supplied by that company by a system of heavy rebates. Needless to say there are other good tyres in the market, notably the Fleuss tyres, which are not included in this arrangement, and a number of the cycle makers rufused to be "tied" to the Dunlop oligarchy. Furthermore, they approached the Board of Trade, and after stating the facts, asked that Board to compel the Dunlop Company to issue licences. Before assenting to the petition, which was otherwise favourably received, Sir Courtenay Boyle desired the opinion of a representative body of cyclists, and accordingly appealed to the Cyclist Touring Club. Two of the officials of that important club thereupon interviewed Mr. Arthur Ducros, and the facts elicited in that interview showed the monopoly-instincts of the company in all their nakedness. The council of the Cyclist Touring Club accordingly reported to the Board of Trade against the company, and strongly urged that body to do all in its power to checkmate the attempted monopoly.

The Governor of the Bank of England was rather severely injured on Monday by being thrown out of a carriage he was driving. The pony took fright at a motor car, and ran into a lamp-post.

British Foreign Trade in January.

The figures for this month of the foreign trade of the United Kingdom do not indicate much one way or another. The gross value of the imports came to £39,916,491, and of the exports £19,231,404, imports being about £141,000 more and exports about £555,000 less than in January, 1897. Imports thus continue to advance and exports to recede, as is shown by the fact that the increase in the former compared with January, 1896, is £1,442,000, and the decrease in the latter £1,915,000. Unquestionably this is a serious fact, if the tendency does not show some change soon; and as regards imports it is made all the more serious because living animals, grain, bacon and hams, fresh beef, preserved meats, fresh and salted pork, dead rabbits, fish, potatoes, condensed milk, hops, lard, and unrefined sugar contribute in a more or less constant and important degree to sustain the total, while raw materials used in our manufactures, such as pig lead, raw cotton, flax, hemp, jute, silk, and wool, show a more or less pronounced tendency to decline. In the case of cotton the decline is to some extent attributable to lower prices, but wool has fallen off in value nearly £1,000,000 compared with January, 1897, and over £200,000 compared with January, 1896, without material alteration in price. We must not press the inference too far from the figures of one month only.

Exports, however, are also unsatisfactory in several respects, showing real elasticity at no point if we except coal. We are not even exporting larger quantities of raw materials like wool, and our exports of such important commodities as cotton yarn and twist barely appear to hold their own. France, Italy, Greece, Egypt, Dutch India, China, Mexico and Central America, West Africa, and Australasia all took smaller consignments of cotton piece goods last January than in January, 1897. And compensation for the decline revealed in these quarters was not quite found elsewhere, although India, on the whole, bought much more freely. The month's total shows a larger decrease on 1896 than on 1897; and the same holds good of jute yarn and manufactures, although in regard to the latter the United States and Australasia may be said to account for the whole decrease. Linen manufactures, again, appear to be steadily declining both in quantities and values in our export tables. The United States took, it is true, only about £14,000 worth less last month than in January, 1897, but the decrease on January, 1896, is fully £100,000 and no other country has helped us in any material way to make this loss good. Canada took £3,000 worth more last month than in the same month a year ago but nearly £8,500 worth less than in January, 1896. The Argentine Republic is not increasing its demands, nor Australasia, nor the Foreign West Indies, nor France, and from Germany the trade continues to be rather insignificant and by no means progressive.

Our silk trade is too small to require anything like analysis, but it seems to be in rather better case than any of those just mentioned. The decline, however, in woollen goods of all descriptions is serious. On a total of about £8,600,000 the shrinkage in one month, comparing last January with the January before, is fully £500,000, and as against January, 1896, the decline is £1,500,000. This sort of thing cannot go on without serious searchings of heart on the part of the manufacturing community. One naturally looks for a poor return in the metal trades, all of which have suffered more or less from the conflict between the working engineers and their employers, but, on the whole, this department shows up wonderfully well. Hardware and cutlery, cutlery being now shown in detail for the first time—in fact, the whole return has been carefully revised and is clearly edited with great care—are considerably down last month compared with previous years, but not so pig, bar, and other iron, railroad iron, hoops, galvanised iron, tinplates, cast iron, or steel. The total in this section is larger than in either of the two preceding Januaries, but the falling off in machinery amounts to £400,000, being £1,071,781 this January as against £1,477,778 the year before. No doubt the exports of machinery, one of the most important and profitable branches of our domestic industry, will soon pick up again. It is not necessary to go through the accounts further, all the items tell much the same story. There is either very slight progress or some recoil, with the grand result stated at the beginning. The only consolation one can turn to is the fact that the raw exports of Foreign and Colonial merchandise amounted to £4,682,661 last month, which was nearly £530,000 more than in January, 1897. During January the movements of bullion resulted in a net export of £427,497 in gold and £124,435 in silver.

Rand Deep Level Mines: An Investigation.—II.

We come now to a branch of this subject which is of the utmost importance to all holders of shares in Transvaal mining companies. Are these mines worked, say, as the Indian ones are, or mainly for Stock Exchange purposes? We fear the reply must be given that the Rand mines of all kinds are from time to time undoubtedly stripped of their rich ore, and, if further testimony is required on this point, it is only necessary to interview half-a-dozen Rand mine managers to obtain direct confirmation. When a new manager takes charge of a property it is quite a common thing for him to proclaim that his predecessor has taken out all the rich rock developed and left the poorer stuff behind, making it extremely difficult until some more rich reef has been exposed to keep up the output to its normal level. Evidence of this is to be found in the back columns of any of the Johannesburg papers.

Situated adjacent to these dividend-paying outcrop mines are the deep level properties which are now being so prominently brought before the investing public. The question is whether the deep levels will be different to the outcrops, and prove free from the sins of their parents? Will picking out the rich ore to justify high prices for the shares ever be resorted to in the case of the deep levels? Human nature is weak, and the commercial morality of mining men is avowedly set upon a very low pedestal; and where there is temptation there will come offence.

One thing is certain, the facilities for picking out the richer ore in the deep level mines are even greater than in the outcrop mines. The deep level mines now crushing, or about to crush, have been in course of preparation—development is the technical term—for the past four, five, and six years. During this period enormous sums of money have been spent in sinking shafts, and exposing vast quantities of the gold bearing

reefs, and to-day the majority of companies are in a position to continue milling for the next three or four years without doing another stroke of development work. For instance, the Simmer and Jack has from 850,000 to 1,000,000 tons of ore exposed; the Geldenhuis Deep, 800,000 tons; the Jumpers Deep, 530,000 tons; the Rose Deep, 520,000 tons; the Crown Deep, 400,000 tons; the Nourse Deep 300,000 tons; and so on. But all the ore in a mine is not of the same value. Any one who is acquainted with the Rand is well aware of the fact, that not only are there poor and rich zones, but also poor and rich reefs. Taking the fields from one end to the other, there are, roughly speaking, four principal reefs—the North Reef, Main Reef, Main Reef Leader, and South Reef. One of these—generally the South Reef, sometimes the North Reef—is invariably richer than any of the others, and if crushed by itself will give a high yield. Should this selection of the rich ore be adopted and persisted in, the mine would in a comparatively short space of time be deprived of all its better grade ore and be left gutted. While the rich reef is being crushed large profits can be shown, and unless the true position of affairs is generally known, an altogether false idea is gained of the value of the mine. To show how the different reefs vary in richness, we give a few instances extracted from the companies' own reports :—

NOURSE DEEP.

Tons developed.		Reef.		Assay value.
175,000	.....	South Reef	.....	16½ dwt. per ton.
115,000	.....	Middle Reef	.....	8¾ „
Nil.	.....	Main Reef	.....	Unpayable.

It will be seen that if the simple operation of only extracting South Reef be pursued, unnaturally high results could easily be obtained; but the limit to which picking can be carried does not stop here. The whole of the 175,000 tons of South Reef is not of an equal grade, part of it may assay, say, 1 oz., some of it 15 dwt., some 10 dwt., and some 8 dwt. This fact is not shown in the official reports, but the manager of the outcrop mine, the Henry Nourse, which has identically the same reefs, appears to be more confiding. He states that of 240,000 tons South Reef ore developed in his mine 138,000 tons assay 15 dwt. per ton; 62,000 tons from 9 to 15 dwt.; and 38,000 below 9 dwt. In the Nourse Deep precisely the same variation in the values occurs.

At the Crown Deep mine the South Reef assays 1 oz. 17 dwt. per ton, the Main Reef Leader 1 oz. 8 dwt. per ton, and the Main Reef itself, being very poor, has not been developed. Some parts of the South Reef are extremely rich. At the Langlaate Deep the South Reef assays 1 oz. per ton, while the Main Reef Leader only gives 12 dwt. A larger proportion of South Reef is consequently being developed. Under such conditions it will be recognised that with the immense quantity of ore developed it is a very easy matter to pick the mines, and this, as things are now situated, could probably go on for a year or even longer without the returns falling off and the device being discovered. These tactics have been adopted by the same people with the outcrop mines in the past, and it would be making a large draft on the credulity of our readers if we asked them to believe that they will not be again resorted to when it is desired to "off-load" deep level shares on the public. Prices are unnaturally inflated, the controlling firms are supporting these prices, and it remains to be seen whether they can justify them in any other manner to the speculating fools who go over and over again to the fire.

And already there is evidence in support of this selection-of-ore habit which should not be neglected, in view of the possibly coming outburst of speculation in these deep level mines. Deep level engineers are never tired of affirming that the reefs in the deep levels are of about the same value as those in the outcrops; but even these hysterically-inclined optimists have not suggested they are richer. How, then, do they account for the fact that while the average recovery from the New Primrose during the past two years has only been £1 9s. per ton, at the Rose Deep, its deep level, the ore is yielding an average of £2 3s. 9d. per ton after only three months' crushing! At the Geldenhuis Estate, in a similar manner, the average yield during the past two years has been £1 11s. 7d. per ton; while at the Geldenhuis Deep it has risen to £1 17s. per ton. Is it that the deep mines are better, or is it that an undue proportion of rich reef is being extracted?

Take this other illustration. When the deep level mines were being developed estimates were made by the engineers, arrived at by sampling and fire assays, of the recovery that would be obtained from the reefs. As most people who have at any time been interested in mining shares are aware, such estimates are proverbially optimistic; and therefore what can be more astonishing than to find that the actual crushing results from the deep levels exceed the estimates. Were the Rand engineers pessimistic in their forecast, because if they were, it is the first time they have ever erred in this direction? Or is it, as we suspect, that an undue proportion of rich reef is being milled, a factor not accounted for when the estimates were compiled. It will be interesting to examine a few of the engineers' reports in this direction.

The consulting engineer of the Nourse Deep put the average value of the reef at 10 dwt. fine gold, or 40s. per ton. This recovery was expected when the mill had got into running order, and included the probable extraction from the slimes. The first crushing from this mine—and first crushings are generally poor owing to absorption of gold by the plates, and from other causes—shows a recovery at the rate of 46s.; while had the whole of tailings produced been treated it would have been nearer 52s. per ton. This without treating the slimes, the plant for which is not yet erected.

At the Rose Deep it was estimated that the ore with sorting would, including the extraction from slimes, give a recovery of 10 dwt. fine gold, equal to 40s. per ton. During the three months the crushing has been carried on, the actual recovery has averaged 43s. 9d. per ton, without any gold being taken from the slimes. Bearing in mind what has already been said about the generality of such forecasts these results are remarkable. Does this not look as if the ore is being picked?

A clue which seems to shed some light on the matter, astonishing to relate, is to be found in some of the deep-level yearly reports. As has been explained at the Nourse Deep two reefs are being exploited, a rich south reef and a poorer middle reef. In the last annual report of the mine the following precise statement is made :—

> This latter grade (speaking of the fire assays) would indicate, with-say, 20 per cent. sorting, a recovery of 10 dwt. fine gold per ton. As it is intended to exclude most of the middle reef ore for the present, it is confidently expected that the rate of the yield can be *graded up* to about 12 dwt., or, say, 48s. per ton.

Again, a little further on in the same report, is to be found the following :—

It was expected that milling operations would commence in about welve months ; but, owing to the desire to increase the development in the south reef as much as possible, the construction of the reduction plant was not pushed.

That this is not an isolated instance of the tactics of these deep level magnates in "*grading-up*" the value of the ore may also be judged from the following extract from another annual report, that of the Jumpers Deep, Limited (1897), a mine which is soon to commence crushing :—

The assay value of the ore on this basis works out at 11¼ dwt., which indicates a recovery for the entire development of about 7 dwt. fine gold per ton, but by careful working of the mine, and allowing for waste rock, &c., it is estimated that when crushing operations are fairly under way, the rate of gold can be *graded up* to about 11 or 12 dwt., or say 45s. to 50s. per ton.

The exact meaning of such phraseology as "grading up," "excluding poorer reefs," and "careful working" must be left to the reader ; but if this is not a *prima-facie* admission on the part of "deep-level manufacturers" that it is their intention to pick the rich eyes out of the mines, we cannot conceive what is. Therefore, to attempt to predict the future of deep levels based on the present outputs from the mines, as is being done day after day by the "uninterested" South African and financial Press, is the height of absurdity.

After such handling of the mines one is not surprised to discover that even the accounts of the deep level companies are arranged so as to make it appear that the profits are far larger than they actually are. As may be imagined, to develop the enormous bodies of ore the mines have in sight has cost very large sums of money, and with the deep levels this expenditure will be found in every case charged to "capital account." The Simmer and Jack has spent £180,000 in this way, the Jumpers Deep £165,000, the Nourse Deep £180,000, Geldenhuis Deep £110,000, Rose Deep £200,000, and Crown Deep £200,000. Besides these amounts, heavy expenditure has been incurred on shafts, also debited to capital account, Simmer and Jack having spent £150,000, the Nourse Deep £80,000, the Jumpers Deep £77,000, the Geldenhuis Deep £50,000, the Rose Deep £50,000, and the Crown Deep £82,000. It is apparent that the cost of sinking shafts and putting in levels to expose the reef bodies cannot properly be looked upon as an asset. It is not convertible, and when the mine is exhausted is valueless. On the other hand, it would be inconvenient to debit the whole of these initial expenses to profit and loss account *en bloc*. Consequently it is the custom with the Rand outcrop mining companies as the reef is milled to write off from the "development account" an amount proportionate to the quantity of ore extracted, charging it to the current expenses account.

When the mine is worked out the whole of the development account is thus wiped out. The initial cost of shaft sinking is similarly obliterated by writing off annually a certain percentage for depreciation. By this method the expenses are fairly portioned over each ton of ore treated. The deep levels, however, in their anxiety to show low working costs and large profits, have ignored all such minor considerations, and are drawing on their ore reserves without writing anything off their profits for the original cost of developing the ore. They have even gone further than this. In one case, at the Geldenhuis Deep, such items as directors' fees, salaries, licences, office expenses, debenture interest, interest on loans, &c., have also been debited to capital account, while a loss made as the result of the first three months' crushing has been dealt with in the same way, the whole being treated as an asset. By this means last year was started with a clean profit and loss sheet, and a dividend of 30 per cent. declared at the end of twelve months out of the profits shown on paper.

To convince the sceptical it will, perhaps, be necessary to quote chapter and verse. The Geldenhuis Deep up to the end of 1894 spent £13,200 for directors' fees, office expenses, interest, cost of debenture issue, &c. During 1895 it crushed during three months, and made a loss for the year of £20,300. Consequently, at the beginning of 1896 there should have been £33,500 standing to the debit of profit-and-loss account. The directors, however, transferred the whole of this sum to capital account, and treated it as an asset. Thus, in 1896, the books of the company showed a clean profit-and-loss account. During 1896 a paper profit of £3,700 was made ; but this was only arrived at by failing to debit the expenses account with the cost of developing the ore extracted. The quantity of ore developed during the year was 26,700 tons less than that milled, while no charge was made to profit-and-loss account for reef taken from the "surface dumps" (stuff that had already been mined and lay on the ground). During 1897, regular monthly profits were announced, redemption of development account, cost of shaft sinking, depreciation on machinery, directors' fees, &c., not being charged up ; and in December a dividend of 30 per cent., absorbing £84,000, was declared. This may be a very fine method of advertising deep levels, but it is not book-keeping. In a similar manner the Rose Deep working expenses for December are officially declared at only £1 1s. 5d. per ton ; but in the statement issued there is nothing to show that the cost of developing the ore is being charged out of profits. In these circumstances, it is impossible to ascertain the actual cost of working in the deep level mines, and the much-vaunted claim that the mines can be operated as cheaply as, or cheaper than, the outcrops must be received with the greatest reserve. The profits declared month by month are evidently entirely deceptive, and must not be accepted as genuine returns on which to base any calculations as to the dividend-earning capacities of the mines.

Another very specious device requisitioned to advertise "deep levels" is to incorporate an extensive area of mining ground into one company, thus giving it theoretically a much longer "life" than an "outcrop" property. The argument is used that it is preferable to hold shares in deep levels, with prospective lives of twenty-five years, than shares in outcrops mines with lives of only ten years. Unfortunately, however, for the validity of this contention, when all the necessary funds for the equipment of the deep mines have been raised, the capitals of the deep levels will be nearly as large in proportion as those of the outcrops. Then it must be borne in mind that although the surface area of the deeps is extensive, the mines are really not so large as they appear to be, owing to the fact that the ore contents of the deep claims are considerably less than those nearer the outcrop. For instance, a Henry Nourse claim contains three times as much gold-bearing reef as a Nourse Deep

claim, and consequently, in comparing the two companies, the area of the deep level must be divided by three. The Henry Nourse, with a capital of £125,000, owns twenty-three claims "now being worked," and thirty-eight claims "not being worked" (*vide* Gold Fields Deep diagram compiled by E. V. Melville), making sixty-one claims in all. The Nourse Deep has at present an issued capital of £450,000, and owns 259 deep claims, equal in contents to about eighty-six outcrop claims. To earn an appreciable dividend on the present market valuation of the stock (quoted at 7⅛), it will be necessary to erect at least another 100 stamps, rendering the raising of further money necessary, entailing an addition to the capital. We are aware that part of the Henry Nourse mine consists of dip ground; but even making allowance for this, it is difficult to understand where the deep level scores an advantage. The large capitals of the deep levels, and the huge valuations ruling for their shares, will necessitate operations being carried on upon a very large scale. This means the sinking of immense sums of money in the erection of plant and in initial development so that the capitals of the deep levels, large as they are to-day, and heavily in debt beyond as many of the companies are, will be considerably heavier when the regular producing stage is arrived at. The following table giving the present capitals of some of the deep levels, and their adjoining outcrop mines, indicates how heavily the deeps are loaded even to day in this respect:—

Deep Levels.		Corresponding Outcrops.	
Company.	Capital.	Company.	Capital.
Simmer and Jack...	£4,700,000	—	—
Simmer and Jack East *.....	600,000	Geldenhuis Estate	£200,000

* In debt.

A Sham Council of "Foreign Bondholders."

Yes, sham it is and sham it is apparently meant to remain. How many members of the Lubbock-charmed "Council" now regularly voting as they are ordered in Moorgate-street are holders of foreign bonds? Is Sir John Lubbock himself interested in any, or many, of the loans whose more or less bogus "committees" he plays chairman to? A parade has been made of the Privy Councillors, the members of our great banking firms, of railway directors, and of Members of Parliament upon the Council. What Sir John Lubbock said on that subject is true enough, and nothing to the purpose. He is surrounded by men of great attainments, men of note, men of social standing and of influence in Governmental and political circles. But Sir John is an adept at throwing dust into people's eyes. It is diamond dust and its glitter entrances. It is, however, dust after all. Sir John's notables are men without whom his Uruguay arrangement would not have passed muster. Guatemala, where twice the overdue coupons have been abstracted from bondholders; Ecuador, where utter ignorance and neglect have sacrificed bondholders; Costa Rica, where Mr. Kattengall and the Council walked off with every penny of the cash paid by the Government; Portugal, where the Council issued and ceased to issue certificates of claim for unpaid dues; Columbia, where a better arrangement was in course of negotiation: every one of these cases shows that if Sir John Lubbock's Council were consulted it knew little of the business it was engaged in, while if it accepted his *dicta*, the duty it had undertaken was grossly neglected.

The practice of co-opting members of the Council may have been adopted with the best purposes. In effect, it has been a complete failure so far as the protection of bondholders is concerned. Witness the compromises made by the Council during many past years, which have resulted in the destruction of the security that was sought when the Corporation of Foreign Bondholders was formed.

On the default of Portugal, the price of Portuguese bonds fell 20 or 30 per cent. in a few weeks. No effort had been made by preventive action to avert this catastrophe. Costa Rica is a case where the blunder of 1884 was repeated eleven years later. Experience carried no reflection, taught no wisdom, and the result proved calamitous. Again and again the Council has proved that it did not rightly appreciate the duties it had undertaken. Speculators buy from discomfited investors the bonds for which they had paid hard cash. The French purchased the Turkish bonds sold by disheartened English supporters of the political Ottoman Empire, and at the lowest prices; Germans acquired the depreciated Central and South American bonds, realised by us at a ruinous price; and a handful of English ornamental persons, at meetings called by the Council, voted away the property of others who looked in vain for protection at the hands of the Council of Foreign Bondholders.

Had the certificates of permanent membership of the Corporation of Foreign Bondholders been confined to holders of foreign bonds, as was resolved by the Council in 1873-4, the Council would have been controlled by the members of the Corporation. In 1883-4, thirty-six certificates of permanent membership were stated by a speaker at one of the meetings to have remained unclaimed. The same speaker foresaw that the number of unclaimed certificates would increase, and would be bought up by some clique, who would deal with the assets of the Corporation as they might think well.* At meetings from 1880 to the present day,

* As illustrating the way the certificates of the permanent memberships are trafficked with in secret by the Council of Foreign Bondholders, we append here a list of the new names which have been put upon the register since February, 1897. The great majority appear to be those of personal friends of Sir John Lubbock. Why were these certificates not sold openly to foreign bondholders, and to the highest bidder? A return ought to be obtained of the price paid for each, and considering the methods employed by the secretary, methods exposed by us in our monthly issue for September last, the manner in which they come into the Council's hands for disposal ought also to be investigated:—Benwell, J.P.; Bristowe, Arthur Lynn, 27, Austin Friars; Callard, G. S. Esmond, 3 and 4, Great Winchester-street; Campbell, A. J., 55, Old Broad-street; Campbell, Lord Archibald, Coombe Hall Farm, Morbiton; Clark, Edward, Stock Exchange, E.C.; Collins, Mrs. L. M., 38, Porchester-terrace, W.; Davidson, Theodore, Elmfield, Sidcup, Kent; Evans, W. Freke, 35, Gloucester-place, Hyde Park, W.; Gardner, Samuel, 13, Copthall-court; Grimston, H. S., 22, Ryder-street, W.; Gunyon, J. E., North Cray, Foot's Cray, Kent; Hamilton, J. F., 25, Ladbrooke Gardens, W.; Harvey, Richard M., 7, Mincing-lane, E.C.; Holland, R. M., 68, Lombard-street, E.C.; Kennedy, A. E. R., Bartholomew House, E.C.; Konstam, Mrs. Teresina, 142, Ebury-street, Eaton Square, W.; Lambert, Streeter, 24, Kensington Gore, W.; Landau, H., 5, Copthall-buildings, E.C.; Lidderdale, Right Hon. W., Bank of England; Lowenadler, P.

a Bill has been spoken of, and proposed, to give the certificate holders the rights and interest they pretend to in the operations of the Council.

Sir John Lubbock replies to the demand for these rights by a Bill to disestablish the permanent members of the Corporation, to give the assets of the Corporation to some twenty-one of their number, to deprive the remainder of every right they have or should possess, and to perpetuate a Council that is not representative of the English holders of foreign bonds. Meanwhile, the holders of foreign bonds are dazed. They suppose the eminent men whom Sir John Lubbock has introduced to the Council equal, in the domain of foreign loans, to the position they occupy in their own sphere, and stand aghast at the way in which their interests are played with or thrown aside. In any case, no single holder of foreign bonds has spoken out, except in the recent case of the Province of Buenos Ayres, when Mr. Bruce Gardyne challenges Sir John Lubbock to call a public meeting of bondholders. Sir John does not seem fond of public meetings. He loves to move in his own circle!

In this case the Council is as inept as in others. It makes no sign; consequently, and unless steps are taken by some other body, the Province of Buenos Ayres—as well able to meet its debt as the City of London itself—will escape upon a private arrangement between the Central Government and the Province, whitewashed because it is aided by the Council of Foreign Bondholders to clear itself by passing a brush over the balance it owes, or will owe, to its sterling bondholders.

The Council has been readily listened to when its mouthpiece stated that £100 a year each to twenty men of eminence, and £1,200 a year to its president were relatively small sums. But the Council is eminently unjust in seeking to deprive those who took the risk of establishment upon their hands of the increment of value in the assets of the Corporation. The Council has not contented bondholders because it has not protected their interests; it is out of touch with what concerns those interests. There is not upon the Council one man who is intimately acquainted with negotiations for foreign loans.

And now this inept body comes forward with a Bill. The proposed Bill was authorised owing to tactics which did not give any opportunity for a discussion upon merits, and the requisite statutory majority could not have been obtained had not secrecy been observed and those tactics adopted. There is one way of obtaining what is desired, and one way only, by reorganisation under limited liability. Banks, insurance offices, institutions of the highest station and credit, have organised or reorganised under limited liability. All that has been said in this case in opposition to limited liability is sheer nonsense. Leave a sufficient capital sum for the continuance of business. Form strong committees of bondholders, and give them the power of nomination to the Council. Let the bondholders in sections and in turn give a support vote to the Council, and then a strong Council understanding its work will be found protecting efficiently the interests of the English holders of foreign bonus, against the wire-pulling and intrigue of houses in the loan-mongering line and everybody else. The first step in effecting this reform is to offer combined and strenuous opposition to the Bill now before Parliament.

American Affairs.

(FROM A CHICAGO CORRESPONDENT.)

I desire to congratulate you most sincerely on the appearance of your first weekly number and on finally having reached a stage at which your calls on readers will be frequent enough to become well known to the great army interested in financial matters.

There appears to be but little which is new with us. I doubt if anything of moment is done in currency reform at this session. The majority are disinclined to act, or take up in earnest so important a financial question, until the situation under the new tariff act is more fully determined. They also fear making mistakes just at this time. Then, too, there is quite a desire among the people for quiet. One will often hear something like "Better let well enough alone. We are doing very well, and don't want to be disturbed now. Better wait awhile," &c., &c., and I am inclined to believe it is as well to be more steady on our pegs, and, in the meantime, consider and discuss the new propositions before they are taken up by Congress.

Senator Wolcott's recent speech has done him no good, and was, I think, most unfortunate for himself. For a man, in such a speech as his was to be, to first cover the President with fulsome praise, claiming him as a partisan, and then lampoon him over Mr. Gage's shoulders, was such transparent demagoguery, that it became ridiculous, and naturally weakened the whole speech.

There is much satisfaction among the people over so many of our securities coming home, and it is coupled with a feeling that liquidation of debt owing to other countries should now progress rapidly. The return of our obligations in 1893 was an object lesson not soon to be forgotten. A few days ago I heard it put substantially in this way: "Even if our currency were all one could desire, and there was no longer danger from that source, Europe is constantly threatened with disturbance, and no one can tell when the holders of our bonds and stocks will need to realise, and so give us trouble. Better develop less rapidly, pay our debts, and be in a position to make the most out of opportunities. We are too rich to justify being in debt to other countries."

Your engineers' strike has enabled us to introduce considerable machinery into England, which is claimed to possess superior merit. A great engine-building concern in Milwaukee has, I am told, booked large

English orders for engines regarded as superior for certain uses, but which England would not try until the strike occurred. The builders believe that as soon as in use large orders will follow, but I don't see much in it, as the English can build like them, and surely some of the shops will adopt the improvements if really valuable.

General business is going very satisfactorily. The trouble about wages in the New England cotton mills is, I think, the beginning of a piece of "poetic justice" in which the prime movers of emancipation, and greatest disturbers of the Southern States, are to be the sufferers. Living is much cheaper, and wages, since the war, much lower, in the South than in the North. Cotton mills in the South have done very well indeed, although up to this time their chief production has been most largely of the coarser fabrics, which yield the smallest profits. When the South goes in for finer goods, as it no doubt soon will, New England cannot compete any better than it can now in the coarser, as the South has almost every advantage, except capital, the one thing which can be moved there without expense.

I firmly believe that the next quarter of a century will see the most of our cotton mills on the highlands of Tennessee and other Southern States. It is right among the cotton plantations, the climate is very fine and very healthy, people can live cheaply, and are accustomed to do so, and there is practically no end of people to draw on for such work. The only hope I can see for New England cotton in this race is free trade, and manufacturing largely for export.

The surplus of ready money in the West continues large, but no doubt it will be put in use before very long. I wish you could make up your mind to a vacation, come to Chicago, and take up railways under the changed conditions, growing out of the consolidation of weak, unprofitable lines into the various great systems, which has been going on so long, but just now reaching the fairly completed stages, with whatever it implies. I would like to do it if competent, but the most I could do would be to arouse attention, and spoil originality for others.

We are at sea on the Chinese question, as now presented, and are wondering what you will all make of it. Our cue will be to let you fight it out, and take the chances of getting our share—"Monroe doctrine," you know. I was greatly impressed by an article of last autumn, by some Frenchman, entitled "Who will exploit China?" more so, perhaps, because it brought so vividly to mind what my old friend Governor Jewel said to me after his return from Russia, to which he was our minister in Grant's time.

He, in answer to queries, said in substance: "The Russians are great diplomats, and, like the Jesuits, plan for the far distant future as much as the present. While an outlet to the Mediterranean is one of their greatest ambitions, I believe they regard the opening up of Siberia, and control on the Pacific Coast, as of much greater importance. Russia does not expect to extend her possessions westward, nor does she want detached dependencies; did not want Alaska, but did want us to have it, and would like to see us in control of all the North American Pacific coast. Asia offers Russia great opportunities, and, with Siberia opened up by a railway through to the Pacific, she would be largely master of the situation. There are, no doubt, several reasons for the Russian friendship for the United States, which I believe is very genuine. They believe in but two kinds of Government: absolute monarchy, and a republic for which the people are properly prepared, and that the geographical positions and policies of Russia and the United States furnish a good guarantee against confliction of interests."

We get an occasional Cuban shake up, but are beginning to believe the end is near—that Spain has pretty nearly exhausted her resources for keeping up the fight, and that it will end before very long. Cuba has been a source of great annoyance and expense. We do not want it, but do want the island peaceful and productive. Hawaii hangs in the balance, and no one can guess the turn. The new Chinese question may, however, make annexation more probable. L. B. S.

Critical Index to New Investments.

UNITED ORDNANCE AND ENGINEERING COMPANY, LIMITED.

With this is incorporated the business of Easton, Anderson & Goolden, Limited. Share capital is £275,000, ordinary £1 shares, and £275,000, Five and a Half per Cent. Cumulative Preference shares of £1 each, and there is also offered £250,000 First Mortgage Four and a Half per Cent. Debenture stock. By a fault in drawing up the prospectus, the issue price of the stock is not mentioned, but it is presumably par, nor do we see at what dates the interest is due. The debenture stock is redeemable at 105 after January 1, 1908, on six months' notice being given, and it is secured by a first mortgage on the freeholds and fixed plant, as well as a floating charge on the other assets. The company which is a Hooley promotion, is formed to manufacture and sell guns, gun carriages, ammunition and war material, and to carry on business as electrical, hydraulic, mining and general engineers; to acquire a licence to manufacture and sell the Schneider-Canet artillery, and to take over the business of Easton, Anderson & Goolden, Limited, engineers, of Erith and London. Fuller, Horsey, Sons & Cassell, value the freehold engineering works and plant of Easton, Anderson, & Golden, at £202,257, exclusive of goodwill, and W. B. Peat & Co. certify that the stocks and stores and other assets on June 30 last (some time back) were valued in the books of the company at £154,955. Peat's certificate might have been dispensed with, for there is nothing in it; anyone can certify what assets stand at in books. That does not guide one to an estimate of their proper value. Sir W. G. Pearce and Mr. Francis Elgar sell the Schneider licence to Mr. Ernest Terah Hooley for £50,000, and this gentleman sells the licence and properties to the company for £550,000 in cash. Two points seem to be missing—what profits Easton Anderson, & Golden have made in the past, and what Mr. Hooley gave for their business.

As a matter of history we may mention that a company called Easton & Anderson, Limited, was formed in 1888 to take over a business of engineers and shipbuilders carried on under the same name at Erith and London. The capital was £250,000 in £100 shares, of which £206,000 was issued as ordinary, and the balance in 5 per cent. preference shares. What the company did, or whether it made any profits, was not made public. Six years later a company was brought out called the Easton, Anderson, & Goolden, Limited, which took over the 1888 company, as well as the business of W. T. Goolden & Co. The capital this time was put at £200,000 in £10 shares, half ordinary and half 6 per cent. preference, all the ordinary being allotted, and £50,860 of the preference. In May, last year, an issue of £150,000 four and half per cent. first mortgage debenture stock was offered through Messrs. Hoare & Co., at par, and besides this an issue of £30,000 second mortgage debenture stock was made. Investors, we believe, showed no undue anxiety to subscribe the capital, and several trust companies were left to "hold the baby" between them, as their list of investments showed. Any merit there may be in the undertaking now formed it is difficult to find, and we certainly see no security for the preference capital, because Easton Anderson & Goolden have not the courage to disclose what their real position is. The capital, too, like that of all Mr. Hooley's companies, is vast.

DAVID THOM, DOMEIER & CO., LIMITED.

Company acquires the soap, oil, tallow and glycerine business established in 1848 of David Thom & Co., of Manchester, and the business of Domeier & Co., established in 1865, which has

been for many years connected with Thom & Co. The profits of the two businesses for four years are given by the chartered accountants and look remarkably fine; but the certificate is very loosely drawn, and is not at all likely to create confidence in the mind of an investor. The assets are a varied assortment, including goodwill, trade marks and trade secrets, but, strangely enough, their valuation is not given in the prospectus. The capital is £180,000 in £5 shares, divided equally into ordinary and six per cent. cumulative preference shares, and for this very choice collection the vendors are willing to accept a mere £147,459 in cash, thus showing a decided preference to sovereigns over shares. In addition to this the company undertakes certain liabilities incurred on November 2c, 1897. This is mysterious; but the hand of the philanthropist is so clearly seen throughout the whole affair that we hope the generosity of the vendors will be appreciated in its proper light.

BALLARD & CO., LIMITED.

Company is formed to buy the business of brewers and maltsters carried on by Henry George Beeman for twenty years under the style of Ballard & Co., of Lewes, Sussex. Capital, £80,000 in £10 shares, in equal parts of ordinary and 5 per cent. cumulative preference shares. There is also an issue of £80,000 four per cent. first mortgage debenture stock at par; interest due April and October, and stock is redeemable after October 1, 1915, at 110. Purchase price is £150,000, including all the share capital, and £70,000 in cash, so that only £10,000 out of the debenture issue will be available for buying new properties. Profits for 1895 were £5,950; for 1896, £6,366; and for 1897, £7,088, which are small enough for such a capitalisation. Collins, Tootell, & Co. value the properties at £115,000, and many of the licensed houses have been acquired in recent years, probably at high prices. The security, for only 4 per cent., seems hardly sufficient.

ARMY AND NAVY PROPERTIES, LIMITED.

The vendor, Frederick Dawkins, transfers to the company various properties around Charing Cross and in Victoria-street, S.W., for £144,000, being the full sum at which they are valued by Joseph Hibbard & Sons. Accountants certify gross annual rental value at £16,572, of which 80 per cent., they say, was fully let. Properties are held on leases having seventy-three to ninety-four years unexpired, at ground-rents amounting to £2,595 per annum. Authorised capital, £100,000, in 10,000 Five per Cent. Cumulative Preference shares of £5 each and 50,000 ordinary shares of £1 each. The whole of the preference shares, which are repayable at 5s. premium by Sun Insurance Company, under a Redemption Sinking Fund policy, are offered at par, and allottees of preference shares are graciously permitted to take ten ordinary shares at par for every ten preference allotted. Of the purchase price £80,000 is represented by a mortage on the properties, and the rest is taken in cash. Consequently while the vendor gets all this money with one hand, with the other he holds a mortgage over the properties for an amount which may not be much under their selling value, so that the security for the preference shares dwindles near to vanishing point.

BRITISH ELECTRIC TRACTION COMPANY, LIMITED.

Company was formed in November 1896 to take over the business of the Pioneer Company, and to develop electric traction. Share capital is £600,000, of which one-half in £10 shares is already issued and quoted about 8 premium. The company is now issuing through the Electric and General Investment Company the other half of the capital in Six per cent. preference shares of £1 each. They are offered at 50s. premium so that they return a purchaser 4½ per cent. interest due February and August. Sir Charles Rivers Wilson is chairman of the board, and a large number of undertakings are said to be engaging the attention of the directors. As this class of business is very much to the front just now, the shares should be a tolerably good investment, though not in any way cheap.

GLENCAIRN MAIN REEF GOLD MINING COMPANY.

Through the "Johnnies" Investment Company this undertaking offers an issue of £140,000 6 per cent. first mortgage debentures of £50 each at par. They will be secured by a first mortgage on all the landed property, buildings &c., of the Company, will be repayable at 102 in seven annual drawings of £20,000 each, commencing May 1st, 1901, or by purchases if below par, and holders will have option until February 7th, 1900, of converting them into ordinary shares at 70s. per share. Interest is due May and November. Issued share capital is £500,000, but no dividend has been paid since the end of 1895, when the capital was less than half what it is now. On the one hand, the interest is tempting; the option to exchange into shares would be valuable were any rich ore to be come across, and it is a well-known fact that many debentures issued by African mine undertakings have turned out remarkably remunerative. The Glencairn, however, is certainly not a rich mine, and although the present issue is made to pay off debt incurred in alterations and mprovements, the mine itself seems some long way off resuming dividends. Still, 6 per cent., with repayment at 2 premium, and the chance of something rich being found, makes the debentures a speculative venture, not entirely without a tempting side, even though it is one of the Barnato group.

VENESTA, LIMITED.

Investors will probobly not rush to take shares in this venture. The capital is £100,000, the present issue being 60,000 shares of £1 each, of which 20,000 shares are allotted to the vendors, the Venesta Syndicate, Limited, in full payment of the purchase money. Venesta boards, which are used for making boxes, tea-chests, &c., are manufactured by cementing together with a patent waterproof composition two or more thicknesses of veneer. Experiments are said to have been highly successful, the only difficulty being the supply to satisfy the demand. To meet this difficulty arrangements have been made with a Russian firm by which a continuous supply will be obtained, and this firm is about to form its business into a company to work harmoniously. The capital of the Russian Company is to be £160,000, and the directors of Venesta, Limited, intend to apply for £32,000 of shares, the Russian Company in return applying for 5,000 shares in Venesta, Limited. This is all very pretty, but the whole affair seems so up in the clouds that none but those in the trade would probably care to take shares.

THE UNITED RAILWAYS OF THE HAVANA AND REGLA WAREHOUSES, LIMITED.

This company has been created with a share capital of £1,540,000, all of it in £10 preferred shares except the odd 40,000 deferred shares. In addition there will be a debt of £2,000,000; £1,600,000 of it is in 5 per cent. consolidated irredemable debenture stock, and the remaining £400,000 in new 5 per cent. prior lien irredeemable debenture stock, of which £350,000 is offered now by Messrs. J. Henry Schröder & Co. at 98. The motives for creating this new English company seem to be twofold—to get out this prior lien stock, and to detach the railway and the warehouses—in themselves excellent properties—from the Commercial Bank of Havana, with whose chequered fortunes they are now too closely identified. Holders of the existing 5 per cent. bonds of the Bank and Railway Company will be allowed to exchange into the new consolidated debenture stock, and the prior lien stock will be offered to the public. Of course, the priority of this new stock can only be established if the old bonds of 1890—redeemable at 105—are converted. Apart from this passing defect, the bond seems good enough, and the railway, with its warehouses, ought to be a fair investment when Cuba is quiet again. As it is, the lines of the company have suffered much since 1894, and the receipts for the past year fell to £327,434 against £524,652 in the former year. To be sure, the net revenue, even then, is brought out at £150,000, or more than enough for the interest on both classes of new bonds; but the net income cannot be very clearly defined under present conditions of working. The prior lien bonds, however, ought to be all right.

BUENOS AYRES AND BELGRANO ELECTRIC TRAMWAYS COMPANY.

The objects of this company are to acquire and amalgamate the concessions, lines, and properties of the old Buenos Ayres and Belgrano Tramway Company, and the concession recently granted to Charles Bright for an electric tramway between Buenos Ayres and Belgrano. The share capital of the new company is £850,000 in £5 shares, of which 40,000 are "A" 6 per cent. cumulative preference, 30,000 "B" 6 per cent. cumulative preference, and 100,000 ordinary shares. There is also created £320,000, 5 per cent. debenture stock which is redeemable after 1,910 at 115, or at par on January 1, 1930. There is now offered for subscription £260,000 debenture stock, and £200,000 "A" 6 per cent. cumulative preference shares. Interest is payable January and July. In November last the former company obtained permission to use the overhead system for the greater

portion of its lines, the grant being for ninety-nine years, after which the lines and rolling stock revert to the municipality; but Mr. Bright has now obtained a concession for an electric tramway between Buenos Ayres and Belgrano by another route, the concession being for sixty years, after which the lines and rolling stock revert to the municipality without payment. For the Buenos Ayres and Belgrano Company's concessions and properties, the new company pays £168,000 in 5 per cent. debenture stock, or cash; £137,500 "B" preference shares and £107,500 ordinary shares; and for the Bright concession and properties, together with the vendor's guarantee of subscription of the "A" shares, and such amount of debenture stock as may be required for the purposes of the company, and for paying off such of the holders of the existing 6 per cent. debenture stock of the old company as do not elect to take new debenture stock, £38,000 in cash and the balance of the ordinary shares, and the actual cost plus 10 per cent. of work done, materials, rolling-stock, &c. This means a very large blowing out of the capital, for whereas the old company had a share and debenture capital of £377,500, the share and debenture capital of the new company, when it is all issued, will be £1,170,000. Naturally, a large sum will be required to equip the tramways with electricity, but the old company seems to be getting very liberal treatment, for it was a none too successful undertaking. In the first year of its existence 6 per cent. was paid on the ordinary shares, and in the two following years 15 per cent.; but for 1889 the dividend descended to 8 per cent., and only 3 per cent. was paid in 1890 on the preference shares. For the next two years nothing was paid on either class of share, while for 1893 1½ per cent., and for 1894 and 1895 2 per cent., was distributed on account of arrears on the preference capital; but for 1896 there was no dividend at all. The passenger traffic between Buenos Ayres and Belgrano is carried by the railways, and it remains to be seen if the new company will draw this traffic to itself after possibly a long period of competition. Under these circumstances the future of the Electric Tramways Company with its inflated capital looks none too promising.

CICERO & PROVISO STREET RAILWAY COMPANY.

Messrs. Van Oss & Co. offer for sale at par $1,700,000 5 per cent. consolidated mortgage gold bonds, redeemable May 1, 1915, of the Cicero and Proviso Street Railway Company. Interest is due May and November and principal and interest is guaranteed by the West Chicago Street Railway Company. The bonds are part of a total of $2,500,000, some of which are reserved for future requirements, and after 1904, when $250,000 6 per cent. bonds mature they will have first mortgage rights on the property. The system is leased for fifty years to the West Chicago Street Railroad Company and each bond has endorsed upon it the absolute guarantee of this company. It is claimed that the West Chicago company is one of the leading tramway companies in the United States, that it owns and operates 259 miles of street railways, almost the whole of which is worked by electricity. Its funded debt is $10,800,000, and its common stock is $13,189,000. Upon the latter, dividends are regularly paid, those for the last three years being 6 per cent. The issue, one-fourth of which has been subscribed by investment and insurance companies in Great Britain, would seem to offer a fair 5 per cent. investment to those who are not afraid of American securities. The guarantor company appears to be in a pretty robust condition, and it is upon its progress that investors will have to keep their eye.

Company Reports and Balance-Sheets.

DANIELL & SONS' BREWERIES, LIMITED.—In our notice of this company's report in THE INVESTORS' REVIEW of January 28, the dividend on the ordinary shares was, by mistake, stated at 3 per cent.; it should have been 4 per cent. The amount carried forward was given as £1,912; it should have been £2,441.

THE GREAT NORTHERN RAILWAY COMPANY.—Gross receipts, £2,751,657; expenses, £1,686,944; proportion of expenses to receipts, 61·3 per cent. In its report for the last six months of 1897 the board of this company makes it very plain why the dividend on its various ordinary stocks has fallen off. Out of the gross increase of £105,000 in the receipts, little more than £4,000 remained to add to net revenue: the balance was all swallowed up in working expenses. Even the slight amount left did nothing to help the ordinary stock, because the amount of capital upon which the company has to pay dividends is half-year by half-year increasing. We make the net increase in the preferential charges compared with a year ago to be about £13,000, and therefore the balance available for dividends on the ordinary stocks tends to diminish, and the capital expenditure goes on steadily year by year. In the past six months it amounted to about £660,000, exclusive of the £391,250 issued to cancel the Royston and Hitchin rent charge. In the current half-year it is estimated that three-quarters of a million will be spent on capital account, and a Bill is to be laid before the proprietors for their sanction which will involve the raising of another £2,500,000 of capital. The proprietors might note these things, and ponder them. After paying a dividend at the rate of 5 per cent. per annum on each £100 of each original ordinary stock, a balance of £15,000 is left to be carried forward, as against £8,000 brought in a year ago; but, owing to the rapid growth of capital charges, this additional balance will count for nothing in helping to eke out the dividend for the current half-year. What with expenses and capital charges, the outlook for the ordinary stock holder, and especially for the deferred ordinary stock holder, in this railway does not appear to us very satisfactory in the near future. The dividends are payable on the 22nd inst.

THE NORTH-EASTERN RAILWAY COMPANY.—Gross receipts, £4,225,698; expenses, £2,454,408; ratio of expenses to income, 58 per cent. The directors in this case also have precisely the same story to tell as their neighbours. Gross receipts rose nearly £133,000, but expenditure increased more than £137,000, consequently the net receipts were actually nearly £4,500 less than in the corresponding half of 1896. This result, the directors state, is mainly due to advanced wages in several grades, to increase in the number of men employed necessitated by shortened hours of labour, and to the larger expenditure upon coal and materials in the locomotive and permanent way departments. It appears to us that this kind of extension in working charges is bound to go on. There is as little finality in it as in the capital account, which in the case of this company expands somewhat less rapidly than in some other instances, but still £325,000 was spent in the half-year just closed. A Bill is before Parliament involving the creation of powers to raise another £2,800,000. In time this capital must tell upon the company's power to pay a high dividend on its ordinary stock. The dividend now due falls short by a ¼ per cent. per annum compared with a year ago, and is only at the rate of 7 per cent. on the consolidated stock. It will be payable on the 19th inst.

THE GREAT WESTERN RAILWAY COMPANY.—Gross receipts, £5,243,967; expenses, £2,931,727; ratio of expenses to receipts, 55·9 per cent. For the half-year to December 31 the gross increase in the receipts was £233,777, and in the expenses £199,093. The increased expenses, therefore, swallowed up 85 per cent. of the increase in gross receipts. Still, this company did rather better than either the Great Northern or the North-Eastern, but it was unable to increase the dividend on its ordinary stock, which remains at the rate of 7¼ per cent. per annum, and the balance carried forward is only £31,351, against £42,884, so that the whole of the additional receipts and more have been consumed in meeting fresh charges on capital account. An addition of £1,500,000 has been made to the consolidated ordinary stock during 1897, and the net result of the capital charges is that about £36,000 more has been required to pay the same dividends on preference and ordinary stocks as a year ago. Within the past six months the company spent £626,441 in new capital, £218,000 of it on working stock, and the expenditure for the current half-year is put roundly at £800,000. The company is going into some extensive commitments in connection with Irish railways; but how far this, if carried through, may add to the preferential burdens, we cannot yet say. It may be that they will involve, in the long run, no extra charge at all. Ireland should benefit by having such a wealthy and powerful corporation as the Great Western behind it; but the company's capital expenditure in England is by no means nearing an end, for the estimated amount of it in the future is £4,415,000, and improvements, additions, and expansions are continually going on. Each half-year's addition to capital, taken by itself, looks small for a company whose gross receipts exceed £10,000,000 per annum; still, they eat into the net revenue steadily and irretrievably. The dividends will be payable on the 16th inst.

NORTH LONDON RAILWAY COMPANY.—Gross income, £270,955; expenditure, £137,921; percentage of expenses to income, 50·90. These figures show an increase of £6,850 in the receipts, and of £3,916 in the expenses, so that the company has obtained its new business at almost a normal outlay. It is a company in the happy position of possessing an almost closed capital account, since only £2,666 was spent on this head last half-year. After paying debenture interest and adding £7,000 to the reserve fund, against £3,500 in the corresponding half of 1896, the company is able to cover its preferential dividends and to give the usual 3¾ per cent. for the half-year on its ordinary stock, making up the year's dividends to the accustomed 7½ per cent. The balance carried forward, however, is, at £7,061, about £650 less than in the second half of 1896. The balance-sheet has a very satisfactory appearance, and there was £140,474 in cash at the company's credit when it was drawn up. The dividend is payable on the 19th inst.

GREAT SOUTHERN AND WESTERN RAILWAY COMPANY OF IRELAND.—Gross receipts, £458,965; expenses, £231,024; ratio of expenses to receipts, 50·3. Out of the net revenue of £196,628 all the preference dividends are met, and a dividend at the rate of 5½ per cent. per annum is declared on the ordinary stock, £3,000 added to reserve, and a balance of £30,339 carried forward. Traffic receipts increased £12,223, and working expenses £6,661. The company spent £24,488 on capital account in the half-year, and looks to expend £304,386 in future years. In the balance-sheet the reserve fund of £23,000, together with superannuation fund of £77,877, stand against an amount of £162,366 at the debit of capital account. The dividends are payable on March 1.

Tottenham and Hampstead Railway Company.—This little property, controlled by the Midland, earned enough last half-year to pay a dividend at the rate of 8½ per cent. per annum on its ordinary stock, leaving about £10 more to carry forward than it had in the second half of 1896. It spent only £207 on capital account in the half-year.

Lloyds Bank, Limited.—The secretary of this bank sends us the following letter, and we have to express our regret that the two mistakes referred to should have been allowed to creep into this paper :—' I am directed to call attention to some grave mistakes in your paragraph (page 164, issue of February 4) with respect to this bank's recently issued report. It is there stated that our investments amount to £3,870,000 only, and are all in one item. Both these assertions are, as you will see upon reference to the report, quite erroneous, as the investments are clearly set out by us in *two items*, and amount, together, to close upon £8,000,000. You have obviously overlooked a most important line — Consols, &c., £4,000,000 odd—and the error, and the inference based upon it, are serious and misleading. I have also to mention that the reserved fund has not been increased by premiums on new shares as you suggest, and the report does not warrant such a surmise, the fact being that the adjustments of capital and reserves of the two banks which we have acquired during the past year have, as mentioned by the directors, increased our own share capital by £260,000, and the reserved fund by £150,000. So recently as September last we had occasion to write you respecting a mistake in The Investors' Review with respect to this bank, and it is unfortunate that a much greater one should have been suffered to appear after so short an interval.

Tramways Union Company.—An old-established company which works tramways at Bremen, Bucharest, and Madrid. Like other companies working abroad, it has not kept up the farce of denying the leasehold character of the business, and so is accumulating sinking funds both to redeem debentures and the share capital. Considerable expenditure has taken place during the past year in the three cities, chiefly in Madrid, which is being supplied with an electric installation. The company has therefore issued £150,000 of Five per Cent. "B" debentures in the year. After setting aside £2,440 to debenture fund, and £1,026 towards repayment of share capital, the net revenue amounted to £12,366, which allowed a distribution of 5 per cent. upon the share capital, and the carrying forward of £351. There is a dividend equalisation reserve of £5,000, but the capital reserve of £10,575 was last year absorbed by special improvements at Bremen.

Westminster Electric Supply Corporation.—This is one of the best, if not the best electric lighting company in London, and its record for the past year is remarkably good. Its revenue of £107,366 showed an increase of £20,734, or about 23 per cent. over that of the preceding year. Expenses naturally increased, but only moderately, and the net profit of £49,585 permitted of a dividend of 12 per cent., and the carrying forward of £3,119. Larger sums were allowed for repairs and depreciation, and the various reserves of this comparatively new company amount to £59,878, and the result is seen in its balance-sheet, where evidence of comfortable circumstances is patent. During the year 4,355,781 Board of Trade units of current were sold for the equivalent of 290,561 lamps of eight-candle power, as against 3,503,054 Board of Trade units sold in the preceding twelve months for an equivalent of 249,318 lamps of eight-candle power. There are now on circuit 292,883 lamps of eight-candle power, and applications have been received for a further 10,886. The company is about to repay £100,000 of Four and a Half per Cent. and Five per Cent. debentures, and therefore issued £200,000 of Three and a Half per Cent. debenture stock, partly, of course, to meet further expenditure.

London and Middlesex Freehold Estates Company.—This is the old London Financial Association of unholy memory under a new name, with its share capital reduced to sensible dimensions. Consequently it appears to be doing better, and in the past year earned a net profit of £16,094. Most of this, however, was obtained from profit on the sale of land and investments, and the board, therefore, prudently distribute only about a third of the amount in a dividend of 5 per cent. upon the shares, carrying forward no less than £10,038. Comfortable sayings are uttered in regard to some of the "lock-ups" of the old company, and those who have stood by it throughout may yet win back a part of their loss.

National Mortgage and Agency of New Zealand. — This company did a trifle better in the past year, for it was able to pay the usual dividend of 5 per cent., and carry forward £962 more than it brought in. Although another £1 per share has been called up of late, the debentures issued are about the same in amount as they were a year ago. The company, we are glad to see, has reduced the issue of guaranteed mortgages by two-thirds in the same period, for such mortgages are a most unsatisfactory sort of security. The new money has apparently gone to swell the investments and liquid assets, so that the position ought to have improved, but no clue is given as to the nature of the investments. The debenture interest, however, is still a serious charge, representing, as it does, two-thirds of the net profits earned in the year.

Brighton Grand Hotel Company.—After a stormy past the affairs of this company have improved of late, and for last year the profit of £4,299 was £1,314 above that of 1896. A dividend of 3½ per cent. was declared, as against 2½ per cent. in 1896, and still worse announcements earlier. The company, however, is not yet in a firm position, and we should like to see more regard paid to depreciation in its accounts. Thus "furniture and plant" stand at £47,874 both in last year's and this year's report, and yet we should imagine that in the interval they had somewhat depreciated. The consolidation of the various debenture issues into one stock was a wise proceeding, but at the same time the expenses in this connection, put at £1,873, ought to be written out of the balance-sheet The allowance for repairs appears to be good.

Brentford Gas Company. — Net profits last half-year were slightly higher at £38,103, but the balance brought in was smaller, and after paying debenture interest the surplus of £58,729 was a little less than a year ago. The usual dividends at the rate of 12 per cent. per annum on the consolidated stock and at the rate of 9 per cent. per annum on the new stock were declared, leaving about £25,000 to be carried forward. The sale of gas increased in the half-year by 9 per cent.

Holt Brewery Company.—Net profits last year amounted to £55,028, or an increase of £4,723 over the previous twelve months. Dividends amounting to 8 per cent. were declared upon the ordinary shares, and £15,000 was added to reserve. The latter fund will then amount to £25,000, being the result of two years' accumulations since the company was reconstructed. Depreciation to the extent of £6,969 was allowed for, which seems low, while repairs only came to £1,451, the value of the properties being returned as £769,325.

Andrew Knowles & Sons, Limited.—This colliery company announces that in the past year there was no improvement in the prices of coal, and no alteration in colliers' wages. The output of the year was somewhat reduced by an accident, which caused a stoppage at one of the company's collieries for about six months. Net profit for the year amounted to £16,226, which allowed of a dividend of 15s. 9d. per share, or 3½ per cent., as against 18s. per share in 1896. To do this the balance forward was reduced £3,461. The company seems to have no reserves worth speaking of, and although £12 10s. per share was written off capital in 1895-6, the balance-sheet has not even now a prepossessing look.

Crystal Palace District Gas Company.—The great aid received in the past by this company from residuals is now rather a misfortune, as their prices have fallen so much of late. To pay the June dividend of 5¼ per cent. no less than £3,669 had to be withdrawn from the reserve fund, and in the past half-year the net revenue only came to £11,652. This implies that £4,416 will have to be withdrawn from the same fund if the dividend of 5¼ per cent. is now to be paid, and evidently it is the intention of the board to favour such a proposal. After this deduction the reserve will amount to £32,166, which means that the company can go on for some years without reducing its dividend. It is stated that revenue has borne the cost of improvement of plant which will be productive in the near future, and the district is a promising one, so that this company, with its low charge of 2s. 7d. per 1,000 feet, ought soon to bring its accounts into equilibrium.

Bristol United Breweries.—The absorption by this company of the brewing concern of D. Sykes & Co. has produced a strong-looking combination. When the amount due on the shares is paid up, the capital should consist of £440,000, with £220,000 of debenture stock, £37,552 of mortgages, and a reserve of £130,000. The percentage of borrowed money to share capital will, therefore, be good, while the reserve represents 20 per cent. of the total share debenture and mortgage capital. The profit and loss account of last year was confused by the arrangements in connection with the amalgamation, but the net revenue sufficed to pay dividends and bonus on the ordinary shares amounting to 15 per cent. for the year. It would be a vast improvement if the allowances for repairs, depreciation, and bad debts, were stated in the profit and loss account. No less than £40,271 of the reserve is invested in securities.

South Metropolitan Gas Company.—Thanks to an increase of over 6 per cent. in the sale of gas, this company was able to pay its usual dividend of 5¼ per cent. out of revenue, and to carry the small balance of £1,802 forward. The reserve fund will, therefore, stand at £94,872, and in addition there is an insurance fund of £44,864, and a leasehold renewal fund of £16,846. Each fund is credited with interest each half-year, so that they grow automatically. To earn its revenue, the company, of course, had to put forth great efforts, and the increase in meters, private, company-owned, and automatic, and stoves and fires used by its clients came to nearly 10 per cent.

National Telephone Company.—Gross income for the half-year ending December 31, amounted to £507,602 ; net, £178,457, increases of £67,624 and £23,473 respectively. Working expenses are 61·33, increase ·06. Addition to reserve, £40,000, making it £510,671. Dividends on ordinary, 6 per cent., free of income tax. On capital account, £267,375 has been expended for additional exchanges, private and underground lines, &c., and further extensions are anticipated, but no estimate of the amount is given.

Wilts and Dorset Banking Company.—A net profit for the year of £113,398 is shown in the report, including £8,576 brought forward, which compares with £108,577 for 1896, when £7,027 was brought in. The usual dividend of 20 per cent. is distributed, and 10s. per share interest is paid on new shares, leaving £8,398 to go forward. The figures of the balance-sheet have been swollen by the new capital raised so that comparison is of little use. Deposits have risen from £7,499,000 to £9,444,000, and bills discounted and loans from £3,581,000 to £5,079,000, which is a heavy total, and might be divided. The premium on the new shares has been added to the reserve, raising it to £700,000, the whole of which stands in Consols at 90. The bank is evidently going ahead, for another half-million of capital is to be raised on such terms as the directors may think fit, and not divided, as previous issues have been, amongst the shareholders. During the year two amalgamations have been effected, and three new branches have been opened, besides several agencies.

Crystal Palace Company.—A hitherto unexplained advance of considerable dimensions has recently taken place in the prices of the various stocks of the company, but the annual report sheds

some light. In this it is stated that a movement has been started for improving the financial position of the company, and it is hoped that by the day of the meeting (next Thursday) the negotiations, which are now pending, will be in a sufficiently advanced stage to be reported to the proprietors. We await the scheme with considerable interest, but think it prudent not to expect too much. In other respects the annual statement is as doleful as usual. Gross receipts came to £134,704, and all but £9,851 was absorbed in expenses. After providing for First Debenture stocks there remains £58 to be added to the previous balance of £239 standing at the credit of the Second Debenture Stock Interest Account, and thus £1,330,175 of stock goes without interest. The year's receipts owing to the Handel Festival are £13,000 more than in the previous year, but the net revenue is the lowest for very many years past. The number of season tickets sold was only 9,140, being also the lowest for many years, but the daily admissions by payment amounting to 1,171,532 were larger than they have been since 1890. The Imperial Victorian Exhibition failed to attract any great additional number of visitors; and there was a great falling off in the receipts from the Handel Festival because it was held so soon after Jubilee day. There is a well-grounded idea that everything at the Palace has to be paid for; yet we find that there were given during the year free, gratis, and for nothing 365 concerts, 553 popular entertainments, 25 firework displays, 20 special fetes and choral festivals and 10 bird, cat, dog, flower, fruit and other shows, besides additional attractions. In spite of all this and of the Handel gathering, the directors did not manage, as was intended, to write off any portion of the £5,500 in respect of repairs to main building in suspense, which has consequently again to be carried forward. The old out-of-the-way Palace seems to be sorely in need of a vigorous push from some quarter to give it a fresh start, but we certainly do not approve of the suggestion of surrounding vestries that such a "white elephant" should be bought up with ratepayers money.

LONDON ROAD CAR COMPANY.—The report for the second half of last year does not show the improvement we expected. Receipts came to £171,934, against £160,438 in the corresponding period, but expenses were £154,865, against £143,229, so that the profit, amounting to £17,068, was actually £141 less than a year ago. The continued growth of the concern is seen in the fact that the number of horses in stock was 4,287, compared with 3,964; the average number of cars working 356, against 334, and the number of people carried over 29 millions, against 27 millions. But while the weekly average traffic receipts per car were £17 14s. 8d., or 2s. 8d. more than in 1869, the weekly average expenses were £16 11s. 3¼d., being an increase of almost 5s. Expenses under all headings were larger, the cost of feeding per horse per week rising from 7s. 10½d. to 8s. 1¼d. Although the company made no larger profit the dividend is raised from 7 to 8 per cent. per annum, and in place of the £3,000 added last year to general reserve, a sum of £2,000 is set aside towards starting a depreciation fund, and a slightly smaller balance is carried forward. The dividends and bonus for the whole year amount to 9 per cent., so that at their present price of 11 the shares yield still 5 per cent.

THE GERMAN BANK OF LONDON made a gross profit last year of £40,414, inclusive of £3,416 brought forward, and a net profit of £27,044. A dividend of 10s. per share, or 5 per cent., is paid for the year for the fifth time in succession, and £4,000 is added to the reserve against £3,000 last year. With this addition it will amount to only £84,000, compared with a fully-paid capital of £400,000. Current accounts of the bank do not exceed £206,470, but its acceptances stand for the remarkably large total of £1,007,564. On the other side bills discounted and advances amount to £1,425,461, but the bank appears to hold no investments. The position seems somewhat unique, but not necessarily unsatisfactory.

NATIONAL PROVIDENT INSTITUTION.—This Mutual Life Office issued 1855 new policies last year insuring £652,400 and yielding £27,490 in new premiums, £11,736 was also received for annuities amounting to £782. Altogether the premium income was £414,788, and the total income, exclusive of £17,299 credited as "balance on revaluation of assets" £635,400. Claims took £316,581, including bonuses, and expenses, exclusive of income-tax and commission, came to £47,419 or little more than 11·3 per cent. of the premium income. After meeting all charges and applying £58,676 in reduction of premiums, there is a balance of £170,329 to be added to the funds, making their total £5,233,418. The quinquennial valuation shows favourable results and gives a total surplus on the five years as at November 20 last of £775,585 of which £714,390 is divided, £7,000 added to the superannuation fund, and £61,195 placed to the insurance fund as undividend surplus.

GLYN, MILLS, CURRIE & CO'S balance-sheet, dated January 31 last, comes to a total of £14,267,069. Cash in hand and at the bank stands at £1,597,675; money at call and notice at £2,335,600; investment, including £1,666,667 Consols at 90, at £2,846,605; and stock company with unlimited liability, there is no profit and loss bills, loans, &c., at £7,308,190. Of course, being a private joint-account. There is a contingent liability of £1,072,375 on acceptances.

ROBARTS, LUBBOCK & CO.—The balance-sheet of this private banking firm, dated January 31, shows current and deposit accounts amounting to £3,803,969. Cash in hand, and at Bank of England, came to £770,401, and bills discounted and advances to £1,709,434.

The gold output on the lowlands of the Amur, in Eastern Siberia, is steadily increasing. During 1897 the washings realised 132 poods as against 81 poods in 1896.

Answers to Correspondents.

Questions about public securities, and on all points in company law, will be answered week by week, in the REVIEW, on the following terms and conditions:—

A fee of FIVE shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of FIVE shillings must be sent to cover the cost of such letter, the fee then being TEN shillings for one query only, and FIVE shillings for every subsequent one in the same letter. While making this concession the EDITOR will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Correspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus:—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway?"

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The EDITOR has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market manipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The EDITOR further respectfully requests that merely speculative questions should as far as possible be avoided. He by no means sets himself up as a market prophet, and can only undertake to provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the INVESTORS' REVIEW, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

A VICTIM.—Your further communications received. I doubt if the gentleman you name would consent to act; it would be better to get a shareholder. I am glad you have done so much. These companies do not send me notices of their meetings, hence the omission; the only ones I had information about are to be held to-day, and I understand some protest will be made. Unless the opposition is strong it will be difficult to get any satisfaction.

H. B.—The original prospectus was not very attractive, and for some time the preference shares, which alone were offered for public subscription, were in the hands of underwriters. A good dividend has helped to raise the market price, and presumably they have taken advantage of it, as they are now dealt in fairly easily and at a good premium. There is also a fair market in the ordinary, which were taken by the vendors in part payment. The price is too high to make them a tempting purchase.

A. Z. B.—I hope to have some news for you in a day or two.

W. H. S.—Your letter has been forwarded.

EXON.—I do not consider the rates offered sufficiently tempting to induce you to consent to the locking up of your money for so long. There is no cause for alarm, but if anything did happen you would be unable to help yourself, as you have not a marketable security. It would be better to accept a little interest and have something you could sell if there were need.

From 1890 to 1897 inclusive, 218 trains were "held up" by train robbers in the United States, resulting in death to seventy-eight people, and the wounding of sixty-seven others. The American Government seems to look helplessly on, and takes no steps in seriously attempting to stop these desperate outrages. Yet it does seem high time that something was done.

The United States War Department are taking steps to control the disorderly crowd now heading for the Alaskan Goldfields. Persons inadequately supplied with provisions will be refused admission altogether.

The new White Star steamer, "Cymric," just out of the builders' hands, is said to be the largest cargo carrying steamer in the world. Her length is 600 ft.; her beam 64 ft., and depth 42 ft.

The affairs of a "financial investor," of the name of E. Bunn, have been placed in the hands of the Official Receiver, to be wound up in bankruptcy, but the gentleman himself has not yet surrendered under the proceedings. This financial investor seems to have had expansive methods of business. He is described as of London, Ipswich, Manchester, Balham, and Brighton. He accepted deposits at the rate of five per cent., with bonuses as circumstances permitted. How much was paid in these respects does not appear; but at the meeting of creditors the assets were said to be of "doubtful value."

The Queensland gold returns for January are as follow:—Charters Towers, 35,900 tons crushed, yielding 26,400 oz.; Mount Morgan, 12,000 tons crushed, yielding 14,000 oz.; Gympie, 800 tons, yielding 1,800 oz.; Croydon, 1,800 tons, yielded 1,500 oz.; other fields, 4,000 tons, yielded 5,800 oz.; alluvial yielded 1,800 oz.; total, 49,900 oz.

THE SUBSCRIPTION LIST WILL BE CLOSED ON OR BEFORE WEDNESDAY, THE 16th FEBRUARY

United Railways of the Havana and Regla Warehouses, Limited.

Incorporated under the Companies Acts, 1862 to 1893.

(INTERNATIONAL COMPANY).

SHARE CAPITAL { 140,000 Preferred—£10 each - - £1,400,000 / 14,000 Deferred—£10 each - - 140,000 } **£1,540,000**

DEBENTURE STOCKS—£400,000 Five per Cent. "A" Irredeemable Debenture Stock.
£1,600,000 Five per Cent. Consolidated Irredeemable Debenture Stock.

Issue of £350,000 (part of a total of £400,000) Five per cent. "A" Irredeemable Debenture Stock.

This "A" Stock ranks in priority to all other Issues of the English Company, and is secured upon its whole property and undertaking, but as regards the Railways subject to any of the Bonds of 1890 for the time being unconverted.

The valuable Dock-warehouses (Wharves), Ferries, Lands, and Appurtenances, which formed no part of the security for the Bonds of 1890, are specially charged to secure the Five per Cent. "A" Debenture Stock.

No charge can be created *pari passu* or in priority to this Debenture Stock without the assent of three-fourths of the Holders.

Conversion of the £1,586,900 existing Five per Cent. Bonds (1890) of the United Railways of the Havana into Five per Cent. Consolidated Irredeemable Debenture Stock of this Company.

Trustees for the Five per Cent. "A" Irredeemable Debenture Stock:
Sir HENRY C. BURDETT, K.C.B. ALEXANDER YOUNG, Esq.

Trustees for the Consolidated Irredeemable Debenture Stock and Voting Trustees:
Baron SCHRODER. J. NAPIER HIGGINS, Esq., Q.C. WALPOLE GREENWELL, Esq.

Messrs. J. HENRY SCHRODER & CO. offer for public subscription the above-named £350,000 Five per Cent. "A" Irredeemable Debenture Stock, which they have contracted for.

The price of issue is £98 for £100 Stock, payable as follows:—

£ 5	on application.
35	,, allotment.
35	,, the 15th March.
23	,, the 14th April.
£98	

Interest at 5 per cent. per annum, from the date of the above Instalments, to 1st July, 1898, will be paid on that date.

Allottees will have the option of paying up in full on allotment, or on the date of any subsequent instalment, under discount at the rate of 2 per cent. per annum. **The failure to pay any instalment when due renders all previous payments liable to forfeiture.**

In case no allotment is made the deposit will be returned forthwith.

Scrip Certificates will be issued in due course in exchange for the Allotment Letter and receipt for the amount due on allotment.

CONVERSION OF THE EXISTING 5 PER CENT. BONDS (1890) OF THE UNITED RAILWAYS OF THE HAVANA.

Holders of these Bonds are entitled to receive Consolidated Irredeemable Debenture Stock of the English Company in exchange for the Bonds of 1890 to the same amount.

The bonds must be delivered to Messrs. J. Henry Schröder & Co., with all unpaid coupons, including the coupon due 1st July next. The interest on the Debenture stock will run from the 1st January last.

Applications for conversion should be lodged forthwith.

The Share Capital of the Old Company, $7,000,000 gold, say equal to £1,400,000, is held by about 500 shareholders, and there will be issued in respect thereof the Preferred shares of this Company to that amount.

United Railways of the Havana and Regla Warehouses, Limited (International Company), has been formed to acquire from the Old Company, named Banco Del Comercio Ferrocarriles Unidos De La Habana y Almacenes De Regla, the well-known system forming the United Railways of the Havana, which has for over forty years past been owned and worked under perpetual concessions. In 1889 the two local Companies which owned the system were amalgamated into the Old Company. This Company also acquires from the Old Company the Dock-warehouses at the Regla Terminus in the harbour of Havana (where the Sugar, Tobacco and other products of the zone served by the Railways, as well as merchandise arriving by sea are stored); also valuable lands adjoining the Main Havana Station in the centre of the City, at Tallapiedra, and elsewhere near the City.

It was not considered advisable by this Company that the Bank of Commerce, the business of which hitherto formed an integral part of Old Company, should be taken over.

For some time past efforts have been made to convert the Railway and Warehouse business into an English Company. With this object, Mr. Underdown, who has now accepted the position of Chairman of this Company, entered, on 30th October last, into a Contract with the Old Company, the benefit of which he transfers to this Company, upon the terms and conditions of the Contract hereinafter mentioned. It is considered that the undertaking, administered under new regulations by an experienced Board of Directors, will have a much enhanced value, and the financial results be greatly improved.

The Five per cent. "A" Irredeemable Debenture Stock, of which £350,000 is now offered, together with the Deferred Shares, have been created to carry out this operation, to clear the Railway of its floating debt, to put the Railway and Rolling Stock in good order (which have naturally suffered to a certain extent, but not seriously, by the political disturbances), to provide working capital, and a reserve fund specially set aside to supplement the earnings of the properties, so that under all circumstances the service of the Debenture Stocks in the early period of resuscitation of the regular traffics may be fully assured.

It is one of the conditions of the transfer of the property that the Railways shall be taken over subject to any of the Bonds of 1890 for the time being unconverted. In that year, £1,600,000 Five Per Cent. Bonds were created in order to extinguish the then existing Bonds of the Bay of Havana and of the Havana Railways, and for further extensions. The latter Bonds have all been redeemed, with the exception of £51,300 of the issue of 1886 (against which £59,900 of the Bonds of 1890 are held by Messrs. J. Henry Schröder & Co.), and these will shortly be redeemed.

The Five per Cent. Consolidated Irredeemable Debenture Stock of £1,600,000 is created chiefly for the purpose of converting the above-mentioned existing Bonds of 1890, and holders of these Bonds are now entitled to exchange them for this Irredeemable Debenture Stock of the Company.

It is pointed out to the Bondholders of 1890 that the advantages they will obtain by conversion will be the following:—

(1) They will become entitled to an Irredeemable Debenture Stock of an English Company (secured by a Trust Deed) carrying interest at 5 per cent. in place of a Bond of a Foreign Company bearing that interest, but which is liable to be paid off at any time at 105, thereby preventing it rising to any much higher price.

(2) This Debenture Stock, though subject to the Five per Cent. "A" Debenture Stock, has more security than the Bonds of 1890, having a charge on the valuable Warehouses and Lands above mentioned, which the Bonds do not possess.

(3) It is believed that, under the management of an English Company, the Share Capital will earn a substantial dividend, whereby the 5 per cent. Consolidated Debenture Stock will have a value far beyond the 105 per cent. at which the existing Bonds are liable to be redeemed.

(4) A very substantial voting power at General Meetings of the Company is secured for the Trustees of this Debenture Stock, so as to render any infringement of the rights of the Debenture Stockholders impossible.

The Statement, furnished by the London Agency of the Old Company, gives particulars of the properties acquired by this Company, together with a return of the revenues derived from the Railways and the Warehouses for the last seven years. It will be seen therefrom that the net revenue of the Regla Warehouses alone during that period has averaged £18,798 per annum, an amount in excess of the sum required to pay the interest on the Five per Cent. "A" Debenture Stock—

The net revenue from the Railways and Warehouses averages per annum ... ... (after deducting the £36,767 mentioned in the report).	£196,179	
The interest on the £350,000 "A" Debenture stock requires per annum	£17,500	
The interest on the Consolidated Debenture stock requires per annum	£80,000	
		£97,500
Showing a surplus of		98,679
The net revenue of 1897 from the railways and warehouses amounts to ... (after deducting a similar sum of £36,767).		122,104

The reports now being received from Cuba indicate a growing amelioration of the political situation, and that a steady resumption of the cultivation of crops has been going on for some considerable time, and this is evidenced by the circumstance that whereas at this time last year only 17 sugar factories were said to be at work, 85 factories are now reported to be working, while other industries are also improving.

The entire Share Capital of this Company is to be issued credited as fully-paid up under the terms of the Agreement below mentioned, the proprietors of the Shares of the Old Company receiving in respect of their Shares the Preferred Shares of this Company, they retaining the Banking business and premises as a separate concern.

The Preferred Shares are entitled to a Cumulative Preferential Dividend of 3 per cent.; then the Deferred Shares receive a like Dividend, any further profits being divided without distinction of class. When the Deferred Shares have received 3 per cent. Dividend in two consecutive financial years, all Shares will become Ordinary Shares.

The forms of the Deed of Trust securing the Five per Cent. "A" Debenture Stock, and of the Deed of Trust securing the Five per Cent. Consolidated Debenture Stock, containing provisions as to the exercise of voting power by the Trustees, both of which deeds provide for convening meetings of Debenture Stockholders whereby a prescribed majority can bind a minority; copy of Agreement dated the 5th day of February, 1898, and made between the Company of the first part, E. M. Underdown, as transferor, of the second part, and Messrs. J. Henry Schröder & Co. of the third part, in which the above-mentioned Contract of 30th October last, as well as other matters, are set out, can, together with the Memorandum and Articles of Association of the Company, be seen at the Offices of the Solicitors, 57½, Old Broad Street, London, E.C.

Applications for quotations on the Stock Exchange will be made in due course.

Prospectuses and Forms of Application and for Conversion may be obtained at the Offices of Messrs. Henry Schroder & Co., No. 145, Leadenhall Street, E.C., from Messrs. W. Greenwell & Co., No. 2 Finch Lane, E.C., and from Messrs. Jourdan & Pawle, No. 1, Cushion Court, E.C.

London, 11th February, 1898.

Notice to Subscribers.

Complaints are continually reaching us that the INVESTORS' REVIEW cannot be obtained at this and the other railway bookstall, that it does not reach Scotch and Irish cities till Monday, and that it is not delivered in the City till Saturday morning.

We publish on Friday in time for the REVIEW to be at all Metropolitan bookstalls by at latest 4 p.m., and we believe that it is there then, having no doubt that Messrs. W. H. Smith & Son do their best, but they have such a mass of papers to handle every day that a fresh one may well look almost like a personal enemy and be kept in short supply unless the reading public shows unmistakably that it is wanted. A little perseverance, therefore, in asking for the INVESTORS' REVIEW is all that should be required to remedy this defect.

All London newsagents can be in a position to distribute the paper on Friday afternoon if they please, and here also the only remedy is for subscribers to insist upon having it as soon as published. Arrangements have been made that all our direct City subscribers shall have their copies before 4 p.m. on Friday. As for the provinces, we can only say that the paper is delivered to the forwarding agents in ample time to be in every English and Scotch town, and in Dublin and Belfast, likewise, early on Saturday morning. Those despatched by post from this office can be delivered by the first London mail on Saturday in every part of the United Kingdom.

Cheques and Postal Orders should be made payable to CLEMENT WILSON.

The INVESTORS' REVIEW can be obtained in Paris of Messrs. BOYVEAU ET CHEVILLET, 22, Rue de la Banque.

ADVERTISEMENTS.

All Advertisements are received subject to approval, and should be sent in not later than 5 p.m. on Thursdays.

For tariff and particulars of positions open apply to the Advertisement Manager, Norfolk House, Norfolk-street, W.C.

THE STOCK EXCHANGE.—NOTICE.

NO MEMBER OF THE STOCK EXCHANGE is ALLOWED to ADVERTISE for business purposes, or to issue circulars to persons other than his own principals.

Persons who advertise as Brokers or Share Dealers are not Members of The Stock Exchange, or under the control of the Committee.

A List of Members of The Stock Exchange who are Stock and Share Brokers may be seen at the Bartholomew-lane entrance of the Bank of England, or obtained on application to

EDWARD SATTERTHWAITE,
Secretary to the Committee of the Stock Exchange.

Committee Room, The Stock Exchange, London, E.C.

The Investors' Review.

The Week's Money Market.

The scarcity of floating balances in the market has been fully disclosed in the past seven days. There was little in the way of "calls" or issues to disturb the equilibrium, and the amounts falling due to be repaid to the Bank of England were only moderate; yet the arrangements in connection with the distribution of the Railway dividends and the settlement of a moderate-sized Stock Exchange account, were quite sufficient to create a keen demand for short loans. Probably all the money repaid to the Bank, and a little more besides, had to be borrowed, with the consequence that day to day loans are quoted 2¾ to 3 per cent., as compared with 2¼ to 2½ per cent. a week ago. Seven-day market loans have also risen from 2½ per cent. to 2¾ per cent.

This greater demand for, or greater scarcity of money has placed the bill market at rather a disadvantage, and discounts have not moved up in consonance, and bills have to be discounted at rates that are often below those paid for money. There has, however, been a mild upward movement here, for sixty day and three months' bills are both quoted 2 1/16 to 2⅞ per cent., as against 2⅞ per cent. a week ago. It is difficult, however, to establish an advance, as it is felt that the tightness of money is in a great measure due to the high total of the Public Deposits, which now stand at 15½ millions. An average total for these deposits at this time of year is about nine to ten millions, so that there is the prospect that some of this money may be released when least expected. The failure of the Chinese Loan proposals has taken away another motive for caution, but we have reason to believe that if Japan only receives 2½ millions next May, a loan for that country will be imminent. The Paris exchange has moved steadily in our favour throughout the week and is now about par, but it is a temporary change due to Stock Exchange commitments. On the other hand, the Russian rate has fallen ·05 to 93·90, but the price of gold is dull at about 77s. 10¾d. per ounce.

The Stock Exchange Settlement showed a somewhat heavier account, and loans for the fortnight were quoted hard at 3½ per cent., while those who borrowed after the first day had to pay 3¾ per cent. A small issue of Bournemouth 3 per cent. stock received fair attention, and the £33,382 offered was applied for more than three times over. Tenders at £102 os. 6d., or £1 os. 6d. above the minimum, received in full. The East Indian Railway Loan was arranged upon the terms mentioned last week, original subscribers having the right to take the modified terms—a very fair arrangement.

Little has to be said this week about the figures of the Bank return. It is still the familiar story of taxes eating into market balances, and the market, therefore, forced to lean upon the Bank. "Public" deposits have increased £1,049,000 within the week, and "other" securities are up £873,000. The market did not borrow all the tax-collectors took from it, because £471,000 in coin and notes came in from circulation, raising the banking reserve to that extent—it is now £23,246,000—and adding £283,000 to the "other" deposits. But the market is poor, and promises to remain poor these six weeks to come.

SILVER.

There has been little change on the week in this market. For a time the price of bars for immediate shipment was pushed up to 26¼d. per oz., but their selling at once became prominent, and the quotation dropped to 26 1/16d. The two-months' forward price has moved in unison at a ¼d. below that for "spot." Better applications were received for the India Council drafts on Wednesday, if the total demanded is solely taken into account, for the amount offered was nearly covered twice, but many of the applications were

at rates that could not be entertained, and the Council did not quite sell its complement. Rupee paper has been quieter, but the opening of a "bull" campaign by M. Ottomar Haupt caused the price to recover to 63¼, after having been 63⅜. Indian exchanges have improved 1/16d. to 3/32d. on the week, as the Money Markets there are growing tighter once again. Chinese rates, however, keep dull.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7 and 8 Vict., cap. 32, for the Week ending on Wednesday, February 9, 1898.

Stock Market Notes and Comments.

We have had a settlement on the Stock Exchange this week and, as usual now, it leaves things much where they were. A certain number of people have lent money and a larger number have borrowed it, and neither lenders nor borrowers have made very much by the operation. At least intermediate lenders have not. Banks, of course, continue to do very well, and the men who take risks on mine shares, getting their 7 per cent. to 10 per cent. or 12 per cent. for their money, are also becoming richer, and, as long as they feel no anxiety about the fate of their capital can continue to possess comfortable minds. But to the general body of those who gamble or take risks on the Stock Exchange times are not propitious. The "House" has been making money in American securities, but, at the same time, its commitments therein have been rapidly on the increase. Notwithstanding all that the financial press here and in America pour forth about "the unprecedented prosperity," which has arrived for all American Railroads, the more staid section of the British public refuses to be moved, or is moved only to sell. Ask any old-fashioned investment broker, and he will answer that his clients have taken no share in producing the recent advance in United States and Canadian Railways. If they have done anything at all it has been to realise previous holdings. This being so, the middleman, or financier, and the Stock Exchange itself, together with an increasing number of those who take moderate risks by joining in current market movements, are alone responsible for the advance in prices. Consequently the "account" in "American rails" to be settled this week proves to be larger than previous accounts and required more money to carry it.

Judging by previous experience this is a good sign for the future. That is to say, markets are almost certain to go higher in order to enable those now "in" to sell out. The movement in both United States and Canadian securities is thus, in our opinion, far from being exhausted. We are told that the Canadian Pacific Railroad Company has earned about $5\frac{1}{2}$ per cent. on its own common stock for the past year, and will pay a 4 per cent. dividend. The traffic receipts of the Northern Pacific Company are increasing at such a pace that dividends appear to be in sight on the common stock of that company likewise, even should nothing be done in the way of selling its lands, which extend to an area about as great as that of all England. Elsewhere we have traffic receipts improving, even the anthracite coal properties appear to be doing rather better in spite of the handicap placed upon them by the artificial restrictions under which they carry on business. This being the view, we think it a pity that old holders of any of these securities should part with them just yet. In dealing with market chances the present is not the time to take the intrinsic merits of these properties into consideration. It may be quite true, and probably is, that in four or five years from now another crop of bankruptcies and reorganizations, revelations of huge floating debts, of lines allowed to run down in order to keep up appearances by paying dividends not earned, and so forth will be upon us, but it would be very foolish to sell stocks at the existing stage of the rise merely on this distant probability. The immediate future is favourable all over the American continent, and it does not seem to us that the forces behind the markets and operating for higher prices are in danger of being exhausted for another six months at the very least.

In other sections of the Stock Exchange the position does not seem to us quite so favourable. It is a very significant fact that Liverpool and Leicester, let alone the East Indian Railway Company, should have been unable to place their loans at the very fine rates of interest offered. Market influences were doubtless at work to spoil the subscriptions to some of these issues, but after all these have been weighed and allowed for we fear it must be concluded that the true cause of failure lay in the higher rates for money now current. Credit is a most sensitive thing. There can be no doubt at all that, intrinsically, these three borrowers are just as able to fulfil their engagements now as they were when money in the Market was floating about at 1 per cent. But money is now scarce at $2\frac{1}{2}$ to $3\frac{1}{2}$ per cent., and therefore loans which would have been snapped up when credit was "cheap" are left alone when it becomes moderately dear. Does not this fact prove that it is not the intrinsic quality of any security which determines the price at which it can be sold, but the condition of the floating credit in the money market. And this in its turn indicates to us that the true standard of the ability of any borrower to raise money is to be found not in the borrower's position but in the facility buyers of a security find for pawning it. Investors pure and simple, satisfied with a $2\frac{1}{2}$ per cent. return upon their money, should be just as ready to buy Liverpool or Leicester stock, offered to them under par, when money in the open market is $2\frac{1}{2}$ per cent. or more, as when it is $1\frac{1}{2}$ per cent. or less. They want permanent security with moderate income, but they form a very small class. The larger proportion even of investors desire to increase their incomes by holding more stock than they can pay for, and they can only hold this stock at profit to themselves when there is a margin between what they give for the money borrowed to carry it with and what the investment yields. Wipe out this margin and the motive for buying is immediately gone. Syndicates above all are paralysed. Perhaps those Colonies of ours, who are so continually coming to us for money, will take note of this aspect of the question and plume themselves less upon the excellent position of their "credit" in London. Were the Bank of England rate 5 per cent. there is not one of them that could borrow a penny at anything like the rates prolonged cheap money here has accustomed them to.

This consideration should not be left out of sight either by that wide-spread community which has been putting money of its own, and of Banks, into Home Railway ordinary stocks for the last two or three years. Not only ought these people to be warned by the rise in money rates, but also by the decline in dividends upon the stocks they hold. Surely both circumstances combined should make everyone with money to invest hold back from these stocks at present. What profit can there be in purchasing any Home Railway stock, even the best, at prices which yield the buyer very little more than 3 per cent. to $3\frac{1}{4}$ per cent. now, and which may in a year or two return very much less? Expenses are increasing rapidly upon our Home Railways, especially upon those whose stocks are called "heavy," namely the North-Eastern, the North-Western, the Great Western, and the Midland, as will be seen from the analysis of the companies' reports in this and previous numbers of the REVIEW. The increased expenditure has generally swept away nearly the whole of the increase of the revenue, and in some instances even more than that increase. A tendency is thus revealed which is not nearly at an end, and the fact is that two main influences are at work in this direction. One is the greater restrictions put upon the companies as to the hours of labour, coupled with the necessity for advancing wages; the other is the

compulsion of circumstances which is driving the companies to carry on their business at a lower scale of charges.

This is an old story to us, and we are not going to enlarge upon it here, but there can be no question at all that railway freights must tend downwards and fall to a very considerably lower plane if we are going to revive our export trade. No inland manufacturer can hope to compete successfully against the productions of Germany, for example, which are carried to the sea, and often over the sea, at much lower charges than English railways habitually levy. In spite of themselves, these railways must grant rebates to allow them to meet the competition. A market committed to extravagant prices for we may say, all our Home Railway stocks, cannot be expected to pay much attention to considerations like these, but the investing public should do so, and above all that class of public which invests speculatively. We can see no good foundation on which to build higher prices for the great bulk of our railway ordinary stocks just now. On the contrary it appears to us that they are much more likely in the near future to fall back than to advance. We are told, of course, that there is "really no stock in the market"; that it is all held by investors; and this is from the jobber's point of view quite true; but how much stock have these so-called investors pledged with their bankers and what interest are they paying for the money they have borrowed? We cannot answer the question and only throw it out to be meditated over.

It is quite possible, now that the loan to China has been, for a time at any rate, lifted off the Market, that we shall see a renewed attempt made to force prices up, and were the Government in a position to buy Consols to a large amount the rise in them which would be the consequence of this buying could not fail to stimulate prices for all classes of good securities. We hardly think, however, that the Government can do much in this way beyond its usual Sinking Fund purchases. Therefore the market promises to lie much where it is, with small gambles going on in odd corners, such as the one in progress this week in Russian Petroleum Oil shares and in Welsbach stock. A general movement outside the American market does not appear probable. There is not enough impulse from the outside public. If speculation breaks out at one point, that point appears to exhaust the entire energy of the speculating community. Look how dead the "Kaffir Circus" has been since American Railways have become the fashion. No amount of puffing, or of fine returns from crushings, &c., stimulates it in the very least. Now and again financiers come in and bid for a few shares, causing prices to go up a little, but there is no echo to their bidding, and when they leave off, carrying away perhaps a few thousand more shares to lock up in their strong boxes, prices sagg back again, and the market is as dormant as before. So it will go on until something happens to, in colloquial language, skake out the holders at high prices, by whom most divisions of the Stock Exchange are now bolstered up. And something will happen soon in the South African market, we believe. The upset looks like beginning in Paris, so please, good public, stand back and look on.

The Week's Stock Markets.

The approach of the Settlement, which began on Tuesday, had the usual effect on markets, and business has been on a small scale. All the Continental Bourses have exhibited a feeling of uneasiness at the present aspect of the Cretan question, and the abandonment of the Chinese loan has also helped to weaken prices. United States Railroad shares have again been the one really active market, and although a good deal of profit taking has occurred, prices generally mark a substantial rise on the week in this department. Consols declined at one time to 112 5/16, and then rallied in spite of the firmer tendency displayed by the money market. Indian Government loans have weakened, but there has been rather more business in Colonial Government issues. Bank of England stock, after establishing a record price, has re-acted somewhat, and there is a fall of 2½ in Bank of Ireland stock. Home Corporation issues have hardly moved, and the Leicester issue fiasco passed almost unnoticed.

The Home Railway Market was flat for the first half of the week, and inclined to brighten up in the latter half. Prices went all to pieces when the Midland dividend was announced as ½ per cent. worse than for 1896, that is, 6½ against 7 per cent., although curiously enough the price least affected at the time was Midland deferred. Then a decided "slump" occurred in Great Northern stocks, owing to the paragraph in the report relating to fresh capital powers. The North Western dividend of 7¾ per cent. (making 7⅞ per cent. for the whole year as comapred with 7¼ per cent. for 1896) was received with equanimity by the market, the way having been paved for the appearance of a lower distribution by previous announcements of a disappointing character. Prices became firmer when goods traffic returns were posted, and the account disclosed a scarcity of stock. On London and North Western there was a "back" of ¼ per cent. paid. South Eastern deferred went to nearly "even," but on Brighton deferred the rate rose to ½ per cent., and on Great Western ¼ to ⅜ was charged. Great Eastern was continued at about 1/16, the stock being still scarce for delivery. On balance the principal movements in the upward direction have been in South Eastern, South Western, and Chatham issues, while on the other hand the Scottish section has been rather dull, and Great Northern deferred has only partly recovered the earlier fall.

United States Railroad shares have again been very active, and substantial rises are apparent in several of the leading company's issues. The Erie Company has definitely concluded arrangements for the purchase of the New York Susquehanna and Western Road on advantageous terms, and it is reported that they will shortly conclude the sale of a block of first preferred stock to pay for the Susquehanna stock acquired. The President of the New York Ontario Road says that the whole of the outstanding 5 per cent. shares will be refunded on June 1 at 105 into 4 per cents., thereby affecting a saving of about $40,000 per annum. Pennsylvania shares have also been in renewed request on a proposal to issue 3 per cent. bonds to retire existing issues.

The Northern Pacific Company is negotiating a sale of lands which will enable them to pay off the whole

of the outstanding "Firsts." As regards continuation rates, 4 to 5 per cent. was generally paid, but Chicago and Milwaukee was scarce for delivery and the rate was not more than 3½ per cent. Later advices from New York and lower quotations caused a set-back on this side, in several instances, and Wall-street operators have been getting nervous over the renewed discussion of foreign politics in Congress.

A considerable fall occurred in Canadian railway stocks towards the close of last week, on rumours from Montreal of a disagreement between the Canadian Pacific and Grand Trunk lines on a question of rate cutting. Prices, however, have since recovered, and it is now stated that amicable terms have been agreed upon. Contango rates on Grand Trunk first and second preferences ruled at about ⅛ per cent., and on the guaranteed at ⅛ to 3/16 per cent., or rather heavier than at the last account. Foreign Government bonds, with one or two exceptions, are lower on the week. Chinese issues were, of course, adversely affected by the failure of the proposed loan. Spanish "fours" have been depressed by a rapid rise in the exchange, coupled with alarmist telegrams from Cuba, although President McKinley professes to regard the position of affairs between Spain and the United States as quite satisfactory. Italian rente hardened up at one time, but the price gave way under the influence of a heavier contango. There has been a good deal of buying of Egyptian securities, and Turkish groups and Greek bonds are firmer in view of the new loan guaranteed by the three great Powers. It is reported that negotiations are pending for the refunding of the whole of the Gold Debt of the Mexican Government. The present debt amounts to $100,000,000, bears interest at the rate of 6 per cent., and is redeemable in July. The proposal is to place it on a 4½ per cent. basis. Among South American descriptions Brazilian bonds have hardened up slightly, in spite of a weaker exchange, but Argentine stocks of the Cedulas have exhibited a dull tendency, although the gold premium has again moved in favour of holders.

Chilian bonds drooped when it was announced that the Government had climbed down and accepted the proposals made by Peru for the settlement of the question relating to the provinces of Arica and Tacna now held by Chile.

Continuation rates ranged from 3 to 4 per cent., or practically the same as those ruling at the last account, but Egyptian, Italian, and Portuguese were continued on slightly heavier terms.

Foreign Railways have attracted very little attention, and rises and falls are about evenly balanced. San Paulo shares have recovered their recent fall, and the London and Brazilian Bank announces that it has decided not to proceed for the present with the issue of debentures of the Mogyana Company for the purpose of the extension, which the San Paulo Company objected to. Mexican Railway stocks have hardly moved.

In the Miscellaneous market the principal activity has again centred in Welsbach Gas stocks, and after several heavy falls on successive days a move in the upward direction occurred. A feature of the week is a big rise in General Hydraulic Power, the dividend just announced being 1¼ per cent. better than a year ago, but a proposed fresh issue of capital has, no doubt, added a considerable value to the old stock in the shape of "rights." Among Brewery companies the interim dividend of 14 per cent. on Guinness ordinary, against 12 per cent. last year, is responsible for an advance of twenty points in the price. The Allsopp dividend is about due, and as is usually the case just before the declaration, the market is a very sensitive one, and the price has jumped about a good deal. Crystal Palace pebentures have been enquired for, but holders seem inclined to keep what they have got, and wait the course of events. Some mysterious selling of Spiers & Pond shares has been going on, and among gas stocks Gas Light "A" has again been pressed for sale, although a slightly firmer tone is apparent towards the close. Holders of British Electric Traction shares were a little disgusted when they found that the new issue of preference shares was being offered to the public at 25 per cent. premium, and nothing was said about a priorallotment being made to existing shareholders.

Mining and Finance Companies.

The South African market has been idle with no very decided tendency, and a general absence of business. The account was easily arranged, rates being quoted about as usual, or 6 to 10 per cent. as a general rule. Chartered shares were unaffected by the resignations of the Duke of Fife and Lord Farquhar from the board; in fact, the price hardened up slightly afterwards. In De Beers, which have been taken up on Paris account, the continuation rate was only 3 per cent., but the price has, nevertheless, weakened. Among Western Australian ventures there has been no business to speak of, Lady Shenton shares being about the only ones much mentioned. Copper shares have not maintained last

week's rise, but Indians have met with a fair amount of support, the monthly returns being up to expectations.

Home Railway stocks finish up the week with a steady tone, especially for Brighton deferred, Metropolitan, and Chatham issues. Canadian Pacific shares closed dull, but Grand Trunk stocks, after several violent fluctuations, finally left off well above last week's level. United States Railroad shares were rather ragged, but closed generally above the worst. Foreign government bonds, apart from a set-back at the last in Brazilian issues, were quiet but steady.

The Produce Markets.

GRAIN.

Business at Mark-lane has been quiet throughout the week, though firm, yet sales, on the whole, were limited. White was quoted on Wednesday at 36s. to 40s., and red, 34s. to 38s. Foreign descriptions, as a rule, were held for full current values, but buyers, on the other hand, were far from eager for business, only moderate sales resulting. Californian was quoted 38s. 9d. ex store; and Walla-Walla, 38s. 6d.; Manitoba, 40s. to 40s. 9d. ex ship. The demand for flour has been generally poor and with more liberal arrivals late values are with some difficulty upheld. Town whites, 34s.; and households, 31s.; whilst country brands vary from 26s. to 31s. according to grade; American patents, 30s. to 32s.; and Bakers, 27s. to 28s.; Hungarian, 38s. to 40s.; French 31. Barley generally dull, and actual sales were on a small scale, but prices were well maintained. Grinding quoted 17s. 3d. to 17s. 6d. landed. Oats were in steady request at about late values. American mixed were quoted 15s. 7½d. ex ship. Maize did not move very actively, but a steady tone prevailed. Beans and peas remain firmly held. The cargo section for wheat ruled quiet, but holders required previous prices for all descriptions. Prompt Californian offered at 36s. 9d., whilst for afloat 37s. to 38s. 6d. is asked. Walla-Walla, prompt shipment, held for 35s. 3d. to 35s. 9d., and afloat from 35s. 9d. to 37s. There has been some fluctuation in the cargo market, but, as a rule, business has been quiet, with no change in rates. For some days sellers held back, but on Wednesday they were more disposed to meet buyers, who, however, evinced considerable indifference. The only sale reported was a steamer of 1,750 tons, Rosario-Santa Fé, February, which changed hands at about 35s. 4½d. The Eddystone, No. 2 red winter, from New Orleans, 15,000 qr., arrived at Falmouth, is offered at 37s. Californian, September, is obtainable at 38s. 6d., and December at 37s. 3d, and prompt shipment at 36s. 6d. to 36s. 9d. Oregon is offered at 37s. Walla-Walla, November, at 36s. 9d. to 37s., and prompt at 35s. 6d. Maize held at 3d. advance, but buyers do not respond. Wheat options ¾d. to ⅞d. up. Maize unchanged to ¼d. dearer. Contracts registered—Wheat, 32,800 centals; maize, 14,400. Barley quiet and unchanged. Oats quiet, with prices favouring buyers. In the Liverpool spot parcels have been firm throughout the week, with a moderate business. Red American futures opened at ½d. per cental advance and, after weakening slightly, strengthened on good buying, together with light offerings. Later, the market was inactive, but near the close it became firmer, finishing steady at the highest of the day, ⅝d. to 1d. per cental dearer. Sales, 350,000 centals.

Official Closing Values (100 lb. deliveries—February 9).

	March.	May.	July.	Sept.
Red American Wheat	7·8⅞	7·4⅞	7·1⅝	6·6⅝

In New York spot parcels have been firm throughout the week, and prices well maintained. In futures there has been considerable fluctuation, with a rather downward tendency. Wheat opened on Wednesday ⅛ c. higher for May with a steady tone, and with firmer cables from Liverpool further improved. Local "bears" were active buyers to cover during the first hour, with something of a squeeze developing on March delivery. A reaction followed on a "bear" raid, based on large North-Western receipts and private cables from Argentine indicating an exportable surplus thence of 37,000,000 bushels, against previous highest pointers of 35,000,000, the cable further mentioning that the weather had much improved and that offerings were increasing. In the afternoon values rallied well, partly owing to foreign buying orders and on reports of a good export business again in progress at outports, the sales being estimated at 25 boatloads. Near the close the market again broke on renewed "bear" pressure, and the final tone was easy, with near positions ⅜ c. better, May unchanged, and July ¼ c. lower. On the kerb a further fall of ⅛ c. occurred.

COTTON.

There has been more activity in the spot market, and prices have been firmly maintained throughout the week. On Tuesday there was a rise of 1/16d. on American, at which rate a good business was done. Thus late news maintained on Wednesday with a still larger business. Brazilian and Surats have continued dull at late rates. Egyptian have been in active demand, and quotations are raised 1/16d. (F. G. F. Brown, 4¼d.). Futures opened unchanged, but, with little offering, improved 1 point during early trading. This was subsequently lost and regained several times on active trading, and during the last half-hour American buying orders lent support, the market closing steady at partially ½ point advance on the day. In New York the market has been quiet but firm, prices going rapidly upwards for the first few days; but on Wednesday the opening was only one point higher, though there was a further advance on shorts cornering, encouraging cables, strong reports from southern spot markets, prediction of decreased movement, more favourable Fall River accounts, and better outlook in dry, goods district. Market closed firm, 13 to 17 points up. Spot quiet, 1/16c. dearer. Middling upland, 6¼c. Sales, 164,200 bales.

New York Closing Values.

Feb. 9 ..	6¼	6·01	6·04	6·08	6·12	6·15	6·18	6·21	6·20	6·21	6·22

WOOL.

The tone of the market continues fairly firm, but the business done is not large. The arrivals to date for the second series of sales (commencing March 15) include:—New South Wales, 54,414 bales; Queensland, 5,093; Victoria, 31,937; South Australia, 876; West Australia, 438; New Zealand, 6,182; Cape and Natal, 15,001. Total, 113,941 bales, of which about 35,000 (24,000 Australasian and 11,000 Cape) have been forwarded direct to manufacturing centres. In Bradford business is confined to actual requirements, while in Leeds the market is reported as about an average, and in Leicester the tone is described as strong and confident, with a regular and healthy turnover, in all the leading description of both home and colonial produce at full quotations.

METALS AND COAL.

Copper has been firm during the week, though on Wednesday the opening was rather easier, £49 2s. 6d. being accepted for Monday, and then £49 1s. 3d. for cash. There were, however, ready buyers of the latter at the price, and an improvement soon took place, the close of the first session showing an advance of 1s. 3d. over the best figures of previous day, cash making £49 3s. 9d. and three months £49 10s. Further dealings took place in cash and three months during the early afternoon without further change from these prices until £49 5s. was paid for the former. The price was not maintained, and the market closed with a bargain at £49 3s. 9d. and £49 6s. 3d., and 7s. 6d. combined for three months, which is about 1s. 3d. better on the day. Sales, 800 tons.

Settlement Prices.

Practically nothing can be said about pig-iron. Market dull and slow throughout the week, and little doing. At Glasgow on Wednesday a prominent "bear" sold fully 20,000 tons on Wednesday forenoon, but buying was as good as the selling. Nevertheless, prices closed weak at an all-round fall of 1½d. per ton. Sales, 40,000 tons.

Attendance at the London Coal Exchange is improving, and signs of increased animation have been shown, but they have not lead to any great accession of business, the seaborne market again disappointing. In the inland market there has been a slight revival of trade.

SUGAR.

The Market is still dull, especially in beetroot descriptions. Cane rather better, though still rather quiet. German 88 per cent. sold—February at 9s. 2d.; April at 9s. 3½d.; May at 9s. 4½d.; June 9s. 4¾d.; and July at 9s. 6½d. f.o.b. Hamburg. The market for home refined is quiet, and sales generally moderate. Pieces at previous prices. Crystals unaltered. Yellow sold at 11s. 7½d. to 11s. 10½d. Stoved goods quiet, and sales moderate. Tate's cubes at 14s. 9d.; second quality, 13s. 10½d.; No. 1 crushed, 13s.; No. 2 ditto, 12s. 6d.; granulated, 13s. 3d.; yellow crystallised, 12s.; No. 1 crystals (in Liverpool), 13s. 1½d.; No. 2 ditto, 12s. 9d.; Standard Liverpool granulated, 12s. 6d.; Lyle's No. 1 granulated, 12s. 9d.; No. 2 ditto, 12s.; No. 1 crystals, 12s. 9d.; No. 3 ditto 12s.; A white, 12s. 6d.; B, 11s. 9d.; O and P crystals, 12s.

TEA AND COFFEE.

Coffee generally quiet, though good qualities commanded full rates. Tuesday's auctions comprised 3,326 bags, about half being East India, and all good qualities sold with good competition at firm prices. Wednesday's auctions comprised 1,561 packages, and all good to fine qualities, especially East India, sold with brisk competition at very full prices; while common descriptions continue extremely slow. East India, bold dull grey to fine bright deep blue, 101s. to 111s. 6d.; low to fine middling, 79s. 6d. to 103s.; smalls, 58s. to 74s.; peaberry, 97s. to 125s. Jamaica, low to good middling bright grey, 70s. 6d. to 88s. 6d.

In tea there has been practically no change during the week. At auction on Tuesday 28,000 packages Ceylon sold; and all grades with the exception of leaf for price marked a decline. Quality generally continues to show deterioration. Terminals slow and unchanged. 5,800 packages, Indian, sold on Wednesday with a good demand at steady prices. Terminals quiet. Good common black Congou: February, 4¼d.; March, 4⅜d.; April, 4⅜d. Indian—Type 1: February, 6⅛d.; March, 7d.; April, 7⅛d. Indian—Type 2: February, 6 3/16d.; March, 6¼d.; April, 6⅜d.; May, 6⅜d. Ceylon: February, 7⅜d.

HEMP AND JUTE.

Hemp dull throughout the week. Baltic still neglected, though sellers of spot are easier. For arrival the tone is firm. But buyers hold off. Manila, F. C., near, £18, value; 250 bales May-July, sailer, sold at £19. Jute dull, only beginning to show a little firmness on Wednesday. First marks, January-March steamer, London, £9 17s. 6d., sellers, with buyers at £9 15s. "Entries" at Calcutta for first week of February, 112,000 bales, against 42,000 in the same period last year; total to 7th inst., 2,876,000, against 2,241,000 a year ago, being 96,000 bales more than total of previous season.

Dividends Announced.

Browne & Eagle, Limited. — Further dividend on the ordinary shares of 10s., making 8 per cent. for the year, free of income tax.

South London Dairies.—Interim dividend of 7½d. per £1 share for the half-year ended January 1 on the ordinary shares.

New British Rubber.—Warrants posted for the 6 per cent. dividend on the preference shares.

W. T. Henley's Telegraph Works.—Dividend at the rate of 12 per cent. per annum on the ordinary shares, including the interim of 3 per cent. paid in September.

Queen Hotel, Harrogate.—Usual dividend of 10 per cent. for the year; £1,000 placed to reserve.

Charles Clifford & Son.—Interim at the rate of 6 per cent. per annum on the preference and 10 per cent. per annum on the ordinary shares.

H. J. Francis & Company.—Further dividend of 7½ per cent., making, with the interim dividend, 10 per cent. for the year ended December 31 last.

Holt Brewery Company, Limited.—Dividends equal to 8 per cent. are declared on the ordinary shares, £15,000 placed to reserve, and £5,457 carried forward.

Patent Victoria Stone.—Five per cent. for the half-year ended December 31, which, with the interim paid in July last, will make 10 per cent. for 1897, £5,257 to be carried forward.

Grantham Waterworks.—Five per cent. for the half-year ended December 31.

Grantham Gas.—Five per cent. on the old shares and 3½ per cent. on the new shares for the half-year ended December 31.

Baron Cigarette Machine, Limited.—7½ per cent. dividend has been declared.

Lord George Sanger.—Warrants for an interim dividend at the rate of 10 per cent. per annum will be posted on the 14th. The dividend will be calculated from October 23, 1897, to December 31, 1897.

Westminster Palace Hotel.—Interim dividend of 5s. per share on account of the year ending June 30 next.

Arthur Guinness, Son, & Co.—Interim dividend at the rate of 14 per cent. per annum on the ordinary stock for the six months ended December 31.

Waihi Gold Mining Company, Limited.—Dividend of 2s. per share on the old shares, and at the rate of 5 per cent. on the new shares, payable March 1.

Salmon & Gluckstein.—Dividend proposed at the rate of 7½ per cent. per annum on the full capital of the company, £8,096 to be placed to depreciation, £1,365 to preliminary expenses not entirely extinguished, and £10,166 to be carried forward.

Edison and Swan United Electric Light Company, Limited —Dividend on account of the current year at the rate of 5 per cent. per annum, less tax, on the "A" shares of the company, in respect of the half-year ended December 31, 1897. This will work out at 1s. 6d. per share on the partly-paid £5 shares (£3 paid), and 2s. 6d. per share on the fully-paid £5 shares, less tax.

Waring and Gillow, Limited.—Dividend of 10 per cent. on the ordinary shares for the past year and the transfer of £10,000 to reserve fund.

Telegraph Construction and Maintenance Company, Limited.—Dividend of 10 per cent. (£1 4s. per share) in addition to the 5 per cent. already paid, making 15 per cent. for the year 1897.

Muntz's Metal Company.—Payment of a dividend out of the profits of the past year at the rate of 7½ per cent. per annum on the ordinary shares and 5 per cent. on the preference shares, carrying forward a balance of about £2,000.

Girls' Public Day School.—Dividend at the rate of 4 per cent., and £688 to be carried forward.

Stock Conversions and Investment Trust notifies that the balance over on its North-Western Railway deferred charge stock, to be carried forward to June 30 next, is equal to 2⅛ per cent., against 2⅜ a year ago, and that on its North-Eastern deferred charge stock 2⅜ per cent. against 2⅝.

Millwall Dock Company.—Dividend on the ordinary shares at the rate of £3 15s. per cent. per annum. Balance forward, £292.

Worcester Exploration and Gold Mining Company, Limited.—A dividend of 15 per cent., payable in South Africa on March 9, has been declared.

Marbeesa Iron Ore.—Further dividend of 2s. per share, making, with interim dividend paid, 10s. for year. £535 forward.

West Australian Market Trust.—Interim dividend at the rate of 15 per cent. per annum for six months ended January 30.

South London Tramways.—Dividend of 5s. per share is declared on the ordinary shares, making 8s. for the year, adding £1,000 to reserve fund, carrying forward £1,485.

BANKS.

British North America.—2½ per cent. (payable April 4), £10,000 to be placed to reserve and £3,726 carried forward.

INSURANCE.

Northern Accident.—Dividend of 8 per cent. as against 7 per cent. last year; £3,000 placed to reserve and £1,485 carried forward.

RAILWAYS.

Furness.—Dividend at the rate of 2 per cent. for the half-year ended December 31.

Midland.—Dividend at the rate of 2½ per cent. per annum on the preferred ordinary stock, and at the rate of 4 per cent. per annum on the deferred converted ordinary stock, being equal to 6½ per cent. on the former ordinary stock. Balance carried forward is £38,000.

London & North-Western.—Dividend at the rate of 7¾ per cent. per annum. The dividend for the half-year ended December 31, 1896, was at the rate of £8 per cent. per annum.

Maryport & Carlisle.—Dividend at the rate of 6½ per cent. per annum for the half-year ended December 31. For the corresponding period of 1896 the dividend was at the rate of 6 per cent. per annum.

Isle of Wight.—Dividends at the rate of 5 per cent. for the half-year on the deferred converted ordinary stock; balance of £1,844 to be carried forward.

Rhondda and Swansea Bay.—Payment recommended of usual dividend on the preference shares for the half-year at the rate of 5 per cent. £512 to be carried forward.

BREWERIES.

Emerald and Phœnix.—8s. per share on the preference shares for the half-year ended November 30.

Cannon.—8 per cent. for the half-year on the ordinary shares, making a total of 16 per cent. for the year, which absorbs £56,000. £3,000 added to reserve and £250 carried forward.

MINING RETURNS.

Consolidated Murchison.—Crushed 503 tons for 507 oz. gold.

Gibraltar Consolidated.—For January: 920 tons inclusive 280 tons low grade, 1,055 oz.; concentrates, 280 oz.; tailings, 103 oz.

Bayley's United Gold Mines.—For four weeks ended January 27: cyanide plant treated 869 tailings, yielding 1,015 oz. gold.

Big Blow.—Crushed 150 tons for 70 oz. gold.

Hall Mines, Limited, British Columbia.—Twenty-seven days, twelve hours' smelting:—5,675 tons of ore smelted, yielding 372 tons matte, containing (approximately) 157 tons copper, 109,070 oz. silver, 338 oz. gold.

Mount Usher.—Crushed 238 tons of ore, yielding 183 oz. gold.

Nine Reefs Company.—Result of the first clea up from stamps mill: 1,300 tons milled, amalgamation on plates yielded 121 oz. gold.

Robinson Gold Mines of W.A.—During January crushed 650 tons, yielding 439 oz., exclusive of concentrates and tailings.

Norseman.—For January 630 tons crushed yielding 444 oz. smelted gold.

Nundydroog.—4,620 tons of quartz produced 4,349 oz.; 800 tons of tailings, 106 oz.; and 3,232 tons of tailings (cyanide) produced 337 oz.

Queensland Menzies.—287 tons for 857 oz. A trial crushing of 17 tons from the south winze gives a return of 287 oz.

United Ivy Reef.—January output, 720 oz.; crushed, 1,100 tons.

Mount Malcolm.—470 tons crushed for 440 oz., exclusive of tailings.

Achilles Goldfields.—Twenty-two days' crushing: 700 tons, 393 oz.

Bonnie Dundee.—Crushed 179 tons from Victory Reef for 216 oz.

Brilliant.—3,150 tons of stone have been crushed for a yield of 2,800 oz.

Broken Hill Proprietary.—24,571 tons ore were treated for the four weeks ended February 3. The output from the refinery was 3,541 oz. gold (estimated), 387,792 oz. silver, 2,238 tons lead, and 65 tons antimonial lead (estimated); the copper matte contained 39 tons copper (estimated) and 34,584 oz. silver (estimated).

Burma Ruby Mines.—Result for January was 76,000 loads washed, producing rubies valued at Rs. 1,04,000.

Montana.—Output for January: gold, 2,340 oz.; silver, 7,600 oz.; from 6,700 tons of ore.

New Kleinfontein.—For last month: Tons crushed, 10,984; ounces recovered from mill, 3,921; tons treated by cyanide, 7,228; ounces recovered, 1,242.

Nigel Gold.—Last month's crushings yielded: Battery, 1,299 oz.; and cyanide, 1,532 oz.

Salisbury Gold.—Crushing for January yielded 2,400 oz.

Sheba Gold.—During January: 8,400 tons of ore crushed for 3,795 oz.; 3,360 tons of tailings, 1,387 oz.; 174 tons of concentrates, 1,218 oz. Total, 6,400 oz.

Mount Morgan.—Tons chlorinated, 12,166; gold returned, 14,191 oz.

Inverell Diamond Fields.—1,834 carats of diamonds, washed by hand from 147 loads. This gives an average of 12½ carats per load.

Glynn's Lydenburg.—For January—from mill: crushed, 1,290 tons; obtained, 453 oz. of fine gold; from cyanide: 840 tons; yield, 330 oz. of fine gold.

Lancaster Gold Mining Company.—For January: Crushed, 7,098 tons of ore, yielding 3,185 oz.

Worcester Exploration and Gold Mining Company.—Result for last month's crushing yielded 2,730 oz.

Angelo Gold Mines.—For January: Tons crushed, 6,998; ounces recovered from mill, 3,362; tons treated by cyanide, 5,659; ounces recovered, 2,501.

New Comet.—For January: Tons crushed, 5,311; ounces recovered from mill, 1,982; tons treated by cyanide, 4,396; ounces recovered, 1,249.

Barrett.—January: Gold, 770 oz. from 2,456 tons; estimated value, £2,600.

Coromandel Gold Mining Company of India.—100 tons of stone produced 885 oz. gold; 800 tons of tailings (cyanide) produced 76 oz. gold.

Cue 1 Gold Mine.—820 tons for 565 oz.

Henry Nourse.—For January, 8,750 tons for 4,917 oz. cyanide, 6,450 tons treated yielding 2,691 oz.

St. Agnes Gold Reefs.—Cleaned up 340 tons yielding 160 oz. gold.

Chiapas during January crushed 1,650 tons of ore, yielding 70 tons of concentrates. The stamp mill crushed 1,450 tons of tailings, yielding 174 oz. gold.

Ferreira Gold.—Results for January: Crushed, 10,400 tons; bar gold extracted, 7,914 oz.; concentrates, 240 tons; assay value of concentrates, 6 oz. fine gold per ton. Cyanide works: Bullion from tailings, 2,859 oz.

Grand Central crushed 5,100 tons, yielding bullion $32,400, and concentrates estimated to yield $14,000.

Jubilee Gold.—Last month's return: 2,390 oz., obtained from 5,852 tons crushed; tailings yielded 700 oz.

New Guadalcazar Quicksilver.—Production for the past month amounted to 9,100 lb.=121½ flasks.

Pigg's Peak Development.—Mill return for the month gives results of ore crushed 2,850 tons for 302 oz.; cyanided, 2,550 tons for 430 oz.; gross yield, 732 oz.

Premier Tati Monarch Reef Company.—Crushings for January: 1,810 tons of ore crushed, yield of gold 706 oz.

St. John del Rey Mining.—Gold produce for January, £13,375; yield per ton, 0·51 of an ounce troy.

Van Ryn.—For January: Tons milled, 11,542; number of ounces recovered, 2,725. Cyanide works: Number of tons treated, 8,400; ounces recovered, 1,464.

Violet Consolidated.—January: Tons crushed, 5,431; total yield, 954 oz.

Wemmer Gold.—Result during January: Mill crushed 6,466 tons, yielding 4,410 oz. Cyanide plant: 4,375 tons treated, yielding 956 oz.; and from concentrates, 157 tons caught, assaying 90 dwt. per ton. Total, 6,072 oz.

Balmoral Main Reef.—January production, 2,318 oz.

Consolidated Main Reef Mines and Estate.—3,500 tons crushed, including 1,300 from dump, produced 1,129 oz. Cyanide: 1,080 tons treated, producing 159 oz.

Crown Deep.—For January: Tons crushed, 22,082; yield in smelted gold from mill, 6,869 oz.; tons of sand and concentrates treated by cyanide works, 20,180 oz.; yield in smelted gold, 6,560 oz.

Rose Deep.—For January: Tons crushed, 14,706; yield in smelted gold from mill, 5,955 oz.; tons of sand and concentrates treated by cyanide, 12,352; yield, 3,711 oz.

Day Dawn Block and Wyndham Gold.—For the fortnight ended February 5: Tons crushed, 1,190, yielding 1,310 oz., including tailings. Have shipped 5,820 oz. of bullion.

De Lamar.—Return for January: Crushed, 4,100 tons; bullion produced in the mill, $36,180.

Durban-Roodepoort.—Results for January: Quartz milled, 10,290 tons for 4,910 oz., and tailings treated, 6,545 tons for 1,195 oz.; total, 6,105 oz.

Frank Smith Diamond.—2,100 loads washed, producing 86 carats.

George Goch Amalgamated Gold Mining Company.—January: 8,010 tons crushed, yielding 1,908 oz. gold, and 1,160 oz. from tailings.

Gold Reefs of West Africa.—Have crushed during January 180 tons of ore, which yielded about 315 oz. of gold.

Ginsberg.—January production, 2,475 oz.

Glencairn Main Reef.—Production for January, 6,749 oz.

Hannan's Reward.—Results for January: Lode crushed, 216 tons, yield, 43 oz.; also cement crushed, 256 tons, yield, 103 oz.

Jumpers.—Crushed, 11,500 tons; obtained from mill, 3,902 oz.; obtained from concentrates by cyanide, 505 oz.; obtained from tailings by cyanide, 1,000 oz.—total, 5,407 oz.

Klerksdorp Gold and Diamond.—Results of crushing for January, 875 oz. of gold of the estimated value of £2,525.

Leicester Consolidated Diamond.—From the mine, 1,925; floors, 5,200; loads washed producing 187 carats.

Lisbon-Berlyn.—For January: Ore mined, 2,150 tons; ore crushed, 2,100 tons; treated by cyanide, 1,900 tons; fine gold recovered, 767 oz.

Meyer and Charlton.—Result for January: Crushed 9,021 tons, producing 2,674 oz.; extracted from tailings, 1,236 oz.; total, 3,910 oz.

New Primrose.—Production for January, 9,137 oz.

New Spes Bona.—January production, 2,037 oz.

Regina (Canada) Gold Mine.—For January, 465 tons crushed, yielding 136 oz. gold.

Rietfontein A.—January production, 5,545 oz.

Roodepoort United Main Reef.—Result for January:—Crushed 7,056 tons, producing 3,201 oz.; cyanide, 1,222 oz.; total, 4,423 oz.

Simmer and Jack Proprietary Mines.—26,010 tons crushed yielded 10,163 oz. of gold.

Sulphide Corporation (Ashcroft's Process).—"Have shipped 104 tons of silver lead bullion, containing 5,500 oz. silver."

Treasury.—Output for January:—5,533 tons yielded 3,585 oz.

Van Ryn West Mining Company.—Tons milled, 8,710; ounces recovered, 3,130; cyanide works—tons treated, 6,720; ounces recovered, 1,333; total, 4,463 oz.

Witwatersrandt (Knight's).—Mill ran twenty-three days, crushing 14,600 tons, yielding 4,070 oz. gold; 9,690 tons cyanide tailings treated, yielding 1,145 oz. gold.

Crown Reef Gold Mines.—Crushed during January, 15,971 tons, yielding 7,919 oz. of gold. Obtained by cyanide 3,643 oz.

Village Main Reef.—40 stamps ran 26 days, crushed 5,370 tons, yielding 3,098 oz.

Princess Estate Gold Mining.—Result for January: crushed 5,025 tons, producing 1,905 oz. of gold. Extracted from tailings, 932 oz. Total, 2,837 oz. of gold. December yield, 2,679 oz.

West Rand Mines.—Mill ran 29 days, crushing 3,815 tons, yielding 1,076 oz. of gold. Cyanide treated 3,064 tons, yielding 313 oz.

Associated of Western Australia.—Treated at mill, 2,000 tons, yielding 2,108 oz. of smelted gold.

Millwall Dock	Cannon-street Hotel, 1 p.m.
North Metropolitan Railway and Canal	138, Leadenhall-street, noon.
South London Tramway	Winchester House, noon.

NOTICES.

The Right Hon. the Earl of Denbigh has been elected a director of the Equitable Life Assurance Society, in the place of Major-General C. A. Sim, deceased.

The Leicester loan has had much the same fate as the Liverpool one. The Corporation asked for tenders for £450,000 two and a half per cent. redeemable stock, the minimum price being 95 per cent. The tenders received only amounted to £125,158. The average price obtained was £95 4s. 5d. The remainder of the stock is now on sale at the minimum price, applications to be sent to the Town Clerk at Leicester.

Asked in the German Imperial Diet on Wednesday as to the state of the negociations with England as to a commercial Treaty, Herr von Bülow stated that at present he could only say that "the main lines of the proposals which we intend to address to England have been determined by consultations between the departments concerned. We have sent these proposals to London, and we are now awaiting the answer."

RAILWAY TRAFFIC RETURNS.

ALGECIRAS (GIBRALTAR) RAILWAY.—Traffic for week ended January 29, Ps. 18,600 ; increase, Ps. 2,335. Aggregate from July 1, Ps. 620,119 ; increase, Ps. 10,728.

WESTERN RAILWAY OF HAVANA.—Receipts for week ended February 5, £2,000 ; increase, £210. Aggregate from July 1, £55,405; increase, £5,873.

ROHILKUND AND KUMAON RAILWAY.—Traffic for eight days ended January 8, £5,906 ; decrease, £305.

SOUTHERN MAHRATTA RAILWAY.—Receipts for week ending January 15, Rs.99,278 ; decrease Rs.2,811.

PERUVIAN CORPORATION RAILWAYS.—Receipts for January, $276,325 ; increase $16,250.

MR. SUTHERST'S COMPANIES.

The action for libel brought by Mr. Sutherst, the whilom 'bus trike leader, against Mr. Hess of the *African Critic*, now the *Critic*, has terminated in a verdict for the defendant. The action is interesting from the light that it throws on the "gentle art of company promoting." Mr. Sutherst is a barrister, and in addition to that profession has carried on of recent years the business of a financier and company promoter. In that capacity he assisted in the promotion of a concern called "The African Contracts Corporation, Limited." This was registered in September, 1895. Hearing that a Mr. Regan had a property in Mashonaland for sale, said to be gold-bearing, he entered into a contract to buy it of him, together with some Transvaal property, for £40,000 in cash and shares, and paid him a deposit of £5,000. Mr. Sutherst then sold what he had bought to the syndicate for £10,000 in cash, and £20,000 in shares. In October, 1895, "Charterland Consolidated" was registered, and the syndicate sold those properties to them for £150,000. Favourable reports as to the estates had been received, but after the sale to the Charterland, on further reports coming, the shareholders' money was returned, and the company entered into liquidation. The Lord Chief Justice expressed surprise that the reports had not been verified before the shares had been offered to the shareholders; but as in this case the money was returned, our only comment must be that these shareholders were exceedingly lucky, and we wish that the same could be said of those who have placed money in other companies. One of the plaintiff's admissions in cross-examination is truly delightful—namely, "Of all his companies the 'Pulp' Company was the best of the lot, but it had not paid a dividend for five years." That is certainly not surprising if his companies are brought out in the way that the African Contracts Corporation and the Charterland Consolidated, according to the reports of the recent action, saw the light.

The average expenses of the war in Cuba, is estimated at 300,000,000 pesetas half-yearly.

The output of pig-iron in the United States during 1897 is stated at 9,652,000 tons.

It is stated from Paris that the French Government objects to take part in the Brussels Sugar Bounty Conference, unless it is intended to arrive at an International agreement with a view to suppressing the direct bounty on exports. M. Méline would not, however, be inclined to modify the internal trade regulations of France, and he is understood to be determined to reserve full liberty of action in regard to the maintenance of the law of July 29, 1884, and the bonus to manufacturers. This is not a very hopeful outlook for the Conference.

On account of the revolution in Nicaragua, the American warship "Alert" has landed troops at San Juan del Sur, which is held by the rebels, in order to protect the Consulate.

The export of cereals from Russia for the week ended the 5th inst. amounted to a total of 3,848,000 poods against 4,157,000 in the previous week.

The shareholders of the Banco del Commercio of Buenos Ayres are stated to have accepted the arrangements made with the London Bank of Mexico and South America. There is no amalgamation of the two concerns, it is said, only a sort of working agreement.
